American Railroad Journal.

Financial and Commercial Review.

THURSDAY EVENING, September 30, 1880.

Money on call is easy to get at 2@3 per cent; on time at 3 to 4½ per cent, and on prime mercantile paper at 4½@5½ per cent.

The offerings of Government bonds to the Treasury on Wednesday amounted to $3,569,350, of which $2,500,000 were purchased as follows: $173,200 6s, 1880, at 102.47; $1,786,000 6s, 1881, at 104.50@104.60; $540,800 5s, 1881, at 102.56@102.66.

The actual rates for prime bankers' sterling are 4 80½@4 81 and 4 83@¼. Cable transfers are 4 83½@¾. Prime commercial bills are 4.79@¼.

The Governors of the New York Stock Exchange have admitted to dealings at the board the following securities:

Peoria, Decatur and Evansville Railroad Company $750,000 first mortgage bonds, due September 1, 1920, secured by mortgage in the Evansville division of the company's road; $750,000 6 per cent income bonds— not accumulation issue upon the same division as the first mortgage above named. When the additional sixty miles of the Evansville Division are completed the funded debt of the company will be as follows: First mortgage 6 per cent bonds, line from Pekin to Mattoon, $1,287,000; First mortgage 6 per cent bonds, Evansville Division, $1,470,000; Income bonds, line from Pekin to Mattoon, $858,000: Income bonds, Evansville Division, $1,280,000.

Chicago and Eastern Illinois Railroad Company $1,000,000 income bonds bearing 7 per cent

interest, payable from earnings if sufficient, in any one year, but not accumulative, and secured by a second mortgage on 131 miles of railroad, subject to a first mortgage of $3,000,000. The company's railroad is what was known as the Illinois division of the old Chicago, Danville and Vincennes Railroad.

New Orleans, Mobile and Texas Railroad, Louisville and Nashville Railroad Company's $5,000,000 6 per cent bonds, principal and interest payable in gold, due January, 1930, and secured by a first mortgage on the N. O., M. and T. Railroad, debenture scrip. $3,000,000 due May 8, 1930, or after, and entitled to 6 per cent interest from the net earnings of the company in any one year after payment of interest on the foregoing named bonds of the Louisville and Nashville Company; $4,000,000 capital stock, divided in shares of $100 each. The road is 141 miles long—from Mobile to New Orleans—with a branch of six miles to Lake Ponchartrain.

The fifth installment of 10 per cent upon subscriptions for the extension of the Texas and Pacific Railway will be due and payable on October 1, at the office of Woerishoffer & Co., New York.

The Galveston, Harrisburg and San Antonio Railroad first mortgage 6 per cent bonds, amounting to $4,500,000, have just been placed upon the list at the Boston Stock Exchange.

State Bonds at the Board were steady, Railroad Bonds were stronger and higher, Government bonds declined, and, at the close, Railroad stocks were lower.

The closing quotations on Thursday were: American Union Telegraph, 60@60⅛; Am. Dist. Tel., 75¼@77; Atlantic and Pacific Telegraph, 40@41; Canada Southern, 58¾@59; Central of New Jersey 72¾@73; Central Pacific, 73¼@74; Chicago and Northwestern, 105@106⅛; do. pref., 122@123; Chicago, Burlington and Quincy, 134@134⅛; Chicago and Alton, 114@114½; do. pref., 125@130; Chicago, Milwaukee and St. Paul, 91@91¼; do. pref., 109@110¾; Chicago, Rock Island and Pacific, 118⅛@118¾; Chicago, St. Louis, and New Orleans, 37@38; Cleveland, Columbus, Cincinnati and Indianapolis, 70@70¾; Columbus, Chicago and Indiana Central, 18⅝@18¾; Delaware and Hudson Canal, 84@84¼; Delaware, Lackawanna and Western, 89⅛@89¼; Hannibal and St. Joseph, 39¼@39½; do., pref., 82¾@83; Illinois Central, 112¾@113¼; Lake Erie and Western, 33½@33¾; Lake Shore and Michigan Southern, 107⅛@108; Louisville and Nashville, 156@156¾; Morris and Essex, 110½@111½; Manhattan Elevated, 29⅛@30; Metropolitan Elevated, 89@90; Michigan Central, 95⅛@95¾; New York Elevated, 110@112; New York Central and Hudson River, 129¾@130; New York, Lake Erie and Western, 38⅞@39; New York, Ontario and Western, 22@22⅛; Northern Pacific, 28¾@29; do. pref., 53¼@53½; Ohio and Miss., 33⅞@34; do. pref., 73@76; Pacific Mail, 39⅜@39⅝; Philadelphia and Reading, 30⅜@30⅝; St. Louis and San Francisco, 31@33; do. pref., 43@44; do. 1st pref., 73⅛@74⅛; St. Louis, Iron Mountain and Southern, 50⅛@50⅝; Union Pacific, 88⅝@89¾; Western Union Telegraph, 98⅛@98⅝; Wabash, St. Louis and Pacific, 36¾@37; do. pref., 68⅜@68⅞.

The following quotations of sales of Railway and other securities, for the week, are in addition to those given elsewhere in our columns:

We shall publish in our next issue the table of Monthly Railroad Earnings.

The work of completing the extension of the New York and New England Railroad from Waterbury to Brewster's is being pushed forward, the work of laying the rails having been commenced. It is expected that the first of November or a few days after that date will witness its opening. The same contractors who are at work upon the extension to Brewster's also have the contract for the grading of the extension from Brewster's to the Hudson River, upon which they are now working. As the steel rails for this last extension were purchased some months since it is probable that we shall soon be able to chronicle the completion of the entire line from Boston to the Hudson.

The Stylographic Pen.

Of all labor saving devices for literary men, the stylographic pen seems to be the best. The writer has used one for one year almost constantly and would not be without it for a considerable sum. It writes ink, can be carried in the pocket, never needs sharpening and is practically indestructible. It does not leak, is easy to fill and is convenient and light. It does away with inking fingers, blotting paper and overturned inkstands and makes writing an easy and a pleasant task. The pen and many other devices for saving labor and time useful to every one who has reading, writing or office work to do may be purchased of the Readers and Writers Economy Co. which aims to afford readers and writers every assistance which all needed capital, every facility and the fullest co-operation of literary workers can secure. Its plan provides for branches in leading centers, and agencies to reach every literary worker, and desires the address of every reader and writer who wishes to accomplish the most possible with his time and strength. Explanations mailed free on application. Address: Economy Co. (P. O. 260,) Boston.

Shenandoah Valley Railroad.

The formal opening of the Shenandoah Valley Railroad took place on the 21st ult. This road is now in full operation from Hagerstown to Milford in Page County, Va. It is expected to connect with the Chesapeake and Ohio Railway at Waynesburg in December, and will thence go on to Lynchburg. At Hagerstown it unites with the Cumberland Valley Railroad, and thus with the main stem of the Pennsylvania Railroad. The new Shenandoah Valley Railroad is 76 miles long as already completed, and is designed to be eventually 143 miles in length. Thus there are two railroads now in operation up the Valley of Virginia from the Potomac that connect with the Baltimore and Ohio Railroad at Harper's Ferry, as well as this one running to Hagerstown and thence connecting with the Pennsylvania system. Referring to the above, the Philadelphia Press says that up to the present time Baltimore "has almost monopolized the vast exports in wheat, corn, flour and live stock which are produced by the industrious population inhabiting the valley. This city will be placed hereafter in active competition with Baltimore by the completion of the upper and northern half of the Shenandoah Valley Railroad."

A contract has been entered into securing the construction of the Gulf, Colorado and Santa Fe Railroad to Fort Worth, Texas. Assurances are also given that the Missouri, Kansas and Texas Road will be extended to that place, making it the railroad centre of Northern Texas. Three of the longest lines in the Southwest will form a junction there, and machine shops will be constructed. The city paid $75,000 to secure the road. The money was raised in three days.

It is expected that a dividend at the rate of one per cent per annum on the ordinary shares of the Great Western Railway Company of Canada will be paid out of the net earnings of the half year ending July 31, 1880. Only half this rate was paid last year, and none at all for many a year before.

Manufacturing Notes.

—The Westinghouse automatic brake has been applied to 3,277 engines and 13,502 cars, and the non-automatic to 2,472 engines and 8,812 cars.

—The Illinois Central Railroad Company has ordered the immediate construction of 100 freight cars of 20 tons capicaty, at its Weldon Shops.

—The Howe scale works at Rutland, Vermont, have 318 men on the pay roll, which now amounts to between $14,000 to $15,000 a month.

—The President of the Delaware, Lackawanna and Western Railroad has contracted for 30,000 tons of steel rails, presumably for the Buffalo extension of his road.

—Among the belts recently made by P. Jewell & Sons, of Hartford, Conn., for an Eastern Connecticut manufacturer, is one of 45 inches wide and 110 feet long. This required ninety bullocks' hides, and is one of the largest belts ever made.

The Michigan Central Railroad is putting on eight new sleeping cars, each 73 feet long, 18 feet longer than those hitherto in use. Each has twelve sections, a drawing room and a smoking room. The entire interior finish is mahogany.

—The Phœnix Iron Company are now using in their new mill at Phœnixville, Penn., pea coal and coal dust for generating gas for heating iron, which they find to work quite satisfactorily. These are the only works in the country where Anthracite coal has been used for this purpose.

—Riehle Bros. Proprietors of the Philadelphia Scale and Testing Machine Works, have lately received large orders from the Missouri Pacific Railroad, for Scales, also smaller order for scales for new elevator in New York Harbor, and new rolling mill adjoining Messrs. John Roach's ship yard, in South Chester.

The Chicago, Milwaukee and St. Paul Railway Company declared a semi-annual dividend of 3½ per cent on both the common and preferred stocks payable Oct. 15. The transfer books will close Sept. 30 and reopen Oct. 21.

The Delaware, Lackawanna and Western Railroad Co. have declared a dividend of 1½ per cent, payable October 20, 1880. This is the first dividend paid by this company since July, 1876, when 2½ per cent was paid.

The Oregon Railway and Navigation Co, have declared a quarterly dividend of 2 per cent, payable November 1, also a scrip dividend of 10 per cent, both payable to stockholders of record September 28.

The Dubuque and Sioux City Railroad Company have declared a dividend of 3 per cent, payable on the 15th of October. The last dividend was in June, 1880, when 3½ per cent was paid.

The Chicago, Rock Island and Pacific Railway Company has declared a quarterly dividend of One and three quarters per cent, payable Nov. 1.

The first sod on the Montreal and Champlain Junction Railway was turned recently amid great enthusiasm.

☞ The Miami Valley Narrow Gauge Railroad is to be built at once under the name of the Cincinnati Northern Railroad.

Railroad building is progressing with energy in Sonora.

General Grant on Railroads.

General Grant has written two letters to Senor M. Romero, a member of the Mexican cabinet and formerly the Mexican Minister at Washington, which have been published recently in the Mexican Journal, El Nacional. General Grant has had almost unparelleled opportunities for obtaining the views of prominent officials and men in all departments of business, of many countries, and what he says on Mexican and United States railway relations has great weight not only on account of his well attested practical judgment in such matters, but especially on account of his recent careful study of them during his travels. In his letter of April 13th he says:

"There is not the least doubt that if Mexico offers opportunities to capitalists to construct railroads of the utmost importance to the country they will be undertaken by gentlemen who have the capital and the resources to construct them in the shortest possible time, and without the enormous subsidies heretofore paid for this object; and that within a short time they will bring the City of Mexico, by direct rail, within six or seven days of New York. No one can calculate the immense advantage from this which will result to both countries. Mexico could send to the United States each year $200,000,000 of her products, tropical and semi-tropical, and could produce besides the same quantity for other markets. The income of the Republic would augment from 16 to 18 millions of dollars to 80 millions at least, without in any way adding to the burdens of taxation. I confess that much depends on the result of the coming elections, which, if peaceably settled, will assuredly produce these great benefits. I ardently hope that this will be the result.

Writing from Galena, June 21, General Grant says:

ESTEEMED SIR:—Your favor of 17th May was duly received. There is now no doubt that the work of the railroads will progress rapidly and that Mexico will commence to enjoy a progress admirable and a prosperity extraordinary. If we could in the United States bring in the most important persons, we could form a syndicate which could carry through these enterprises without the conditions which will now be necessary to undertake them; but my idea is now for the Government to issue bonds at 6 per cent per annum, organizing a liberal system of banking on this basis, which banks will issue notes receivable for all public debts, and thus preserve the paper money at par, which will facilitate the building of the roads and preserve the National credit. Mexico could thus, in a few years, from the products of her soil, export 200 millions in value per annum, and receive in return the products of our manufactures. But if Mexico can preserve her precious metals in addition to her other productions, she will enrich herself sufficiently to obviate the necessity of foreign importations. I can only repeat that if Mexico can peaceably elect her new President without revolution, it is certain that her prosperity will be secured, and that both Republics will unquestionably be the recipients of benefits. Please express my views to the parties most interested.

The report of the Minneapolis and St. Louis Railway Company to the State Railroad Commissioner for the year ending June 30, 1880, shows that the total earnings were $582,463; the total operating expenses of the entire line were $339,930 86, or 58 36 per cent of the earnings. The excess of earnings over operating expenses and taxes is $230,929 71. The total payments, in addition to the operating expenses, were $1,095,-641 20. The total bonded indebtedness of the company is $2,405,000; the total cost of construction and equipage is $4,750,606 77. The whole length of the line is 369 miles. The branch from Albert Lea to Fort Dodge was opened to the State line in November, 1879, and completed to Fort Dodge the last of June, 1880.

Philadelphia and Reading Railroad.

Comparative statement of gross receipts, tonnage and passengers, of the Philadelphia and Reading Railroad Company, for the month of August, 1880 and 1879:

	1880. Month.	1880. Year to date.
Gross receipts:		
Railroad traffic	$1,415,833 92	$11,495,798 06
Canal traffic	63,490 67	444,911 69
Steam colliers	43,283 84	433,650 36
Richmond coalbarges	9,204 71	72,332 75
Total Railroad Co.	$1,531,813 14	$12,446,703 16
Reading Coal & Iron Company	918,571 25	7,780,137 10
Total of all	$2,450,384 39	$20,226,840 26
Tonnage and passengers:		
Tons of coal on railroad	557,614 08	4,785,760 04
Tons of merchandise	483,571 06	4,403,360 19
Passengers carried	900,147	7,125,553
Coal transported by steam colliers	54,752 00	408,692 00
Tons of coal mined:		
By Coal and Iron Co.	214,335 12	2 265,788 01
By tenants	105,211 07	799,063 17
Total mined from lands owned and controlled by Co. & from leasehold estates	349,646 19	3,065,451 18

	1879. Month.	1879. Year to date.
Gross receipts:		
Railroad traffic	$1,305,414 38	$9,191,503 76
Canal traffic	101 092 42	560,886 83
Steam colliers	47,630 71	482,756 16
Richmond coal barges	8,143 36	107,480 31
Total Railroad Co.	$1,462,280 87	$10,342,127 06
Reading Coal and Iron Co.	805,686 26	7,123,446 80
Total of all	$2,267,967 13	$17,465,573 96
Tonnage and passengers:		
Tons of coal on railroad	730,214 11	5,707,371 02
Tons of merchandise	545,930 19	3,273,988 07
Passengers carried	820,270	5,555,816
Coal transported by steam colliers	55,111 00	440,997 00
Tons of coal mined:		
By Coal and Iron Co.	413,270 05	3,021,254 16
By tenants	113,942 16	898,957 07
Total mined from lands owned and controlled by Co. and from leasehold estates	527,213 01	3,920,212 03

Comparative statement of business of the Philadelphia and Reading Railroad Company for August, 1880:

	1880. Month.	1880. Year to date.
Gross receipts	$1,531,813 14	$12,446,703 16
Gross expenses	1,042,162 07	9,528,245 88
Net profit	$489,651 07	$2,918,457 28

	1879. Month.	1879. Year to date.
Gross receipts	$1,462,280 87	$10 342,127 06
Gross expenses	982,528 28	7,703,756 26
Net profit	$479,752 59	$2,638,370 80

Comparative statement of business of the Philadelphia and Reading Coal and Iron Company for August, 1880:

	1880. Month.	1880. Year to date.
Receipts	$918,571 25	$7,780,137 10
Expenses	845,261 27	7,765,903 94
Profit	$73,309 98	$14,233 66
Net profit of all	562,961 05	2,932,690 94

	1879. Month.	1879. Year to date.
Receipts	$805,686 26	$7,123,446 90
Expenses	977,470 76	7,877,485 78
Loss	$171,784 50	$754,038 88
Net profit of all	307,968 09	1,884,331 92

The total of both companies for the past month is $2,450,384 39, against $2,267,967 13 in corresponding month last year, an increase of $12 417 26. The total for the year to date of both companies is $20,226,840 26, against $17,465,573 96 last year, an increase of $2,761,266 30.

The Coal Trade.

The leading coal carrying companies make the following reports of their tonnage for the week ending September 18, and for the year to the same date, compared with their respective amounts carried to the same time last year:

	Week.	1880.	1879.
Reading Railroad	206,319	5,826,417	6,255,038
Schuylkill Canal	24,519	826,947	690,721
Lehigh Valley	109,987	3,454,793	3,806,296
Del., Lack. & Western	92,528	3,267,927	2,631,810
Shamokin Valley	22,426	589,655	648,134
Central New Jersey	109,048	2,476,782	2,775,659
United R. R. of New Jersey	34,252	782,173	612,957
Pennsylvania Coal	38,353	746,195	1,004,077
Delaware and Hudson	84,801	2,057,556	2,377,487
Huntingdon & Broad Top Mt.	8,767	316,387	227,357
Penn. and New York	20,870	854,461	985,422
Clearfield, Pa.	46,653	1,151,557	1,098,648

The total tonnage of anthracite coal from all the regions for the week ending Sept. 18, as reported by the several carrying companies, amounted to 649,070 tons, against 563,122 tons in the corresponding week last year, an increase of 85,948 tons. The total amount of anthracite mined for the year is 15,643,707 tons, against 18,275,196 tons for the same period last year, a decrease of 2,621,-989 tons. The quantity of bituminous coal sent to market for the week amounted to 108,819 tons, against 47,511 tons in corresponding week last year, an increase of 61,308 tons. The total amount of bituminous mined for the year is 3,066,823 tons against 2,513,264 tons for the corresponding period last year, an increase of 553,559 tons. The total tonnage all kinds of coal for the week is 757,889 tons, against 610,633 tons in corresponding week last year, an increase of 147,256 tons, and the total tonnage for the coal year is 18,710,030 tons against 20,788,460 tons to same date last year, a decrease of 2,078,430 tons. The quantity of coal and coke carried over the Pennsylvania Railroad for the second week of September was 158,361 tons, of which 119,887 tons were coal and 38,474 tons coke. The total tonnage for the year thus far has been 4,908,633 tons of which 3,695,440 tons were coal and 1,213,193 tons coke. These figures embrace all the coal and coke carried over the road east and west. The shipments of bituminous coal from the mines of the Cumberland coal region during the week ended Sept. 18 were 50,-422 tons, and for the year to that date 1,598,007 tons—387,627 tons over the corresponding period of last year. The coal was carried as follows: Baltimore and Ohio Railroad—week 24,268 tons, year 918,726 tons, an increase over 1879, 271,275 tons. Chesapeake and Ohio Canal—week, 21,264 tons; year 421,208 tons; increase over 1879, 67,912 tons. Pennsylvania Railroad—week 4,890 tons; year, 163,073 tons; increase over 1879, 48,458 tons.—Phil. Ledger, Sept. 27.

The new Brattleboro' and Whitehall (narrow gauge) Railroad, leased by the Central Vermont

is being rapidly pushed to completion. Rails are being laid and rolling stock is arriving.

Losses by the Pittsburg Riots.

The official report of the losses by the railroad riots of July, 1877, is just published. The following is the loss of railroad property:

For Pennsylvania Railroad losses, $2,007,400; Pittsburg, Cincinnati and St. Louis Railway, $227,814; Cleveland and Pittsburg Railroad, $32,-233; Erie and Pittsburg Railroad, $5,490; Pittsburg, Fort Wayne and Chicago Railroad, $34,759; Ashtabula, Youngstown and Pittsburg Railroad, $2,010; total, $2,310,166; accrued interest to date, $334,974; grand total, $2,647,140. These claims were compromised at $1,600,000. Of railroad rolling stock there were wholly destroyed and partially damaged 107 locomotives. There were wholly destroyed 33 passenger coaches, 5 Pullman palace coaches, 3 officers' coaches, 7 emigrant coaches, 3 combined baggage and passenger coaches, 1 paymaster's car, 8 baggage cars, 10 express cars, 2 postal cars, 951 box or house cars, 92 refrigerator cars, 34 stock cars, 856 gondola or flat cars, 48 cabin or freight conductors' car, 1 tool car, 98 coal and coke cars.

If these engines and cars had been coupled together in one train, it would have covered 11¾ miles of track. Other important losses were Pittsburg Grain Elevator Company, original amount of claim $211,210 30; compromised and settled for $138,804 23; Pullman Palace Car Company, original amount of claim $88,000, compromised and settled for $55,217 40; Baltimore and Ohio Railroad Company, original amount of claim $56,-469 20, compromised and settled for $33,232 82; Keystone Hotel Company, original amount of claim $32,724 54, compromised and settled for $22,293 41; seventy-nine buildings burned, belonging to private individuals and corporations other than those belonging to the railroad companies. The total number of all kinds of claims to September 20, 1880, which have been settled by the County Commissioners, mostly without the intervention of the Courts, is 1502. The face of these claims was for loss (and did not include interest,) amounting to $3,261,013 81. They have been compromised and settled for $2,489,737 97.

The French Government, it is said, is occupied with the consideration of a tunnel under Mont Blanc, and has commissioned M. de Lepinaye Inspecter of Railways, to draw up a comparative report as to the various passages through the Alps that are either completed or in prospect, stating the advantages and disadvantages of each as to distance, gradients, and cost of construction. The Mont Blanc route has an advantage of forty kilometers over the Simpson route, of fifty-three over the St. Gotbard, and of fifty-two over the Mont Cenis routes.

An extension of the Mt. Ayr Branch of the Chicago, Burlington and Quincy Railroad from Redding to Grant City, Mo., 10 miles, and the Bethany extension from Davis City, on the Mt. Ayr branch to Bradford, 10 miles, is announced.

The Missouri Pacific, the St. Louis and Lexington, the Kansas City and Eastern, the Lexington and Southern, the St. Louis, Kansas and Arizona, and the Kansas City, Leavenworth and Atchison Railroad Companies have been consolidated under the name of "The Missouri Pacific Railway Company."

Northern Central Railway.

The gross earnings, operating expenses and net earnings of the Northern Central railway for the month of August, 1879 and 1889, were:

	1879.	1880.
Gross earnings.....	$816,716 17	$458,923 51
Operating expenses..	260,489 80	330,966 59
Net earnings.....	$56,226 36	$122,956 92

—showing an increase in earnings of $137,207 84, in expenses of $70,476 79, and in net earnings of $66,730 55.

For the eight months ending with August, 1879 and 1880, the earnings, expenses, etc., were:

	1879.	1880.
Gross earnings.....	$2,476 661 64	$3,120,012 24
Operating expenses.	1,896,627 74	2,146,816 42
Net earnings.....	$579,033 90	$973,195 82

—showing an increase in earnings of $644,350 60, in expenses of $250,188 68, and in net earnings of $394,-161 92.

Infringment upon Letters Patent.

In the suit of Christopher C. Campbell, assignee in trust, against Postmaster James of this city and others, for infringments upon letters patent granted Marcus P. Norton of Troy, N. Y., for improvements in post-marking and postage cancelling in the postal service of the United States, a final decree was made and filed in the United States Circuit Court by Judge Wheeler, awarding the complainant $64,471. Postmaster James appealed the case to the Supreme Court of the United States, upon a stipulation in which complainant waives the filing of a bond by the Postmaster as security for judgment and for judgment pending appeal. Attorney General Devens has stipulated to bring on the case for hearing and argument in November.

A company has been incorporated at Indianapolis, Ind., for the purpose of building a railroad from Greencastle to Vincennes; it is to be known as the Greencastle, Eel River and Vincennes Railroad.

By November the railroad from Yale, B. C., to a point one mile below Emory will be ironed and ready for the rolling stock. The work is of a heavy, substantial character.

Ground has been broken at Somerset Junction, about four miles from Fall River, for a double track on the Old Colony Railroad between that station and Fall River.

The completion of the Brattleboro and Whitehall Railroad to Newfane, Vt., was formally celebrated on the 25th ult. The work on the remainder of the road is being pushed rapidly.

A contract for the extension of the Denver and Rio Grande Railroad to the Gunnison country, has been let, the work to be finished within seven months.

Preliminary surveys are now being made of the line of the Des Moines and Kansas City Railroad, when these are completed the road will be put under contract.

A contract has been concluded between the Wabash, St. Louis and Pacific Railway Company and Col. Ralph Plumb for the construction of the first section of a new line of railroad between Peoria and Chicago, Ills.

The surveyors on the Carson and Colorado Railroad peliminary survey have reached Candelaria, Nevada.

Work on the Costa Rica railroad from the Capital, San Jose, to the Atlantic is progressing satisfactorily.

The balance in the Michigan State Treasury on the 1st of September was $1,519,886 52.

The Republic of Nicaragua boasts that it has no foreign debt.

CHICAGO, MILWAUKEE AND ST. PAUL RAILWAY COMPANY, NEW YORK, Sept. 24, 1880.

NOTICE IS HEREBY GIVEN THAT DIVIDENDS have been declared out of the net earnings for the year 1880, of Three dollars and fifty cents per share on the preferred stock, and of Three dollars and fifty cents per share on the common stock of this company, payable on the 15th day of October next, at the office of the company.

The transfer-books will be closed on the 30th day of September, and reopened on the 21st day of October next.

JULIUS WADSWORTH, Vice-President.

COUPONS of the FIRST MORTGAGE BONDS OF THE CENTRAL PACIFIC RAILROAD COMPANY (SAN JOAQUIN VALLEY BRANCH), and of the LAND BONDS, due October 1, 1880, will be paid at the office of Fisk & Hatch, No. 5 Nassau-st.

C. P. HUNTINGTON, Vice President.

COUPONS of the FIRST MORTGAGE BONDS OF THE SOUTHERN PACIFIC RAILROAD COMPANY (of California), due October 1, 1880, will be paid at the office of the company, No. 9 Nassau and 11 Pine-sts., C. P. HUNTINGTON.

Rival Canal Routes.

Among the reasons which have been urged for and against the inter-oceanic canal projects is the greater percentage of calms and variable winds at the termini of the one route as compared with the other. In reply to an inquiry from Rear-Admiral Ammen, Captain de Krafft, the hydrographer to the Bureau of Navigation, makes a report in which he says:

From a total of 2,353 observations in the Bay of Panama, and of 1,758 observations on the coast of Nicaragua in the vicinity of Brito, and in each case covering roughly about the same extent of ocean, it appears that the calms and variable winds at the former locality amount to 11 per cent of the whole number of observations, while at the latter they amount to 5 per cent.

In order to reach the region of the trade winds sailing vessels from Panama bound to India, Japan, California or the Northwest Coast, in coming out of the bay and afterward making the necessary northing, will be obliged to make about 600 miles through variable winds and vexatious calms before finding themselves in as good a position to make their westing as the vessels leaving the coast of Nicaragua.

There are 3,687 miles of railroad in operation in Michigan. The total amount from transportation service by the several roads doing business in the State for the past year was $45,942,860 23, an increase of $3,226,721 18, or 7.55 per cent over the aggregate earnings for 1878. The earnings per mile of road operated were $7,450 14, an increase per mile of $337 38.

IRON & STEEL RAILS

FOR IMMEDIATE and FUTURE DELIVERY

For Sale by Manufacturers' Agent,

JAMES HENDERSON,

61 Wall St., N. Y.

First-Class English

IRON & STEEL RAILS,

AT LONDON PRICES, F. O. B.

VALENTINES VARNISHES

OUR CLAIMS.

We claim that our Finishing Varnishes are unsurpassed in the following qualities:

1. Uniformity. 3. Fluency. 5. Drying. 7. Fulness. 9. Durability.
2. Paleness. 4. Reliability. 6. Hardening. 8. Brilliancy. 10. Economy.

All know it is easy to make a Varnish that has the single quality of DURABILITY but Varnishes which wear well are generally inferior in color and working quality uncertain in laying, too slow in drying, or lacking in body or lustre, and frequently they possess ALL these defects.

In our "RAILWAY-COACH FINISHING" the ten qualities will be found combined and our other Varnishes are as elastic and durable as is practicable for the work on which they are employed.

Those of our Varnishes which have the greatest durability require time for hardening. They have superior elasticity, and ARE DISTINGUISHED FOR THE EXTENT OF SURFACE THEY WILL COVER, WHICH RENDERS THEM ECONOMICAL.

VALENTINE & COMPANY,

Chicago. NEW YORK. Paris.

Patent Stretched and Patent Riveted Short Lap

BELTING.

Our Belts are made from pure Oak Tanned Butts, and of the heart or solid part only. No part of the shoulder being used. Any one not familiar with Belt making can readily detect this by the shortness of the lengths and laps. Long laps are made including the shoulder or thinner and softer part of the Leather, causing the Belt to be, in its enduring qualities, no better than its poorest or thinner parts

Our Belting is warranted to run straight and maintain an even bearing on the pulleys, and sold under the fullest Guarantee.

J. B. HOYT,
D. B. FAYERWEATHER,
HARVEY S. LADEW.

LEATHER BELTING.

Made exclusively from Messrs. J. B. Hoyt & Co.'s Best Oak Butts —shoulders all cut off, only solid leather used—short lengths and short laps—fully warranted.

Rubber Belting and Hose and Packing at lowest prices.

STEPHEN BALLARD & CO.,
16 & 18 Chambers St,
NEW YORK.

PATENT
MINERAL WOOL.

ITS FOREMOST QUALITIES:

CHECKING TRANSMISSION OF HEAT, COLD AIR, SOUND AND ELECTRICITY AS AN AIR-HOLDING MATERIAL, ABSOLUTELY FIRE-PROOF AS A MINERAL—RAT AND VERMIN-PROOF, AND NOT ATTRACTING DAMPNESS, BECAUSE VITREOUS.

Its Manufacture, Composition and Uses in the Construction of Dwellings, etc.

A. G. DAY,

MANUFACTURER OF
Kerite Insulated Telegraph Wire and Cables

Of all kinds made to order, for Ocean, River, Aerial and Subterranean Lines.

The Kerite covering of these Conductors unlike any other, resists effectually the destructive action of Heat and Moisture, and the corrosive agents either in Earth, Air or Water.

☞ Special orders should state whether the Cable is to be exposed to Earth, Air or Water.

FACTORY—SEYMOUR, CONN. **Office, 120 Broadway, New York.**

NEW YORK, LAKE ERIE & WESTERN RAILWAY.

TO THE TRAVELING PUBLIC.

During the Centennial Season—six months, closing November 10, 1876—the Erie Railway carried almost 3,000,000 passengers, without a single accident to life or limb, or the loss of a piece of baggage.

And for a whole year, the official records of the United States Post-Office Department show the arrivals of Erie Railway trains in New York, on time, to be from 15 to 27 per cent. ahead of competing lines.

Facts well worthy the consideration of travelers.

E. S. BOWEN, General Superintendent.
JNO. N. ABBOTT, General Passenger Agent.

PASSENGER CARS

Of the Finest Finish, as well as every description of CAR WORK, furnished at Short Notice and at Reasonable Prices by the

HARLAN & HOLLINGSWORTH COMPANY, Wilmington, Del.

J. CURLEY,
MANUFACTURER OF ALL KINDS OF CARRIAGES

Fine Work both Heavy and Light a Specialty!

☞ All the latest Styles or Patterns kept in Stock or Works.

MANUFACTORY AND REPOSITORY, Corner Boreum Place and State St., Brooklyn, N. Y.

EAMES VACUUM BRAKE CO.,
RAILWAY TRAIN BRAKES,

P. O. BOX 2,878. SALES OFFICE, 15 GOLD ST., NEW YORK. Represented by THOS. PROSSER & SON.

THE EAMES VACUUM BRAKE is confidently offered as the most efficient, simple, durable and cheapest power Brake in the market. Can be seen in operation upon over fifty roads.

COLOR-BLINDNESS.

VALUABLE SUGGESTIONS FROM MASSACHUSETTS RAILROAD COMMISSIONERS.

The most valuable of recent contributions to this mooted subject, is contained in the last report of the Railroad Commissioners of Massachusetts. The legislature of 1879 passed the following Resolve: "RESOLVED, That the Board of Railroad Commissioners be instructed to consider whether any legislation is expedient or needful with reference to the employment by railroad corporations of persons afflicted with color blindness; and report thereon to the next General Court."

By virtue of this resolve the commissioners gave early and careful attention to the subject; witnessed an interesting examination of railroad employees, conducted by Dr. Jeffries, and united with him in sending circulars of inquiry to various experts and officials in Europe. The commissioners examined a large number of persons employed for the most part by railroad companies, using for tests, colored worsteds, as recommended by Professor Holmgren, and as practised by Dr. Jeffries. They supplemented this examination by experiments with colored flags and lanterns, whenever any visual defect was found to exist and sought in various ways to obtain information on the subject.

While the commissioners were unable to find that any railroad accident had ever been clearly traced to color-blindness, they early became convinced that the possible dangers that might result from this cause were such that an examination should be had of all persons employed on railroads in Massachusetts, whose duties were in any way connected with signals. They sent circulars therefore to the presidents of all railroads within their jurisdiction, asking that all such employees might be examined and the results reported. In answer to these circulars, reports were received from the various roads showing that intelligent and careful investigation had been made on most of them. The Commissioners say: "A striking result of these investigations was the effect upon the railroad officials, who conducted or witnessed them. There had been much scepticism among them as to the existence of color-blindness. The experiments opened their eyes to a source of danger hitherto unknown, and insured attention to this matter in the future."

The official circular of the commissioners called attention also, to defects of vision, although this subject had not been directly referred to them. They found that many railroads had apparently been in the habit of employing men in places, where sight was of the highest importance, without examination, and of keeping in their employ men whose sight was failing, without making regular tests of their visual power. One railroad official wrote: "We once had an engineer who was near sighted and removed him at once; but he was the only man I have ever known, who could not see an object six hundred feet from him, that was willing to risk his life on a locomotive. There are many persons who are near sighted and a small percentage of the people are color-blind; but I do not believe they prefer railroading as a means of living."

The commissioners very pertinently remark, that "such reasoning is unsafe; and men whose vision has gradually become defective, without being conscious of it, are found employed on railroads; and it is probable that men who know their defect are willing to risk their lives, and the lives of others, rather than to lose their means of gaining a livelihood. Members of this Board, while they cannot speak of any railroad accident as resulting from color blindness, do know cases where defective vision has led to such accidents. In one case, at least, the defect was never suspected by the person himself, until it had caused a considerable destruction of property. It was then recognized; and a new employment, not requiring vigorous eyesight, was given to the employe.

It has seemed to the Board that examination as to the strength of the vision was even more important than an examination as to color-blindness. And this view is confirmed by Prof. Holmgren's statement: "If the system of signals were based upon form, and all persons discharged from the service of railways, who, in consequence of an imperfection of vision, could not clearly and decidedly distinguish these signals at a distance, the proportion of such would be larger than that of the color-blind." The final conclusions reached by the commissioners were:

1. That the existence of color-blindness, total and partial, is a well-established fact, and that there are men who, by reason of such defect, are unfit for positions on railroads requiring ability to distinguish color-signals.

2. That the extent of dangerous color-blindness, i. e., such color-blindness as unfits persons for railroad employment, has been greatly exaggerated, and that a very small per cent of persons are, for this reason, unfit for such employment.

3. That examinations may be properly made by persons not medical experts; and that such examinations will certainly be sufficient, if doubtful cases are referred to such experts.

4. The Board recommends that every railroad company shall have an annual examination of every employe whose duties require or may require capacity to distinguish form or color-signals, and that no one shall be so employed who has not been thus examined. The examination should refer to color blindness and to other defects in vision. It should include all who are in any way concerned in the movement of trains.

5. The Board does not recommend any legislation on the subject. The interest of each corporation is strong enough to insure careful examination. Humanity would prevent any company from knowingly employing a person whose defective sight might at any time cause a fatal accident. And self-interest will make railroad managers careful in avoiding even false charges that accidents have resulted from such defects.

The failure to make examinations heretofore is owing to the want of information on the subject; and, in regard to color-blindness, to the general incredulity as to its existence. Information is now generally diffused, and incredulity has ceased, thanks to the efforts of scientific men. And there is no reason to fear that due attention will not be given to the recommendation that all applicants for employment on railroads, and all persons employed, shall be examined for defects.

Another Projected Ship-Canal.

The project of a canal for ships from the Baltic to the North sea, between the Bay of Kiel and Brunsbuttle, in the estuary of the Elbe, appears likely to prove a success. Its depth throughout is to be 20 feet and 9 inches, its width at the surface of the water 160 feet, and at the bottom 64 feet, the banks thus having a gentle slope. Provision is also to be made, by means of a peculiar system of locks and reservoirs, for increasing the depth of water to some 26 feet, whenever it may be desirable to do so, this depth allowing of the passage through the canal of the heaviest German ironclad afloat, namely, the Konig Wilhelm, a vessel of nearly 10,000 tons displacement, but drawing only 26 feet. In size this canal will not compare unfavorably with the Suez, the latter be-

ing 172½ feet wide at the surface of the water, 70 feet at the bottom and about 26 feet deep.

Iron Excursion Boats.

The certificate of incorporation of the "Iron Steamboat Company," whose purpose it is to build a fleet of iron excursion boats intended for the navigation of the Hudson River, New York Bay, Long Island Sound, and other waters, was filed at Freehold, Monmouth County, N. J., on the 27th ult. The incorporators are John Roach, Charles H. Cramp and Joseph C. Ferguson, of Philadelphia; Nathan G. Miller, of Bridgeport, Conn.; George S. Scott, of Scott, Leavitt & Co., bankers and brokers, No. 24 Broad street, New York; Washington E. Connor, banker and broker, No. 80 Broadway; Samuel Carpenter, General Eastern Passenger Agent of the Pennsylvania Railroad Company; Charles E. Quincy of the firm of William Heath & Co., bankers and brokers, No. 19 Broad street; J. B. Houston, President of the Pacific Mail Steamship Company; James D. Smith, of Jameson, Smith & Cotting, bankers and brokers, No. 12 Wall street; Alfred R. Whitney, iron merchant, at the corner of Hudson and Thomas streets; William J. Hutchison, of Kennedy, Hutchinson & Co., bankers and brokers, No. 5 Wall street, and Rufus Hatch, banker and broker, No. 47 Exchange Place.

These gentlemen, believing that iron vessels would be vastly superior in point of safety to the wooden excursion boats now plying in local waters, and convinced that the business between this city and Coney Island, Rockaway Beach, and Long Branch can be increased by their introduction, have decided to build at once eight or nine boats wholly of iron and steel. Each of them will be divided into not less than 12 water tight compartments, and provided with improved compound engines, steel boilers, and all appliances conducive to comfort, safety, and speed. It is designed to make them perfectly seaworthy, so that they can be sent for Winter use to Savannah, Charleston, Florida, and New Orleans, and it is expected that there average rate of speed will be not less than 20 miles an hour. The company proposes to build 30 of these iron steamboats between now and 1883, the year of the proposed World's Fair. The total amount of the capital stock is $10,000,000, which is divided into 100,000 shares of the par value of $100 each. The sum of $800,000 has already been pledged, and subscription books are shortly to be opened. The business of the company is to be conducted at Long Branch and in this City. Its object, as specified in the certificate of incorporation, is "the building, furnishing, fitting, purchasing, chartering, managing, navigating, and owning of steamboats and other vessels, to be used and employed for carrying and transporting passengers and freight on the Hudson River, New York Bay, Long Island Sound, and other waters." The iron vessels of the company will, it is estimated, pay from 25 to 40 per cent on the investment.

Sunday Travel Again.

The Providence justice court has discharged Frank C. Trainor, charged with evading his fare on the Boston and Providence road Sunday night, because the road was violating the Sunday law in running their cars on that day. Trainor would not give up his ticket to the conductor because he could not have a suitable seat, though he refused to accept any of those found for him.

Accountability of Bank Officials.

The recent arrest and imprisonment of forger Silas M. Waite of the Brattleboro bank will lead some people to ask whether there might not be a new method of electing bank directors: If the stockholders of a bank will not attend the meetings of the bank the power to appoint directors might be placed in the hands of some government official or the office of director abolished. Receiver Price now in charge of the bank says that "the stockholders of the bank have been requested for sixteen years back to meet and elect a board of directors to guard their interests and direct the management of the bank. The law provides that no officer, clerk, teller or book-keeper shall act as proxy, for obvious reasons. Nevertheless only two or three of the 260 shareholders were present at such meetings, the remainder sending proxies to be used by Silas M. Waite. The stockholders thus voluntarily confided to Waite their whole interests in the bank and made him practically the sole stockholder and autocrat of the concern. It is not strange, therefore, that a board of directors, elected by Waite, six-ninths of whom held only sufficient stock to qualify them, should have felt some respect for this confidence of the share owners and for Waite and less responsibility to and watchfulness for the interests of the stockholders whom they only indirectly represented."

Mr. Price is undoubtedly right, but the National Bank act makes every director of a bank "who participates in or assents to" any violation of law by any of the officers of the bank "liable in his personal and individual capacity for all damages which the association, its shareholders or any other person, shall have sustained in consequence of said violation." This statute covers every director who "knowingly violates," or "knowingly permits" others to violate the law. To what extent has a bank director a right to be ignorant of the details of a bank.

The State courts, when they are allowed by the federal courts to interpret the statute are disposed to hold the officers of national banks to a very strict accountability. The language of the supreme court of Kentucky, concurred in by that of Kansas, and given in Controller Knox's last report is as follows:—

It is the duty of directors of a bank to use ordinary diligence in acquiring knowledge of its business. They cannot be heard, when sued, to say that they were not apprised of facts the existence of which is shown by the books, accounts and correspondence of the bank. They should control the subordinate officers of the bank in all important transactions. Therefore under the circumstances proved in this particular case they were held liable for the abstraction and sale of special deposits by the latter. (United society, etc., against Underwood, 9 Bush. Ky.)

The 10th Kentucky contains another case in point. Directors had published the usual legal statement, attesting the soundness of the bank and trustworthiness of its officers. Persons relying upon this statement became sureties upon the bonds of the cashier, although he had already embezzled, as might have been known to the directors by "the use of slight diligence." The court held that the sureties, being misled by the directors' statement, were released from their obligation. "They had a right to believe," says the court, "that the directors before publishing the statement investigated the condition of the bank."

The rotten condition of the Brattleboro bank escaped detection so long because the National bank examiner of the date who was notoriously incompetent was secured in his position simply because he had the influence of the senatore and representatives from Vermont. It is to be hoped, for the sake of all bank depositors if for no other reason, that the government will make a clean sweep in the matter and will allow no one to escape on the plea of ignorance.

Joplin and Galena Railroad.

Articles of association of the Joplin and Galena Railroad Company, of Missouri, were filed on the 29th ult. with the Secretary of State of Missouri; capital, $105,000. The road is to be ten miles in length in this State, and is to run from a point between the Sixth Street and the East Joplin Railroad depots, in Joplin, in a west and southwesterly direction, through Jasper county, to the State line (on the east line of Cherokee County, Kan.), dividing the States of Missouri and Kansas, said railroad to be built south of the railroad now running from Empire City to Joplin, and will connect with the Joplin and Galena Railroad of Kansas. The road is to be standard gauge. The incorporators are E. F. Winslow, New York; C. W. Rogers, A. Douglass and T. E. Cassidy, of St. Louis; D. H. Nichols and John O'Day, of Springfield, Mo.; B. F. Hobart and W. A. Thomas, of Oswego, Kan.; O. Baily, White Cloud, Kan.

Articles of association of the Joplin and Galena Railway Company of Kansas were filed with the Secretary of the State of Kansas at Topeka, on the 30th ult. The incorporators are E. F. Winslow, of New York; C. W. Rogers, A. Douglass and T. E. Cassidy, of St. Louis; John O'Day and D. H. Nichols, of Springfield, Mo.; W. A. Thomas, of Oswego; W. B. Stone, of Galena, Kan., and O. Bailey, of White Cloud Kan. The general office of the company will be situated at Galena, Kan., and the road will run from a point on the east line of the State of Kansas on the east line of the County of Cherokee in the said State, where it will connect with the Joplin and Galena Railroad of Missouri. It will be built to the west line of the town or city of Galena, in Cherokee County, and will be three miles long and will be standard gauge. The capital stock will be 350 shares of the value of $100 each. The directors are the incorporators, with the exception of B. F. Hobart, of Oswego, Kan., who is added to the list of directors. The whole is an enterprise of the St. Louis and San Francisco Railroad Co., and when completed will connect with that road at Joplin, Mo., via the Joplin and Galena of Missouri.

The Atchison, Topeka and Santa Fe Railroad Company has just completed 35 miles of a new road in New Mexico, from Socorro to San Marcial, and expects to have enough more completed by Jan. 1 to make connection with the Southern Pacific Railroad. "Sleepers" will then be run through from Kansas City, a distance of nearly 1,200 miles, and an important connection will then be completed.

New York, Saturday, October 9, 1880.

Entered at the Post Office at New York, N. Y., as Second-Class Mail Matter.

AMONG the new features adopted by the AMERICAN RAILROAD JOURNAL, as appears on another page of this issue, is a department on counterfeit money It is intended to make this a permanent and authentic feature of the paper, and we believe it is one that will prove of great service and value to our readers. We are to receive from the U. S. Secret Service Division at Washington immediate notice of the discovery of counterfeits, which will be promptly published in the JOURNAL, and information in various forms will be given, through facilities which we have, so that this department may be taken as a trustworthy guide and assistant in checking the circulation of bogus money.

ALTERATIONS and improvements being made in the tables, which are weekly features of the JOURNAL, necessitate the temporary withdrawal of part of them. The Bond List and the Share List do not appear this week. In the Bond List alterations are desirable, owing to changes among the roads, consolidations, etc., since our tables were revised. The Share List is naturally corrected at this season of the year, and as this is the time when much of the necessary information comes to us from our correspondents and from the railroads, the table, if published now, could not be as symmetrical and complete as we would wish. The injustice of reporting one road many months in advance of another is manifest, but it would be unavoidable in any other way, than that which we adopt. On these accounts we withold these two tables until they are perfected and made of greater value than ever before, to accomplish which no efforts will be spared. We have added several important features to the JOURNAL recently and it seems desirable now that some of our tables should appear semi-monthly, monthly and quarterly instead of weekly, thus giving us an opportunity to lay before our readers more information and a greater variety each week. We shall announce the tables as they are to appear from week to week. The table of contents always gives those in the current number, and in future by referring to the files of the JOURNAL any of its tables desired can readily be found, and they will contain as late information as though appearing in each number, as we do not intend to withhold any tables that are of weekly interest. While adding new features to the JOURNAL, our aim is to retain and improve the old ones.

MR. GOULD seems to be almost omnipresent. We are told that he is interested in a new railroad in Colorado, and in a steamboat enterprise in New Orleans. Like the genii which issued from the fisherman's lamp, his insatiable spirit envelopes and compasses a great continent. He lays one hand on New York and the other on San Francisco, and does not trouble himself about statutes or legislatures. With the Wabash system and the new extension of the Delaware and Lackawanna in one hand, he can raise or depress railroad stocks at will ; and with the American Union Telegraph in the other, he has already proved himself a formidable rival to the great telegraph system of the Western Union. His power never was greater than it is at this moment, and he would be a wise man who could predict what will be his next railroad combination or what new plan will next appear.

A Word of Caution.

While our business men, and especially those connected with railroad interests, are feeling again the stimulus of prosperity, words of caution may seem unwelcome, yet it is at such a time that a careful survey of the situation and of the conditions affecting it now, or likely to operate upon it in the future, should be made. The JOURNAL has an abiding faith in the future of American progress and development, and an unshaken belief in the superiority and soundness of the recognized American enterprises as reliable fields for investment, while at the same time it appreciates the importance of guarding against a too hasty multiplication of enterprises or spreading of investment fields. We are but seven years removed from the breakdown of 1873, and the lessons of that check to our enterprises may wisely be studied.

American railroad securities were never in a more solid condition than at present. Under good management, possessors of valuable properties and enriched by a season of substantial earnings, our railroads in their present condition and outlook present strong elements of reliability. But upon this era of good feeling an element falls which, if not guarded against, gives promise of being prolific of evil. The trouble or threatened evil is one created by the railroads themselves, in an apparent aim to rival each other on the same ground ; or in a tendency to risk capital in building competing lines through sections well occupied at present, relying upon proposed improved management and close competition instead of natural facilities, rather than to attempt to place new lines in undeveloped sections, where they are actually needed and where they would open new resources of wealth in agriculture, manufactures and mining.

While every State and territory in the country has some important line of railroad undertaken, and while so many forms of railroad work are proposed and underway, still there is ample room for more. With about one hundred thousand miles of railroad in operation, the result of fifty years' labor and earnings, holding about sixty-five millions of dollars of public money, besides hundreds of millions in public lands, in addition to the State, municipal and private investments, we have now projected an amount of railroad suggestively large, by private capital alone. Our country is probably big enough and rich enough in resources for it all, if it is projected in the right localities and in a timely manner. The wonderful increase of immigration to our West gives promise of a largely increased demand for railroads to open up agricultural and mining districts.

But even with these facts unquestioned, the projectors of new railroad enterprises have these questions to consider: From what sources can the money to build them be expected? And will the traffic of the selected locality or termini justify the construction? Our available area of cultivated lands, our forests, mines and fisheries warrant an increase of transportation facilities in certain localities, while such an increase always brings with it a stimulus to manufactures ; but it must be remembered that the lines already established have never for any length of time been unable to supply the demands made upon them, and that considerable increase in the amount of freight now in transit would be required to give profitable employment to all the projected lines.

At the East a third or fourth line is proposed to Buffalo and Suspension Bridge, a second is proposed to Pittsburg, and the second Chesapeake line to Cincinnati is taking shape. In the great central basin the competition is fiercer still : both the Wabash and Burlington parties seem to be aiming at paralleling each other's lines ; and beyond the Mississippi, to the Rocky Mountains, there are several new lines proposed. Even the distant Pacific is not too remote nor sparsely settled for this collision of capital : there are the Canadian, the Northern, the Texas, and the Atlantic and Pacific routes all in the money market, notwithstanding the fact that the old Pacific road was supposed to be ample for all the traffic; and a second through route is just on the eve of completion by the junction of the Southern Pacific with the road through Colorado. Be-

sides these are roads proposed on a huge scale in Mexico.

Rates of interest tending to equalize themselves over the maritime world have ruled low, and borrowing has in the main been easy. A result of this has been a temptation to construct roads not always so much because they were needed, as because there was a profit promised in their building. There is no doubt that there are many railroad projects on paper which would throw lines through wild and barren sections having but little of either soil, population, timber or minerals, with scanty prospects of local traffic, and no hope of through traffic excepting at ruinously competing rates. This is the one chief feature of railroad projecting that in our era of railroad prosperity needs cautious guarding against: that of attempting to build competing lines where none are needed and where they can only live by a division of business, through breaking tariffs, with old established lines in most cases bearing all that it is possible for them to bear of competition now. The result can only be that of Samson's pulling at the temple: the coming down of both, with the temple at the top of the heap after all.

This element to be guarded against, however, is not one that will weaken confidence in American securities either at home or abroad. It is not difficult to discriminate between those worthy securities which have the strongest elements of reliability in them, from natural causes, and those whose claims for favor lie in less tangible forms or depend perhaps upon the success with which they can outdo their competitors in a field already fully occupied. American securities which have a charcter here can be counted as solid abroad, and there is little in the pushing of enterprises here to excite alarm, while there is much in the prosperity of other industries, the allies of the railroads, and of the railroads themselves to enhance and more firmly establish their value. If an investor in placing his money in railroad securities will use one-half the care he does in the purchase of a horse, it will not be hard for him to decide which ones have the elements of reliability and profit in them. A little study of the geography of our country, an examination into its resources, a glance at guide books, a reading of railroad earnings and a little seeking after information from reliable journals and trustworthy negotiators should make it not very difficult to decide which are the railroads most desirable for permanent investment.

The Receivers of the Philadelphia and Reading Railroad Company, guarantees of the divisional coal land mortgage bonds of the Philadelphia and Reading Coal and Iron Company, announced that they will purchase the overdue interest and coupons, due in October, on the bonds of the several tracts named at the following rates: Swatara, 6 per cent; Houtz, Meyer and Kinnear, 5 per cent; Salem Coal Company, 4 per cent. Bondholders desiring to accept these terms, are requested to make application to the treasurer of the Railroad Company.

The Shipping Convention.

Fifty one mercantile associations were represented at the convention which opened at the Board of Trade rooms at Boston Wednesday. The object of the convention was stated by Capt. Ambrose Snow, of New York, as temporary chairman, to be the harmonizing of "conflicting opinions regarding shipping interests, that an agreement may be reached as to what form of relief Congress may be asked to render. The Navigation laws, the world over, make it possible for us to sell ships. The question for our country to consider is whether it perfers to see its foreign commerce under the old flag disappear by the sale of its ships or whether she prefers to adopt such legislation as will enable our present ship-owning communities to retain what they now have and in future add to it. Our commerce is in a sinking condition. Is it worth any sacrifice to save it, and what sort of sacrifice shall be made? The Convention is asked to state what, in its judgment, Congress can and ought to do for this great interest."

The seventy six delegates in attendance effected the following permanent organization: President—J. S. T. Stranahan, of New York. Vice Presidents—W. H. Lincoln, of Boston; Washington Ryan, of Portland; Henry Winsor, of Philadelphia; E. D. Bigelow, of Baltimore, and H. H. Adams of Cleveland. Secretaries—William F. Humphreys, of Boston; Frank S. Gardner, of New York; Fritz H. Jordan, of Portland; Henry Hall, of New York, and Joel Cook, of Philadelphia.

The Resolutions of the Boston Board of Trade, which were presented in behalf of that body by Ex-Mayor Lincoln, embodied the following views: the approval of the bill entitled "An act to repeal and annul certain acts pertaining to the shipment and discharge of seamen," which bill was presented in the House of Representatives last year by Hon. Wm. Claflin, of Mass; that permission should be granted to take goods of foreign production or manufacture out of bond free of duty when such goods are to be taken as stores on board of any ships bound from a port in the United States to a foreign port; that property invested in shipping should be exempt from all local and municipal taxation by special act of Congress, leaving the income only subject to such taxation; that compulsory pilotage should be abolished in the United States; that the Government should assist lines running to important foreign ports, by proper remuneration for carrying mails; that the navigation laws restricting the registry of vessels to such as are built in the United States should be repealed, with this proviso, that all vessels of foreign build owned by citizens of the United States and sailing under the flag of the United States shall be excluded forever from coasting or inland trade; that all material entering into the construction or repair of ships shall be admitted free of duty when so employed; that Congress should take early action providing for the distribution of the balance in the Treasury on account of the Geneva award.

Practical suggestions concerning details of plans following the general line of the above views, were made by Mr. Lincoln, Mr. J. E. Burtt, of Boston, Capt. Ambrose Snow, and Mr. John H. Boynton of New York. A number of important topics were in this way placed before the convention for consideration and action. The indications were that the convention would continue its sessions through several days. Wednesday evening the delegates were entertained at a banquet given by the Commercial and Merchants Clubs of Boston, at the Hotel Brunswick.

Personal.

—Bishop Bedell, of Ohio, delivered a special sermon to railroad men at the Church of the Holy Trinity (Dr. Tyng's) Sunday evening.

—Mr. Louis E. Lefferts has received the appointment of Secretary of the Gold and Stock Telegraph Co.—Mr. Lefferts is the son of the late Marshall Lefferts, and for a long time has been connected with the Western Union Company,

—A marine glass was recently presented to Capt. Thos. S. Curtis, of the Havana Steamer Saratoga, in behalf of the Emperor of Germany, in recognition of his rescue of the crew of the wrecked German bark Chistopher Columbus, last February.

—Among the prominent railroad men in the city the past week were Mr. D. Chadwick, Government Director of the Union Pacific, Mr. Thos. Allen, of St. Louis, and Mr. S. S. Merrill, General Manager of the Chicago, Milwaukee and St. Paul.

—Mr. John J. Kiernan, long familiar to Wall street circles in connection with his news agency, has been admitted to general partnership in the advertising agency of Frank & Flamant, one of the largest and best in the city. Mr. Kiernan has heretofore been a special partner of this agency, which is strengthened by his active partnership in its business.

—The venerable Peter Cooper received a special invitation from the Mayor and City Council of Baltimore and Mr. Robert Garrett in behalf of the president and directors of the Baltimore and Ohio Railroad to be present at the Baltimore celebration. The president's car, Maryland, of the Baltimore and Ohio Railroad was placed at his service and the hospitalities of the city were tendered him.

—Prof. Geo. M. Mowbray, of Mass., the well known manufacturer of nitro-glycerin and kindred explosives, and the author of several valuable treatises on mining and tunnelling, is also an admirer and liberal patron of the fine arts. At present he is educating, in foreign art schools and studios, his nephew, Harry M. Mowbray, who is accredited by art authorities with decided talent and with being among the promising young American artists now in Paris.

The government of Costa Rica has entered into a contract with Imosen Chiarin for the construction of an elevated railroad from San Jose, the capital, to Rio Suclo, there to connect with the railroad in course of construction from Limon, the work to be commenced within six months from the date of the contract.

RAILROAD EARNINGS—MONTHLY.

Massachusetts Central Railroad.

The contract for all the grading and masonry between Old Furnace, a village in the town of Hardwick, and Amherst has just been let to Davis & Monson. The work will be begun at once and pushed forward to an early completion, the only obstacle being the settlement of some land damage claims. The distance is thirty miles, and there is nothing very difficult in any part of the construction. The masonry is to be done for fifteen iron bridges, the longest—perhaps 700 ft.—being at Bondville, a village in the southern part of Palmer. Two weeks ago a gang of men began on the "College hill cut," which will probably include the whole of Blake field, the Amherst College ball grounds. Another full gang is grading at Northampton, and stone is being quarried for finishing the piers of the bridge across the Connecticut river. Arrangements have been made for four gangs of stone masons to begin at once on the abutments of the bridge that is to carry the Central's track over the New London Northern Railroad at Belchertown. Numerous gangs of men will grade between Northampton and Coldbrook this autumn, and the contractors say that the whole can be finished within five months. The two most difficult physical obstacles in constructing the whole road are now almost removed They were the cuts at Berlin and Rutland. The former is wholly completed, and the latter will be finished this winter. The "Rutland cut," through the solid rock which caps the summit of the high ground in Rutland, will be the deepest rock excavation on the entire road, and, with the exception of the "Berlin cut," the most difficult to make. Blasting was begun there last May, and has ever since been steadily continued. Sixty-five men are employed, with two Ingersoll steam drills and one steam and one horse derrick. The drills have a capacity of drilling six to nine feet an hour, and are kept going day and night. Of the whole work, involving a rock cut of 1100 feet, more than one-half is now finished, and the remainder is advancing at the rate of 100 feet per month. The 10,000 cubic yards of rock already excavated have been used to make the "fill" at the west end of the cut, so that the embankment when completed will be a mass of broken rock capable of withstanding the severest rains and floods. The blasting of the "Berlin cut," owing to the peculiar hardness of the rock and the unfavorable lay of the grain, was quite difficult, so that the excavating begun in April, 1879, was not completed until May, 1880. The cut measures three-fourths of a mile in length, 80 feet at the greatest and 20 at the least depth, and 18 feet in width at sub-grade. The cost of the work at Berlin has been about $60,000, about 50,000 cubic yards of rock and soil having been removed.

The section of the Nicaragua railroad from the port of Corinto inland to Chinandega is about to be finished and opened to the public. Arrangements have already been made for the extension of the road from Chinandega to Leon and Grande.

Latest Railroad Earnings.

The following are the latest railroad earnings reported:

	1879.	1880.
Hannibal and St. Joseph—		
Fourth week in September	$53.326	$63.781
January 1 to September 30	1,311,212	1,782,819
Wabash, St. Louis and Pacific—		
Fourth week in September	$230.384	$308.225
January 1 to September 30	6,068,029	8,741,398
Louisville and Nashville—		
Fourth week in September	$150.152	$276,700
July 1 to September 30	1,390,269	2,413,900
St. Louis and San Francisco—		
Fourth week in September	$61,000	$86,000
January 1 to September 30	1,027,000	1,876,000
Denver and Rio Grande—		
Fourth week in September	$36.819	$142 373
Month of September	112,823	400.990
Mobile and Ohio—		
Month of September	$161.253	$179.191
July 1 to September 30	377,892	449,643
Northern Pacific—		
Month of September	$270,893	$332,810
January 1 to September 30	1,383,386	1,686,389
Chicago, Milwaukee and St. Paul—		
Fourth week in September	$332.071	$397,000
Month of September	1,018,806	1,257,000
Chicago, St. Paul, Minneapolis and Omaha—		
Fourth week in September	$80,849	$103,032

—Rails will be laid on the New York and New England road to Brewsters by December 1st.

2s Portrait of Thomas Jefferson.
5s Portrait of Andrew Jackson.*
10s Portrait of Daniel Webster.*
20s Portrait of Alex. Hamilton.
50s Portrait of Benjamen Franklin.
100s Portrait of Abraham Lincoln.
500s Vignette representing Victory divested of her Armor.
1000s Portrait of DeWitt Clinton, ex-Governor of New York State

* Only notes of the new issue counterfeited.

Counterfeit Note List.

HOW TO USE THE LIST.

All Paper Money in the United States is printed in sheets of four notes of one denomination on each sheet. Each bill bears a letter called the check letter, usually A, B, C or D, which appears on its upper left hand, and lower right hand corner. The notes are always numbered in their order on the sheets; thus all notes lettered A, will bear the number 1 or a number which divided by 4 will leave 1 remainder; the number accompanying B divided by 4 will leave 2 remainder, C, 3 remainder, D, no remainder. All genuine notes with letters A and C will have odd numbers and all with B and D even numbers.

The counterfeiter makes his plate commonly from one bill and rarely prints more than one of the four letters. As soon as a spurious bill is discovered measures are taken to redeem all good bills of that denomination, bearing the same letter. This leaves the counterfeit alone in the field.

All bills bearing the letters given in the following list should be refused by all non-experts.

We can assure our subscribers that there are no counterfeit bills on paper currency of the United States, which are known to the Secret Service Division at Washington at this date.

The National Bank notes printed in Italics are stolen and are worthless.

Banks starred do not exist, and the whole issue is fraudulent.

Common Law.

BEQUEST OF BONDS DOES NOT INCLUDE OVERDUE COUPONS.

NEW YORK COURT OF COMMON PLEAS, SEPTEMBER 16, 1880.

McGRATH v. VAN STAVOREN.

A testator gave to his niece specified railway bonds; held, that interest coupons on the bonds, due at the time of testator's death, did not pass to the niece.

This action was brought by Emma H. McGrath and others against Emma Van Stavoren and others for the construction of some of the clauses of the will of George W. Van Stavoren, who died in 1861. To his niece the plaintiff named, testator, gave two $1,000 Erie Railway bonds, on which, at the time of his death, there were undetached interest coupons due to the amount of $280. he plaintiffs claimed that this sum belonged to the legatee. The court gave judgment for the defendants.

DALY, C. J. The coupons attached to the bond were due and payable at the time of the death of the testator and did not pass with the bond to the legatee, but form a part of the coupons of the estate. De Gendre vs. Kent, L. R., 4 Eq. 283-5; Wright vs. Lucker, 1 Johns. & Hem. 266; Brundap vs. Brundap, 60 N. Y. 544, 551; Lock vs. Venables, 27 Beav. 598; In re Rogers, 1 Drew & Small, 338; Paton vs. Shephard, 10 Sim. 186; Earp's Will, 1 Parsons' Eq. (Penn.) 453, 464-5; Spear vs. Hart, 3 Robertson, 420.

"Specific legacies," says Williams, "are considered as separated from the general estate, and appropriated at the time of the testator's death, and consequently, from that period, whatever proceeds accrue upon them, and nothing more or less, belongs to the legatee." 2 Williams on Executors (4th Am. ed.), 1221. And it is equally an established rule that the bequest of a bond or other security does not pass the interest which has accrued and is payable on the security, unless there is something super-added to the bequest to show that such was the intention. Roberts vs. Kuffin, 2 Atk. 112; Gibbon vs. Gibbon, 13 C. B. (4 J. Scott) 217, per Manle J.; 1 Roper on Legacies (2 Am. ed.), 285; Floyd on Wills, 227-8.

The cases suggested—of a bond with coupons attached, given mortis causa (Walsh vs. Sexton, 55 Barb. 251), or the bequest of a promissory note (Williard, J., in Tifft vs. Porter, 8 N. Y. 516)—are not analogous. The gift mortis causa of a bond, with coupons attached which were then due and payable, shows by the delivery of the bond with the coupons the intention that the donee is to have both the bond and the interest that is due on the coupons. But no such intent is inferable by the bequest of a bond in a will, where nothing is said about interest which is then due upon coupons attached to the bond or which may become due at the time of the testator's death, and in the case of a promissory note drawing interest, the interest is payable, together with principal, when the note becomes due, and necessarily passes, as incident of the note, by the transfer of a note to another.—[Albany Law Journal.

Legal Notes.

MASTER AND SERVANT.

"The true doctrine of the common law is that the master is liable to his servants, as much as to any one else, for the consequence of his own negligence; and it is no defense for him to show that the negligence of a fellow servant (for which he was not responsible) also contributed to bringing about the injury. Shearman & Redfield on Negligence, § 89; Fifield vs. Northern R. R. Co., 42 N H. 225; Hough vs. Railway Co., 100 U. S. 213; Cayzer vs. Taylor, 10 Gray, 274; Paulmier vs. Erie R. R. Co., 5 Vroom, 151, 157. In Cayzer vs. Taylor the Supreme Court of Massachusetts state the rule as follows: 'But we are not prepared to say that if one uses a dangerous instrumentality, without the safeguards which science and experience suggest or the positive rules of law require, he is not responsible for an injury resulting from such use because the negligence of one of his servants may have contributed to the result, or because a possible vigilance of the servant might have prevented the injury.' That was a case in which a servant sued his master for injuries from the collapse of a steam boiler used in the defendant's manufactory, in which the plaintiff was employed," This is consistent with Booth vs. Boston and Albany Railroad Co., 73 N. Y. 38; S. C., 29 Am. Rep. 97, where the injury was caused by the negligence of the company in not furnishing a sufficient number of brakemen on a train, and the negligence of the engineer in running the train; and with Stetter vs. Chicago & N. W. R. Co., 46 Wis. 497; S. C., 29 Am. Rep. 102, note, where the injury was caused by the subsidence of an unsafe track, and the negligence of the conductor in disregarding his instructions to run slowly over it.—[Albany Law Journal.

QUIT-CLAIM DEED.—EFFECT.

A quit-claim deed is as effectual to pass the title to real estate as any other, and the purchaser accepting such deed, without notice of prior rights, will be as effectually protected as if the deed contained full covenants of warranty, unless the contrary appear from the conveyance: Bradbury vs. Davis, Sup. Ct. Col., 1 Col. Law Reporter, 7.

BANKS.

A bank has an equitable right, analogous to the doctrine of stoppage in transitu over the credit it gives to a borrower (who becomes insolvent) for the proceeds of a note it had discounted for him. Dougherty vs. National Bank, Supreme Court, Pa.

MARITIME LAW—SEAMEN CAN BE REQUIRED TO WORK ON SUNDAY.

A seaman upon a schooner in the harbor of Frankfort, Michigan, where she was towed to receive a cargo of lumber, cannot refuse to work on Sunday, in loading the schooner, where the towing vessel is not able to enter the harbor by reason of an insufficiency of water, and is lying outside in the lake, awaiting the schooner, and is in a place of danger. Where the master of the schooner was of opinion that it was necessary, for the safety of the towing vessel, that the loading of the schooner (begun on Friday) should be completed on Sunday, and ordered the work to be done, it was the duty of the crews to obey. In this case, held, that a seaman refusing to work on Sunday was rightfully expelled from the schooner, and forfeited his wages for his disobedience. The Richard Matt, 1 Biss. 440. District, E. D. Pennsylvania, Aug 2, 1880. Smith vs Schooner J. C. King. Opinion by Acheson, D. J.

Dividends.

—The Housatonic Railroad Company has declared a quarterly dividend of $2 per share on the preferred stock, payable Oct. 15.

—The Vermont and Massachusetts Railroad Company will pay a dividend of $3 per share Oct. 7.

—The Topeka Equipment Company has declared a dividend of 5 per cent payable Oct. 1.

—A dividend of 1½ per cent was paid by the Portsmouth and Dover Railroad on the 1st inst., being a part of a dividend due July, 1879, one per cent of which had been paid. The remaining one-half per cent was required to pay legal expenses.

—The Boston, Clinton, Fitchburg and New Bedford Railroad Company has declared a dividend of $2 50 per share on its preferred stock, payable Oct. 15.

—The Missouri Pacific Railroad Company have declared a quarterly dividend of 1½ per cent. payable October 15th.

The smoke-consuming engine invented by Mr. David Sinton, of Cincinnati, Ohio, is said to be a complete success. The peculiarity of the invention consists in a series of four arches of varying heights, built of fire-bricks and rising from the sides of the furnace to the bottom of the boiler. Between the third and fourth arches is a large open heat-chamber. The coal is retained in the firebed, in front of the three arches, until the oxygen and coal gases combine and pass under the arches all aflame into the heat-chamber, wher they produce an intense heat devoid of any smoke. Mr. Sinton will give Cincinnati the free right to use his invention in its municipal buildings, and he has no idea of devoting to his own use any money arising from the sale of rights to others.

Union Pacific Railway.

The earnings and expenses of the Union Pacific Railway from the time of consolidation, February 1, to June 30, 1880, were as follows:

Gross earnings		$10,279,489 10
Operating expenses (50.19 per ct.)		5,159,200 22
Net earnings		$5,120,288 88
Less interest on funded debt	$2,350,348 45	
Sinking fund	86 440 00	
Government	625 000 00	
Dividend, 2½ per ct.	1,269,060 00	
		4,330 848 45
Surplus		$789,440 43

Statement of the Public Debt of the United States, October 1, 1880.

Totals	$64,623,512 00	$969,352 68

Interest paid by United States, $17,589,861 30; interest repaid by transportation of mails, &c., $13,824,654 81; interest repaid by cash payments: 5 per cent net earnings, $655,198 87; balance of interest paid by United States, $33,110,007 62.

The foregoing is a correct statement of the public debt, as appears from the books and Treasurer's returns in the Department at the close of business, Sept. 30, 1880.

JOHN SHERMAN,
Secretary of the Treasury.

Houston and Texas Central Railway.

The following is a comparative statement of the earnings, expenses, etc., of the Houston and Texas Central Railway for the month of August:

	1879.	1880.
Gross earnings	$232,122 12	$289,380 21
Operating expenses (including taxes)	133,710 08	138,375 61
Net	$98,412 03	$151,004 60
Increase in gross earnings, 24.66 per cent		$57,258 09
Increase in expenses, 3.48 per cent.		4,665 52
Gain in net earnings, 53.44 per cent		$52,592 59

The length and cost of mail transportation for the fiscal year ended June 30, 1880, as given in the annual report of the second assistant postmaster, were as follows: 11,112 public routes, aggregating 843,888 miles, and costing in all $22,296,269, including salaries of route officers and agents. The railroad routes were 82,320 miles long; steamboat routes 23,320 miles, and "star" routes 235,248 miles. The increased cost of the mail service during the year was $2,283,397.

American Railroad Journal.

Financial and Commercial Review.

THURSDAY EVENING, October 7, 1880.

Money on call is 2@3 per cent and in abundant supply. Time loans are 3 to 4½ per cent; and prime mercantile paper 4½@5½.

The market for foreign exchange is dull and about steady at 4 80½@4 81, and 4 83@½ for prime bankers' sterling, the posted rates being 4 81½@4 84. Cable transfers are 4 83½@4 84. Prime commercial bills are 4.79¼@½.

The proposals to sell bonds to the Government on Wednesday aggregated $5,366,350, of which the Secretary of the Treasury accepted $2,500,000 at 102.35 to 102.56 for 6s of 1880, 104.35 to 104.56 for 6s of 1881, and 102.58 to 102.64½ for 5s of 1880.

The Governors of the New York Stock Exchange have admitted to dealings at the board the first mortgage six per cent gold bonds ($1,040,000) of the Texas and St. Louis Railroad Company. This is a narrow guage railroad extending from the terminus of the St. Louis and Iron Mountain Railroad at Texarkana, Texas, to Corsicana, Texas, and thence to Waco. The road is completed from Texarkana to Tyler, a distance of 125 miles, the division Tyler-Corsicana-Waco being now under construction. The company is entitled to 102,400 acres of land for each completed ten miles section, except on thirty-six miles on which it will receive only 51,200 acres (less 21 miles), of which certificates have been sold. The capital stock and the bonded debt of the company stand as follows: Capital stock authorized on

road from Texarkana to Waco ($8,000 a mile), $2,000,000; land grant bonds authorized on road from Texarkana to Waco ($8,000 a mile) $2,000,000; first mortgage 6 per cent gold bonds authorized on road from Texarkana to Waco ($8,000 a mile), $2,000,000; no securities can be issued, except upon completed road.

The closing quotations on Thursday were: American Union Telegraph, 60@61½; Am. Dist. Tel., 72@74; Atlantic and Pacific Telegraph, 39½@40¼; Canada Southern, 58⅞@59⅞; Central of New Jersey 72¾@73; Central Pacific, 72½@73; Chicago and Northwestern, 108⅜@—; do. pref., 124¾@125; Chicago, Burlington and Quincy, 137¾@138; Chicago and Alton, 113@114; do. pref, 120@130; Chicago, Milwaukee and St. Paul, 93⅛@93¼; do. pref., 109@110; Chicago, Rock Island and Pacific, 117@117½; Chicago, St. Louis, and New Orleans, 35@36; Cleveland, Columbus, Cincinnati and Indianapolis, 70@71; Columbus, Chicago and Indiana Central, 17½@18; Delaware and Hudson Canal, 84⅛@84½; Delaware, Lackawanna and Western, 90¼@90⅜; Hannibal and St. Joseph, 38@38⅛; do., pref., 81@81½; Illinois Central, 111½@112½; Lake Erie and Western, 32¼@32½; Lake Shore and Michigan Southern, 109@109⅛; Louisville and Nashville, 159@160; Morris and Essex, 111¼@111½; Manhattan Elevated, 35@35½; Metropolitan Elevated, 98½@99; Michigan Central, 97⅛@97⅜; New York Elevated, 112@113; New York Central and Hudson River, 130@130½; New York, Lake Erie and Western, 39¼@39⅜; do. pref., 70⅜@70¾; New York, Ontario and Western, 21¼@22; Northern Pacific, 27¾@28; do. pref., 52¼@52½; Ohio and Miss., 33¼@33⅜; do. pref., 73@73½; Pacific Mail, 41⅛@41⅜; Philadelphia and Reading, 29¾@30; St. Louis and San Francisco, 32¼@34; do. pref., 43@44; do. 1st pref., 74@75½; St. Louis, Iron Mountain and Southern, 49⅞@50; St. Louis, Alton and Terre Haute, 19¼@21; do. pref., —@80; Union Pacific, 88@88¼; Western Union Telegraph, 97⅝@97⅞; Wabash, St. Louis and Pacific, 36¾@37; do. pref., 68⅛@68⅝.

The following quotations of sales of Railway and other securities, for the week, are in addition to those given elsewhere in our columns:

Boston, Hoosac Tunnel and Western Railway.

The contract for the construction of the extension of this railway from Mechanicsville, its present Western terminus at the Hudson River, to Schenectady, was recently let to Messrs. Bridgens and Snyder of Pennsylvania, who are to have the extension completed by the first of next July. The whole distance by the new route to Schenectady from Mechanicsville will be seventeen miles, but only thirteen miles of new road will have to be built, as a portion of the Delaware and Hudson Road will be utilized. At the present time the freight traffic via this line reaches Mechanicsville from Schenectady, via Ballston, a distance of twenty-six miles, so that the new route will save nearly ten miles when completed.

The Western business for New England which the Erie Railway is sending through the tunnel, over the Boston, Hoosac Tunnel and Western Railway is increasing rapidly, and would show a still larger increase were it not for the blockade at North Adams, which has now existed for some time, owing both to a want of sufficient yard room for the handling of cars, such as it now is. As the State management is rapidly increasing the accommodations at this point, it is to be hoped that this difficulty will soon be remedied.

Besides its business with the Erie Railway, this new connection with the tunnel is giving Boston an opportunity to utilize the Erie Canal, as several large shipments of grain have come through from the West via the canal, the new railroad, the Hoosac Tunnel, and thence over the Fitchburg Railroad to Boston, and we now learn of a single shipment of 70,000 bushels of corn in one consignment on the way here by this route.

We have every reason to expect that upon the completion of the line to Schenectady, next summer, which will bring that point within about 200 miles of Boston, the canal will be utilized as an important factor in developing the business of the tunnel, and at the same time increasing the commerce of the port of Boston. The managers of the Boston, Hoosac Tunnel and Western are negotiating with the State authorities for a contract for the operation of the Troy and Greenfield Railroad, upon nearly the same basis as the one recently secured by the Fitchburg Railroad.—[Boston Journal, Sept. 30.

Louisville and Nashville Railroad.

At the annual meeting of the stockholders of the Louisville and Nashville Railroad Company, held in Louisville, Ky., on the 6th inst., the annual report was presented, showing that the company was operating nearly 2,400 miles of road. The report recommended the extension of the Louisville and Nashville Railroad system into Arkansas and Texas, and stated that negotiations are now on foot looking toward securing an independent route into these States. The net earnings for the entire fiscal year of 1878-'79 were $2,231,771 06, or 41.43 per cent of the gross earnings For 1879-'80 they were $3,227,643 63 or 43.41 per cent of the gross earnings. The officers were re-elected. President Newcomb resigned because of ill health, and hoped his resignation would be accepted at as early a date as possible—not later, be trusted, than December 1. A committee was appointed to take action upon his resignation. It is Mr. Newcomb's desire that Mr. E. H. Green shall succeed him. A recommendation that the present stock of the Louisville and Nashville Railroad be increased by a dividend of 100 per cent was adopted. The following directors were unanimously elected for the ensuing year: H. Victor Newcomb, E. H. Green, E. P. Alexander, Geo. C. Clark, C. C. Baldwin, Clarence H. Clark, B. F. Guthrie, Geo. A. Washington, Henry C. Murrel, Logan C. Murray, and Joseph T. Woodward.

Construction Notes.

—Sidney Dillon has just closed a contract for building a double track extension of the Delaware, Lackawanna and Western Railroad from Binghamton to Buffalo.

—Messrs. O'Brien & Rogers have the contract for the extension of the Walkill Valley road from Kingston to Albany.

—The grading on the New Haven and Northampton road to the Hoosac Tunnel line will be completed about Jan. 1st.

—The Massachusetts Central folks are said to have effected a loan of one million and a half. They propose pushing the road to an early completion.

—Work is being rapidly pushed on the West Shore road. A large force are now tunneling West Point.

By the recent narrowing of the Franklin branch of the New York, Pennsylvania and Ohio Railroad, 36 miles between Meadville and Oil City, that line is now entirely standard gauge. The work, which was under the charge of Engineer Charles Latimer, was completed in six hours. In his report to headquarters Mr. Latimer speaks in the highest terms of the work done by all those under him, from the engineers to the spike drivers. The ties were found to be as sound as when first laid, and this made the job of spike driving as difficult as on a new road.

At a meeting of the stockholders of the St. Louis, Kansas and Arizona Railway, Sept. 30, the consolidation of that company with the Missouri Pacific was ratified. Over two-thirds of the stock of the corporation was represented.

Mexican Central Railroad.

Mr. Rudolph Fink, brother of Trunk Line Commissioner Albert Fink, and until recently General Manager of the Selma, Rome and Dalton Railroad, sailed on Thursday of last week in the Steamer City of Washington for Mexico, where he goes in the interest of a company recently organized in Boston for the purpose of building a railroad from the City of Mexico to El Paso, Texas. The length of the proposed road is to be about 1,100 miles, of which more than 200 miles have been surveyed, and about 15 miles from the City of Mexico graded. It is said that all the money required for the enterprise has been subscribed, principally in Boston, and a subsidy of $9,500 per mile secured from the Mexican government. The road is known as the Central Mexico railroad. The intention of the projectors is to make a connection with the Atchison, Topeka and Santa Fe Railroad, which is now completed to Albuquerque, New Mexico, and jointly with the St. Louis and San Francisco company is rapidly constructing a road to the Pacific coast. It is expected that the Central Mexican Railroad will prove a valuable addition to the vast Southwestern system now being completed by the two roads mentioned. Mr. Fink is to be the general manager and chief engineer of the Mexican road, with headquarters in the City of Mexico.

Missouri Pacific Railway.

At a meeting of the directors of the Missouri Pacific Railway Company held in this city on the 2d inst., the following statement of the business for the current quarter was presented and adopted, and a quarterly dividend of 1½ per cent was declared payable October 15:

	Gross earnings.	Expenses.	Net earnings.
July...	$539,657 97	$255,235 44	$284,422 53
Aug...	547,298 21	306 123 98	241,174 23
Sept...	503,874 83	275,000 00	228,874 83
Totals.	$1,590,830 51	$836,359 42	$754,471 09
Net earnings			$754,471 09
Interest charges, taxes three months.			386,872 00
Total			$367,599 09
One and one-half per cent dividend on $12,416,000 stock			186,240 00
Surplus for the quarter			$181,859 09

The consolidated company is made up of the following roads, viz: Missouri Pacific, Kansas City and Eastern, Lexington and Southern, St. Louis, Kansas City and Arizona, and Kansas City, Leavenworth and Atchison Railroads and the St. Louis and Lexington Railroad. The total mileage of the new company is 691; total bonded debt, $19,261,000; capital stock, $12,416,000. The officers of the new company are: Jay Gould, President; S. H. H. Clark, Vice-President; A. H. Calif, Secretary and Treasurer.

The Ontario Silver Mining Company has declared its regular monthly dividend of Fifty cents per share for September, payable Oct. 15 at the office of Wells, Fargo & Co., No. 65 Broadway.

The Silverton Narrow Gauge Railroad has 400 men at work near Aumsville, Oregon, and also 40 teams. Nine hundred men are grading near Brownsville.

Delaware and Hudson	69,398	2,126,955	2,448,232
Huntingdon & Broad Top Mt.....	6,916	323,303	230,039
Penn. and New York.	25,619	880,111	961,002
Clearfield, Pa.....	40,445	1,192,002	1,182,640

The total tonnage of anthracite coal from all the regions for the week ending Sept. 25, as reported by the several carrying companies, amounted to 664,499 tons, against 576,293 tons in the corresponding week last year, an increase of 58,206 tons. The total amount of anthracite mined for the year is 16,277,706 tons, against 18,852 489 tons for the same period last year, a decrease of 2,574,-783 tons. The quantity of bituminous coal sent to market for the week amounted to 101,309 tons against 48,671 tons in corresponding week last year, an increase of 52,638 tons. The total amount of bituminous mined for the year is 3,168,145 tons against 2,559,629 tons for the corresponding period last year, an increase of 608,876 tons. The total tonnage all kinds of coal for the week is 735,808 tons, against 624,964 tons in corresponding week last year, an increase of 110,844 tons, and the total tonnage for the coal year is 19,445,851 tons against 21,411,758 tons to same date last year, a decrease of 1,965,907 tons. The quantity of coal and coke carried over the Pennsylvania Railroad for the third week of September was 163,272 tons, of which 122,945 tons were coal and 40,327 tons coke. The total tonnage for the year thus far has been 5,071,905 tons of which 3,818,385 tons were coal and 1,253,520 tons coke. These figures embrace all the coal and coke carried over the road east and west. The shipments of bituminous coal from the mines of the Cumberland coal region during the week ended Sept. 25 were 51,-217 tons, and for the year to that date 1,564,224 tons—430,127 tons over the corresponding period of last year. The coal was carried as follows : Baltimore and Ohio Railroad—week 23,410 tons, year 942,136 tons, an increase over 1879, 285,966 tons. Chesapeake and Ohio Canal—week, 23,278 tons ; year 444,486 tons ; increase over 1879, 91,190 tons. Pennsylvania Railroad—week 4,529 tons ; year, 167,602 tons ; increase over 1879, 52,927 tons.—Phil. Ledger, Oct. 4.

Texas and Pacific Railway.

The amount of roadway completed on the Texas and Pacific Railway on the 1st of October was 550 miles. The amount still to be built in order to connect with the Southern Pacific at El Paso is 450 miles. The extension of the Texas and Pacific began to be constructed at Fort Worth about the 1st of April. Since then 105 miles of track have been laid, 250 miles of road graded and the ties for 200 miles more got out and made ready for delivery. The track material for 100 miles more is on its way out. To equip the new road twenty locomotives have been bought and forty contracted for 1,400 cars delivered and 700 box cars and 1,000 flat cars contracted for, all deliverable within the year 1880. Track is being laid at the rate of thirty-three miles per month, and as the road progresses westwardly the earnings increase, as it commands a large scope of country heretofore without transportation facilities. Since June 1 to date the earnings of the completed road have increased $140,000.

A work by Dr. Ernest Engel, entitled "The Age of Steam," has but now been issued from the German Statistical Bureau, and contains some interesting statements, according to one of which there were in the whole world in 1879 about 210,-000 miles of railroad, with 105,000 locomotives, representing a force equal to 30,000,000 horse power. The force of other steam engines in use for various purposes Dr. Engel sets down as at least 13,000,000 horse power.

Denver, Salt Lake and Western Railroad.

A new railroad project dots the chart of Colorado's transportation system ; an enterprise which, as it contains the names of gentlemen associated with the Burlington lines, may be considered as the offspring of that syndicate, which has for months shown its intention to enter this territory and compete sharply for Colorado's rapidly increasing traffic. It has been called "The Denver, Salt Lake and Western Railroad," and, according to articles filed recently with the Secretary of State, proposes to pursue the following route : from Denver proceeding northwest by the most practicable route to the Cache-la-Poudre river at or near Fort Collins ; thence up the valley and through the narrows and canyons of the Cache-la-Poudre, following the main stream to the forks ; thence via the south fork of said river to its headwaters ; thence by the most feasible route westward to the Bear of Yampa river ; thence down the valley and through the several canyons of Bear river, with the privilege to extend the road to and into the Territory of Utah, together with branch lines from the main line of said railroads, starting from the most feasible place thereon, and extending into the counties of Boulder, Jefferson, Gilpin and Clear Creek in said State of Colorado.

The capital stock of the railroad company is set forth as $500,000, divided into 5000 shares of $100 each, and the company is created for fifty years, and for the first year its affairs are to be intrusted to a board of directors, consisting of John S. Cameron, Charles F. Hendre, Edward O. Wolcott, J. W. Blythe and T. S. Howland. The principal office will be in Denver.—[Denver Tribune.

Oregon Pacific Railroad.

The New York Times says that the recently formed Oregon Pacific Railroad Company, which is composed of Eastern capitalists, appears to contemplate no less a scheme than the construction of a new transcontinental route, and then adds :

Not long ago the Oregon Pacific Company absorbed the Willamette Valley and Coast Railroad Company, obtaining all the valuable land grants and tax immunities of the latter, together with the unequaled harbor of Yaquina bay. The Willamette company was organized for the purpose of breaking up the monopoly of the Oregon Railway and Navigation Company, which long has controlled transportation in that State. The Willamette company proposed to construct a road across the entire centre of the State. When absorbed by the new company only ten miles of the Willamette road had been built. At this time the new company has taken all the preliminary steps for the immediate construction of the first 130 miles of the road. It is proposed to go to work at once and finish the line from Corvallis to Yaquina bay, a distance of 60 miles, and to construct 70 miles from Corvallis eastward, the entire 130 miles to be equipped and in running order by September 1, 1881. A line of steamers will then be put on to run from Yaquina bay to San Francisco. Congress, at its last session, made an appropriation to deepen the entrance to this harbor, which is said to be of ample extent to afford shelter to the navies of the world. The intention is to carry the line eastward along the military road through the Sweet Home Valley and Mount Jefferson Pass, claimed to be the only accessible pass in the Cascade range. The eastern terminus is to be Boise City, in Idaho. A branch will run from a point near the intersection of the Crooked, Squaw, and Des Chutes riv-

ers, in a northeasterly direction to Umatilla, on the Columbia river, where connection will be made with the Oregon Railway and Navigation Company's main line. Another branch will run from a point near Silver City southerly to Winnemucca, on the Central Pacific railroad. The length of the main line and branches will be about 600 miles. The early completion of the extensions of the Chicago, Burlington and Quincy, and Chicago and Northwestern lines to Boise City is also looked forward to, thus practically adding two more transcontinental routes to the transportation facilities of the continent.

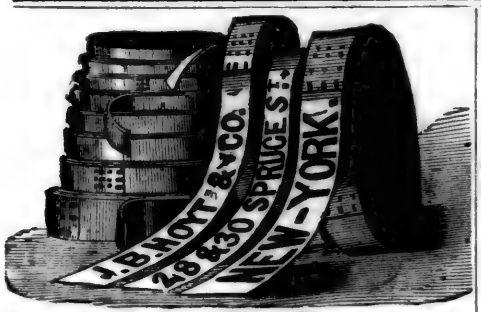
VALENTINES VARNISHES

OUR CLAIMS.

We claim that our Finishing Varnishes are unsurpassed in the following qualities:

1. Uniformity. 3. Fluency. 5. Drying. 7. Fulness. 9. Durability.
2. Paleness. 4. Reliability. 6. Hardening. 8. Brilliancy. 10. Economy.



All know it is easy to make a Varnish that has the single quality of DURABILITY but Varnishes which wear well are generally inferior in color and working quality uncertain in laying, too slow in drying, or lacking in body or lustre, and frequently they possess ALL these defects.

In our "RAILWAY-COACH FINISHING" the ten qualities will be found combined and our other Varnishes are as elastic and durable as is practicable for the work on which they are employed.

Those of our Varnishes which have the greatest durability require time for hardening. They have superior elasticity, and ARE DISTINGUISHED FOR THE EXTENT OF SURFACE THEY WILL COVER, WHICH RENDERS THEM ECONOMICAL.

VALENTINE & COMPANY,

Chicago. NEW YORK. Paris

Patent Stretched and Patent Riveted Short Lap

BELTING.

Our Belts are made from pure Oak Tanned Butts, and of the heart or solid part only. No part of the shoulder being used. Any one not familiar with Belt making can readily detect this by the shortness of the lengths and laps. Long laps are made including the shoulder or thinner and softer part of the Leather, causing the Belt to be, in its enduring qualities, no better than its poorest or thinner parts

Our Belting is warranted to run straight and maintain an even bearing on the pulleys, and sold under the fullest Guarantee.

J. B. HOYT,
D. B. FAYERWEATHER,
HARVEY S. LADEW.

LEATHER BELTING.

Made exclusively from Messrs. J. B. Hoyt & Co.'s Best Oak Butts—shoulders all cut off, only solid leather used—short lengths and short laps—fully warranted.

Rubber Belting and Hose and Packing at lowest prices.

STEPHEN BALLARD & CO.,
16 & 18 Chambers St,
NEW YORK.

PATENT
MINERAL WOOL.

ITS FOREMOST QUALITIES:

CHECKING TRANSMISSION OF HEAT, COLD AIR, SOUND AND ELECTRICITY AS AN AIR-HOLDING MATERIAL, ABSOLUTELY FIRE-PROOF AS A MINERAL—RAT AND VERMIN-PROOF, AND NOT ATTRACTING DAMPNESS, BECAUSE VITREOUS.

Its Manufacture, Composition and Uses in the Construction of Dwellings, etc.

This pamphlet and small sample mailed free.

A. G. DAY,

MANUFACTURER OF

Kerite Insulated Telegraph Wire and Cables

Of all kinds made to order, for Ocean, River, Aerial and Subterranean Lines.

The Kerite covering of these Conductors unlike any other, resists effectually the destructive action of Heat and Moisture, and the corrosive agents either in Earth, Air or Water.

☞ Special orders should state whether the Cable is to be exposed to Earth, Air or Water.

FACTORY—SEYMOUR, CONN. **Office, 120 Broadway, New York.**

NEW YORK, LAKE ERIE & WESTERN RAILWAY.

TO THE TRAVELING PUBLIC.

During the Centennial Season—six months, closing November 10, 1876—the Erie Railway carried almos 3,000,000 passengers, without a single accident to life or limb, or the loss of a piece of baggage.

And for a whole year, the official records of the United States Post-Office Department show the arrivals of Erie Railway trains in New York, on time, to be from 15 to 27 per cent. ahead of competing lines.

Facts well worthy the consideration of travelers.

E. S. BOWEN, General Superintendent.
JNO. N. ABBOTT, General Passenger Agent.

PASSENGER CARS

Of the Finest Finish, as well as every description of CAR WORK, furnished at Short Notice and at Reasonable Prices by the

HARLAN & HOLLINGSWORTH COMPANY, Wilmington, Del.

J. CURLEY,
MANUFACTURER OF ALL KINDS OF CARRIAGES
Fine Work both Heavy and Light a Specialty!

☞ All the latest Styles or Patterns kept in Stock or Works.

MANUFACTORY AND REPOSITORY, Corner Boreum Place and State St., Brooklyn, N. Y.

EAMES VACUUM BRAKE CO.,
RAILWAY TRAIN BRAKES,

P. O. BOX 2,878. SALES OFFICE, 15 GOLD ST., NEW YORK. Represented by THOS. PROSSER & SON.

THE EAMES VACUUM BRAKE is confidently offered as the most efficient, simple, durable and cheapest power Brake in the market. Can be seen in operation upon over fifty roads.

SECOND QUARTO SERIES, VOL. XXXVI., No. 42.] NEW YORK, OCTOBER 16, 1880. [WHOLE No. 2,321, VOL. LIII.

Early History of the New York and Erie Railroad.

The first T rail laid on a railroad in the United States was imported from England by the New York and Erie Railroad Company in 1845; and the first rail of that kind ever made in this country was manufactured for that company in 1846 by the Lackawanna Iron Works, of Harrison, Pa., now the city of Scranton. The recent resignation of W. W. Scranton from the general managership of the Lackawanna Coal and Iron Company, which is the Lackawanna Iron Works of 1846, recalls a series of incidents in the early history of the New York and Erie Railroad and of the iron works, by which the pioneer of trunk railroads in America was saved from bankruptcy and the forfeiture of its franchises to the State of New York, and the struggling iron manufactory was enabled to raise itself from insignificant proportions and impending ruin to be the most wealthy and powerful corporation of its kind in the country.

Work was commenced on the New York and Erie Railroad in 1835, but the great financial revulsion of 1836-7 compelled the suspension of operations. In 1838 the State of New York aided the company by its credit to the amount of $3,000,000. This large sum was expended and only sixty-one miles of railroad were completed up to 1845. The road then extended from Piermont, on the Hudson River, to Otisville, Orange County, on the summit of the Shawangunk Mountains. The original idea of the engineers was that the rails must be laid on piles to have a solid and even foundation. For ninety miles westward from Oswego two lines of posts were actually sunk. This ridiculous proceeding not only absorbed a large portion of the company's funds, but wasted months of valuable time. For years these lines of posts remained standing.

In 1845 the State of New York, anxious to have the great work of connecting the lakes with the ocean by a line of rails completed, once more came to the aid of the company. An act was passed by which the New York and Erie Railroad Company was relieved of the claim of the State against it for the loan of $3,000,000, and such substantial aid was extended that the company was enabled to resume the work of construction with a well filled treasury. The act contained a proviso, however, that the road should be forfeited to the State if on January 1, 1849, it was not in readiness for business between Piermont and Binghamton. The company had four years in which to complete 137 miles of road.

In 1843 George W. Scranton and Selden T. Scranton, of Oxford Furnace, N. J., established a nail factory and rolling mill at Harrison, Pa., then a village of a dozen houses. That portion of the Lackawanna Valley was then almost entirely undeveloped. The Delaware and Hudson Canal Company had opened coal mines in the upper part of the valley, and had founded several villages. Its now famous gravity railroad extended from Archbald, nine miles north of Harrison, to Honesdale, the head of the company's canal. That was the first railroad for actual transportation constructed in the United States. The mining property of the Lackawanna Iron Works was valuable, but the company had a very meager capital and the region was prejudiced against it. The works struggled along for three years, and financial disaster seemed inevitable. In 1846, however, the Scranton Brothers determined to either assure the future by a bold stroke or to go down with the effort. They knew that the Erie Company was obliged to pay $80 a ton for the rails it was importing from England, and that in its straightened circumstances, and in view of the time to which it was limited in finishing the road to Binghamton, it must necessarily obtain iron at cheaper rates and more speedily than the foreign material could be furnished. The brothers resolved to venture on manufacturing the rails at their works. They suggested the idea to a number of capitalists who were deeply interested in the Erie road, and these gentlemen agreed to advance to them $100,000 in order to enable them to buy the necessary machinery, with no security but their word of honor. A contract was made by which the Lackawanna Iron Works agreed to furnish the Erie Company with 12,000 tons of rails at a rate much less than the English iron cost to be delivered at Lackawaxen, Pike County, Pa., during the years 1847-8. It required several months to fit the works with the furnaces and machinery, which were hauled by teams more than sixty miles over the most primative of mountain roads. The first rails were turned out in the latter part of 1846. As fast as the iron was ready it was sent in wagons to Archbald, where it was loaded on the cars of the Delaware and Hudson gravity road. By these it was carried to Honesdale over the Moosic Mountains and transferred to canal boats, which delivered it to the company at Lackawaxen. The first 1,500 tons were taken to Port Jervis, N. Y., by canal, and the track between that place and Otisville, the western terminus, was laid. Everything worked smoothly until it was attempted to carry the road across the Delaware from Port Jervis into Pike County, Pa., where serious trouble arose. It was originally intended that the line should cross into Pennsylvania at the village of Matamoras, nearly opposite Port Jervis, but that route was found to be utterly impracticable. To cut a road-bed along the perpendicular rock boundary of the Delaware on that side for three miles would have required the outlay of millions of dollars and more time than the company had. In anticipation of a crossing at Matamoras, however, the Milford and Matamoras Railroad Company had been chartered by the Pennsylvania Legislature, its purpose being the construction of a line up the Delaware Valley to connect with the New York and Erie at Matamoras. When the Erie Company, therefore, sought to cross at Sawmill Rift, three miles further up the river from Matamoras, it was met with an injunction and the work was stopped. This delay threatened to prove fatal to the completion of the road to Binghamton in the stipulated time. Finally the matter was compromised.

The unfortunate delay in the work made it necessary for the iron company to distribute the iron at the different points along the route, the nearest of which was fifty miles from the works. The rails were hauled by teams over the heavy mountain roads of Northern Pennsylvania to Narrowsburg, Cochecton, Equinunk, Stockport, Deposit and Lanesboro. To some of these points roads had to be cut through the dense forest. Over four hundred mules and horses were required, as many as ten span frequently being attached to one wagon. The rails were simultaneously laid east and west from the points named, and five days before the time for the road's completion to Binghamton had expired the last spike was driven. The event was celebrated in Binghamton on the 28th of December, 1848. Benjamin Loder, then President of the company, delivered an address in the course of which he declared that the energy, enterprise and promptness of George and Selden Scranton had saved the New York and Erie Railroad to the company.

The contract was a profitable one to the iron works, notwithstanding the great expense and la

bor connected with its fulfilment. That contract laid the foundation for the city of Scranton. It led to the building of the Delaware, Lackawanna and Western Railroad and to the Pennsylvania Coal Company's railroad in the Lackawanna Valley and to the great coal development that followed. It brought more than $250,000,000 capital into the valley and made of the tottering Lackawanna Iron Works the rich and powerful Lackawanna Coal and Iron Company, the iron steel and mining industries of which to-day give employment to 3,000 men.

Massachusetts Central Railroad.

The people living in the central portion of the State, through which the Massachusetts Central Railroad was surveyed and partly constructed before the panic of 1873, will be pleased to learn that the enterprise in which they have taken a great interest and invested largely of their means is once more actually upon the way to a successful completion, and that before many months will have passed away they will have an opportunity to enjoy an excursion to Boston over that line.

Mr. N. C. Munson, the contractor for the construction of the entire line, yesterday drove the first spike in the first rail of the new line at Snelling, where the Lowell and Framingham Branch of the Old Colony Railroad crosses the new road. From this point the roadbed being nearly completed eastward to the crossing of the Fitchburg Railroad at Stony Brook, and westward to Coldbrook on the Weir River, the work of laying the rails in both directions will be vigorously pushed forward, as 4000 tons of rails have been purchased and are now being received. With an active prosecution of the uncompleted work between the points mentioned, there is but little doubt that the entire distance from Stony Brook to Coldbrook can been laid with rails before the close of the year. From Stony Brook to the proposed connection with the Lowell Railroad in Cambridge considerable work has been done, but as there is still a large portion of the new line in Waltham, Belmont and Watertown, not yet graded, this portion of the road will not be in running order until next summer. From Coldbrook to Amherst a new line for a large portion of the distance has been adopted, necessitating the abandonment of most of the work done before the suspension in 1873. The work of grading this section, some 30 miles, has recently been sub let by Mr. Munson to Davis and Munson, who will push the work forward vigorously and have this portion of the line ready for the rails next summer. The section extending from Amherst to Northampton has also been recently sub-let to Contractor McClellan of Chicopee, and as a large expenditure has already been made upon the foundations and piers for a bridge to cross the Connecticut, this section should also be ready for the rails next summer. Beyond a reasonable doubt, therefore, the whole line from Boston to Northampton will probably be completed before another year has passed. Upon the section from Amherst through Sunderland and Deerfield to a connection with the Troy and Greenfield, no work has as yet been commenced, though an early subletting of a contract for its execution is expected. Even if this section should not be completed at present, the new road when completed to Northampton would have two connections with the Hoosac Tunnel and Troy and Greenfield Railroad —one via the Connecticut River Railroad to Greenfield and the other via the New Haven and Northampton Railroad's new extension to Shelburne Falls. Both of these routes, however, increase the distance from Boston to the tunnel to such an extent that, compared with its own proposed line, they would not long answer for the through traffic which the managers of the Central Road propose to develop.

The building of the extension of the New Haven and Northampton to Shelburne Falls can scarcely be accounted for, if the managers did not expect that the Massachusetts Central would utilize this route to the Tunnel instead of constructing a shorter line from Amherst.

Capitalists who have been eager to invest in mines and in railroad enterprises in the West and in Mexico have feared for a long time to take hold of this enterprise. At length business men and capitalists have been found who have faith in the enterprise, and who are able to see that the line is completed. The old bonds of the company have been bought up and canceled by the new concern, and sufficient money is left to complete a considerable portion of the proposed line, and there is scarcely a doubt that sufficient capital can be raised to complete the entire line as soon as it is needed, and at rates most advantageous to the stockholders.

The new line will not only open a new competing route from Boston to the Tunnel, but it will promote the development of a section of the State which has failed to keep pace with the adjoining sections, because it has had no railroad facilities.

One feature which promises to add to the success of the Central Road is that an old corporation like the Lowell Railroad, with experienced officers and employes and extensive equipment, at this end of the line has contracted to equip and operate the new road upon its completion. Thus many of the disadvantages of organizing a staff of officers and purchasing new equipment will be avoided.—[Boston Journal, Oct. 7.

Accidents at Railroad Grade Crossings.

The following circular has been issued by the board of railroad commissioners:—

BOSTON, Oct. 6, 1880.

To the President of ——— Railroad,—Dear Sir:—The fearful and increasing number of accidents at grade crossings makes it desirable to call the attention of all railroad managers in this State to the subject. During this railroad year the number of such accidents has been 50, of which 20 were fatal. The numbers last year were 30 and 13; year before last they were 29 and 17. No doubt one cause of the increase has been the increased number of railroad trains run. But, on an investigation of these cases, the board has found reason to believe that due care has not been exercised by managers of railroads as to the duties of flagmen. Of the above named 50 accidents, 23 occurred at stations guarded by gates or flags, and of this number 8 were fatal. It appears that, in some cases, flagmen are obliged or allowed to perform other duties, more or less connected with railroad business, and conflicting with their duties as guardians of the lives of travellers. In other cases too much work and too long hours are required of flagmen, so that perfect and unfailing vigilance cannot always be secured. Again there is sometimes a failure to notify flagmen of of irregular or "wild" trains, and, finally, at some crossings it appears to be the practice to flag some trains and not to flag others. It is hoped that this general circular, in addition to the special recommendations heretofore made, will prevent a repetition of these fatal errors. It is also recommended that more care be exercised in deciding the questions of placing gates or flagmen at dangerous crossings. A recent decision has established as law that the want of an order to station a flagman at a crossing is no defence for a railroad injury to a traveller, if a jury thinks a flagman was needed. And, without such a decision, and without regard to the pecuniary consequences, a due regard to the safety of the public should command, at all places of danger, every precaution that is known to railroad managers.

The Ottawa Official Gazette publishes an order of the British Council announcing that, "from and after September 1, 1880, all British territories and possessions of North America, not already included within the Dominion of Canada, and all islands adjacent to any such territories and possessions shall, with the exception of Newfoundland and its dependencies become part of said Dominion."

Blessing a Railroad.

In the midst of the forest, with hardly any evidence of civilization in sight, save the road itself, its train of cars, and the people who had come to honor the occasion, was performed the ceremony of blessing the St. Lawrence, Lower Laurentides and Saguenay Railway, which is intended to connect Three Rivers with Lake St. John. About 1,200 people, principally from Three Rivers and the surrounding parishes, were present.

The scene of the ceremony was at the present terminus of the road in the parish of St. Tite, beyond the settlement. On a wooden platform hastily erected, and surrounded by his clergy, stood the venerable Bishop, addressing words of lofty eloquence to his hearers, previous to blessing the undertaking; in front of the platform was massed the large assemblage, composed principally of the hardy sons of toil, bareheaded, listening attentively to the words of their prelate; behind lay the iron road with its train of cars, the unconscious agents in all this display, and up and down as far as the eye could reach, stretched the forest, whose foliage, marked with the changing lines of Autumn, was indescribably beautiful—the whole scene bringing one back to the days of early Canadian history.

His Lordship, the Bishop of Three Rivers, began his address with a brief account of the fall of man and the consequences which resulted from it. Man was condemned to make war against nature' to subdue nature to his wants, to wrest from the earth its fruits, and to bring the animal creation under his subjection. Man's life was a continued contest; and when man refused to submit himself to this law of God he degenerated into the savage, and finally became extinct. Thus, in the case of savage tribes refusing to till the earth, they were reduced to warfare against the animals, and in the end disappeared. What had become, he asked, of the savage tribes that formerly occupied this continent? They had refused to bow to the law of God; they had refused to cultivate the soil, and consequently had become extinct. Man was also commanded to occupy the whole earth, and to enable him to fulfill this command he was given the genius of invention by which he could contrive means to bring the very elements into his service. He then referred more particularly to the undertaking under notice, predicted a great future to be developed out of this enterprise, as the large tree sprang from a mustard seed, and in conclusion gave the new line the Angel Raphael as its guardian, that as the angel watched over Tobias on his journey it might equally watch over this road and its passengers. His Lordship then gave the benediction.—[Montreal Gazette, Oct. 2.

The New York and New England Railroad Company's extension to the Hudson River will be opened to Brewster's December 1. Grading to Hopewell Junction, twenty-five miles farther, is well under way. To reach Fishkill on the Hudson from Hopewell Junction thirteen miles of the track of the Newburg, Duchess and Connecticut Railroad may be used, or a new road may be built. There have been some movements looking toward the lease of a portion of the Newburg road by the New York and New England Company. It is a local road, fifty-eight miles long, stocked at $887,850 and bonded for $1,164,000 (incomes). Its gross earnings were last year $164,488, and its net earnings $18,845. The leasing of the Connecticut Western and of some of its connections to the Hudson river has also been talked of.

New York, Saturday, October 16, 1880.

Entered at the Post Office at New York, N. Y., as Second-Class Mail Matter.

NEXT week we shall publish a Counterfeit Coin List.

ALTERATIONS and improvements being made in the tables, which are weekly features of the JOURNAL, necessitate the temporary withdrawal of part of them. The Bond List and the Share List do not appear this week. In the Bond List alterations are desirable, owiug to changes among the roads, consolidations, etc., since our tables were revised. The Share List is naturally corrected at this season of the year, and as this is the time when much of the necessary information comes to us from our correspondents and from the railroads, the table, if published now, could not be as symmetrical and complete as we would wish. The injustice of reporting one road many months in advance of another is manifest, but it would be unavoidable in any other way, than that which we adopt. On these accouuts we withold these two tables until they are perfected and made of greater value than ever before, to accomplish which no efforts will be spared. We have added several important features to the JOURNAL recently and it seems desirable now that some of our tables should appear semi-monthly, monthly and quarterly instead of weekly, thus giving us an opportunity to lay before our readers more information and a greater variety each week. We shall announce the tables as they are to appear from week to week. The table of contents always gives those in the current number, and in future by referring to the files of the JOURNAL any of its tables desired can readily be found, and they will contain as late information as though appearing in each number, as we do not intend to withhold any tables that are of weekly interest. While adding new features to the JOURNAL, our aim is to retain and improve the old ones.

A RECENT decision of the New York Court of Appeals goes farther in the matter of the personal responsibility of bank officials than any American case that we are familiar with. The trustees of a savings bank were held to be liable for their imprudence in building an expensive banking house on which the decline in real estate resulted in considerable loss. The decision is based upon the duty of trustees to conserve their trust and in these days of reckless speculation is timely and full of common sense. Judge Earl says in his decision: "Their project was to buy this corner lot and erect thereon an imposing edifice, to inspire importance, attract attention and thus draw depoeits. It is not legitimate for the trustees of such a bank to seek deposits at the expense of present depositors. * * This was not a case of mere error or mistake of judgment on the part of the trustees, but it was a case of improvidence, of reckless and unreasonable extravagance, in which the trustees failed in that measure of reasonable prudence, care and skill which the law requires." In too many of our savings banks, the trustees consist of men who are not depositors and have no pecuniary interest in the institution. They constitute a close corporation, and have the power to perpetuate themselves without regard to the wishes of the depositors. Judge Earl's decision coming so close upon the Brattleboro' bank failure will again call attention to this matter and we shall be surprised if legislative discussions do not grow out of it. It is lucky for Congressman Tyler that he does not live within Judge Earl's jurisdiction.

Railroad Carelessness.

The railroad accidents in Pennsylvania and Connecticut last week suggest an inquiry into the cause and origin of railroad casualties, which seem to be increasing in number from month to month. By the accident on the Pennsylvania Railroad over a score of lives were lost and many wounded. The story of the accident is as follows:

The first section of Wall's accommodation train, going east from Pittsburg, left the union station at 11:31 P. M., Saturday night, having a large crowd of passengers on board who had been to the city to participate in the closing exercises of the exposition and to witness the democratic demonstration. The back platform was crowded. The first section stopped at the regular station at 28th street, where it was delayed on account of another train which was in the next block. The second section came along at good speed, but owing to the crowds on the back platform of the first section the signal lights were hidden from view, and consequently the engineer of the second section did not see the train ahead of him until it was so near that his train could not be checked in time to arrest the collision, and the engine went crashing into the rear coach of the first section, packed with human beings. Among these unfortunates the engine buried itself to the very car windows, among screaming, suffering men, women and children, mangling all who were in its course. The boiler head of the colliding engine was wrenched off by the shock, and the scalding water and steam poured over the occupants of the car as if bent on completing the horrible work that had gone before. It is impossible to describe the fearful scene that followed. The moans of the dying and wounded and the shrieks of those who had lost friends was frightful. Word was immediately telegraphed to the mayor's office for assistance, and twenty-five policemen, with a full corps of physicians and wagons, were despatched at once to the scene of the disaster, where they were soon busily employed in alleviating the sufferings of the victims and clearing the wreck. The wounded who were unable to care for themselves were carried to the soldiers' hospital, located but a short distance from the accident.

Superintendent Pitcairn said if the rules had not been disobeyed the accident would not have occurred. The train had not yet gone into the block operated by the signal system, and the flagman was under imperative ordors to go back half a mile and flag the following train; he must not wait to be ordered back by the conductor, but go on his own accord. This applied whether the train is in the block or still in the yard limits, as in this case. The flagman and all employes of the trains are old and experienced men, and the officials cannot condemn them until an investigation is had, but the matter will be sifted and the responsibility placed where it belongs. The passengers state that the flagman, whose name is Penrod, did not go back. The orders for the movement of trains is the same in vogue for thirty years, and officials insist that the trainmen and not their superior officers violate the rules. Opinion seems to place the responsibility on Flagman Penrod of the first section. Mr. Pitcairn says the loss by the wreck will not be a thousand dollars, that the run in was not extraordinary, and that the escaping steam was the cause of the fatality. A run in might occur again without the loss of a single life. Several prominent business men called to see Messrs. Pitcairn and Pugh of the Pennsylvania Railroad and stated that they considered that by gross carelessness of some person or persons murder had been committed, and asked that the investigation be thorough. The officials promised that everything possible would be done to fasten the guilt on the proper parties. Coronor hope was also called upon, and stated that all those found implicated would be placed under arrest. The name of the engineer of the second locomotive was Julius Huey, and that of the fireman Rambo. Both are residents of Pittsburg, and escaped uninjured, though they stuck to the engine

when it ploughed through the rear car of the other train.

The accident on the New York and New England Railroad Friday evening was occasioned by a passenger train running to Willimantic meeting an extra freight train. Both trains were running fast. The passenger train had the right of way. There were only six passengers on the train, as through travel to Willimantic naturally takes the express that leaves Hartford 10 minutes before the accommodation, and the accommodation had left all its way travel, having passed its last station previous to reaching Willimantic. The engines came together with a crash. Engineer Charles Kenyon of Hartford and Fireman Thomas Flood of Rockville, who were on the passenger engine, were both killed. Engineer James Forsaythe of Putnam, and Fireman Michael Hurley of Boston on the freight engine were also both killed. Conductor Henry Aldrich of Hartford, who was in charge of the freight train, was terribly scalded and died soon after. The wreck presented a frightful scene of suffering and ruin. None of the passengers were injured but five employes perished and no one knew why except that "some one had blundered." The train of Conductor Henry Aldrich seems to have been responsible for the accident, but as the only two men who knew why it started are dead it is probable that nothing definite will be learned as to the cause of the mistake.

The accident presents a striking similarity in one respect to the great disaster at Wallaston on 6th October, 1878, where one hundred and eighty-six persons were injured, nineteen of them fatally. Immediately after, Charles H. Hartwell, the conductor of the freight train which was run into by a passenger train, was arrested and indicted for manslaughter in causing the death of a passenger. The negligence alleged in the indictment was his failure of duty to send forward a signal of danger, when he ran upon the inward track, leaving the switch thrown out of line. Mr. Hartwell was convicted; but the case was carried to the Supreme Court, on exceptions, and no decision has yet been reached. Negligence or willful carelessness were the cause of both accidents and more than half of the whole number of accidents which occurred in the United States during the last year, resulting in the derailment of trains occurred through the carelessness of the employees or from unexplained causes. If we look at other railroad accidents we shall find that railroad employes are not the only ones who are guilty of carelessness.

Accidents at grade crossings have become so frequent in Massachusetts that the State Board of Railroad Commissioners have issued a circular calling the attention of railroad managers to the increasing number of such accidents, and recommending that more care be exercised in deciding the question of placing gates or flagmen at dangerous crossings. It is startling to learn that nearly fifty such accidents occurred in Massachusetts in one year, and that twenty of them resulted fatally. Should new railroads increase as rapidly in years to come as during the years just gone by, and railroad traffic increase in a like degree this matter will become one of alarming proportions. In one New England town four fatal accidents occurred within the last three months, at or near grade crossings. The writer held an inquest in all the cases and found that in two cases the accident might have been prevented by placing a flagman at the crossing, and that in the other two cases the persons were trespassers and walking upon the track to save themselves a few steps. That railroad managers have been remiss in their requirements of flagmen appears from the statement of the Commissioners, but the public have a plain duty in this matter. The carelessness, or rather recklessness, of travelers is after all the chief cause of grade crossing accidents. One recent case resulted from the determination of a man to creep under a closed gate and to run the risk of being struck in spite of the remonstrance of the gateman. Truly our people must have a keen appreciation of the value of time when in order to save a few steps or a brief space of time they habitually risk a horrible death.

The Shipping Convention.

The sessions of the National Shipping Convention at Boston were closed on Friday evening of last week. The recommendations made by the Convention for the consideration of Congress were briefly as follows: The repeal of the law which requires the advance of three months pay to seamen, and other provisions relating to the employment and discharge of seamen; that American ships be authorized to take out of bond, free of duty, foreign goods when the same are to be used as stores for ships engaged in the foreign trade and sailing to and from Pacific ports; that ships engaged in the foreign trade be exempt from all other taxes than those imposed by Congress; the payment by the government to American lines of steamships proper sums of money for the carrying of mails; a provison for a bounty upon both sail and steam tonnage for a given number of years on all American vessels less than fifteen years of age, engaged in foreign trade; the creation of a new department with a Cabinet officer to be known as the department of commerce; the alteration of laws for the admeasurement of vessels so that only the space available for cargo be measured; the abolishmeut of compulsory pilotage and of the office of United States Shipping Commissioner; the immediate revision of our consular system; the establishment of a special fund for the payment of bounties to American shipowners; the revision of laws so that individual owners in vessels shall be responsible for the debts of vessels only in proportion to such ownership; the changing of laws relative to the carrying of life saving apparatus by passenger carrying vessels so that the requirements shall be uniform for both foreign and American vessels.

The recommendations as given above include the principal work of the convention. The endorsement of these was generally quite unanimous, though upon two or three points, notably that pertaining to the office of Shipping Commissioner, there was extended discussion and a close vote. The convention was undoubtedly made up of the representative shipowners and ship builders and its voice can confidently be considered that of by far the largest portion of those engaged in these important interests, and as such it will have great weight. The convention made itself a permanent organization and the president was requested to appoint a committee to wait upon Congress and urge the enactment of the recommended legislation.

Dividends.

The Panama Railroad Company has declared a quarterly dividend of four per cent, payable Nov. 1.

The Coney Island and Brooklyn Railroad Company have declared a dividend of five per cent, payable Oct. 16.

The Grand Trunk Railway of Canada will pay a dividend of 3 per cent, on the second preferred stock Nov. 1.

The Profile and Franconia Notch Railroad has declared a dividend of 8 per cent for the past year, payable Nov. 1.

The Louisville and Nashville Railroad Company has declared a dividend of one hundred per cent, payable in stock to the stockholders of record on the 13th of November next. The transfer books will be closed on the 13th of November and reopened on the 1st day of December.

The Baltimore and Ohio Railroad Company has declared a semi-annual dividend of 5 per cent on the stock of the Main Stem, payable 1st November next. The transfer books will be closed from 20th October to November 1. This is the first dividend of five per cent that the company has declared since the depression which followed the panic of 1873. The company has also declared a half-yearly dividend of 5 per cent on the stock of the Washington Branch, payable 1st November.

Washington City, Virginia Midland and Great Southern Railroad.

A decree was passed on the 13th of February last by the Circuit Court of Alexandria, Va., at the suit of certain bondholders of this company, for the sale of the several roads owned by it. These embraced the old Orange and Alexandria Railroad, which by consolidation with the Manassas Gap Railroad became the Orange, Alexandria and Manassas Railroad Company, which latter corporation was subsequently consolidated with the Lynchburg and Danville Railroad to form the Washington City, Virginia Midland and Great Southern Railroad Company. These roads constitute a link in the chain of direct railroad communication between this city and the South, the importance of which can readily be appreciated. Default having been made in the payment of principal or interest, or both, of several classes of bonds secured by successive mortgages upon these different roads the decree referred to for the sale of the

roads, and marshaling the different claims and liens of different classes of creditors, was obtained by the concerted action of most of the various bondholders. Exceptions were filed to the decree, and pending the hearing of those exceptions upon appeal to the Virginia Court of Appeals an injunction was obtained staying the sale.

The opinion of the Court of Appeals was delivered by Judge Christian on the 7th inst., which sustains the decree of the lower court, and rejects all of the 17 exceptions taken from that decree except two, one of which relates to the mode adopted by Commissioner Shepherd in computing interest upon certificates issued by the company for interest upon certain bonds, and the other to priority permitted by the court below to certain judgment creditors; and these two exceptions, regarded as unimportant, are remitted to the lower court, which the Court of Appeals deems competent for their determination. It will thus be observed that the decision of the Court of Appeals sustains all the material points in the decree of the lower court ordering the sale of the railroad, franchises and property of the Company, as desired by the creditors, who, for their own protection, are expected to purchase the property at the sale according to the schedule or scheme of reorganization heretofore published and agreed upon.

The Wheeling and Lake Erie Railway, now in course of construction from Wheeling to Huron, Ohio, will pass through Nevarre.

The construction of the Montreal and Champlain Junction Railway, running from Dundee in the county of Huntingdon, and near the American border to Montreal, is being actively prosecuted. Already the track is laid as far as St. Constant, and freight trains have been run over the completed section; the whole line is expected to be in working order by the coming spring.

The Cambridge Branch of the Jefferson, Madison and Indianapolis Railroad has been resurveyed and found to be only 63 instead of 65 miles in length.

Common Law.

U. S. CIRCUIT COURT, D. NEB.

UNION PACIFIC RAILWAY CO. V. B. & M. R. R. CO.

RIGHT OF WAY—CONDEMNATION OF CROSSING FOR ANOTHER RAILROAD.

The right of way of the Union Pacific Railway is subject to the laws of the State of Nebraska respecting the crossing and connecting of railroads, and the condemnation of property for those purposes; it is not the property of the Federal government set apart for its own use.

In the exercise of the power of eminent domain in condemning a right of way, a majority of the persons authorized to make the award have power to decide the same, provided they all act on the matter.

Motion to dissolve injunction restraining respondents from extending their railroad track across that of complainant. The complainant was a corporation created by and organized under the act known as the Pacific Railroad Charter, approved July 1, 1862, and acts amendatory thereof. The defendants were corporations organized under the laws of Nebraska. The complainant owned and operated the Union Pacific Railway, extending from the Missouri River westwardly across the State, and the defendants owned and operated a line from Omaha to Lincoln. The respondants, desiring to extend their track across that of the complainant for the purpose of connecting with the Omaha and Northern Nebraska Railway Company, instituted proceedings under the law of Nebraska, in the proper State court, for the purpose of assessing the damages accruing to the complainant on account of the crossing of its track, and also for the further purpose of designating the point at which said crossing should be made and the manner of crossing. The statute under which these proceedings were instituted is as follows (§113 Gen. Stat. Neb. 195): "Every railroad company shall have power to cross, intersect, join, and unite its railroad with any other railroad before constructed, at any other point on its route, and upon the grounds of such other railroad company, with the necessary turnouts, sidings, and switches, and other conveniences in the furtherance of the object of its connections. And every company whose railroad is, or shall hereafter be, intersected by any new railroad, shall unite with the owners of such new railroad in forming such intersections and connections, and grant the facilities aforesaid; and if the two corporations cannot agree upon the amount of compensation to be made therefor, or the points and manner of such crossings and connections, the same shall be ascertained and determined by commissioners, to be selected as provided in this subdivision." The section referred to as regulating the proceedings is §97, p. 191. It provides for the appointment of six commissioners, and for an appeal from their assessment. Commissioners were appointed in this case as required by the statutes, and, after being qualified, they proceeded in the performance of their duties Their report was signed by only four of their number.

McCRARY J., in delivering the opinion of the court, after stating the facts, said: If the statute is applicable to this case, and has been followed in the condemnation proceedings, the complainant is bound, and has no remedy except the right to contest the question of damages on appeal to the District Court. Counsel for complainant insists that the proceedings in condemnation are void upon several grounds, which will now be considered.

1. It is claimed, that inasmuch as the complainant's franchise is derived from the United States, no State legislation is valid which provides for condemning the right of way for another railroad across its right of way and track. It is now well settled that the right of eminent domain is a right inherent in every government, and that it belongs alike to the States and to the United States, Each, within its own sphere of governmental action, may exercise it. The United States vs. Chicago, 7 How. 158; Kohl. vs. The United States, 91 U. S. 367. Should a case of conflict between the State and federal government arise, the paramount authority of the United States under the Constitution would of course, prevail. Thus, if the United States has, by proper proceedings, condemned and taken land for a fort, arsenal, navy yard or lighthouse, or for a postoffice, custom house, or court house, it would not be in the power of the State, in the exercise of its right of eminent domain, to take the same property. But the present case does not come within this principle. The United States has never condemned the right of way of the Union Pacific Railway, and taken for its own use for public purposes within the meaning of the rule just stated. It has only chartered that company, given it the right to construct and operate a railway, and granted to it the right of way over public lands along its line, together with the right to take private property for the same purpose upon making just compensation. The distinction between this and the condemnation of land under the right of eminent domain for national purposes is too plain to require elaboration. I am clearly of the opinion that the right of way of the Union Pacific Railway is not property of the federal government set apart for its own public use, so as to exempt it from the operation of the law of the State of Nebraska, above quoted, respecting the crossing and connecting of railroads, and the condemnation of property of a corporation acquired under a law of the United States. If, however, it were conceded to be the land of the United States, unless held for governmental purposes, it would, even in that case, be subject to the State's power of eminent domain. Land owned by the United States, as a mere proprietor, and not used for any of the purposes of the national government may be taken by the State, for public use: United States vs. Railroad Bridge Co. 6 McLean, 517. It has been held by the Supreme Court of the United States that the Pacific Railroad is subject to State taxation R. R. Co. vs. Peniston, 18 Wall, 5. It was insisted in that case that the Pacific Railroad was created by Congress for public and national purposes, and that, like a national bank, it was an instrument of the general government, and not subject to State jurisdiction for purposes of taxation. But this position was not sustained. It is difficult to see upon what principle property can be held to be so exclusively within the federal jurisdiction as to be beyond the reach of the State's power of eminent domain, and yet subject to State taxation.—[Chicago Legal News.

It was also held that the statute applied to every corporation operating a railroad within the State and that an award signed by four out of six commissioners was valid.

Legal Notes.

DEED.

A purchaser of land is not effected with constructive notice of a prior unrecorded conveyance by the mere fact that he was one of the subscribing witnesses thereto. Vest vs. Michie, 31 Gratt. 149, p. 722.

GIFT.

S. deposited in a savings bank moneys belonging to her in trust for M. and K., who were her distant relatives. She retained the pass books until death, drawing out only one year's interest, and M. and K. were ignorant of the deposit. Held, that the transaction constituted an effectual trust for their benefit on the death of S. Martin vs. Funk, 75 N. 134, p. 446.

ASSIGNMENT FOR BENEFIT OF CREDITORS.

An assignment for the benefit of creditors authorizing the assignee to "sell and dispose of the property and generally convert the same into money, upon such terms and conditions as in his judgment may appear just and for the interest of all parties interested," is not void upon its face. Brahmstadt vs. McWhirter, 9 Neb. 6, p. 396.

EXEMPTION.

A partnership is not within the language or intendment of the exemption law, and hence none of the property of a partnership is exempt from seizure on execution. White vs. Heffner, 30 La. Ann. 1280, p. 238.

Partnership property is not exempt from execution, before division and settlement of the partnership affairs. Spiro vs. Paxton, 3 Lea, 75 p. 630.

ABATEMENT.

An action by a husband against a carrier of passengers for a loss of services of his wife and expenses in consequence of injuries to her person, resulting from the defendant's negligence, is grounded in tort, but survives as an action for a wrong to the "property, rights or interests of another," within the statute. Cregin vs. Brooklyn Crosstown Railroad Co., 75 N. Y. 192, p. 459.

DAMAGES.

An abutting owner, who does not own the soil of the street, cannot recover for any injury to his freehold resulting from the presence of a steam railway in the street, but only for damages resulting from such misconduct in its management as amounts to a nuisance, as leaving cars standing an unreasonable time, unnecessary noises and dangerous speed. Grand Rapids and Indiana R. R. Co. vs. Heisel, 38 Mich. 62, p. 306.

ATTORNEY AND CLIENT.

An agreement between attorney and client, for the attorney's compensation for services rendered, will be jealously scrutinized, and will not be supported without clear proof on the part of the attorney that it is fair and reasonable. Dickinson vs. Bradford, 59 Ala. 581, p. 23.

The contract of an attorney for services as such before a department of government or a legislative body is valid, but for lobby services is void, and where it is for both, the entire contract is vitiated. McBratney vs. Chandler, 22 Kans. 692, p. 213.

CONTRACT.

A note written and dated in Maine, but signed in Massachusetts by the wife of a citizen of that State, as surety for her husband, and returned by mail to the payee in Maine, is a Maine contract, and is enforceable in Maine although void by the laws of Massachusetts. Bell vs. Packard, 69 Me. 105, p. 251.

Where a bank discounted a note, its officers knowing that the proceeds were to be used for an unlawful purpose, but not intending to aid such purpose, the note is not invalid. Henderson vs. Waggoner, 2 Lea, 133, p. 591.

EVIDENCE.

In an action on a policy of insurance on the life of one for the benefit of another, the declarations of the insured, before or after the insurance, are not competent evidence, unless part of the res gestæ. Mobile Life Insurance Co. vs. Morris, 8 Lea, 101, p. 631.

An instrument in this form: "Received of A, $500 due on demand," is open to parol explanation of its consideration, to show that it was intended as a mere receipt, De Lavallette vs. Wendt, 75 N. Y. 579, p. 434.

In the case of a mother, aged sixty-nine years, her son-in-law, aged forty-five, and his two children, aged respectively 10 and 7 years, who all perish in the same shipwreck, there is no presumption of survivorship. Newell vs. Nichols, 75 N. Y. 78, p. 424.

INSURANCE.

Where, in a contract of insurance which covers a storehouse and the goods therein, it it stipulated that should the assured subsequently take out a policy in any other company the assurers should receive notice of it on pain of forfeiting their policy, a subsequent assurance of the house or the goods in another company, without notice to the assurers, will work the forfeiture of the contract with them, whether the subsequent contract was legally enforceable or not. Allen vs. Merchants' Mutual Ins. Co., 30 La. Ann. 1386, p. 243.

A policy of fire insurance conditioned to be void for over valuation is avoided by any substantial over-valuation, whether fraudulent or innocent. Boutelle vs. Westchester Fire Ins. Co., 51 Vt. 4, p. 666.

From Thirty First American Reports, Weed, Parson & Co., Albany.

CARRIER.

The last of several common carriers, forming a connecting line, cannot be held for the negligent loss of goods by a prior carrier of the same line. Lowenbury vs. Jones, 56 Miss. 688, p. 379.

A stipulation in a bill of lading given by a common carrier, that in case any claim for damage should arise for the loss of articles mentioned in the receipt while in transit or before delivery, the extent of such damage or loss shall be adjusted before removal from the station, and claim there for made in thirty days to a "trace agent" of the carrier is an unreasonable provision which the courts will not uphold. Capehart vs. Seaboard and Roanoke Railroad Co., 81 N. C. 438, p. 505.

Where goods, specially accepted by a common carrier for transportation, are lost or injured, the burden of proof is for the carrier to show that the loss or injury was within the terms of the exception, and that he was not negligent. Shriver vs. Sioux City and St. Paul Railroad Co., 24 Minn. 506, p. 353.

If a carrier of passengers purchases his vehicles from reputable manufacturers, giving them such examination as is practicable and usual among prudent carriers using similar vehicles, he is not responsible for defects not discoverable on such examination, although they might have been discovered in the manufacturing. Grand Rapids and Indiana Railroad Co. vs. Huntley, 38 Mich. 537, p. 321.

Personal.

—Mr. Cornelius Vanderbilt and family arrived from Liverpool this week.

—John D. McDonald has the contract for the construction of the Detroit, Marquette and Mackinaw Railroad.

—Mr. Nathaniel White, who died at Concord, N. H. last Saturday, was one of the two founders of the United States and Canada Express.

—Mr. H. C. Townsend principal examiner in the Patent Office, has resigned, intending to begin the practice of patent law in New York.

—Sir Alexander Galt, the Canadian Minister at London is in New York for a few days, previous to returning to Ottawa and from there sailing for England.

—James S. Merrill, Assistant Superintendent at Cincinnati of the Pullman Palace Car Company, has been appointed Superintendent of the Baltimore and Ohio sleeping car service.

—Capt. Jas. B. Eads, the projector of a ship-railroad across the Isthmus came to New York from the west last week, for the purpose of conferring with capitalists and persons interested in the enterprise.

—Mr. John S. Harberger who died at Plainfield, N. J., last week, forty years ago was a fellow clerk in the New York branch of the old United States Bank with James M. Morrison, Henry F. Vail and George W. Duer, who all became presidents of New York banks. Mr. Harberger died as president of the Manhattan Bank—the old Aaron Burr water works bank—which he entered in 1842 and in which he had previously been assistant cashier and cashier.

—Mr. Cyrus W. Field is the recipient of a compliment of the most pleasant and cordial nature from a number of his neighbors and personal friends, who give a dinner in his honor at Delmonicos' on the evening of the 26th, desiring to express to him their best wishes on the eve of his departure for a tour around the world. Among the promoters of the entertainment are Mr. Jackson S. Schultz, Secretary Evarts, Consul-General Archibald, Chief-Justice Daly, ex-Judge Henry Hilton, Mr. Wm. M. Fleiss, Mr. John Paton, Mr. Wm. Libbey, Mr. James McCreery, Mayor Cooper, Mr. Samuel D. Babcock, Mr. Abram S. Hewitt and Colonel Henry G. Stebbins.

At the recent meeting of the directors of the Northern Pacific Railroad Company, held in New York, it was decided to build the eastern extension from Duluth or the junction to Sault Ste Marie at as early a period as possible. The work of locating the route will probably begin as soon as the details and connections between the several companies comprising the chain of roads that are to form the through line can be settled. For this purpose a committee was appointed to which was delegated the power to arrange and complete plans for the work, and also to consider and decide upon all questions of a local nature. The committee met and organized in Boston on the 18th inst. It is composed of the following gentlemen: B. P. Cheeney of the N. P. R. R., chairman; Charles L. Colby, W. C. R. R.; J. L. Stackpole, M. H. and O. R. R.; W. M. Banning, M. and O. R. R.; James McMillen, M. and Mac. R. R.

Latest Railroad Earnings.

The following are the latest railroad earnings reported:

	1879.	1880.
Hannibal and St. Joseph—		
First week of October	$53,698	$54,062
January 1 to October 7	1,364,910	1,862,066
Denver and Rio Grande—		
First week of October	$30,414	$106,576
January 1 to Oct. 7	856,635	2,328,116
St. Louis, Iron Mt. and Southern—		
First week of October	$180,146	$175,800
January 1 to Oct. 8	3,435,799	4,454,209
Chesapeake and Ohio—		
Month of September	$222,601	$240,628
January 1 to September 30	1,424,489	1,988,797
Missouri, Kansas and Texas—		
First week in October	$74,595	$89,260
January 1 to Oct. 7	2,263,162	3,115,030
Wabash, St. Louis and Pacific—		
First week in October	$244,610	$316,000
January 1 to Oct. 7	6,312,639	9,057,398
Louisville and Nashville—		
First week in October	$126,800	$229,000
July 1 to Oct. 7	1,517,009	2,642,900
St. Louis and San Francisco—		
First week in October	$48,100	$70,400
January 1 to Oct. 7	1,075,100	1,946,400
Grand Trunk—		
Week ending Oct. 2	$210,817	$226,509
January 1 to Oct 2	6,410,872	7,700,685
New York, Lake Erie and Western—		
Month of September	$1,492,797	$1,799,800
Year ending Sept. 30	15,942,022	18,700,000
Texas and Pacific—		
Month of September	$240,361	$264,084
Lake Erie and Western—		
Month of September	$68,182	$109,852
Great Western of Canada—		
Week ending Oct. 1	$114,229	$126,084
Little Rock and Ft. Smith—		
Month of September	$32,578	$48,193
Northern Pacific—		
First week of October	$71,000	$97,000
January 1 to Oct. 7	1,454,386	1,783,389
Kansas City, Ft. Scott and Gulf—		
Third week of September	$18,964	$21,803
January 1 to Sept. 21	578,174	777,845
Kansas City, Law. and So.—		
Third week of Sept	$10,838	$18,474
January 1 to Sept. 21	326,723	506,562
Oregon Railway and Nav. Co.—		
Month of September	$196,117	$270,000
Chicago, Milwaukee and St. Paul—		
First week in October	$273,358	$338,000
January 4 to Oct. 7	6,834,231	9,059,000
International and Gt. Northern—		
First week in October	$39,647	$55,155
January 1 to October 7	1,123,927	1,228,604

Mr. Devereux and the directors of the C. C. C. & I. Railroad, with the directors of the Cincinnati, Sandusky and Cleveland road, went over the latter road yesterday, and are negotiating for its lease. The annual report of the Sandusky road, which will appear in a few days, it is said shows net earnings for the year of about $300,000 on equivalent of about 2½ per cent of the stock.

The United States Circuit Court, Judge Low, has enjoined the Chicago, Burlington and Quincy Railroad from trespassing upon the surveyed line of the Iowa, Missouri and Nebraska Railroad, and from hereafter interfering with their extension. Contracts to build the extension of the Iowa, Missouri and Nebraska Railroad have been let.

Imports of Dry Goods at New York.

The imports of foreign dry goods at New York for the month of September, were :

ENTERED FOR CONSUMPTION.

The Chicago, Burlington and Quincy Railroad has awarded the contracts for the extension of its Mt Ayr branch from Bethany to Albany, 17½ miles. This connection will connect the Burlington with its newly acquired St. Joseph and Des Moines narrow-gauge road, and gives it a new and short freight line to St. Joseph and the other Missouri river points. The St. Joseph and Des Moines, which is fifty miles long, runs from St. Joseph to Albany. It is the intention of the Burlington to make the narrow-gauge road a standard one as soon as possible, so as to secure another through route of uniform gauge from Chicago to St Joseph, and via the Kansas City, St. Joseph and Council Bluffs, from that point to Kansas City.

Commerce of New York.

The foreign imports at New York for the month of September, 1880, are officially stated as follows :

	1879.	1880.
Entered for consump'n.	$16,809 325	$17,495 330
Do. for warehousing....	4,815,222	7,148,519
Free goods	9,139,245	10,162,197
Specie and bullion....	27,482,179	18,850,020
Total entered at port..	$57,745,971	$53 651,066
Withdrawn fr.wareh'use	7,699,112	10,648,846

The foreign imports at New York for nine months from January 1, were :

	1879.	1880.
Entered for consump'n	$117,239,777	$182,299,102
Do. for warehousing..	53,699,602	93,292,898
Free goods.....	66,862,351	62,917,838
Specie and bullion	40,199,989	83,510,882
Total entered at port..	$278,001,719	$402 020,220
Withdrawn fr. wareh'se	50,287,507	68,428,532

The duties received at New York for the nine months ending with September, were :

	1879.	1880.
January	$7,655,552 67	$11,960,677 78
February	8,229,362 06	12,254,602 24
March.....	9,320,695 68	14,469,557 65
April.....	8,184,797 88	11,901,071 43
May	7,577,233 93	9,752,773 54
June	7,198,779 44	10,699,840 52
July	9,329,895 17	13,360,394 37
August	10,562,138 82	14,492,861 87
September	11,790,902 26	12,856,636 10
Total..	$79,859,857 91	$111,747,915 50

The exports from New York to foreign ports in the month of September, were :

	1879.	1880.
Domestic produce.....	$35,774,116	$36,785,577
Foreign free goods.....	73,729	172,919
Do. dutiable.....	349,125	518,595
Specie and bullion.....	515,261	244,765
Total exports	$36,712,231	$37,721,856
Do. exclusive of specie .	36,196,970	37,477,091

The exports from New York to foreign ports for nine months from January 1, were :

	1879.	1880.
Domestic produce....	$249,824,861	$302,587 820
Foreign free goods...	1,634,381	1,947,027
Do. dutiable.....	3,421,789	3,555,295
Specie and bullion....	12,991,579	5,824,766
Total exports....	$267,872,610	$313,914,918
Do. exclusive of specie	254 881,031	308,090,142

Colonel George N. Nettleton, general manager of the Fort Scott and Gulf Railroad, to which corporation the Springfield and Western Missouri road was sold, is making arrangements for immediate work on the Springfield end of the Springfield and Western Missouri road. He says that the cars will be running between Springfield and Fort Scott by the first of January next.

Steel rails for a number of miles are being laid on the Boston, Concord and Montreal Railroad north of Warren Summit. A considerable quantity had been previously laid south, some at intervals of about twenty miles.

American Railroad Journal.

Financial and Commercial Review.

THURSDAY EVENING, October 14, 1880.

The money market continues very easy at 2@3 per cent for call loans, 3@4 per cent for time loans, and 4½@5½ per cent for prime mercantile paper.

The market for foreign exchange is dull but strong and the leading drawers of sterling have advanced their posted rates to 4.82½@4.85. The actual rates are 4.81⅛@4.81¾ and 4.84@¼. Cable transfers are 4.84½@4.84¾, and prime commercial bills are 4.80¼@4.80¾.

The proposals to sell bonds to the Government on Wednesday aggregated $4,990,100, of which the Secretary of the Treasury accepted $2,500,000 at 102.55 to 102.59 for 6s of 1880, 104.55 for 6s of 1881, and 102.55 to 102.67 for 5s of 1881.

A carefully prepared estimate of the amount of gold and silver coin in the country October 1, 1880, has been made by the Director of the Mint. The estimate is based upon the amounts in the country June 30, 1879, and shows an increase since that date of $83,390,305 in gold coin, and $37,748,350 in silver coin. This increase is said to be from coinage and import. The total amounts estimated as in the country October 1, 1880, are $369,881,003 gold and $149,799,335 silver. Of these amounts there are $67,204,293 of gold in the Treasury and $302,676,709 in circulation or held by banks, and $72,454,600 silver in the Treasury and $77,344,735 in circulation. In addition, the Treasury holds $68,040,540 in gold bullion, and $5,557,759 in silver bullion, which

the Mints are turning into coin as rapidly as their facilities will admit. This is a larger amount of specie than has ever before been in the country. The increase of gold bullion is from imports of foreign gold during the past year.

The closing quotations on Thursday were: American Union Telegraph, 62¼@62½; Am. Dist. Tel., 74@75¼; Atlantic and Pacific Telegraph, 41½@41⅝; Canada Southern, 63½@64; Central of New Jersey 75⅝@75¾; Central Pacific, 72¾@73¼; Chicago and Northwestern, 112⅝@112¾; do. pref., 133@134; Chicago, Burlington and Quincy, 139¼@139½; Chicago and Alton, 113½@114½; do. pref., 125@—; Chicago, Milwaukee and St. Paul, 97⅛@97¼; do. pref., 114¼@114½; Chicago, Rock Island and Pacific, 117½@118; Chicago, St. Louis, and New Orleans, 36½@38; Cleveland, Columbus, Cincinnati and Indianapolis, 72@73; Columbus, Chicago and Indiana Central, 18⅝@18¾; Delaware and Hudson Canal, 85½@85¾; Delaware, Lackawanna and Western, 93⅜@93½; Hannibal and St. Joseph, 39⅝@39⅞; do., pref., 83½@83⅝; Illinois Central, 118¼@118½; Lake Erie and Western, 32@32½; Lake Shore and Michigan Southern, 111¼@111⅜; Louisville and Nashville, 158½@160½; Morris and Essex, 113@113½; Manhattan Elevated, 34½@34⅞; Metropolitan Elevated, 98½@98¾; Michigan Central, 101½@101¾; New York Elevated, 113@113½; New York Central and Hudson River, 131¾@132½; New York, Lake Erie and Western, 42⅛@42¼; do. pref., 73@73½; New York, Ontario and Western, 23½@23⅝; Northern Pacific, 29@29¼; do. pref., 58@58¾; Ohio and Miss., 34⅝@34⅞; do. pref., 76@76¾; Pacific Mail, 41⅞@42; Philadelphia and Reading, 32¾@32⅞; St. Louis and San Francisco. 34@34½; do. pref., 45@45½; do. 1st pref., 74@74½; St. Louis, Iron Mountain and Southern, 51⅛@51¼; St. Louis, Alton and Terre Haute, 19¾@21; do. pref., —@79; Union Pacific, 91¼@91½; Western Union Telegraph, 101½@101⅝; Wabash, St. Louis and Pacific, 38¼@38⅜; do. pref., 70½@70¾.

The following quotations of sales of Railway and other securities, for the week, are in addition to those given elsewhere in our columns:

Illinois Central Railroad.

During the month of September the traffic on the lines operated by this company was :

In Illinois	$625,709
In Iowa (Leased Lines)	171,523
Total	$797,232

The traffic for the same month in 1879, on the same mileage, was :

In Illinois	$582,350
In Iowa (Leased Lines)	153,715
Total	$736,065

During Sept., 1880, the Land Sales were 2,689.71 acres for $17,913 26, and the cash collected on Land Contracts was $12,947 14.

New York, October 11th, 1880.

L. A. Catlin, Secretary.

The receivers of the Philadelphia and Reading Railroad Company will pay on the 9th of November one-half of the July coupons of the general mortgage bonds of said company, returning the coupons to the holders stamped "half paid." They will also pay on the same date the entire July coupon of the general mortgage deferred sterling scrip. The receivers have also ordered the payment on Oct. 25 of $200,000 additional, making, with previously ordered payments, a total of $600,000 out of the $1,000,000 of receiver's certificates issued under the order of court of May 27, 1880.

The Indianapolis Journal learns from a source seemingly reliable that the Pennsylvania Company has secured stock enough of the Terre Haute and Indianapolis Railroad to give it control of the property. The portion of the line between Terre Haute and St. Louis has been under their control virtually since built. D. W. Caldwell has been appointed General Manager of the Line.

New York Central and Hudson River Railroad.

The following is a comparative statement of the earnings of the New York Central and Hudson River Railroad for the month of September 1879 and 1880:

	1879.	1888.
Passengers	$640,069 77	$771,219 00
Freight	1,810,783 72	1,771,089 92
Miscellaneous	471,522 70	458,317 96
Totals	$2,922,376 19	$3,000,626 88

—showing an increase for the month of $78,250 69.

The earnings monthly for the fiscal years ending September 30, 1879 and 1880, were as follows:

October	$2,771,203 61	$2 898,586 19
November	2,567 318 47	2,801,835 04
December	2,237,265 30	2,846,216 37
January	2,024 811 99	2,598,612 75
February	2 210,304 17	2,817,230 80
March	2,474,392 22	2,854,834 78
April	2,214,626 15	2,782,324 58
May	2,211,010 69	2,540,997 52
June	2,022,823 28	2,653,477 42
July	2,194,422 71	2,863,316 41
August	2,546,028 82	3,022,854 54
September	2,922,396 19	3,000,626 88
Totals	$28,396,583 60	$33,175,913 28

—showing an increase for the twelve months of $4,779,329 63.

Twelve hundred tons of iron rails arrived at Baltimore last week for the Baltimore and Cumberland Valley railroad extension from Waynesboro', via Chambersburg, to Shippensburg, Pa., twenty-seven miles. This importation, which is about half what is required, will be followed by a like quantity now shipped and being shipped by two other steamers, sufficient to complete the entire line, the grading of which is being energetically prosecuted. The contractors for the construction of the road are John and James Humbird, of Cumberland, Md.

One of the longest, if not the longest, narrow-gauge roads in the country is the Utah and Northern, which extends north from Ogden through Idaho across the Rocky mountains into Montana. It is now open for three hundred and thirty miles, and before the end of the season will reach a point three hundred and sixty miles from Ogden. The officers of the road report its business to be in every way satisfactory, and the people along the route speak in the highest terms of its equipment and management.

The extension of the Lexington and Big Sandy railroad, from Huntington, West Virginia, to Ashland, Kentucky, was completed on the 8th inst. There remains now but a short gap to be filled between the Rush coal mines and Mt. Sterling, until the Chesapeake and Ohio railway will have direct Western rail connections.

The Supreme Court of New York has just rendered a decision to the effect that he who sells diseased cattle forfeits the pay for them, and is liable in damages for the spread of the disease.

Work on the Napanee, Tamworth and Quebec Railway will be commenced immediately. A committee has been appointed to engage engineers to locate the line, draw plans, etc.

Cincinnati Southern Railroad.

Hon. Alex. Ferguson, a member of the Board of Trustees of the Cincinnati Southern Railroad, and Attorney for the Trustees, has submitted a form for the new lease of the road. It contemplates a term of 25 years. The rents are to be paid quarterly, and consist of a percentage of the gross earnings. The lessees are to keep the road in repair. Keep it well stocked, and are to stand good for all damages that may arise out of the management or operation of the road. In case of destruction of certain bridges by tornado or flood, the Trustees are to restore them. If, at the expiration of 25 years, the lessees should not become their own successors, it is provided that their rolling and operating stock shall be appraised in a specified manner and taken at such appraisement by whoever succeeds them. The matter is now before the Trustees for their action, and if approved bids will be invited.

The earnings of the Chesapeake and Ohio Railway for the month of September, 1880, were $240,628 32, against $222,601 26 for the month of September, 1879, an increase of $18,027 06. For the first nine months of 1880 the earnings were $1,988,797 26, against $1,424,489 04 for the first nine months of 1879, an increase of $564,808 22.

The earnings of the Central Pacific Railroad Company for the month of September, 1880, were $1,957,000, against $1,649,429 for the month of September, 1879, an increase of $307,571. For the first nine months of 1880, the earnings were $14,106,694, against $12,520,129 for the corresponding period of the previous year, an increase of $1,586,565.

The Denver and Rio Grande Railway Company has announced that it will give immediate work to 5000 laborers at the rate of $1 25 to $2 per day and board. The men are needed for extensions which this company is constructing in six different directions, and which will require the employment of a large force for at least two years.

Mr. A. E. Tonzatin, general manager of the Burlington and Missouri River Railroad in Nebraska, announces the extension of his road to Harbine Station, Nebraska. This station has been opened for business. The distance from Red Cloud is forty-one miles.

The Government of Nicaragua has approved the contract entered into by their representative in New York with the president of the South American Cable Company for the laying of their cable in the waters of Nicaragua, in the Pacific, and the connecting of the same with her shores.

According to a notice appearing in the Quebec Official Gazette, the Levis and Kennebec Railway will be sold by the sheriff, on the 17th prox., under a judgment in favor of the Wason Manufacturing Company of Springfield, Mass.

The new location of the Massachusetts Central Railroad in the town of Belmont has been approved by the Railroad Commissioners. The new location is near and parallel with the track of the Fitchburg Railroad.

RAILROAD AND CANAL DIVIDEND STATEMENT.

Showing the amount of Stock Outstanding, the Dividend Periods and the date of last Dividend.

Marked thus (*) are leased roads.	Stock outstanding.	Dividend Periods.	Last Dividend Payable.

The Kentucky Railroad Commissioners, who have been in session in Frankfort since September 1, having under consideration the valuation of every species of railroad property in the State, have found over 1,500 miles of railroad in the State subject to taxation, and found them all well equipped and in good condition as to their earnings. The increased valuation of railroad property over last year will amount to $8,500,000, besides $1,500,000 worth of property that was not assessed last year. This will bring the State over $40,000 per annum additional revenue.

The Coal Trade.

The leading coal carrying companies make the following reports of their tonnage for the week ending October 2, and for the year to the same date, compared with their respective amounts carried to the same time last year:

	Week.	1880.	1879.
Reading Railroad	165 589	5,694,466	6,638,928
Schuylkill Canal	22,078	869,726	741,923
Lehigh Valley	92,068	3.658,542	3,657,542
Del., Lack. & Western.	66,514	2,527,424	2,794 245
Shamokin Valley	25,185	640,790	683,484
Central New Jersey.	103,955	2,694,231	2,968,856
United R. R. of New Jersey	26,565	832,802	645,696
Pennsylvania Coal	26,212	809,123	1,057.409
Delaware and Hudson	53,466	2,180,421	2,518,299
Huntingdon & Broad Top Mt.	6,428	329,731	232 689
Penn. and New York.	17,747	897,858	987,124
Clearfield, Pa.	41,613	1,233,615	1,174,995

The total tonnage of anthracite coal from all the regions for the week ending October 2, as reported by the several carrying companies, amounted to 526,194 tons, against 590,179 tons in the corresponding week last year, a decrease of 63,985 tons. The total amount of anthracite mined for the year is 16,803,904 tons, against 19,442,666 tons for the same period last year, a decrease of 2,638,762 tons. The quantity of bituminous coal sent to market for the week amounted to 100,848 tons, against 62,328 tons in corresponding week last year, an increase of 38,015 tons. The total amount of bituminous mined for the year is 8,268,485 tons against 2,624,073 tons for the corresponding period last year, an increase of 644,112 tons. The total tonnage all kinds of coal for the week is 626,588 tons, against 652,507 tons in corresponding week last year, a decrease of 25,970 tons, and the total tonnage for the coal year is 20,072,389 tons against 22,066,739 tons to same date last year, a decrease of 1,994,350 tons. The quantity of coal and coke carried over the Pennsylvania Railroad for the third week of September was 163,272 tons, of which 122,945 tons were coal and 40,327 tons coke. The total tonnage for the year thus far has been 5,071,905 tons of which 3,818,385 tons were coal and 1,253,520 tons coke. These figures embrace all the coal and coke carried over the road east and west. The shipments of bituminous coal from the mines of the Cumberland coal region during the week ended Oct. 2 were 51,010 tons, and for the year 1,605,285 tons—an increase of 476,878 tons as compared with the corresponding period of last year. The coal was carried as follows: Baltimore and Ohio Railroad—week 24,099 tons, year 966,235 tons, an increase over 1879, 305,805 tons. Chesapeake and Ohio Canal—week, 22,310 tons; year 466,796 tons; increase over 1879, 113,500 tons. Pennsylvania Railroad—week 4,602 tons; year, 172,203 tons; increase over 1879, 57,573 tons. The total tonnage of the Reading Railroad for the week ending last Saturday, October 9, was 96,500 tons, of which 20,500 tons were sent to Port Richmond, and 43,000 tons shipped from there. —Phil. Ledger, Oct. 11.

It is said that the net receipts of the Reading Railroad and the Reading Coal and Iron Company for the month of September, after charging up all rentals, exceeds $1,200,000. Out of this the Receivers have concluded to pay, on Oct. 5, the sum of $100,000 on account of the money borrowed by them, for which certificates were issued. The loan was $1,000,000, to pay the interest on the consolidated mortgage bonds then falling due and the wages of the railroad employes. A further payment of $200,000, it is said, will be made on the same account.

The last rail of the gap between Holgate and Grand Rapids, on the Toledo, Delphos and Burlington Railroad, was put down on Sunday, giving a continuous line from Toledo to Warren, a distance of 175 miles. From Warren the track is laid to Marion, a distance of eighteen miles, thus increasing the length of the line to 193 miles. From Marion to St. Louis a large portion of the road is completed, and nearly the whole of the remaining gap not yet completed is under contract and work is being pushed as rapidly as possible. On those portions of the line already completed, freight and passenger business has already opened out very brisk. Twenty-four new engines have been ordered, part of which have arrived and are in service, and the others will be received in a few days. New freight cars are also being received every week. A fine equipment of passenger coaches has been ordered by the company, and will be received soon. This will give, within a few weeks a through line between Toledo and St. Louis, and it is thought that it will eventually be converted into a standard gauge, as it is noticeable that full sized ties are being put down. A branch of the road, being built to join the Dayton, Covington and Toledo narrow-gauge, will give a through line to Cincinnati and the narrow-gauge system of southern Ohio and Indiana.

It has been definitely determined to extend the Shenandoah Valley railroad north from Hagerstown, Md., to Harrisburg, Pa. It will run parallel to the Cumberland Valley Railroad, and become a competing line. At Harrisburg it will connect with roads leading directly to New York and Philadelphia.

Track-layers are working in both directions east and west, on the Detroit, Butler and Pacific Road. The laying of rails began this week at Romulus Station. The roadbed is all graded. Work will also soon be begun at Butler, and as soon as the iron arrives track-laying will begin at Grand Trunk Junction.

The extension of the Bell's Gap Railroad from Lloydsville, Cambria county, to Coalport, Clearfield county, Penn., will be completed as far as Glasgow, which is fully half the distance, within the next ten or twelve days, and the other half before thd winter fairly sets in.

The directors of the Gold and Stock Exchange Telegraph Co., recently elected, are: Norvin Green, Tracy R. Edson, James H. Barker, Augustus Schell, Anson Stager, William M. Bliss, George B. Prescott, James O. Green, Hamilton McK. Twombly and Samuel F. Barger.

The Toledo, Peoria and Warsaw, and the Missouri, Iowa and Nebraska Railroads have ceased to exist as independent corporations, and will hereafter be known as the Peoria and Iowa Division of the Wabash, St. Louis and Pacific Railway Company.

Fourteen bids were received and opened on Thursday of last week for the construction of the extension of the Mackinaw branch of the Michigan Central railroad from Gaylord, its present terminus, to Cheboygan, a distance of 50 miles,

A railroad corporation has been formed, to be called the Eastern Junction, Broad Sound Pier and Point Shirley Railroad Company. The road will commence at a point on the Eastern (Mass.) Railroad in Revere, near Beach street, and extend to Broad Sound Point, so called, through a portion of Revere, thence along a line of the ocean, through a portion of Winthrop to Point Shirley. The length of the road will be about four miles, and its gauge 4 feet 8½ inches. The capital stock of the company is to be $40,000.

DIVIDEND NOTICE.

THE LOUISVILLE AND NASHVILLE RAILROAD COMPANY has declared a dividend upon its capital stock of ONE HUNDRED PER CENT, payable in stock to the stockholders of record on the 13th November, 1880, and intend to increase the number of its shares of capital stock to that extent and for that object; and further notice is hereby given that the transfer-books of this company will be closed on the 13th November, and reopened on the 1st day of December, 1880. W. RANNEY, Secretary.
New York, Oct. 13, 1880.

Its location, in the PORT of NEW YORK, is most favorable for shipments, and its CARS, CONSTRUCTED in SECTIONS, may be ENTIRELY COMPLETED before being packed for transportation.

VALENTINES VARNISHES

OUR CLAIMS.

We claim that our Finishing Varnishes are unsurpassed in the following qualities:

1. Uniformity. 2. Paleness. 3. Fluency. 4. Reliability. 5. Drying. 6. Hardening. 7. Fulness. 8. Brilliancy. 9. Durability. 10. Economy.

All know it is easy to make a Varnish that has the single quality of DURABILITY but Varnishes which wear well are generally inferior in color and working quality uncertain in laying, too slow in drying, or lacking in body or lustre, and frequently they possess ALL these defects.

In our "RAILWAY-COACH FINISHING" the ten qualities will be found combined and our other Varnishes are as elastic and durable as is practicable for the work on which they are employed.

Those of our Varnishes which have the greatest durability require time for hardening. They have superior elasticity, and ARE DISTINGUISHED FOR THE EXTENT OF SURFACE THEY WILL COVER, WHICH RENDERS THEM ECONOMICAL.

VALENTINE & COMPANY,

Chicago. NEW YORK. Paris.

Patent Stretched and Patent Riveted Short Lap

BELTING.

Our Belts are made from pure Oak Tanned Butts, and of the heart or solid part only. No part of the shoulder being used. Any one not familiar with Belt making can readily detect this by the shortness of the lengths and laps. Long laps are made including the shoulder or thinner and softer part of the Leather, causing the Belt to be, in its enduring qualities, no better than its poorest or thinner parts

Our Belting is warranted to run straight and maintain an even bearing on the pulleys, and sold under the fullest Guarantee.

J. B. HOYT,
D. B. FAYERWEATHER,
HARVEY S. LADEW.

LEATHER BELTING.

Made exclusively from Messrs. J. B. Hoyt & Co.'s Best Oak Butts—shoulders all cut off, only solid leather used—short lengths and short laps—fully warranted.

Rubber Belting and Hose and Packing at lowest prices.

STEPHEN BALLARD & CO.,
16 & 18 Chambers St,
NEW YORK.

PATENT
MINERAL WOOL.

ITS FOREMOST QUALITIES:

CHECKING TRANSMISSION OF HEAT, COLD AIR, SOUND AND ELECTRICITY AS AN AIR-HOLDING MATERIAL, ABSOLUTELY FIRE-PROOF AS A MINERAL—RAT AND VERMIN-PROOF, AND NOT ATTRACTING DAMPNESS, BECAUSE VITREOUS.

Its Manufacture, Composition and Uses in the Construction of Dwellings, etc.

A. G. DAY,
MANUFACTURER OF
Kerite Insulated Telegraph Wire and Cables

Of all kinds made to order, for Ocean, River, Aerial and Subterranean Lines.

The Kerite covering of these Conductors unlike any other, resists effectually the destructive action of Heat and Moisture, and the corrosive agents either in Earth, Air or Water.

☞ Special orders should state whether the Cable is to be exposed to Earth, Air or Water.

FACTORY—SEYMOUR, CONN. **Office, 120 Broadway, New York.**

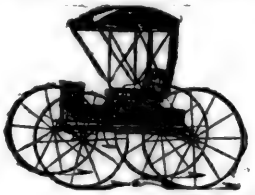
NEW YORK, LAKE ERIE & WESTERN RAILWAY.

TO THE TRAVELING PUBLIC.

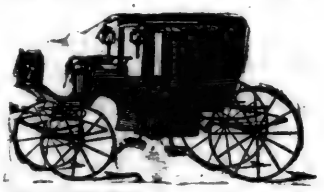
During the Centennial Season—six months, closing November 10, 1876—the Erie Railway carried almos 3,000,000 passengers, without a single accident to life or limb, or the loss of a piece of baggage.

And for a whole year, the official records of the United States Post-Office Department show the arrivals of Erie Railway trains in New York, on time, to be from 15 to 27 per cent. ahead of competing lines.

Facts well worthy the consideration of travelers.



E. S. BOWEN, General Superintendent.
JNO. N. ABBOTT, General Passenger Agent.



PASSENGER CARS

Of the Finest Finish, as well as every description of CAR WORK, furnished at Short Notice and at Reasonable Prices by the

HARLAN & HOLLINGSWORTH COMPANY, Wilmington, Del.

J. CURLEY,
MANUFACTURER OF ALL KINDS OF CARRIAGES
Fine Work both Heavy and Light a Specialty!

Saratoga Lake Railroad.

The fact that General Burt has commenced to lay the rails upon his latest enterprise—that of building a railroad from the village of Saratoga Springs to Saratoga Lake—is exciting considerable interest in that section of the country, and in railroad circles as well. This interest arises from a desire to learn what is to be the ultimate purpose and termination of the enterprise in question, and regarding which several different theories have been advanced, all of them upon the supposition that the mere construction of a costly wide-gauged road from the Springs to the Lake, to be used only during the short pleasure season, is not the sole purpose and intention of the projectors of the new railroad. The Saratoga Lake Railroad is to have its western terminus at Saratoga, in the rear of the Town Hall, from which it will run to Moons, where it crosses the water and goes to the White Sulphur Spring, past Cedar Bluff and Snake Hill. At White Sulphur Spring, it is said that the builders of the road have purchased 200 acres of land, including the spring and hotel property. That this portion of the road will prove of great advantage to the visitors to the springs, who are now at the mercy of the hackmen when desirous of going to the lake, is beyond a peradventure.

Of the several theories advanced, that the lake is not the real objective point which its builders have in view, the one which claims that the road is to be extended from the Hudson River at Stillwater, near which point a connection with the Boston, Hoosac Tunnel and Western Railroad can easily be made, which would give that railroad a route to Saratoga several miles shorter than its present connection over the Delaware and Hudson Road via Ballston, is the most probable, extended to a connection with the Boston, Hoosac Tunnel and Western Railroad. Gen. Burt's new road would open to the Adirondack Railroad an excellent opportunity to connect with the Hoosac Tunnel, and as the Adirondack Railroad is to be extended to the St. Lawrence River as soon as the foreclosure proceedings, now in progress, are finished, the opportunity to give the Tunnel a direct connection with the West, via the Grand Trunk and the Canadian railroads, which are now reaching out for the Northwest, via Lake Nipissing, and the Sault St. Marie, will amply justify the extension of the road from the lake to the Hudson River.

Then, again, another theory which has been advanced is that the new road is being constructed in the interests of the Vanderbilt system of railroads, and is to be extended to the Troy and Boston Railroad, so as to give that road a shorter route to Saratoga, and one which will be independent of the Delaware and Hudson Road, which now controls all railroads approaching Saratoga. Advocates of this theory claim that the New York Central traffic for Saratoga will utilize the Saratoga Lake Railroad if it is built beyond the lake. Still another theory of those who are guessing at the intentions of the owners of the new road is that it will be used by the Delaware and Hudson Company in connection with the new road they design to construct up the Hudson River, through Schuylerville to Fort Edward, and thus secure a shorter line from Troy to Saratoga and the Lake Champlain region.

Our own theory is that the Saratoga Lake Railroad, as at present intended, has only the lake in view for its eastern terminus, but that eventually it will be extended so as to form an important part of a line which will become a large contributor to the Hoosac Tunnel and its eastern connections.—[Boston Journal, Oct. 16.

Mexican Railway Concession.

A dispatch dated Denver, Col., Oct. 16th, says that an official copy of the railway concession recently granted by the Mexican Government to a company authorized to be formed by Messrs. Palmer & Sullivan has been received, and that the Mexican National Construction Company has been organized there, under the laws of Colorado, to work the concession, and then adds:

The contract is for the construction in eight years of thirteen hundred miles of narrow gauge railroad, with a telegraph line, from the City of Mexico to the frontier of the United States and to the Pacific Ocean, in consideration of a money subsidy averaging $10,900 a mile—the total subsidy payable in railroad construction certificates to be issued on the completion of the first ninety-two miles, and thereafter as each twelve miles are built. It amounts to more than $14,000,000 of absolute bounty. The payment is assured by a provision applicable to all the custom houses, maritime and frontier, that no payments shall be made in coin or otherwise than in these Railroad Construction certificates at the rate of $4 in every hundred of the duties due, under penalty of a second payment. The obligation of the government is limited to 4 per centum of the import duties in any year. Certificates can be bought only of the company, which is compelled to keep agencies for their sale, and is prohibited from exacting more than par for them. The government binds itself for the whole contract period of ninety-nine years not to grant any subsidy to parallel roads within sixty-five miles on either side and permits the company to accept additional subsidies from the State. The government exempts from national, State or municipal duties or taxes for fifty years after the road is completed all material for construction, operation or maintenance, exempting only stamp duties; requires that mails and messengers be carried free, and that federal troops and immigrants arriving under government assignment be carried for sixty per centum less than the regular tariff; stipulates that rates shall not without the company's consent be changed for ninety-nine years.

The right of way, two hundred feet, will be granted through all public lands, and the use of timber, stone, water, etc., thereon be given free; the right of condemnation of private lands will be under the same regulations as govern taking private property for public service. Vessels laden with railway and telegraph supplies will be exempted from all dues for fifteen years after the lines are completed, except pilotage. Passengers, mails and merchandise will be exempted for twenty-five years after the completion of the road from all dues except transit duty, not exceeding one dollar a passenger or ton.

The international line must be completed from the City of Mexico to the Texas border, at Laredo, or some point between Laredo and Eagle Pass, within eight years. The Pacific line must be completed to Manzanillo, or any point between that and Navidad, within five years; two hundred and seventy-seven miles, divided in any desired proportion between the two lines, must be completed every two years, but there is a prohibition against beginning construction at the United States frontier until the completion of the last division is announced. The company expect to finish the International line to the Rio Grande, under eight hundred miles, to effect an unbroken communication with the railway system of the United States, within three years. The first section of the line is already accepted, and one thousand men and five thousand tons of steel rails have been ordered for the work.

The company has one of its offices at Colorado Springs and one at the City of Mexico. The principal office will be in New York. Its subscription of $4,000,000, made up last summer by General Palmer upon the condition of securing the concession, will now be called up

by the Union Construction Company in instalments required to do the work.

The First Railroad in America.

Some of our contemporaries are making themselves unhappy over the fact that Baltimore has the priority of them in great enterprises and inventions. New York and South Carolina are disputing the claim of our city to the first railroad, and now the Boston Post comes forward and asserts that Massachusetts is entitled to the priority in virtue of the Quincy quarry road, built in 1826, to carry granite to the seaboard. But this road, as well as the Mauch Chunk railroad, was a gravity road. Baltimore's priority consists in having first established a railroad for general transportation purposes, and in having used upon this road the first l comotive engine—Peter Cooper's—ever built in America. These claims are beyond dispute. They are fully stated, with the evidence for them, in Stuart's Lives of American Engineers. Railroads are old inventions, almost as old as collieries, and the plan of traction by steam was suggested as early as 1802 by the British engineer Trevethick. But the first railroad for general traffic in the world, the Stockton and Darlington, was what suggested the Baltimore and Ohio road to Philip E. Thomas and George Brown. That road, like the Baltimore and Ohio, was meant to be worked by horse power, and horse power was first used upon both of them. Robert Stephenson's engine, "Rocket," first used on the Liverpool and Manchester road in 1829, however, revolutionized the system, and Mr. Cooper's engine was tried on the Baltimore and Ohio as soon as the results of Stephenson's experiment became known.—[Baltimore Sun.

Ohio and Mississippi Railroad.

At the annual meeting of the Ohio and Mississippi Railroad Company, held at Cincinnati on the 14th inst., the president submitted the following report:

The usual annual reports of the President and Board of Directors of the operations of the company have been intermitted since the year 1876, because the entire property of the company since the 17th day of November of that year has been in the Custody of the Circuit Court of the United States for the District of Indiana, and has been operated and managed by a receiver appointed and acting under the orders of that Court, with proper supplementary powers from other courts having jurisdiction over the property of the company located beyond the limits of the State of Indiana. The receiver, in addition to his monthly reports of receipts and disbursements made, as required by the order of his appointment, has made and published four general reports, the first two covering the period from November 17, 1876, to December 31, 1877, and the others the years ending December 31, 1878, and December 31, 1879, respectively. His next report in course will be for the year ending December 31, 1880, which it is presumed will be made and published as soon after that date as the accounts and statements can be prepared for that purpose. In view of the time yet to elapse before this expected report can be made, the stockholders and bondholders of the company will be gratified to learn that the business and net earnings of the road have steadily increased since the receiver's appointment in 1876. His reports show that the net earnings for the year ending December 31, 1877, on both the main line and Springfield Division were, $690,299; for the year 1878, $864,547 62; for the year 1879, $1,051,418 97, while for the nine months of the current year, say to September 30 (the earnings for September being estimated approximately), the net earnings were $353,382 85, against $613,284 52 for the corresponding period of 1879 and for the entire year will probably be about $1,300 000. The earnings of the Springfield Division were less than expenses for the year ending December 31, 1877, by the sum of $43,169 62; for the year 1878, $26,920 36; for the year 1879, $3,778 26. These deficits were taken into the account in making up the amount of net earnings of the main line and Springfield Division, as above stated. The directors are advised by the receiver that the net earnings have been applied to the payment of all the matured interest coupons on the company's first mortgage bonds, a part of the past due interest on the second mortgage bonds and of other recognized obligations of the company, in strict accordance with the orders of the Court, whose officer he is, and that in the mean time the road has been gradually improved by large but needful and judicious expenditures (charged to expenses) for steel and iron rails, new cross ties, renewals of bridges and trestles, the building of new structures and the renewal or repair of old ones, so that the property of the company is in better condition than at any previous period, and the track of the main line by the end of the current year will be in nigh perfect order. Very considerable sums have also been expended upon the Springfield Division in the renewal or repair of bridges and trestles, or in substituting embankments for the latter, and in general repairs of track and road bed, so that the division is now reported in condition to be operated with entire safety. The board deem it unnecessary to go into further particulars, as the receiver's reports cover all the details of receipts and disbursements, both in the operation and management of the road and in the payment of debts and interest, to which reports reference is made for such information in detail.

By order of the Board of Directors.

WILLIAM T. McCLINTICK, President.

Cincinnati, O, October 14, 1880.

After the reading of the President's report an election for three directors was entered upon with the following result: Frank W. Tracey, of Springfield, Ill., re-elected for three years; Osman Latrobe, of Baltimore, Md., elected for three years; James Sloane, of Baltimore, Md., elected for three years. The choice of the last two gentlemen retired Messrs. M. H. Bloodgood and Lewis B. Parsons. The directory met afterwards and organized as follows: W. T. McClintick, of Chillicothe, President; W. M. Walton, of New York, Secretary, and E. K. Pinnett, of Cincinnati, Assistant Secretary.

Bessemer Steel.

The London correspondent of the Manchester Examiner says: "The city of London has done itself honor in conferring its freedom upon Sir Henry Bessemer, whose name certainly deserves to rank among those of most illustrious men who have signed the roll. Sir Henry is best known by his great invention for making steel, but how busy he has been in other directions may be understood from the fact that there are no less than 114 patents which have been taken out in his name. How valuable his steel process is we already know, but nothing could explain the extent of the revolution which his invention created better than the figures which he quoted. When the invention was introduced into Sheffield the entire make of steel was 51,000 tons per annum, whereas last year it was no less than 830,000 tons, or more than 16 times the former produce of the country. The difference in price is still more wonderful. This year he estimates 2,000,000 of tons of steel will be made in Europe and 1,000,000 tons in England, at a cost of £30,000,000, whereas, under the old process, it would have cost £150,000,000. The man whose genius has effected such enormous good to the community is entitled to take a high place on the roll of national benefactors, and the city may well be proud to have him among her freemen.

At a meeting of the principal bond and stock holders of the Connotton Valley and Connotton Northern railroads of Ohio, held in Boston on the 24th inst., it was unanimously determined to consolidate the two roads, changing the present northern terminus from Fairport harbor to the city of Cleveland and to postpone for the present the building of the Fairport line. The bonds of both companies now outstanding are to be called in and a new mortgage, covering the whole line from the southern coal fields to Cleveland, is to be issued in their stead, thus making the road continuous under one name and management. Track is now being laid at the rate of three-quarters of a mile per day north of Canton, on the way to Cleveland.

Several gentlemen connected with the Chicago, Milwaukee and St. Paul Railway Company—including Messrs. Mitchell, Merrill, Carey and Walker—have organized the Central Illinois and Wisconsin Railway Company, with a capital of $1,000,000. It will construct a road from Rockton, on the Racine and Southwestern Division of the St. Paul road, to Kankakee, crossing the Chicago, Burlington and Quincy, Chicago and Alton, Chicago, Rock Island and Pacific and other lines. Twenty miles of track will be laid this fall.

A certificate of the incorporation of the Buffalo and Cleveland Railway Company was filed with the Secretary of State of Ohio on the 18th inst. by John P. Kingsford, of New York, and Stevenson Burke, Charles Hickox, William B. Sanders, Charles Bulkey, and A. R. Spencer, of Cleveland. The road is to run parallel with the Lake Shore and Michigan Southern Railway, and constitute another trunk line between the East and the West. The capital stock is $6,400,000.

A new railroad to the heart of the Catskills is being surveyed. The route is from Phœnicia, Ulster County, to Hunter, Greene County, with a branch to Tannersville, Haines's Falls, the Laurel House, the Sunset Rock House, and to a point about one mile from the Catskill Mountain House. The road is to be in operation by June 1, 1881, and will be under the management of the Ulster and Delaware Railroad Company.

President Huntington, of the Chesapeake and Ohio Railway, has purchased several hundred acres of land at Newport News, the junction of the James River and Hampton roads. This finally settles the question of the eastern terminus of that road. It is said that work will be begun at once and the road finished between Richmond and Newport News in six months.

Bradley Barlow, Manager of the Southeastern Railway, has purchased the new road now in process of construction between Freligsburg and West Farnham, and will complete it as far as Sheldon, thereby making the road a connecting link between the Southeastern and Vermont Division of the Portland and Ogdensburg Railroad.

William C. Nicoll, Robert A. McKinney, and others are named as directors of the Ocean Beach and Sheepshead Bay Railway Company, with a capital of $100,000. The road is to be only one mile in length.

ALTERATIONS and improvements being made in the tables, which are weekly features of the JOURNAL, necessitate the temporary withdrawal of part of them. The Bond List and the Share List do not appear this week. In the Bond List alterations are desirable, owing to changes among the roads, consolidations, etc., since our tables were revised. The Share List is naturally corrected at this season of the year, and as this is the time when much of the necessary information comes to us from our correspondents and from the railroads, the table, if published now, could not be as symmetrical and complete as we would wish. The injustice of reporting one road many months in advance of another is manifest, but it would be unavoidable in any other way, than that which we adopt. On these accounts we withold these two tables until they are perfected and made of greater value than ever before, to accomplish which no efforts will be spared. We have added several important features to the JOURNAL recently and it seems desirable now that some of our tables should appear semi-monthly, monthly and quarterly instead of weekly, thus giving us an opportunity to lay before our readers more information and a greater variety each week. We shall announce the tables as they are to appear from week to week. The table of contents always gives those in the current number, and in future by referring to the files of the JOURNAL any of its tables desired can readily be found, and they will contain as late information as though appearing in each number, as we do not intend to withhold any tables that are of weekly interest. While adding new features to the JOURNAL, our aim is to retain and improve the old ones.

The St. Gothard Tunnel.

Whether the opinion of one of the engineers, that the boring of the St. Gothard Tunnel is the greatest work hitherto attempted by man, be true or not, there can be no doubt that it is the greatest engineering triumph of the nineteenth century. The tunnel is situated on the most direct route between the North Sea and the Mediterranean, and is intended to form a part of the railway connecting these two great bodies of water. The operations at St. Gothard were begun under the advantage of the skill and experience that had been gained in constructing the tunnel of Mont Cenis and the Hoosac Tunnel.

In constructing the Hoosac Tunnel many costly experiments were made with tunneling machines and boring apparatus. One boring machine was made especially for the Hoosac Tunnel at South Boston in 1851, which weighed about seventy tons and was designed to cut out a groove around the circumference of the tunnel thirteen inches wide and two feet in di ameter by means of revolving cutters. A central core was left to be blasted out with gunpowder. A second machine, constructed at Hartford, known as the "Talbot Tunneling Machine," also worked on the principle of revolving cutters, and was intended to cut out a core seventeen feet in diameter. A third machine, made in New York, was intended to cut a core of eight feet and was adopted by the contractors in the early days of the Hoosac Tunnel. All these machines proved failures and the old method of hand drilling and blasting by means of gunpowder was the only successful method known to engineers until the invention of compressed air drills and the introduction of nitro-glycerine and its kindred explosives. Experiments with drills working by means of compressed air were begun at the Hoosac Tunnel and at Mont Cenis about the same time. At the Hoosac Tunnel under patronage of the contractors, the Messrs. Shanly, the manufacture of nitro-glycerine was carried on and improved by George M. Mowbray of North Adams, while at Mont Cenis dynamite, a mixture of nitro-glycerine with infusorial earth, was used.

The Hoosac Tunnel is nearly five miles long and cost upwards of eighteen millions of dollars; the Mont Cenis Tunnel is about seven and a quarter miles in length and cost about fifteen millions of dollars while the St. Gothard Tunnel will be nine miles and a quarter in length and will cost from twenty-five to thirty per cent less than that of Mont Cenis. If the engineers had the advantage of the experience gained in constructing other great tunnels the obstacles to be overcome were greater and more numerous. The engineers of the tunnel of Mont Cenis had a point at the highest part of the ground from which they could see at once objects indicating the positions of both openings. No such advantage existed at St. Gothard and some of the summits are so steep and high that it is impracticable to attempt any direct tracing of the line over the mountain. The work was interfered with at times by the infiltration of water; by rocks of exceptional hardness, and by a bed of loose material at one end, in which it was dangerous to work for fear the mass would fall and bury the workmen, and cut off their retreat.

The most efficacious means adopted to speed the work of excavation were the diking of torrents and the application of water collected in aqueducts as a moving power to turbine wheels requiring high falls, the adoption of air-compressors which worked with great rapidity, the cooling of air in the compressors, at the moment of compression, by the injection of water in a fine spray, the use of dynamite, and the determination which was adopted from the beginning to carry on the excavation, from the top of the tunnel. By aid of these methods the advance through the hard rocks was made with double the speed that the engineers in charge had been able to attain in boring the Mont Cenis Tunnel. Aside from the commercial advantages resulting from the completion of the St. Gothard Tunnel must be reckoned the perfection of the machinery and tools for boring and the training of a body of skilled workmen who have become experts able to determine, by merely inspecting a rock, how to deal most efficiently with it. The perforation of tunnels will be in the future a simpler, easier and less costly operation than it has been before, and mountains that have hitherto been deemed impenetrable will now be attacked with confidence.

New Hampshire Railroads.

According to the Report of the Railroad Commissioners of New Hampshire, recently issued, no new lines of railroad have been commenced in the State during the past year, but the Profile and Franconia Notch and the Whitefield and Jefferson routes have been completed and are meeting with all the success that their projectors anticipated. Since the report of 1879 the business prospects of the railroads of the State have materially improved. In the preface the following subjects are discussed at length and in an intelligent manner: railway management, necessity of investigation, terminal facilities, freight discriminations, car lines, color blindness, taxation and the question of securing uniformity in the time and manner of making returns. Under the head of terminal facilities, reference is made to the fact that New Hampshire has one of the best and safest harbors in New England, and that a large amount of local or domestic freight is delivered at Portsmouth by vessels that go back in ballast, because no available return freight is offered, while a great deal of rough and dressed granite is every year sent to about the same points as these ships go for freight. It is possible that granite might be delivered in New York, Philadelphia or Baltimore by these vessels at less cost than by any

other route, besides securing for the land lines in this State the full amount paid for railway transportation instead of dividing with other roads. Granite is a staple article in New Hampshire, and has the reputation of being of the best quality in color and power anywhere found to resist the action of the elements, but, unfortunately, regarding the prospect of its becoming a source of wealth, the finest quarries are situated so far inland that the freight becomes a serious factor in their practical development. There are 34 railroads in operation in the State, with a total length of 1005 miles. The longest line is the Boston, Concord and Montreal, 167 miles and the shortest the West Amesbury Branch Railroad, 2¼ miles. Since the volume went to press the Manchester and Keene Railroad has been completed and put into operation. The Commissioners are: Hon. G. P. Conn, M. D., of Concord, Hon. D. E. Williard of Oxford and Hon. J. E. French of Moultonboro'.

European and North American Railroad.

Whereas, Hannibal Hamlin and William B. Hayford, both of Bangor, Maine, trustees under mortgage of the European and North American Railway Company, of its lands, railway and property, dated March 1, 1869, did, on application of more than one-third of the bondholders, give notice of the foreclosure of said mortgage by reason of default in the condition of the same, by reason of non-payment of the interest coupons of said bonds, and did cause said notice to be published and recorded as provided by law, the first publication thereof being October 3, 1877; and whereas, three years from the date of said first publication have expired and said mortgage has not been redeemed, and no proceedings for redeeming said mortgage have been taken, and the right of redeeming said mortgage has been foreclosed, therefore, by force of the statute, the bondholders under said mortgage, their assignees and successors, are constituted a corporation, as of the date of the foreclosure, for all the purposes, with all the rights and powers, duties and obligations, of said original European and North American Railway Company.

Decision of an Important Railroad Land Case.

The Secretary of the Interior has rendered a decision involving large pecuniary interests in the Western Railroad of Minnesota, now operated and controlled by the Northern Pacific Railroad Company, in regard to the claim of that company for lands under the indemnity grant to the State of Minnesota of the acts of March 3, 1857, March 3, 1865, and the various amendatory statutes. This decision, which also bears directly upon the similar claims of the Chicago, Milwaukee and St. Paul Railway, and probably upon those of several other Western companies, is favorable to the claims. It is to the effect, first, that such indemnity can only be taken for lands lost in places along the respective lines of the road within the lateral limits prescribed by the granting acts, as contradistinguished from grants of quantity to the amount of any designated number of sections per mile for the entire length of road. Second, that indemnity is provided for all lands sold or pre empted prior to the date of definite location of the respective lines, whether so disposed of before or after the passage of the granting acts, but that lands reserved by competent authority before the date of the grants are altogether excepted out of their operation, and can neither be taken as indemnity nor made the basis of such indemnity when so found reserved within the granted limits. This decision accords with the opinion of Attorney General Devens furnished to the Interior Department last June, and is substantially in accord with the original practice of the department prior to the decisions rendered by the Supreme Court in the cases of Leavenworth, Lawrence and Galveston Railroad Company vs. the United States and the United States vs. Burlington and Missouri River Railroad Company, which cases are construed by the Attorney-General's opinion as not necessarily conflicting with the views therein expressed.

Latest Railroad Earnings.

The following are the latest railroad earnings reported:

	1879.	1880.
Louisville and Nashville—		
Second week of October.....	$128,862	$223,200
July 1 to Oct. 14.....	1,645,872	2,866,100
Missouri, Kansas and Texas—		
Second week of October.....	$84,226	$94,000
January 1 to Oct. 14.....	2,347,388	3,209,030
St. Louis and San Francisco—		
Second week of October.....	$46,700	$75,100
January 1 to Oct. 14.....	1,121,800	2,021,500
Pittsburg, Titusville and Buffalo—		
Month of September.....	$39,000	$54,000
January 1 to Sept. 30.....	347,198	426,672
Chicago, Milwaukee and St. Paul—		
Second week of October.....	$278,065	$362,000
January 1 to Oct. 14.....	7,112,296	9,421,000
Denver and Rio Grande—		
Second week of October.....	$27,940	$101,973
January 1 to Oct. 14.....	884,575	2,430,089
Texas and Pacific—		
First week of October.....	$63,562	$63,794
Grand Trunk—		
Week ending Oct. 9.....	$212.558	$223,452
January 1 to Oct 9.....	6,623,430	7,924,137
Great Western of Canada—		
Week ending Oct. 8.....	$102.504	$123,342
January 1 to Oct. 8.....	3,261,873	3,839,716
International and Gt. Northern—		
Second week of October.....	$46.314	$64,399
January 1 to October 14.....	1,169,241	1,293,003
St. Louis, Iron Mt. and Southern—		
Second week of October.....	$172 909	$175,900
January 1 to Oct. 16.....	3,608,708	4,630,109
Hannibal and St. Joseph—		
Second week of October.....	$53.698	$53,738
January 1 to October 14.....	1,418.608	1,915,804
Flint and Pere Marquette—		
Second week of October.....	$26,203	$36,245
January 1 to Oct. 14.....	845,636	1,204,808

American District Telegraph.

From the report of the American District Telegraph Co., which was presented at the annual meeting held on the 19th inst., we learn that the gross earnings for the year ending September 30, 1880, were: from gross earnings from telegraph and messenger business, $442,839 03; from other sources, $7,812 01—total income, $450,651 04; the aggregate expenditures and repairs were $318,534 42; and the net earnings, $132,116 62. Cash assets on hand Oct. 1, 1880, exclusive of lines, instruments, fixtures, patents, and franchises, $188,645 14. Increase of gross earnings over previous year, $36,167 90; increase of net earnings over previous year, $34,258 29. This company has no bonded or floating indebtedness of any kind. The following directors were elected: C. W. Andrews, G. Hilton Scribner, A. B. Cornell, L. F. Payne, T. C. Platt, H. L. Hotchkiss, I. M. Patterson, Jr., C. M. Depew, P. H. Lawrence.

Personal.

—Sir Edward Thornton and family will sail for Europe November 6th.

—Mr. Hugh Riddle, President of the Chicago, Rock Island and Pacific Railroad, was at the Windsor Hotel, New York, Thursday.

—Vice President Charles E. Perkins and Mr. J. M. Walker, of the Chicago, Burlington and Quincy Railroad were in New York this week.

—Mr. Daniel Chadwick, Government Director of the Union Pacific Railroad, is in New York this week, stopping at the St. Nicholas Hotel.

—Mr. Bradley Barlow, Manager of the Southeastern Railway, has purchased the railroad now being constructed between Freieglesburg and West Farnham, Vt., with the intention of completing the same to Sheldon.

—The freedom of the City of London has just been conferred upon Sir Henry Bessemer. He has taken out one hundred and fourteen patents and since his steel process was introduced into Sheffield the manufacture of steel has increased from 51,000 tons a year to 830,000 tons.

—Mr. J. L. McInnis, of Winnipeg, Manitoba, has written a letter to the New York Herald which contains in a condensed form some valuable facts concerning the Canadian Pacific Railway and its prospects. The letter was written in answer to editorial strictures on the railway and was published this week. It corroborated the statements of the AMERICAN RAILROAD JOURNAL as recently published in our full history and description of the project, and has drawn out further editorial comment from the Herald.

The consolidation of the Indiana, Bloomington and Western, the Cincinnati, Sandusky and Cleveland and the Columbus, Springfield and Cincinnati railroads into the Ohio, Indianapolis and Western Railroad Company has been agreed to by the executive committee of the several railroads. The new company is to build a line of 115 miles, connecting the two roads, and will thus control a line of 543 miles, from Sandusky, Ohio, to Peoria, Ill. The new line is to be built from the proceeds of bonds to be issued, and the company will issue stock to the limit of $10,500,000, share for share to the Sandusky and Columbus roads, and two shares for one to the Indiana, Bloomington and Western. The agreement has been signed and it will be submitted immediately to the stockholders for ratification.

Efforts are being made to form a connection between the Shenandoah Valley Railroad, and the Atlantic, Mississippi and Ohio Railroad. The latter road, which is now in the hands of a Receiver, runs from Norfolk, Va., west and south-west through Virginia, Tennessee, and Northern Alabama into Northern Mississippi, and is looked upon as a possible connection between the Shenandoah Railroad and the Texas Pacific Railway,

Contracts have been let for the extension of the Bethany Branch of the Chicago, Burlington and Quincy Railroad from Bethany, Mo., to Albany, 17½ miles. Arrangements are being made to change the St. Joseph and Des Moines road, from Albany to St. Joseph, from 3 feet to standard gauge.

RAILROAD EARNINGS—MONTHLY.

	January.	February.	March.	April.	May.	June.	July.	August.	September.	October.	November.	December.	Total.

The Pullman Car Patents.

The answer of the Baltimore and Ohio Railroad Company to the suit of the Pullman Palace Car Company, of Chicago, for an injunction to prevent the introduction of palace cars on the Baltimore and Ohio Railroad similar in construction to those of the Pullman Company claims that the Pullman patents are invalid, many of them having been anticipated by other inventors; that many of the claimed inventions are found in cars used long prior to the Pullman patents; and that the reissue which Pullman took out in 1875, was for a different invention from that of his original patent. The Baltimore and Ohio Company claim that Pullman has repeatedly, on the ground of defective specifications in previous patents, had new ones issued, and in this way has extended his original device into a much larger claim. In 1876, Pullman filed a bill against the Barney and Smith Manufacturing Company, of Cincinnati, to restrain their manufacture of cars, which he claimed infringed his patent. This is the company manufacturing cars for the Baltimore and Ohio, and which has also manufactured cars for the Central Pacific, Chicago, Milwaukee and St. Paul and other railroad companies, as well as for the Wagner Sleeping Car Company. Testimony has been taken in this case at Cincinnati, but no injunction has ever been obtained. Similar suits were brought against the Wagner Company in Chicago and New York with similar results. The defendants also claim that the Michigan Central, Chicago, Rock Island and Pacific, Chicago, Milwaukee and St. Paul, Central Pacific, and other roads, are using cars similar to those manufactured for the Baltimore and Ohio, and that the Pullman Company has never sought to restrain them; also, that all of Pullman's 80 patents have expired except one, and that has only two years to run.

The Pullman's Company's counsel asked the court for an order to restrain the Baltimore and Ohio from using the cars, pending the hearing of the case. This the court refused to grant, and the Baltimore and Ohio will put on its new cars Nov. 1. The hearing, in the case has been postponed until November.

COUNTERFEIT COIN LIST.

GOLD COINS.

$1.

Standard weight 25.8 grains, least current weight 25.67 grains.

There are some counterfeits dated 1851-1852, light in weight. The new gold dollar 11-20th of an inch in diameter as counterfeited is dated 1861, light in weight, but very deceptive.

$2 50.

Standard weight 64.5 grains, least current weight 64.18 grains.

Some coins dated 1846, weighing only 48 grains instead of 64½—are in circulation.

$3.

Standard weight 77 4 grains, least current weight 77.02 grains.

Excellent counterfeits of this denomination have been issued and circulated.

$5.

Standard weight 129 grains, least current weight 128.36 grains.

The issues of 1844-1845-1847 have been imitated. The 1845 piece is 10 grains too light ; the 1847 coin is 13 grains too light.

$10.

Standard weight 258 grains, least current weight 270 grains.

The issues of 1801 and 1810 have been extensively counterfeited.

$20.

Standard weight 516 grains, least current weight 513.42 grains.

This coin has been sawed in two pieces, the center taken out and platinum or some other metal substituted. The *ring* is not perfect. Experts have also bored holes in the side and taken out about seven dollars worth of gold and then soldered the holes with gold.

The English Sovereign

has been imitated by plating so that the counterfeit is worth about three dollars and nearly as heavy as the genuine.

SILVER COINS.

Ten Cents.

Standard weight 38.58 grains.

Spurious dimes dated 1853 and 1875 are in circulation, the date 1875 has the appearance of a genuine coin.

Twenty-five Cents.

Standard weight 26.45 grains.

There are many deceptive quarters. Those bearing dates 1828 and 1860 are the most dangerous ; others bearing dates 1853, 1857, 1861 are not so well executed.

The Canadian 25 Cent Coin

has been extensively counterfeited. Large quantities of them have been circulated in the South and West.

Fifty Cents.

Standard weight 192.9 grains.

Half dollars have been successfully counterfeited. The one most likely to deceive is dated 1842, thickly plated ; another good imitation is dated 1876, plated with silver, exact weight, and good ring The counterfeit bearing date 1874 is not likely to be taken.

One Dollar.

Standard weight 412.5 grains.

Counterfeits of the new one dollar silver coin first appeared about the first of April, 1878. The general appearance is good, the milling is well done, but the color is such as to readily distinguish it from the genuine. Look out for other new counterfeits better executed.

The Trade Dollar.

Standard weight 420 grains.

This coin has been variously and extensively counterfeited. One early imitation was dated 1876, made of a composition formed principally from type metal. The milling on the edge of the piece is very well done, but the piece is too thick and the inscription IN GOD WE TRUST, beneath the figure of Liberty, upon the obverse, is imperfect. This counterfeit was extensively circulated in the East Indies, China, Japan and other Oriental countries.

Many other imitations of the trade dollar have been produced and the latter specimens appear almost perfect. One of the last imitations is finely finished ; the various devices of the impress are accurate and distinct, and the ring is perfect. The piece is very deceptive, but it is about 1-32 of on inch undersize, and 115.5 grains underweight. It is of a dark color after having been handled, and has a smooth, greasy or quicksilvery feeling when rubbed between the thumb and fingers.

Note.

The Trade Dollar authorized to be coined by act of Congress February 12, 1873, has been formally recognized as a coin of the United States. The Trade Dollar was demonetized July 22, 1876, and its coinage was suspended by order of the Secretary of the Treasury, February 22 1878. The circular of the Treasury Department of July 25, 1878, declares : "The United States Trade dollar also is not a legal tender, and therefore has only a bullion value." The average bullion value, of full weight trade dollars, is ninety-three cents and two tenths of a cent each. The Trade Dollar was intended for exportation abroad. It excels the Mexican silver dollar by two-tenths of a cent, and is of equal finoness (900) with the United States legal tender silver dollar and contains seven and one half grains more standard silver. At present though demonetized and refused by many banks and all Government offices, trade dollars are generally taken in trade without discount and may be commercially rated at the price they command for exportation. There is no allowance for abrasion in silver coins.

Tests.

Counterfeit silver pieces made of block tin washed over with quicksilver are easily detected by the ring. A genuine silver piece will feel rough enough under rubbing, while the counterfeit feels smooth and oily. Experienced persons detect spurious coins by the weight. The jeweler uses nitric acid for the detection of debased gold and silver. Scratch the coin with the knife and then apply the acid to the scratch. If the acid boils up greenish, the coin is bad ; but if it turns white the coin is good. The following test for determining whether silver is good or bad is known as the "Mint Test," although the tests employed at the Mint are weight and size :

24 grains nitrate of silver.
30 drops nitric acid.
1 ounce water.

A drop of this mixture will have no effect upon genuine silver but will blacken a debased coin. Persons handling large amounts of coin must rely upon the eye and the sense of touch.

New York Underground Railroad.

The stockholders of the New York Underground Railroad Company met on the 20th inst. in the Morse Building for the purpose of taking action on the proposed consolidation of their company with the Broadway Undergrcund Connecting Railroad Company, which owns additional underground franchises. Mr. George Ticknor Curtis, counsel of the New York Company, made the following statement, after which an adjournment was taken until Wednesday of next week :

The Directors of the New York Underground Railway Company, and also the Directors of the Broadway Underground Connecting Railway Company, each met on the 19th inst. to close their proceedings previous to their consolidation. It was concluded not to report the agreement of consolidation to the stockholders' meetings called to be held this week, but to ask them to adjourn their meetings to next week, at which time the President of the two companies will report the agreement of consolidation. Each company has executed a mortgage to the Farmers' Loan and Trust Company to secure the payment of 6 per cent bonds, to be issued by the consolidated company to an amount not exceeding $2 000,000 per mile of railway to be put under construction and made south of Fifty-ninth street. It is expected that the consolidation will be effected next week, after which the offices of the consolidated company will be in the new building, Nos. 3, 5, and 7 Cortlandt street, a portion of which the engineer and his assistants already occupy.

A New Mine Lamp.

According to the London Telegraph, one of the greatest boons to miners, on the score of safety, is the new miner's lamp, in which the light of phospheresecence is substituted for that of positive ignition. In this apparatus the interior of the screen is covered with a brightly luminous paint, and there is, therefore, nothing in its construction or character that can by any means become a source of danger. Such a contrivance, if answering the capacity claimed for it, must be of peculiar value, pecuniarily considered, in preventing the destruction of property by explosion. But the great advantage of such a lamp over those now in use is its insuring against a peril from which the Davy Lamp cannot protect the workmen. If the lamp be carried against a current of air mixed with fire damp, the explosive gas penetrates through the gauze and comes in actual contact with the flame, a catastrophe being the natural result of such contact ; obviously, however, no risk of this sort could be involved in the use of a phospheresecent light by miners.

Dividends.

—The Boston and Maine Railroad Company will pay a dividend of $4 per share Nov. 15.

—The Calumet and Hecla Mining Company has declared a dividend of $5 per share, payable Nov. 15.

—The Homestake Mining Company has declared its regular monthly dividend of Thirty cents per share for September, payable Oct. 25, at the office of Wells, Fargo & Co., No. 65 Broadway; also, an extra dividend of a similar amount, payable at the same time and place.

—The Montreal City Passenger Railway, after passing a six per cent dividend, carries forward $18,000 to the rest account.

Arthur Dudley Vinton, T. Lindsley, and others, are named as directors of the New York, Brooklyn and Rockaway Railroad Company, with a capital of $500,000. The road will commence in the town of Flatbush, on the line of the Brooklyn, Flatbush and Coney Island Railway, at or near Prospect Park, and running thence in a south-easterly direction through the town of Flatbush to the Atlantic Ocean, at or near a point of Rockaway Inlet. The length of the road is estimated at eight miles.

Legal Notes.

MUNICIPAL CORPORATION.

A person who voluntarily attempts to pass over a sidewalk of a city, which he knows to be dangerous by reason of ice upon it, which he might easily avoid, cannot be regarded as exercising ordinary prudence, and cannot maintain an a tion against the city to recover for injuries sustained by falling upon the ice. Schæfler vs. City of Sandusky, 33 Ohio St. 246, p. 533.

Alleys are not primarily designed as streets, but simply as a means of local convenience to a limited neighborhood, and a roof twelve or fifteen feet over and above an alley is not necessarily an obstruction. Beecher vs. People, 38 Mich, 289, p. 316.

A municipal corporation granted permission, by ordinance, to a street railway company to lay a double track in its streets. The company proceeded to do so, and expended large sums of money in the work. Held, that the municipal corporation could not thereafter restrict the permission to a single track, it not appearing that the double track would cause any injury or inconvenience. City of Burlington vs. Burlington Street Railway Co., 49 Iowa, 144, p. 145.

NATIONAL BANK.

A National bank organized as successor to a State bank may maintain an action to foreclose a mortgage of real estate executed to the State bank as security for a note, and assigned to it by the State bank on the formation of the National bank. Schofield vs. State National Bank of Lincoln, 9 Neb. 316, p. 412.

A National bank has no power to deal or speculate in promissory notes or to acquire title thereto, except by discount. First National Bank of Rochester vs. Pierson, 24 Minn. 140, p. 341.

Under the National Bank Act, in an action upon a note usuriously discounted by a National bank, the amount of the usury may be set off by an accommodation indorser, although the note does not carry interest on its face. National Bank of Auburn vs. Lewis, 75 N. Y. 516, p. 484.

NEGLIGENCE.

One who signs and delivers a contract, in form like a negotiable promissory note, but with a condition limiting his liability, so appended as to be capable of separation, leaving an apparently perfect note, is liable to an innocent indorser of such note who acquires the same for value and before maturity, after such separation has been made by the payee, without the maker's knowledge. Noll vs. Smith, 64 Ind. 511, p. 131.

A boy, twelve years of age, was injured while playing on a railway turn-table, left unlocked and unguarded, in an open prairie, where persons frequently passed. Held, that the question of negligence and contributory negligence were for the jury. Kansas Central Railway Co. vs. Fitzsimmons, 22 Kans. 686, p. 203.

NEGOTIABLE INSTRUMENT.

A mere promise to pay a forged note, when such promise is given by the supposed maker of the note without any new consideration, and after the promise has acquired the note, is not binding. Workmen vs. Wright, 33 Ohio St. 405, p. 546.

One who transfers a negotiable promissory note by indorsement without recourse impliedly warrants the genuineness of the prior signatures, and that so far as he is concerned the paper expresses the exact legal obligations of all such prior parties. Challiss vs. McCrum, 22 Kan. 157, p. 181.

OFFICE AND OFFICER.

A county treasurer and his sureties are not liable for public moneys of which the principal was violently robbed without his fault. Cumberland vs. Pennell, 69 Me. 351, p. 284.

PARENT AND CHILD.

A father gave his son, ten years of age, to a man of good character and ample means, to keep him during minority. The father dying three years afterward, the mother brought habeas corpus for the child. Held, that she was entitled to his custody, although she was poor and dependent, and he preferred remaining with defendant. Moore vs. Christain, 56 Miss. 408, p. 375.

PARTITION.

The court has no jurisdiction to order partition of lands, between heirs of a father, where the petition alleges that one heir is alive and that the mother is pregnant by the father. Gillespie vs. Nabors, 59 Ala. 441, p. 20.

PARTY WALL.

One owner of a party wall, who adds to it for his own use, may maintain an action of contribution against the other owner who has used such additions, for one-half the value of the additions made. Sanders vs. Martin, 2 Lea, 213, p. 598.

SALE.

On a sale of goods by a manufacturer for a particular purpose, there is an implied warrant of fitness for that purpose; but the manufacturer is not bound to furnish the best that are or can be made, but only such as are usually made and used, and as are reasonably fit for the purpose. Harris vs. Waite, 51 Vt. 481, p. 694.

Where goods are sold to one for the use and benefit of another, by whom they are received and used, the latter cannot be held therefor merely upon his acknowledgement of the correctness of the account and his oral promise to pay it. Hendricks vs. Robinson, 56 Miss. 694, p. 382.

The Philadelphia Record says that during the last eight months the business of the Pennsylvania Railroad Company has been phenomenal. It is expected that the company will have a surplus of fully $10,000,000 over last year to meet the extraordinary expenses contemplated here and elsewhere along the main line. This year the company shows a gain of $2,848,926 on the eastern lines. The United Companies of New Jersey have already earned $250,000 more than for the first eight months of last year, and the deficit is likely to be reduced to $600,000. The Philadelphia and Erie, which was short on its fixed charges last year $332,887, has already made up that loss and more too by a gain of $372,899 net for the first eight months. The Pennsylvania Company is also $2,116,103 ahead of last year already.

The Circuit Court of Alexandria, Va., entered a decree at a special term, on the 16th inst., ordering the sale of the Washington City, Virginia Midland and Great Southern Railroad. In accordance with the decree John S. Barbour, commissioner of sale, announces that the entire line of road and all branches, with all equipments, rights, franchises, properties, etc., will be sold on 20th December next, at public auction, at Alexandria. The property will be purchased by a committee of its creditors, and reorganized under terms agreed upon some time since and not published.

Manufacturing Notes.

—Mr. John Hall, of the Great Western Railway, has invented a novel air brake, which is highly commended by the Scientific American.

—The splendid new steamer Excelsior reached Washington on the 10th inst. She is intended to connect the Baltimore and Ohio Railroad at Shepherd, on the Potomac, with the Richmond and Fredericksburg Railroad at Quantico, 32 miles below.

—The new "indicator" has been placed on several of the cabooses of the Pennsylvania Railroad on the Pittsburg division. It registers the number of miles travelled per hour by the car, the rate of speed, the number and duration of the stops, etc; in fact gives a complete and accurate account of the doings of the train to which the car is attached.

—There was recently cast at the Black Diamond Steel Works, Pittsburg, Penn., an anvil weighing 160 tons. The anvil will be used for a seventeen ton steel hammer, which is now being made by Krupp, of Essen, Prussia. The molten metal was run from five furnaces built for the purpose, and occupied six hours exactly. It will take six months to cool the casting.

Advices from the city of Mexico dated October 4th state that the telegraph system continues to extend, and now includes the distant points of Pepic, Rosario, Mazatlan, Hermosilla and others, bringing those places into direct communication with the capital. There are now over 10,000 miles of line in operation. The Mexican Gulf cable will be in operation next spring. It is now being made in England, and will be landed at a Texas port in January, and laid thence to Vera Cruz. The election of Gonzalez as President has been accepted in every part of the republic. Business and the financial situation continue to improve. All current expenses are promptly paid, and obligations are being liquidated.

The Winchester (Va.) Times publishes a letter from Edward D. McConkey, of Baltimore, to Mr. Dandridge, of the house of Delegates of Virginia, in which he states that he expects to have the Baltimore, Cincinnati and Western railway completed to Winchester within a year. The company was chartered last winter by the Virginia Legislature.

The Brantford and Port Burwell branch of the Great Western Railway of Canada is being put in first-class order. New iron bridges are being built between Brantford and Harrisburg, and the whole line laid with steel rails. Brantford is becoming a railway centre, and the trade of the city is continually on the increase.

Among the railroads soon to be completed may be mentioned the Wallkill Valley Railroad, from Kingston to Saugerties, N. Y.; the Catskill Mountain Railroad, from Catskill to Palenville, N. Y., and a railroad to connect Calvert City, in Marshall County, Ky., with Columbus, Hickman County, Ky.

The extension of the Pittsburg, Virginia and Charleston Railroad has been completed from Monongahela City to Lock No. 4, and trains ran for the first time between these two points on the 18th inst.

Agreements of consolidation have been completed between the Elgin and State Line and Union Railroad companies; also between the Chicago and Tomah and the Milwaukee and Madison. All the roads are owned by the Chicago and Northwestern Railway company. The company announce that by November 1 it will have the track laid on its Deadwood Extension to Pierre, Dak., on the east bank of the Mississippi river, opposite Fort Pierre, and from that date this company will have in operation a through route to Deadwood—rail to Pierre, and stage thence to Deadwood. The distance by rail from Chicago to Pierre is 780 miles, and by stage from Pierre to Deadwood 170 miles.

The Seattle and Walla Walla (Oregon) Railroad has been purchased by Henry Villard, a transfer having been effected on the 14th inst., at which time formal possession was taken of the property by Gen. T. A. Tannatt.

Philadelphia and Reading Railroad.

Comparative statement of gross receipts, tonnage and passengers, of the Philadelphia and Reading Railroad Company, for the month of September, 1880 and 1879:

	1880. Month.	1880. Year to date.
Gross receipts:		
Railroad traffic	$1,877,073 06	$13,372,871 12
Canal traffic	151,583 63	596,495 62
Steam colliers	50,259 80	483,920 16
Richmond coalbarges	10,340 07	82,672 82
Total Railroad Co.	$2,089,256 56	$14,535,959 72
Reading Coal & Iron Company	1,336,389 65	9,116,526 75
Total of all	$3,425,646 21	$23,652 486 47
Tonnage and passengers:		
Tons of coal on railroad	904,828 09	5 690,588 13
Tons of merchandise	478,093 01	4,881,454 00
Passengers carried	1,001,251	8,126,807
Coal transported by steam colliers	45,836 00	454,528 00
Tons of coal mined:		
By Coal and Iron Co.	439,615 13	2 705,403 14
By tenants	163,565 16	963,229 13
Total mined from lands owned and controlled by Co. & from leasehold estates	603,181 09	3,668,633 07

	1879. Month.	1879. Year to date.
Gross receipts:		
Railroad traffic	$1,197,161 79	$10,388,665 55
Canal traffic	105 522 13	665,908 96
Steam colliers	54,710 82	537,466 98
Richmond coal barges	16,618 66	124 098 97
Total Railroad Co.	$1,374,013 40	$11,716,140 46
Reading Coal and Iron Co.	978,745 28	8,102,192 18
Total of all	$2,352,758 68	$19,818,332 64
Tonnage and passengers:		
Tons of coal on railroad	810,314 08	6,517,685 08
Tons of merchandise	523,049 05	3,797,037 12
Passengers carried	893,314	6,449,180
Coal transported by steam colliers	56,715 00	497,713 00
Tons of coal mined:		
By Coal and Iron Co.	410,241 05	3,440 496 01
By tenants	128,718 16	1,027,676 02
Total mined from lands owned and controlled by Co. and from leasehold estates	547,960 00	4,468,172 03

Comparative statement of business of the Philadelphia and Reading Railroad Company for September, 1880:

	1880. Month.	1880. Year to date.
Gross receipts	$2,089,256 56	$14,535,959 72
Gross expenses	1,156,086 38	10,684,332 26
Net profit	$933,170 16	$3,851,627 46

	1879. Month.	1879. Year to date.
Gross receipts	$1,374,013 40	$11 716,140 46
Gross expenses	1,000,695 01	8,704,451 27
Net profit	$373,318 39	$3,011,689 19

Comparative statement of business of the Philadelphia and Reading Coal and Iron Company for September, 1880:

	1880. Month.	1880. Year to date.
Receipts	$1,336,389 65	$9 116 526 75
Expenses	1,117,426 38	8,883,329 82
Profit	$218,963 27	$283,196 93
Net profit of all	1,152,133 45	4,084,824 39

	1879. Month.	1879. Year to date.
Receipts	$978,745 28	$8,102,192 18
Expenses	1,098,001 97	8,975,487 75
Loss	$119,256 69	$873,295 57
Net profit of all	254,061 70	2,138,393 62

The stockholders of the St. Johnsbury and Lake Champlain Railroad (formerly Portland and Ogdensburg) have voted to authorized the president to issue mortgage bonds to the extent of $300,000, at 6 per cent interest, with 30 years to run. The proceeds to be devoted to taking up outstanding indebtedness of $200,000, for the purchase of new rolling stock, improvement of the road-bed, and for additional traffic facilities. During the past year the gross earnings have been increased 38 per cent over 1879, and the demand for freight transportation is much larger than can be provided for. Under the new management the business prospects are much increased.

The Atchison, Topeka and Sante Fe Railroad Company has issued a circular to shippers of California freight, announcing that that road and the Southern Pacific will be completed and connected about January 1, 1881, thus opening up a new through route between the East and San Francisco, Sacramento, San Jose, Los Angeles, Marysville and all other points in California and Arizona.

The Wilmington, Del., Every Evening says that the French Creek branch of the Wilmington and Northern railroad running east from Springfield five miles is carrying large quantities of iron ore and is doing a heavy business generally. A considerable portion of the ore goes to the furnaces of Messrs. E. & G. Brooks, at Birdsboro, Penn., while the Phœnix Iron Company also receives large quantities.

A trestle bridge, 12,600 feet long and 94 feet high, on the Shenandoah Valley Railroad, at East Liberty, Page county, Va., fell with a crash last Saturday afternoon. It is thought this will delay the completion of the road for several months.

The Tamworth and Quebec Railway is being surveyed. It has bonuses and stock to the extent of five thousand dollars per mile.

Philadelphia Stock Exchange.

Closing Prices for the week ending Oct. 19.

American Railroad Journal.

Financial and Commercial Review.

THURSDAY EVENING, October 21, 1880.

Money on call is easy at 2@3½ per cent; on time 3@4 per cent, and on prime mercanile paper 4½@5½ per cent.

The posted rates of the leading drawers of sterling are 4.82@4.84½. The actual rates are 4.81 @½ and 4.83¼@¾. Cable transfers are 4.84 @¼. Prime commercial bills are 4.79½@4.80.

The Governors of the New York Stock Exchange have admitted to dealings at the board the following named securities:

Wabash, St. Louis and Pacific Railroad Company—$35,000,000 general mortgage 6 per cent gold bonds, due in 1920. The mortgage is for $50,000,000, and of the amount now placed upon the list $33,000,000 is reserved to retire prior mortgages maturing prior to 1911.

Utah Southern Railroad Company—$450,000 general mortgage 7 per cent bonds, numbered 1,501 to 1,950.

Denver, South Park and Pacific Railroad Company—$1,800,000 first mortgage 7 per cent gold bonds, due 1905, and 35,000 shares of capital stock of the par value of $100 each.

Louisville and Nashville Railroad Company—$14,716,000 general mortgage 6 per cent gold bonds, due 1930. Of this amount $9,716,000 are reserved to retire prior mortgages. Evansville, Henderson and Nashville Division—$2,400,000 first mortgage 6 per cent gold bonds, due 1919.

Midland Railroad Company of New Jersey—$3,500,000 first mortgage bonds. Application to

list the capital stock and income bonds also was refused.

The closing quotations on Thursday were: American Union Telegraph, —@61; Am. Dist. Tel., 78@78¼; Atlantic and Pacific Telegraph, 41½@42; Canada Southern, 66@66½; Central of New Jersey 76⅛@76¼; Central Pacific, 74½@75; Chicago and Northwestern, 116¼@116⅜; do. pref., 138¾@139; Chicago, Burlington and Quincy, 141¼@141¾; Chicago and Alton, 118½@120; do. pref., 130@135; Chicago, Milwaukee and St. Paul, 103½@103⅝; do. pref., 116½@117; Chicago, Rock Island and Pacific, 121@121¾; Chicago, St. Louis, and New Orleans, 87@88; Cleveland, Columbus, Cincinnati and Indianapolis, 77@78; Columbus, Chicago and Indiana Central, 19@19⅜; Delaware and Hudson Canal, 85⅛@85⅜; Delaware, Lackawanna and Western, 94⅝@94¾; Hannibal and St. Joseph, 41⅞@42; do., pref., 86¼@86½; Illinois Central, 114@114¼; Lake Erie and Western, 33@33¼; Lake Shore and Michigan Southern, 114½@114⅝; Louisville and Nashville, 160@161; Morris and Essex, 114¾@115½; Manhattan Elevated, 38⅛@38⅛; Metropolitan Elevated, 112½@112½; Michigan Central, 105¼@105½; New York Elevated, 118@119½; New York Central and Hudson River, 135@135¼; New York, Lake Erie and Western, 43½@43⅝; do. pref., 74¾@75; New York, Ontario and Western, 32@34; Northern Pacific, 28¼@28¾; do. pref., 53@53½; Ohio and Miss., 35¾@36; do. pref., 77½@78; Pacific Mail, 45@45⅛; Philadelphia and Reading, 37⅛@37¼; St. Louis and San Francisco. 35@36; do. pref., 47@47½; do. 1st pref., 75@77; St. Louis, Iron Mountain and Southern, 51⅝@51⅞; St. Louis, Alton and Terre Haute, —@22; do. pref., 80¼@81; Union Pacific, 92⅜@94½; Western Union Telegraph, 103½@103⅝; Wabash, St. Louis and Pacific, 40⅜@40¾; do. pref., 73¾@73⅞.

The following quotations of sales of Railway and other securities, for the week, are in addition to those given elsewhere in our columns:

New York.—Am. Dock and Imp. 7s, ass., 112⅛; Boston and New York Air Line, 44; Boston, Hartford and Erie 1st, 41½; Buffalo and St. Line 1st, 103; Chicago, St. Louis and New Orleans, 37½; Chicago, St. Paul, Minn. and Omaha, 43⅞; do. pref., 83⅛; do. consol., 99⅞; Cincinnati, Indianapolis, St. Louis and Chicago, 89½; Chesapeake and Ohio 1st pref., 26; do. 2d pref., 21¼; do. cur. int., 41¼; do. 1st, Series B, 71⅝; Central Iowa, 30; do. deben. certif., 81; do. 1st, 106¾; Chicago, Milwaukee and St. Paul 2d mort., 104½; do. 8s, 1st Southern Minn. div., 102½; do. The Wilmington (Del.) Every Evening says it now looks as if the Philadelphia, Wilmington and Baltimore Company is really thinking seriously of building the projected branch line from Dover to Milford. The latest surveys give almost a bee line between the two towns, passing between Camden and Lebanon, about half a mile west of Magnolia and through Frederica. The right of way has been promised over most of the route. The road will run through a fine peach, berry and truck growing district, but the chief end in view is said to be the building up of Rehoboth and making it accessible to Philadelphia by fast trains within three hours.

Mr. P. J. Brown, of Ingersoll, has been awarded the contract for the construction of the Southwestern Railway, and commenced work last Saturday. The people of Winnipeg will rejoice at the prospect of the early completion of this the first of the great colonization railways intended to act as feeders to the Canada Pacific Railway.

New York, Lake Erie and Western R. R.

The gross earnings, working expenses and net earnings of the New York, Lake Erie and Western Railroad for the month of August 1879 and 1880, were :

	1879.	1880.
Gross earnings.....	$1,450,222 78	$1,606,873 68
Working expenses...	858,985 50	957,685 85
Net earnings....	$591,237 28	$649,187 83

—showing an increase in gross earnings of $156,650 90, in working expenses of $98,700 35, and in net earnings of $57,950 55.

From October 1, 1879 to August 31, 1880, the earnings, expenses, etc., were :

	1878-'79.	1879-'80.
Gross earnings....	$14,449,527 35	$16,906,691 54
Working expenses.	10,244,303 51	10,615,626 50
Net earnings.	$4,205,223 84	$6,291,065 04

—showing an increase in gross earnings of $2,457,164 19, in working expenses of $371,322 99, and in net earnings of $2,085,841 20.

At the annual meeting of the stockholders of the Ohio and Mississippi Railway Co. held in Cincinnati on the 14th of October, James Sloan, Jr., and Osman Latrope of Baltimore, and F. W. Tracy of Springfield, Ill., were elected directors to serve the ensuing four years. The annual report of Receiver King stated that the property was vastly improved and that its net earnings for the year ended Oct. 31, 1880, would probably reach $1,300,000. It was stated that this sum was in excess of about $400,000 which would be charged to the expense for substituting steel for iron rails. Nearly the whole line is now laid with steel. The report says the company will have on hand Nov. 1, nearly half a million dollars, and be prepared to pay two coupons on the second mortgage bonds and two on the Springfield Division bonds.

At a meeting of the European and North American Railroad Corporation recently held at Bangor, Me., N. Woods, S. H. Blake, H. C. Ayer, T. J. Stewart, E. A. Wilson, Sprague Adams, C. P. Stetson, John S. Ricker and H. N. Fairbanks were chosen directors. At a meeting of the directors N. Woods was elected President ; J. Fred. Leavitt, Clerk ; N. Woods, Treasurer, and F. W. Cram, Superintendent.

At the recent annual meeting of the Profile and Franconia Notch Railroad, held at Concord, N. H., the following gentlemen were chosen as a board of directors for the ensuing year : Richard Taft, Emmons Raymond, Samuel N. Bell, John H. George, Walter Aiken, Joseph A. Dodge and John H. White. Richard Taft was chosen President and Charles C. Lund, Clerk.

The steam pilot boat "Hercules" has been laid up. It has been a financial success, but the Pilot Commissioners, who are opposed to steam, have refused to renew the license of the pilots running her. She will, therefore, be laid up till the question is decided in the Courts.

The Ontario and Pacific Railway line has been decided on to within four miles of Huntsville. The proposed branch line to Parry Sound will leave the main line about two miles north of Utterson.

New Steam Pilot Boat.

The Pilot is to be the name of the new steam pilot boat built for the Pilot Association of Baltimore by the Harlan & Hollingsworth Company, of Wilmington, Del. The boat, which has cost $40,000, has been finished in the time agreed upon with Captain John H. Cooper, president of the Pilot Association. The dimensions are: length over all, 122½ feet; extreme molded beam, 23 feet ; depth, 12¾ feet ; depth from base line to top of quarter deck, 18 feet. The hull is of iron. The machinery consists of an inverted, direct acting compound engine, with 22 and 36-inch engines, and 26 inch stroke ; one cylindrical return tubular boiler, with a working pressure of 70 pounds of steam to the square inch ; an independent boiler feed steam pump, which can be used also for fire service. The boat, which is the first of the kind, was launched on the 16th inst. from the company's yard, Wilmington, and is expected to reach Baltimore in a month.

The route of the Denver, Salt Lake and Western Railroad for which articles of incorporation have been filed, extends from Denver northwest to the Cache-la-Poudre river, near Fort Collins ; thence up the valley and through the narrows and canyons of the Cache-la-Poudre, following the main stream to the forks ; thence by the South Fork of said river to its headwaters ; thence westward to the Bear or Yampa river ; thence down the valley and through the several canons of Bear river, with the privilege of extending the road to and into the territory of Utah, together with branch lines from the line of said railroad, extending into the counties of Boulder, Jefferson, Clear Creek and Gilpin in the State of Colorado.

The Secretary of the Interior has rendered a decision involving large pecuniary interests in the case of the Western Railroad of Minnesota, now operated and controlled by the Northern Pacific Railroad Company, in regard to the claim of that company for lands under the indemnity grant to the State of Minnesota of the acts of March 3, 1857, and March 3, 1865, and the various amendatory statutes. This decision, which also bears directly upon the similar claims of the Chicago, Milwaukee and St. Paul Railway, and probably upon those of several other Western companies, is favorable to the claims.

It is stated at the Interior Department that the Northern Pacific Railroad will be completed within two and a half years ; 100 miles were completed and approved by the President, August 1st last ; 100 more will be ready for his approval when he returns, and 500 are to be constructed next year. It is stated that no legislation looking to an extension of the Northern Pacific land grant period will be asked at the next session of Congress.

Alexander Cameron has been appointed by Judge Gilbert receiver of the New York, Gravesend and Coney Island Railroad Company, which has not yet built its route. The principal property of the company is a wharf at the foot of Thirty-sixth-st., Brooklyn, and about eighty rods of track.

The Public Lands.

From the Annual Report of the Commissioner of the General Land Office, now nearly completed, we learn that there were surveyed during the fiscal year ending June 30, 1880, 15,699,253 acres of public lands, and 652,151 acres of private land claims. This is an increase in the amount of public lands surveyed of 725,347 acres over that of the last year. This great increase is attributed to the operation of the act of March 3, 1879, which led to a great increase in the number of applications by private individuals for public surveys. Disposals of public lands during the year were made as follows:

	Acres.
Cash entries	850,740
Homestead entries	6,045,570
Timber culture entries	2,193,184
Agricultural college scrip	1,280
Locations with military bounty land warrants	88,522
Swamp lands patened to States	3,757,888
Lands certified for railroad purposes	1,157,375

The area of public lands surveyed in the different States and Territories during the last year is as follows:

	Acres.		Acres.
Arizona	208,521	Nebraska	709,179
California	3,792,630	Nevada	928,694
Colorado	2,775,601	New Mexico	1,624,156
Dakota	2,130,808	Oregon	1,052,221
Idaho	225,637	Utah	440,585
Louisiana	80,504	Washington T.	847,595
Minnesota	296,253	Wyoming	184,449
Montana	302,413		

In addition to this, surveys were made of private land claims in three States and Territories, as follows: California, 58,708 acres; Arizona, 149,258 acres; New Mexico, 444 184 acres. The total area of public lands surveyed from the beginning of surveying operations up to the close of the last year is shown to be 752,557,195 acres, leaving an estimated area yet unsurveyed of 1,062,231,727 acres.

The Coal Trade.

The leading coal carrying companies make the following reports of their tonnage for the week ending October 9, and for the year to the same date, compared with their respective amounts carried to the same time last year:

	Week.	1880.	1879.
Reading Railroad	95,539	5,790,005	6,826,211
Schuylkill Canal	5,416	375,143	764,581
Lehigh Valley	71,746	3,729,288	3,616,373
Del., Lack. & Western	52,654	2,580,079	2,877,244
Shamokin Valley	20,697	661,488	700,529
Central New Jersey	36,914	2,731,146	2,058,176
United R. R. of New Jersey	9,675	842,477	662,758
Pennsylvania Coal	17,950	827 074	1,087,364
Delaware and Hudson	33,844	2,214,266	2,585,716
Huntingdon & Broad Top Mt	10,287	340,018	239,024
Penn. and New York	21,999	919,857	1,016,066
Clearfield, Pa	43,801	1,277,416	1,214,113

The total tonnage of anthracite coal from all the regions for the week ending October 9, as reported by the several carrying companies, amounted to 396,790 tons, against 521,814 tons in the corresponding week last year, a decrease of 125,024 tons. The total amount of anthracite mined for the year is 17,200,694 tons, against 19,964,980 tons for the same period last year, a decrease of 2,764,286 tons. The quantity of bituminous coal sent to market for the week amounted to 106,019 tons against 53,224 tons in corresponding week last year, an increase of 52,795 tons. The total amount of bituminous mined for the year is 3,374,504 tons against 2,673,027 tons for the corresponding period last year, an increase of 701,477 tons. The total tonnage all kinds of coal for the week is 502,809 tons, against 575,038 tons in corresponding week last year, a decrease of 72,229 tons, and the total tonnage for the coal year is 20,575,198 tons against 22,638,007 tons to same date last year, a decrease of 2,062,809 tons. The quantity of coal and coke carried over the Pennsylvania Railroad for the last two days of September was 60,212 tons, of which 45,637 tons were coal and 14,575 tons coke. The total tonnage for the year thus far has been 5,287,366 tons of which 3,975,767 tons were coal and 1,311,599 tons coke. These figures embrace all the coal and coke carried over the road east and west. The shipments of bituminous coal from the mines of the Cumberland coal region during the week ended Oct. 9 were 44,688 tons, and for the year 1,649,928 tons—an increase of 516,405 tons as compared with the corresponding period of last year. The coal was carried as follows: Baltimore and Ohio Railroad—week 20,945 tons, year, 987,181 tons; an increase over 1879, 375,181 tons. Chesapeake and Ohio Canal—week, 17 819 tons; year 484,615 tons; increase over 1879, 131,319 tons. Pennsylvania Railroad—week 5,924 tons; year, 178,127 tons; increase over 1879, 59,355 tons. The total tonnage of the Reading Railroad for the week ending last Saturday, October 16, was 205,000 tons, of which 56,500 tons were sent to Port Richmond, and 51,000 tons shipped from there. —Phil. Ledger, Oct. 18.

Philadelphia and Reading Companies.

Mr. Franklin B. Gowen, one of the receivers of the Philadelphia and Reading Railroad and Coal and Iron Companies, has written a letter in reply to an article calling attention to the position occupied by the various creditors of the aforesaid corporations, in which, after commenting on the impression that might be created, he gives an account of what the receivers have been doing in reference to the certificates of indebtedness and the several mortgages. He says there has been no difficulty on any of the mortgages, and the receivers hold legal possession of the property on behalf of the general mortgage and income mortgage creditors, subject to the liens of all prior mortgages. If it were possible that such a thing as a foreclosure or sale of the property could ever take place, the latter would be sold subject to the lien of all the prior mortgages, and out of the proceeds of sale the receivers' certificates would be paid even if there was not enough money to pay the general mortgage in full; but such sale would in no manner disturb the lien or affect the security of the prior mortgages, the holders of which can, therefore, safely dismiss all fears as to their position. As to the amount of receivers' certificates outstanding, he says:

On the 27th of May last the receivers were authorized to borrow $1,000,000, of which $610,000 was for interest on consolidated mortgage due June 1, and the remaining $390,000 was for the purpose of paying arrears of wages. Of this issue of $1,000,000, there has been paid $300,000 and $300,000 additional will be paid within the next two weeks. The receivers also issued $379,162 86 of certificates for July rentals, all of which have since been paid. The receivers of the Coal and Iron Company have from time to time issued, on account of current deliveries of iron, certificates amounting to $231,801 16, of which amount there have been paid $157,591 07. These are all the certificates or obligations issued by the receivers of either company, except the 4 per cent certificates issued under the order of the Court for materials and supplies furnished to the two companies, and this latter issue had no other effect than to convert an existing lien bearing 6 per cent interest into one which bears but 4 per cent. It must be remembered that there are over $60,000,000 of the securities of the company which are subordinate to the lien of the general mortgage, and although no disposition has been shown by the general mortgage creditors to harass the company, or to insist upon securing their own rights at the expense of any subsequent creditors, yet it cannot but be agreeable to the late creditors to find that the receivers are gradually reducing the arrears of prior incumberances.

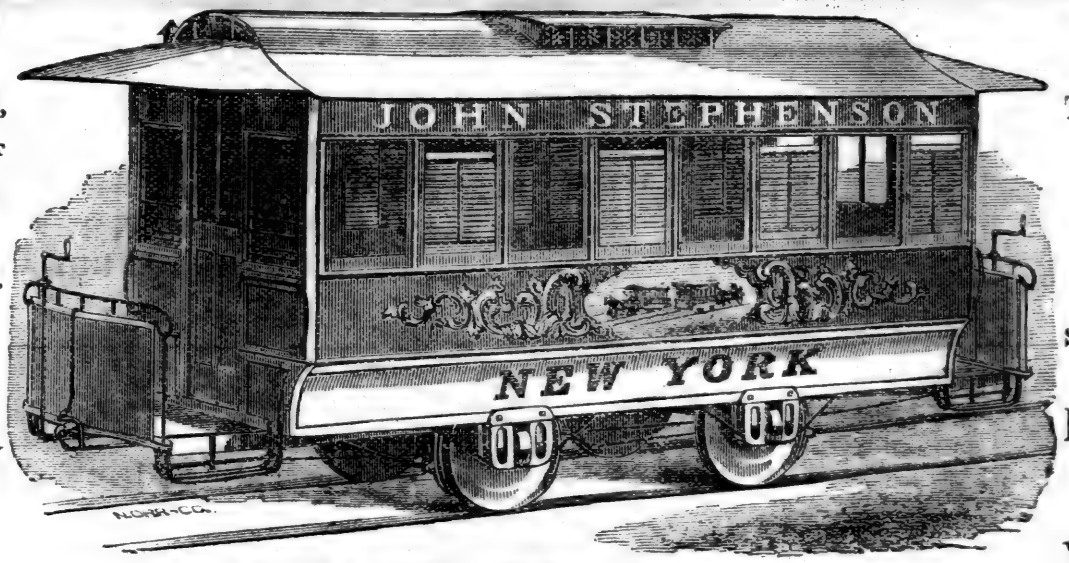
BREWSTER & CO.

(OF BROOME ST.)

BROADWAY, 47th to 48th Sts.

ONLY PLACE OF BUSINESS.

ESTABLISHED 1873.



LONERGAN'S SECRET SERVICE,

T. E. LONERGAN, Proprietor,
82 & 84 Nassau Street, New York.

The investigation of frauds on Railway Companies a specialty.

CARS FOR ONE HORSE, WITH or WITHOUT **Platforms,** OR TO Swing on Trucks.

EVERY **STYLE AND** VARIETY OF CONSTRUCTION.

CARS FOR TWO HORSES COMBINING ALL Valuable Inventions **ELEGANT** STYLE. Light & Durable, **Full Size** AND REDUCED WEIGHT.

47 EAST 27TH STREET.

This Establishment commenced building STREET CARS in 1832, and is famed for superior ELEGANCE of workmanship and SUBSTANTIAL practical results.

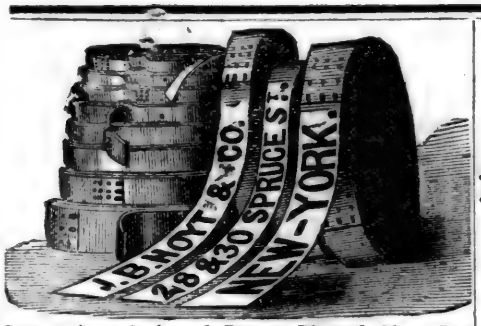
Its location, in the **PORT** of **NEW YORK**, is most favorable for shipments, and its CARS, CONSTRUCTED in SECTIONS, may be **ENTIRELY COMPLETED** before being packed for transportation.

VALENTINES VARNISHES

OUR CLAIMS.

We claim that our Finishing Varnishes are unsurpassed in the following qualities:

1. Uniformity. 3. Fluency. 5. Drying. 7. Fulness. 9. Durability.
2. Paleness. 4. Reliability. 6. Hardening. 8. Brilliancy. 10. Economy.



All know it is easy to make a Varnish that has the single quality of DURABILITY but Varnishes which wear well are generally inferior in color and working quality uncertain in laying, too slow in drying, or lacking in body or lustre, and frequently they possess ALL these defects.

In our "RAILWAY-COACH FINISHING" the ten qualities will be found combined and our other Varnishes are as elastic and durable as is practicable for the work on which they are employed.

Those of our Varnishes which have the greatest durability require time for hardening. They have superior elasticity, and ARE DISTINGUISHED FOR THE EXTENT OF SURFACE THEY WILL COVER, WHICH RENDERS THEM ECONOMICAL.

VALENTINE & COMPANY,

Chicago. NEW YORK. Paris

Patent Stretched and Patent Riveted Short Lap

BELTING.

Our Belts are made from pure Oak Tanned Butts, and of the heart or solid part only. No part of the shoulder being used. Any one not familiar with Belt making can readily detect this by the shortness of the lengths and laps. Long laps are made including the shoulder or thinner and softer part of the Leather, causing the Belt to be, in its enduring qualities, no better than its poorest or thinner parts

Our Belting is warranted to run straight and maintain an even bearing on the pulleys, and sold under the fullest Guarantee.

J. B. HOYT,
D. B. FAYERWEATHER,
HARVEY S. LADEW.

LEATHER BELTING.

Made exclusively from Messrs. J. B. Hoyt & Co.'s Best Oak Butts —shoulders all cut off, only solid leather used—short lengths and short laps—fully warranted.

Rubber Belting and Hose and Packing at lowest prices.

STEPHEN BALLARD & CO.,
16 & 18 Chambers St,
NEW YORK.

PATENT
MINERAL WOOL.

ITS FOREMOST QUALITIES:

CHECKING TRANSMISSION OF HEAT, COLD AIR, SOUND AND ELECTRICITY AS AN AIR-HOLDING MATERIAL, ABSOLUTELY FIRE-PROOF AS A MINERAL—RAT AND VERMIN-PROOF, AND NOT ATTRACTING DAMPNESS, BECAUSE VITREOUS.

s Manufacture, Composition and Uses in the Construction of Dwellings, etc.

This pamphlet and small sample mailed free.

A. G. DAY,
MANUFACTURER OF
Kerite Insulated Telegraph Wire and Cables

Of all kinds made to order, for Ocean, River, Aerial and Subterranean Lines.

The Kerite covering of these Conductors unlike any other, resists effectually the destructive action of Heat and Moisture, and the corrosive agents either in Earth, Air or Water.

☞ Special orders should state whether the Cable is to be exposed to Earth, Air or Water.

FACTORY—SEYMOUR, CONN. **Office, 120 Broadway, New York.**

NEW YORK, LAKE ERIE & WESTERN RAILWAY.

TO THE TRAVELING PUBLIC.

During the Centennial Season—six months, closing November 10, 1876—the Erie Railway carried almos 3,000,000 passengers, without a single accident to life or limb, or the loss of a piece of baggage.

And for a whole year, the official records of the United States Post-Office Department show the arrivals of Erie Railway trains in New York, on time, to be from 15 to 27 per cent. ahead of competing lines.

Facts well worthy the consideration of travelers.

E. S. BOWEN, General Superintendent.
JNO. N. ABBOTT, General Passenger Agent.

PASSENGER CARS

Of the Finest Finish, as well as every description of CAR WORK, furnished at Short Notice and at Reasonable Prices by the
HARLAN & HOLLINGSWORTH COMPANY, Wilmington, Del.

J. CURLEY,
MANUFACTURER OF ALL KINDS OF CARRIAGES
Fine Work both Heavy and Light a Specialty!

☞ All the latest Styles or Patterns kept in Stock or Works.

MANUFACTORY AND REPOSITORY, Corner Boreum Place and State St., Brooklyn, N. Y.

EAMES VACUUM BRAKE CO.,
RAILWAY TRAIN BRAKES,

P. O. BOX 2,878. SALES OFFICE, 15 GOLD ST., NEW YORK. **Represented by THOS. PROSSER & SON.**

THE EAMES VACUUM BRAKE is confidently offered as the most efficient, simple, durable and cheapest power Brake in the market. Can be seen in operation upon over fifty roads.

Vermont and Canada Railroad.

At the annual meeting of the stockholders of the Vermont and Canada Railroad Company, held at Bellows Falls, Vt., on the 21st inst., Francis A. Brooks of Boston, Charles E. Billings of Newton, John D. Bryant of Boston, Thomas F. Clary of Boston, Wm. H. Webb of Philadelphia, James W. Johnson of Boston and Francis V. Parker of Boston were elected directors by a vote of 8,542 shares. The following resolution was then offered and adopted:

Resolved, That the Directors this day chosen be requested to proceed in the assertion of such legal rights, if any, as the corporation may have to the possession and control of its own property, and reclaiming the same from the Central Vermont Railroad Company.

The President explained the reason for the change in some of the directors, attributing it to the fact that there was "a difference of opinion in the old board." "The present board," he said, "were unanimously of the opinion that possession of the road should be obtained first. The past rental due was gone." He then read a statement of facts relative to the expected decision of the Supreme Court now in session at Montpelier, the substance of which is as follows:

The Vermont and Canada Railroad was organized in 1849, the road originally being from Essex Junction to Rouse's Point, a distance of 47 miles. To comply with the charter it was necessary to extend the line from Essex Junction to Burlington, and in 1858 the charter was extended for five years, and in 1861 the extension to Burlington through the Tunnel was made and the connection with the Rutland Road completed. In 1850 and 1851 the Vermont and Canada leased this road to the Vermont Central Company. They were to operate it and pay 8 per cent on the cost of construction, which was $1,348,500, as annual rental. The security for rental was the reserved right on the Vermont and Canada Company's part in case of non-payment of rent to enter in possession of both the Central and Vermont and Canada Roads and to operate the same till rent was paid. The road from Burlington to the middle of the channel at Rouse's Point, a distance of about 47 miles, and a branch from Swanton Junction to the Vermont and Canada line, a distance of 10 miles, constitute the Vermont and Canada Road. In 1852 the Vermont Central Company failed and surrendered the Vermont Central and Vermont and Canada Roads to the trustees of the first mortgage bonds of the Vermont Central Road.

In 1854 these trustees failed and on December 1, 1854, failed to pay the six months' rent then due the Vermont and Canada Company. The Vermont and Canada immediately commenced a suit in the Franklin County Court and sought to enforce the agreement by which it was to occupy both roads till back rents were paid. Upon this application the property was put into the hands of receivers. In 1854 they were ex-Gov. J. Gregory Smith, Joseph Clark and Lawrence Brainard. The right of the Vermont and Canada Company was disputed by all the other parties interested in it, one of the reasons being that the charter of the Vermont and Canada Company authorized that corporation to operate a railroad from Rouse's Point to Burlington only, and it was beyond the capacity of that corporation to make a contract by which it might operate a railroad from Rouse's Point to Windsor. The amount of the cost of construction upon which the eight per cent rental was to be paid was also disputed. However, in 1861, the Supreme Court of Vermont rendered a final decision in that clause fixing the cost of construction at $1,348,500.

In 1864 the compromise decree was made. The effect and construction of this is the one thing about which the parties interested in the property have been involved before the courts; it having been complicated with questions arising out of the debt created by the managers under the decree and floated by them on the Boston market. From 1864 to 1871 the Swanton branch and Burlington branch were built and the property improved by erection of depots, etc. To pay for this the capital stock was increased $1,651,500, making the capital $3,000,000. The managers have further improved the property and have floated bonds as follows:

Equipment bonds	$2,000,000
Stanstead, Shefford and Chambly 7s	500,000
Missisquoi	500,000
Vermont and Canada guaranteed 8s	1,000,000
Income and extension	1,000,000
	$5,000,000

In addition to this sum the management had a floating debt of $2,800,000, upon which their notes went to protest in September, 1872. In December, 1872, they failed to pay the semi-annual rent of $120,000 due the Vermont and Canada Company. The Legislature of 1872 chartered the Central Vermont Railroad Company, with a view to organize a corporation out of the different securities, whereby all the debt should be capitalized into stock of the new company.

In May, 1873, the Central Vermont Company organized with a cash capital of $1,000,000—a majority of which was subscribed by Duncan, Sherman & Co., Trenor W. Park and other New York capitalists. There was a clause in the Central Vermont's charter which provided that until a majority of the first mortgage bonds of the Vermont Central Road should be retired under the new charter the Central Vermont Company might operate the property temporarily under the orders of the Court of Chancery of Franklin county. Availing themselves of this clause, application was made to have the property temporarily intrusted to the Central Vermont Company, and on July 1, 1873, Chancellor Royce granted the application.

The old question as to the relative rights of the Vermont and Canada Company, as distinguished from the rights of the persons having the trust debts of almost $8,000,000, was not determined and has been since in one form or another continually before the Courts, the Central Vermont Company retaining the possession for the past seven years. The opinion of Judge Barrett in 1877 has been claimed as a victory by both parties, and now the expected decision by the Supreme Bench is quite currently reported to be in favor of the Central Vermont Company. The Vermont and Canada stock in market has advanced, however, presumably by speculators.

The decision is a grave one and involves millions. Certain it is that the present managers have one of the best roads in the country—steel rails, improved rolling stock—and Vermonters were never so well served as to-day in railroad facilities.

Railroad Expresses.

The Adams Express Company has replied to the statement which is going the rounds of the press that the Ohio and Mississippi Railroad Company, which has now been three years engaged in the express business, has profited largely by it; that the Express Company paid them $4,000 per month; and that the Railroad Company realized $93,000 from its express service in the year ending August 31, 1880. To all this the Adams Express Company say:

This would read well if it were borne out by the facts. The contract of the Adams Express Company was to pay the Ohio and Mis-

sissippi Railway $200 per day. For that sum of money it was entitled to carry 13,000 pounds per day. If it failed to carry 13,000 pounds, that was its loss; it must pay the sum guaranteed. If it carried more than 13,000 pounds the excess was to be paid for at the rate of $1 25 per 100 pounds. Instead of $4,000 per month, as "it is stated," it guaranteed to pay $5,200 per month. The declaration that the exhibit of 1879 shows a handsome gain will be entitled to consideration when it is officially stated what tonnage was carried to produce the $93,000. If such a statement is made it will show that it takes a large quantity of express freight, at about 33 cents per 100, over 340 miles of road, to earn $93,000. Or, in other words, that no tonnage account is kept at all, and that what is called "express" is a great part of it freight that would or should go to its freight account. If the Ohio and Mississippi can show that on 13,000 pounds a day it realized more than the old express company paid, there is a chance for railroad expresses.

Grand Trunk Railway of Canada.

DIRECTORS' REPORT, June 30.

	1879.	1880.
The gross receipts upon the whole undertaking, including the Buffalo and Champlain lines, have been..	£832,869	£991,992

	£211,426	£337,248
Less—Interest on postal and military bonds not retired.	438	.....
Leaving	£210,988	£337,248

Applicable for the following payments, viz.:

Interest, &c., paid on lands	£2,762
" Brit. Am. Land Co. Deb.....	617
" Montreal Seminary Deb.....	616
" Island Pond Debentures.....	2,700
	£6,695
Deduct interest on loans, &c.....	503
	£6,193
Atlantic and St. Lawrence lease.....	£52,540
Lewiston and Auburn railway rent.....	1,849
Detroit line lease.....	11,250
Montreal and Champlain bond interest.	8,515
Buffalo and Lake Huron rent.....	35,000
1st Equipment bond interest..	11,925
2nd Equipment bond interest	15,000
5 per cent perpetual debenture stock...	72,489
	£214,762
Showing a balance of.....	122,487
	£337,249

The amount brought forward from the preceding half year, £1,440, makes, with the above balance from the past half year, £122,487, a total of £123,927, out of which a dividend for the half year at the rate of £5 per cent per annum on the First Preference Stock has been paid, absorbing £80,374 and leaving a balance of £43,552. As regards the appropriation of this balance of £43,552, the Board resolved, after obtaining the opinion of eminent counsel on the Arrangements Act of 1873, to pay a dividend on the Second Preference Stock for the half year at the rate of 3 per cent per annum, absorbing £34,896, and leaving £8,659 to be carried forward to the current half year. This dividend will accrue to the holders of Second Preference Stock registered in the books of the company on the 4th instant, and the warrants will be payable as already notified on the 1st November next. The gross receipts of the half year were greater than in 1879 by £159,122, or 19.10 per cent, though the receipts for the Riviere du Loup section, amounting to £22,263, were included in 1879, and, that section having been sold, were not received in 1880. The working expenses, including renewals, amounted to £675,344, or 68.08 per cent, against a total charge of £634,423, or 76.17 per cent in 1879, showing an increase of £40,921, or 6.45 per cent, as compared with an increase in the receipts of 19.10 per cent. The passenger receipts increased by £26,824, or 11.54 per cent, and the numbers by 47,198, or 5.58 per cent, as compared with 1879, but the receipts for mails and expresses showed a decrease, owing mainly to the sale of the Riviere du Loup section, of £3,201. The receipts from freight traffic increased by £135,786, or 24.09 per cent, and the tonnage by 203,265 tons, or 16.59 per cent. The total number of passengers was 892,825, against 845,627; and the quantity of freight was 1,428,103, against 1,224,838 tons. The average receipt per passenger was 5s. 9⅛d., against 5s. 6d.; and per ton of freight 9s. 9⅛d., against 9s. 2⅛d. The charges for maintenance and renewal of road and rolling stock were in 1880 £242,429, and in 1879 £214,862, showing an increase of £27,567. The expenditure for fuel, wages, and other charges for working the Railway, was in 1880 £432,914, and in 1869 £419,559, an increase of £13,355.

The percentage of working expenses to gross receipts was reduced, as regards maintenance and renewals of road and rolling stock, by 1.86 per cent, and as regards all other charges by 6.73 per cent; making a total reduction on the general result in working the railway of 8.09 per cent. The expenditure on capital account during the half year was £96,131 19s. 0d.; but as there have been credited to this account (1) the amount received from the Dominion Government for the Biviere du Loup Line, and (2) an amount received during the half year as premium on Debenture Stock issued, the total expenditure has been reduced by £222,244. There has been issued during the half year £106,000 of Debenture Stock at a premium of nearly 5 per cent. out of the proceeds of which £51,800 of First Equipment Mortgage Bonds have been redeemed, and the balance has been applied to general purposes. The Chicago and Grand Trunk Railway was opened for traffic from temporary stations in Chicago to Port Huron on the 8th February; and, under the decision of the American Board of Arbitration, 10 per cent of the freight traffic and 6 per cent of the live stock traffic out of Chicago have since been awarded to that railway. Its access to the proposed permanent stations in Chicago has until recently been retarded by legal obstructions. These having at length been removed, increased facilities for passenger and freight traffic will be afforded. Full explanations in regard to the agreements referred to in the notice convening the special meeting (to be held immediately after the half yearly meeting) will be given by the President in proposing the necessary resolutions.

On behalf of the Board,
H. W. TYLER, President.
21 Old Broad street, E. C., 14th October, 1880.

Immigration Statistics.

The immigration into the United States during the year ended June 30 was 457,257, as follows: At New York, 263,726; Port Huron, 94,375; Boston, 34,062; Philadelphia, 21,727; Baltimore, 17,894; San Francisco, 7,153; all other ports, 18,820. Of arrivals there were from Europe 347,747; Asia, 5,839; America, 101,681. The immigration from Europe was as follows: Great Britain and Ireland, 144,876; Germany, 84,888; Sweden, 39,186; Norway, 19,895; Austria, 12,304; Italy, 24,327; Denmark, 6,576; Switzerland, 6,156; Russia, 4,854; Hungary, 4,363; France, 4,313; Netherlands, 3,340; Holland, 2,177; all others, 2,142. The immigration from the American Continent included British North American provinces, 99,706.

Harlem Extension Railroad.

The last train under the management of R. C. Root of New York ran into Bennington over the Harlem Extension Railroad South on the 16th inst. This is that portion of the Harlem Extension Road which was abandoned in 1877 by the Central Vermont Company, and is the identical piece of track built by town bonds, over the payment of which there has been so much litigation and politics in western Vermont since 1867. After remaining closed several months, in November, 1877, Mr. Root took possession for the bondholders and has operated it since as a feeder for the Bennington and Glastonbury Railroad and Coal Company, and the extensive coal works on the Bennington and Rutland Railroad Company's line. In this manner the railroad in controversy has paid something, and worthless bonds have appreciated to about twelve cents. Certain bondholders representing the interests of Henry A. Tilden and others have applied for a Receiver, and that part of the railroad in the State of New York has passed into the hands of John Van Valkenburgh, the Receiver. Whether the road will be closed or not is not known. In any event Bennington's connection South is broken, as the Vermont portion of the railroad will not be operated, being owned by Vermont parties, who, with Mr. Root, have made unavailing efforts to come to some agreement with the Receiver to operate the south end. It is feared that disastrous consequences will ensue to large business interests should trains cease running.—[Bennington (Vt.) Banner.

A company is being organized to build a narrow-gauge railway from Mansfield, Allegheny County, Pa., to connect at Temperanceville with the street railroad running to Pittsburg. The capital is to be $50,000, and the work will begin as soon as a sufficient amount is subscribed to guarantee the completion of the road. If this enterprise is successful it is thought that the road will be extended through Cecil, Chartiers, Mt. Pleasant and other townships in the northwestern part of Washington County, which are underlaid by fine veins of coal.

At the annual meeting of the Tehauntepec Railroad Company held at Pittsfield, Mass., October 20, the following gentlemen were elected directors: Edward Learned, of Pittsfield; T. J. Buckley, George S. Coe, Cortland P. Dixon, Ozias Bailey, Myron P. Bush, John A. Marvin, Hayden H. Hall, W. P. Learned, all of New York, and Manuel Gamboa and Francisco de Harrando of Mexico. The reports were very flattering, thirty miles of the road being already graded and the track laid for about ten miles.

The citizens of Bath, Me., have authorized the city council to pay the city bonds issued in aid of the Knox and Lincoln Railroad, if it can be done on favorable terms. For that purpose the Council is authorized to issue new bonds bearing 4 per cent interest, to run not less than twenty years nor more than forty years from date, and cover an amount not exceeding $871,850.

The Wind Gap (Penn.) Railroad will be completed and in running order as far as Pen Argyl by the 1st of January.

New York, Saturday, October 30, 1880.

Entered at the Post Office at New York, N. Y., as Second-Class Mail Matter.

AMONG the new features adopted by the AMERICAN RAILROAD JOURNAL, as appears on another page of this issue, is a department on counterfeit money It is intended to make this a permanent and authentic feature of the paper, and we believe it is one that will prove of great service and value to our readers. We are to receive from the U. S. Secret Service Division at Washington immediate notice of the discovery of counterfeits, which will be promptly published in the JOURNAL, and information in various forms will be given, through facilities which we have, so that this department may be taken as a trustworthy guide and assistant in checking the circulation of bogus money.

ALTERATIONS and improvements being made in the tables, which are weekly features of the JOURNAL, necessitate the temporary withdrawal of part of them. In the Bond List alterations are desirable, owing to changes among the roads, consolidations, etc., since our tables were revised. The Share List is naturally corrected at this season of the year, and as this is the time when much of the necessary information comes to us from our correspondents and from the railroads, the table, if published now, could not be as symmetrical and complete as we would wish. On these accounts we withhold these two tables until they are perfected and made of greater value than ever before, to accomplish which no efforts will be spared. We have added several important features to the JOURNAL recently and it seems desirable now that some of our tables should appear semi-monthly, monthly and quarterly instead of weekly, thus giving us an opportunity to lay before our readers more information and a greater variety each week. We shall announce the tables as they are to appear from week to week. The table of contents always gives those in the current number, and in future by referring to the files of the JOURNAL any of its tables desired can readily be found, and they will contain as late information as though appearing in each number, as we do not intend to withhold any tables that are of weekly interest. While adding new features to the JOURNAL, our aim is to retain and improve the old ones.

AN account of the annual meeting of the stockholders of the Vermont and Canada Railroad Company, together with the names of the new Board of Directors, is given on another page. The meeting, which was held at Bellows Falls, Vt., on the 21st inst., was of more than usual interest on account of the expected decision of the Supreme Court of the State, now in session in Montpelier, and which it is supposed will be in favor of the Central Vermont Company. A review of this celebrated case is also given in connection with the above.

The State of Allegheny.

An association has been organized in the western part of Pennsylvania, with headquarters in the city of Pittsburg, which has for its object the creation of a new State out of a portion of the State of Pennsylvania to be called the State of Allegheny. It is proposed to divide the State of Pennsylvania so as to follow the county lines between McKean, Cameron, Clearfield, Blair, Huntingdon and Fulton counties on the one side, and Potter, Clinton, Centre, Mifflin, Juniata and Franklin counties on the other; the new State to consist of all that part of Pennsylvania west of the line so defined. It will embrace twenty-eight counties with a population of 1,454,196. The total population of the entire State of Pennsylvania is 4,237,312. This would leave the State, after taking from it the State of Allegheny, with 2,783,116 inhabitants, or nearly twice the population of the proposed State of Allegheny. A number of leading men are interesting themselves in the movement, who are very earnest in advocating the formation of the new State.

Nicaragua Ship Canal.

On the 12th of June last Mr. S. L. Phelps, representing the Provisional Interoceanic Canal Company, sailed from this city for Europe to lay before foreign capitalists the concessions granted by the Government of Nicaragua to that company for building a ship-canal across Nicaragua. Since Mr. Phelps's return he has been busily engaged on the report of the executive committee, of which he is the chairman, in which are embodied the results of his mission, and of Mr. A. G. Menocal's resurveys of certain portions of the proposed route. A large part of the report, which is dated October 15th, is devoted to showing the advantages of the Nicaragua over the Panama route. The total cost of the canal by the latter route is estimated at $304,000,000, and by the former at $75,000,000. The committee devote much attention to the probable business of such a ship canal, and satisfy themselves that 3,000,000 tons is the lowest estimate of the shipping which will pass through the canal each year. The gross receipts from that amount of tonnage at $2 50 per ton would be $7,500,000, and $6,000,000 after deducting the expenses—equivalent to 8 per cent upon the investment of $75,000,000. The engineer estimates the cost of building at $41,193,839, to which the committee add 15 per cent. The balance of the $75,000,000 is for interest, surveys, commissions, permits, etc.

Boston, Revere Beach and Lynn Railroad.

At the annual meeting of the stockholders of the Boston, Revere Beach and Lynn Railroad Company, held in Boston on the 21st inst., the following Board of Directors was elected: Edwin Walden, John G. Webster, John B. Alley, Edward Tyler, David H. Sweetser, T. B. Dix, Amos F. Breed, David L. Webster, Charles W. Slack, A. B. Martin, N. Gibson.

From the report of the Treasurer, which was presented, it appears that the total investment account on the 30th of September, 1880, the close of financial year, was $719,206 80, as follows: construction, $466,684 17; equipment, $94,219 67; ferry, $110,966 52; real estate, outside of location $47,206 80. The capital stock is $350,000, the net debt, $318,591 69, and the balance of profit or surplus, $50,615 11. The value of real estate not used for railroad purposes is $47,336 44. The expenses of the ferry for the year were $18,684 55, and of the railroad, $34,616 56. The passenger receipts were $151,438 93, the rent receipts $4,448 85, making a total of $155,887 78. The net earnings amounted to $52,586 67. The road has been equipped with steel throughout. The East Boston Station has been altered into a double one. A bridge 1050 feet long has been built between East Boston and Wood Island, and another one at Harbor View, 850 feet long. The road will have laid, by November 1, a double track 1¼ miles in length. A new turn-out has been built at the Pavilion 2000 feet long. The double track will only be laid as far as Winthrop Junction at present. There were 977,000 passengers carried last year and 1,112,000 this year.

The President described in detail some of the improvements of the year, saying that the management had been conservative in charging to the expense account several items which might properly be rated as construction or improvement charges. The grade of the road at Beachmont, the lowest points, has been raised from the marsh level, so that there is no longer any danger of the tracks being reached by high tides. There has been considerable filling in at the long bridge, which has been reduced in length from about 2,000 to 1,600 feet. Iron rails, weighing 40 pounds to the yard, have been replaced by steel rails, ten pounds heavier. A telephone line now connects every station on the line with the Boston office. In the opinion of the directors, the business of the

road will require a double track from East Boston to Winthrop, within one, or at most two years. About one mile of new track was laid during the past year. All the property of the road is reported to be in better condition than ever before. The officers of the company are: Edwin Walden, President; John G. Webster, Treasurer; John A. Tenno, Clerk.

Western Maryland Railroad.

At the annual meeting of the stockholders of this company held on the 20th inst, the following gentlemen were re-elected directors for the ensuing year: Joshua Biggs, of Frederick county; George W. Harris and C. W. Humrichouse, of Washington county; John K. Longwell, of Caroll county, and Edward Worthington, of Baltimore county. The other directors, who are appointed by the Mayor, are Samuel H. Adams, Christian Devries, Daniel J. Foley, George M. Gill, E. J. Hippley, N. G. Penniman, J. A. Preston and Alex. Rieman. The year ended September 30, 1880, has been a prosperous one for the road. The receipts from both passengers and freights were in advance of the previous year. From Edgemont, on the line of the road, to Waynesboro, a distance of 8 miles, the road has been completed and running since July 5, and the whole road from Waynesboro to Shippensburg, via Chambersburg, 26 miles, is under contract to J. Humbird & Co., who have 600 men at work grading, surfacing, &c., working from both ends. The balance of the iron rails for the road have arrived from Cardiff.

East India Railways.

The twentieth annual report of the government director of the East India Railway Companies shows the number of miles now open for traffic as follows:

Guaranteed companies' lines	6,073
State lines	2,363
Native state lines	175
Total	8,611

During the last year 395 miles of new railway have been opened for traffic. The net revenue derived from all the roads for the year was £5,372,596, which was about 4.85 per cent upon the total capital invested. The number of passengers during the year was 43,144,468, or nearly five millions more than for the previous year, and the freight moved was 7,876,766 tons, against 7,296,385 tons the previous year.

Iron Steamboat Company.

The organization of the Iron Steamboat Company was completed at a recent meeting of the incorporators at Long Branch. The following directors were chosen: John Roach, Joseph C. Ferguson, and C. H. Cramp, of Philadelphia; George S. Scott, of Scott & Leavitt; Samuel Carpenter, of the Pennsylvania Railroad Company; James B. Houston, president of the Pacific Mail Steamship Company; Alfred R. Whitney; Nathan G. Miller, Bridgeport, Conn.; W. E. Connor, Charles E. Quincey, of William Heath & Co.; James D. Smith, of Jameson, Smith & Cotting; William J. Hutchison, of Kennedy, Hutchinson & Co.; Rufus Hatch; Lewis May, of May & King; R. Cornell White; Henry Havermeyer and Charles J. Osborne. At a subsequent meeting of the directors, George S. Scott was chosen president, Rufus Hatch, vice president, Lewis May, treasurer, and William M. Earl secretary. An Executive Committee was appointed, consisting of J. B. Houston, W. E. Connor, James D. Smith, Charles J. Osborne, and Lewis May. It is said that contracts for twelve vessels, according to specifications already prepared, will be made soon, and that books for subscriptions to stock of the company will be opened in this city in a few days.

Dividends.

—The Concord Railroad Co. will pay a dividend of 5 per cent Nov. 1.

—The Boston and Providence Railroad Co. has declared a dividend of 4 per cent, payable Nov. 1.

—The Iowa Railroad Land Company has declared a dividend of $1 50 per share, payable Nov. 1.

—The Putnam Nail Company pays a quarterly dividend of $3 per share Nov. 1.

—The Boston Belting Company has declared a dividend of $6 per share, payable Nov. 1.

—The Evening Star Mining Company has declared a dividend of 5 per cent, payable Nov. 5.

—The China and Japan Trading Company will pay a dividend of 7 per cent, Oct. 30

—The Ferguson Gold Mining Company has declared a dividend, payable November 10.

—The Duncan Mining Company has declared a dividend of 7½ cents per share, payable Nov. 1.

—The Manchester and Lawrence Railroad Company has declared a dividend of 5 per cent. payable Nov. 1.

—The Atchison, Topeka and Santa Fe Railroad Company has declared a quarterly dividend of 2 per cent, payable Nov. 15.

—The Cedar Rapids and Missouri River Railroad Co. has declared a dividend of $1 per share on the common stock, payable Nov. 1.

—The North Chicago Rolling Mill Company will pay a dividend of 5 per cent, Nov. 15, and 5 per cent, Dec. 15; both payable to stockholders of record Oct. 28.

—The Car Trust Company of Pennsylvania has declared a quarterly dividend of 1½ per cent, and the Equipment Trust of Pennsylvania of 2 per cent, both payable 1st November next.

—The coupons of the Missouri Division bonds of the Northern Pacific Railroad Company will be paid at the office in New York on or after November 1; also interest on receipts and certificates, Missouri Division construction loan, upon their presentation for indorsement of interest payment thereon.

An Improved Locomotive.

An important innovation in locomotive construction was successfully tested on the Delaware, Lackawanna and Western railroad on the 21st inst. A special train, bearing prominent mechanics and capitalists, and drawn by the locomotive Counterpressure, left Utica at 10 a. m. on that day and proceeded to Waterville, 21 miles distant. There a train of six heavily loaded coal cars was attached, and, without the application of a single brake, was taken to Utica. The speed of the train was diminished and stops made on down grades of 70, 80, and 90 feet per mile, by the use of a lever, the engineer being able thus, unassisted, to slacken the speed of the train at will. The locomotive used is of the ordinary pattern. The power brought to bear against the piston is obtained and controlled by the use of an extra valve in the steam chest. By this steam is had direct from the boiler through a pipe which enters the steam chest where ordinarily the oil cups are placed. By this arrangement there is no need to reverse the cut-off lever, thereby obviating an immense strain upon the engines which attends the process known to railroad men as "hauling over."

Old Dominion Land Co.

Judge Weilford, of the Circuit Court of Richmond, Va., has granted a charter of incorporation to an association of New York capitalists, under the title of "The Old Dominion Land Company." The incorporators are: C. P. Huntington, Harvey Fisk, A. S. Hatch, Jas. H. Storrs and J. E. Gates. Mr. Huntington is president of the company and Mr. Frank Storrs is secretary. The capital stock is restricted by the terms of the act of incorporation to $4,000,000. The stated object of the company is to own, mine and develop land in the State of Virginia. Some of the lands belonging to the company are on the line of the Chesapeake and Ohio railway, which begins at Richmond, and has its terminus at Huntington, W. V., on the Ohio river, but the largest part lies on the peninsula which divides the water of the York and James rivers. The land will be divided into small farms and sold or leased to settlers. There is no railroad on the peninsula proper, and a part of the company's scheme is to build a road from Fortress Monroe to a point on the Richmond and York River railway. The organization of a line of steamships is also contemplated.

According to a statement given elsewhere from the Iron Age 60 per cent of anthracite furnaces, 57 of charcoal and 58 of bituminous were in blast October 1, 1880. This a much larger per cent than has been shown at the corresponding period of any year since 1874. In 1876 the per centage was only a little over 30 in each class of furnace. The figures this year correspond very nearly with those of September, 1874, though there has been an increase in the per cent of bituminous furnaces in blast and a decrease in the charcoal furnaces.

The earnings of the Texas and Pacific Railway Company for the month of September, 1880, were: passenger, $18,195 60; freight, $208,556 55; mail, express, &c., $7,332 78—total, $264,084 93. Same month last year, $240,361 05. Fixed monthly charge for interest and rentals, $64,625. Miles of road operated, 517; miles operated last year, 444. Total number of miles when line now under construction to El Paso shall be completed, 1099.

The London Economist states that notwithstanding the cancellation of large contracts, the total shipment of iron and steel of all kinds from England to the United States between September 1, 1879, and August 31, 1880, reached the enormous total of 1,623,333 tons, as against 260,573 tons in the preceding twelve months. The largest previous shipment to this country was of 1,036,829 tons in 1871.

Cleveland, thirty miles above Chattanooga, on the East Tennessee, Virginia and Georgia railroad, has been made the terminus of the Selma, Rome and Dalton railroad, which was formerly at Dalton on the Western and Atlantic Railroad.

Proposed Railway to Persia.

It is reported from Teheran that some of the principal native merchants of Bagdad have lately obtained from the Sultan a concession for the construction of a line of railway from Nejiff and Kerbella to Bagdad, and thence to the Persian frontier at Khanekin and a prospectus has now been issued by them, inviting Turkish and Persian subjects to take shares in the Company which is being formed to carry out this undertaking. The estimated cost of the projected line is 600,000 Turkish liras. It proposed to raise this amount by issuing 60,000 shares of 10 Turkish liras each, payable in three instalments. The line is to be contracted in two sections. That on the right bank of the Tigris, connecting the Shiah places of prilgrimage at Kerballa and Nejiff with Bagdad, is to be commenced first, and on its completion, should sufficient capital have been subscribed, the second portion between Bagdad and the Persian frontier will be begun. It is estimated that each section will cost 800,000 Turkish liras. A metre narrow-gauge is to be adopted, and iron sleepers will be used in the construction of the entire line, which must, by the terms of the concession, be completed and opened for traffic within three years.—[London Morning Post.

The St. Louis Republican says that the announcement that the Atchison, Topeka and Santa Fe and the Southern Pacific Railroads will be connected about the first of January will probably be soon followed by notice of the consolidation of the Texas and Pacific and the Southern Pacific, so that any working arrangement of the Atchison, Topeka and Santa Fe with the Southern Pacific must be merely temporary. The Texas and Pacific is now about 180 miles beyond Fort Worth and the Republican is advised through well informed sources that the owners of the road have about concluded not to build through to the Pacific coast, but that negotiations for a consolidation with the Texas and Pacific have progressed almost to a point of agreement. If the consolidation is effected it will be a merger of the Southern Pacific into the Texas and Pacific, the whole line taking that name. This will entitle the Texas and Pacific to the whole of its valuable land grant, as the Southern Pacific runs through the Texas and Pacific lands.

The Philadelphia Record learns from good authority that the Northern Pacific Railroad Company are about to open their rich timbered lands on the Pacific division between Puget Sound and the Columbia River, and recieve in payment therefor the preferred stock of the company at par. This division contains about 2,700,000 acres of the best timbered lands in the country. At present the company is only receiving preferred stock for the lands on the Minnesota and Dakota division. When they decide to open the Pacific division (which will be done at their next meeting), it will be giving the preferred stock that much more land to be placed to their credit. This land is worth about $6 per acre.

Under the new assessment law of Nebraska, enacted by the last Legislature, whereby all railroad property is lumped with the roadbed and roadway and exempted from all local taxation, the Union Pacific corporation is assessed $77,924 less in 1880 than it was in 1870, and the counties lose all revenues from assessments on depots, depot grounds, machine shops and other local properties of the road.

Pittsburg, Titusville and Buffalo Railroad.

A dispatch dated Buffalo, October 22, says that the directors of the Pittsburg, Titusville and Buffalo Railroad Company inspected the terminal facilities of their new line in that city on that day, and then adds:

This line will cross the Lake Shore and Michigan Southern Railway at a grade in this city, and the Buffalo Creek Railroad Company have assured the Pittsburg, Titusville and Buffalo Company of equal advantages with other roads entering here in the transfer of freights. It has been discovered that the trip of inspection over the Pittsburg, Titusville and Buffalo has reference to the ultimate lease of that road to the Baltimore and Ohio Railroad Company. The latter company has surveyed a route of 140 miles, from Chicago Junction to Beaver, in Pennsylvania, and in conjunction with the Pittsburg, Titusville and Buffalo, will build 70 miles of road from Beaver to Oil City, a large amount of capital having already been subscribed. With the newly surveyed route between Brockton and Buffalo, in the event of the Baltimore and Ohio leasing the Pittsburg, Titusville and Buffalo, the lessee will have a continuous line from Chicago to Buffalo. It is stated upon good authority that it is the ultimate purpose of the Baltimore and Ohio, in case a lease is perfected, to secure a route into New York city and obtain a large New England freightage to the West. An important route to New York could be made by certain railroad purchases and connections, which the officers of the Pittsburg, Titusville and Buffalo say that they are not at liberty to mention. A local paper here claims to have learned that a road will be run from Irvington, the northern terminus of the Pittsburg, Titusville and Buffalo, to Salamanca, N. Y., there to connect with the Atlantic and Great Western. The determination to build the latter line has been reached since the bondholders of the Buffalo and Southwestern refused to lease that road to the Pittsburg, Titusville and Buffalo. There are rumors mentioning the Rochester and State Line road among the connections by which New York city is to be reached.

The Virginia Mining and Manufacturing Company has been incorporated at Richmond, with A. S. Buford as President, and W. H. Haxall Vice President. The new company has authority to mine and produce for manufacture or market kaolin, plumbago, coal, iron, lead, gold, silver, &c.; to manufacture or buy and sell the same, to lease, buy and hold lands necessary therefor. The capital stock is to be not less than $10,000 nor more $200,000, to be divided in shares in of $100 each, the stock to be deemed and treated as personal estate. The company can hold real estate not exceeding 25,000 acres, and the chief office is to be in Richmond.

An ordinance has been passed by the Cape May (N. J.) City Council granting the right of way to the Cape May Marine Railway Company to lay a railway track in front of the city. The Cape May and Sewell's Point Railway Company, organized under a State charter, have commenced the work of grading their road-bed in front of the city.

Work is to be commenced in a few days on the railroad from Reno, Nev., to Oregon. The grade-stakes have been set for a number of miles from Reno, north, and a set of hands will commence at Reno and grade north, and another force will commence at Belfast, in Honey Lake Valley, Cal., and grade toward Reno.

Latest Railroad Earnings.

The following are the latest railroad earnings reported:

Louisville and Nashville—	1879.	1880.
Third week of October	$135,009	$222,500
July 1 to Oct. 21	1,780,881	3,008,600
Chicago, Milwaukee and St. Paul—		
Third week of October	$292,135	$341,000
January 1 to Oct. 21	7,404,431	9,762,000
St. Louis and San Francisco—		
Third week of October	$46,800	$72,400
January 1 to Oct. 21	1,168,600	2,093,900
Burlington, Cedar Rapids and Northern—		
Third week of October	$34,860	$42,523
January 1 to Oct. 21	1,147,806	1,604,064
Northern Pacific—		
Second week of October	$70,253	$66,000
January 1 to Oct. 16	1,524,083	1,862,559
Denver and Rio Grande—		
Third week of October	$31,762	$111,795
January 1 to Oct. 21	916,337	2,541,884
Indiana, Bloomington and Western—		
Second week of October	$26,612	$28,378
January 1 to Oct. 14	901,846	964,717
Missouri, Kansas and Texas—		
Third week of October	$93,300	$93,419
January 1 to Oct. 21	2,440,688	3,303,049
Grand Trunk of Canada—		
Week ending Oct. 23	$220,230	$244,789
January 1 to Oct 23	7,057,540	8,407,565
Flint and Pere Marquette—		
Third week of October	$27,267	$37,361
January 1 to Oct. 21	872,904	1,242,170
Wabash, St. Louis and Pacific—		
Third week in October	$282,641	$401,034
January 1 to Oct. 21	6,906,087	9,987,273
International and Gt. Northern—		
Trird week of October	$52,079	$66,967
January 1 to October 21	1,222,021	1,359,970
Hannibal and St. Joseph—		
Third week of October	$53,699	$53,579
January 1 to October 21	1,472,307	1,969,383
St. Paul and Sioux City—		
Third week in October	$23,183	$26,434
January 1 to October 21	869,740	1,147,529
Chicago, St Paul, Minn. and Omaha—		
Third week in October	$64,962	$68,336
January 1 to Oct. 21	954,184	1,225,628

Articles of incorporation have been filed in the office of the Secretary of State at Springfield, Ill. of the Central Illinois and Wisconsin Railroad Company, of Chicago, which proposes to construct a railroad from Rockton or some point near there on the Racine and Southeastern Division of the Chicago, Milwaukee and St. Paul Railway, to and through the city of Rockford, to and through Kankakee on the Illinois Central. The capital stock is fixed at $1,000,000, and the corporators are Alexander Mitchell, S. S. Merrill, John W. Cary, Milwaukee; Julius Wadsworth, New York; Edward Walker, Chicago; R. P. Lane, Ralph Emerson, N. C. Thompson, Thomas D. Robertson, William Lathrop, Rockford.

The Grand Trunk Railway of Canada has perfected an arrangement with the Toronto, Grey and Bruce Railway Company, by which the latter road will be operated by the former on a percentage division of the receipts, thus securing to the present bondholders about three per cent per annum, with contingent advances. The arrangement has been approved of by the committee of the bondholders.

Justice Westbrook has appointed J. W. Van Valkenburg Receiver of the Lebanon Springs Railroad, running from Chatham, N. Y., to Bennington Vt.

OTHER CHECK LETTERS.

The following is a list of banks having plates bearing check letters other than A, B, C, D:

5s National Bank of the Republic, Boston, Mass.
Charter number 379; Check letters E, F, G, H.
5s Manufacturers' National Bank, Amsterdam, N. Y.
Charter number 2239; Check letters E, F, G, H.
5s Lycoming National Bank, Williamsport, Pa.
Charter number 2227; Check letters E, F, G, H.
10s } First National Bank, Hoboken, N. J.
20s } Charter number 1444; Check letters on 10s D, E, F, and 20s B.
20s Merchants' National Bank, New Bedford, Mass.
Charter number 799; Check letters B, C, D, E,

NEW ISSUE OF U. S. TREASURY NOTES,

NOT COUNTERFEITED.

1s In centre is portrait of George Washington.
2s Portrait of Thomas Jefferson.
5s Portrait of Andrew Jackson.*
10s Portrait of Daniel Webster.*
20s Portrait of Alex. Hamilton.
50s Portrait of Benjamen Franklin.
100s Portrait of Abraham Lincoln.
500s Vignette representing Victory divested of her Armor.
1000s Portrait of DeWitt Clinton, ex-Governor of New York State.

* Only notes of the new issue counterfeited.

Counterfeit Note List.

HOW TO USE THE LIST.

All Paper Money in the United States is printed in sheets of four notes of one denomination on each sheet. Each bill bears a letter called the check letter, usually A, B, C or D, which appears on its upper left hand, and lower right hand corner. The notes are always numbered in their order on the sheets; thus all notes lettered A, will bear the number 1 or a number which divided by 4 will leave 1 remainder; the number accompanying B divided by 4 will leave 2 remainder, C, 3 remainder, D, no remainder. All genuine notes with letters A and C will have odd numbers and all with B and D even numbers.

The counterfeiter makes his plate commonly from one bill and rarely prints more than one of the four letters. As soon as a spurious bill is discovered measures are taken to redeem all good bills of that denomination, bearing the same letter. This leaves the counterfeit alone in the field.

All bills bearing the letters given in the foregoing list should be refused by all non-experts.

We can assure our subscribers that there are no counterfeit bills on paper currency of the United States, which are known to the Secret Service Division at Washington at this date.

The National Bank notes printed in Italics are stolen and are worthless.

Banks starred do not exist, and the whole issue is fraudulent.

Legal Notes.

One Hundred and Twenty-Seventh Massachusetts Reports.

This volume contains the following cases of general interest:

Dubois v. Mason, p. 87.—Where one indorses a note, payable to the order of the maker, before negotiation and before indorsement by the maker, his liability is that of indorser, and not of joint maker, if when the note is negotiated the maker's name stands first on the back.

Mullen v. Old Colony Railroad Co., p. 86.—If one fraudulently obtains from another his signature to a discharge of a cause of action, the latter may maintain the action without returning the money.

Blumantle v. Fitchburg Railroad Co., p. 322.—A railway passenger had merchandise checked without disclosing its real character. There was no evidence of any agreement to carry it as freight, nor that the baggage-master had any authority to receive it as freight or as personal baggage. Held, that the company were not responsible for its loss, although the baggage master knew the character of the baggage, and received similar packages from other passengers.

Potter v. Stevens Machine Co., p. 592.—A stockholder of a corporation, who is also a creditor of of the corporation, cannot enforce the personal liability of the stockholders for his debt, and one to whom he has assigned his claim, for the sole purpose of enforcing such liability, stands in no better position.

Connecticut River Railroad Co. v. County Commissioners, p. 50.—A statute authorizing the taking of lands for the use of a railroad owned by the State, and of other railroads, without providing for compensation to the owners except from the earnings of the State railroad, is unconstitutional.

Huck v. Globe Insurance Co., p. 306.—A fire policy was conditioned to cease if the insured building should fall except as the result of fire. The was equally and completely divided by a brick partition wall, with communicating doors in each story. A girder in one half fell, bringing down substantially the whole of that part and the goods stored therein, but leaving the other part standing uninjured. A fire afterward broke out in the fallen part, destroying every thing in it save the outer walls, the partition wall, and an elevator, but not communicating to the other part. Held, that no action on the policy could be maintained.

Costello v. Crowell, p. 293.—A promissory note bearing in the margin the words, "given as collateral security with a greement," is not negotiable.

Demsey v. Gardner, p. 381.—The mere delivery, for value, of a bill of sale of a chattel to the purchaser does not vest title in him as against a subsequent attaching creditor of the vendor.

The Pine Creek Route to the Lakes.

The Pittsburg Chronicle says that engineers have been engaged during the past week in running a survey for a new outlet for Pittsburg, and then adds:

They claim to represent the Baltimore, Pittsburg, Titusville and Buffalo Railroad Company, and are supposed to be in the interests of the Baltimore and Ohio Railroad Company. The route surveyed commenced at the Allegheny River near Sharpsburg bridge, and thence up Pine Creek, using part of the route already occupied by the Pittsburg and Western Railroad (narrow gauge.) We understand that the intention is to cross the Allegheny river about Sharpsburg, and connect with the Baltimore and Ohio Railroad at some point on the Monongahela river. We also hear from good authority that this company has already made proposals to buy out the Pittsburg and Western Railroad, already built, and change the same to a wide gauge track, as they expect to use this route from the Allegheny river to Cressdale station, some ten miles. From all indications the road will be built, this being the third survey made by parties in the interests of Baltimore within a few years. What is known as the Pine Creek route has been long classed to be the most direct route to the Lakes.

Nashville and Decatur Railroad.

At the recent annual meeting of the stockholders of the Nashville and Decatur Railroad Company, the old board of directors was re-elected as follows: J. W. Sloss, W. M. Duncan, John Orr, John F. Wheless, A. H. Lusk, Byrd Douglass, John Ramage, D. B. Cliffe, J. W. Baugh, John Frierson, Lucius Frierson, T. M. Jones, S. E. Rose, J. T. Tanner and George Mason. The Report of the President, which was presented, says:

The Board of Directors respectfully make this, their fourteenth annual report. The lessees of the road have strictly complied with the terms of the lease since your last report. The property has been preserved and the terms of the lease fully complied with in every respect. The sinking fund has been paid, as has also the dividends, and there is no cause of complaint. The officers of the Nashville and Florence Railroad Company have not made any report of progress in the construction of their road to the officers of this company. The suit of the bondholders referred to in our last annual report has since that date gone to trial, and the decision of the District Judge has been in favor of the railroad.

Personal.

—Mr. Henry A. Heiser a member of the New York Stock Exchange, has formed a copartnership with Mr. Ira Canfield Jr. and Mr. Samuel Conover for conducting a general banking and brokerage business, at 72 Broadway.

—Mr. J. Pierpont Morgan, Mr. Sumner R. Stone and Mr. Wm. H. Guion are among the recently elected directors of the Ithaca, Auburn and Western Railroad Co.; the reorganized Oswego Midland Western Extension.

—Mr. Herreshoff, president of the Herreshoff Manufacturing Co., Bristol, R. I., the widely known inventor and builder of torpedo boats and small steam vessels, is entirely blind. It is said of him that through the sense of feeling he can tell as much about the construction of ordinary steam launches as others can by seeing.

—Mr. John Duff, who died of pneumonia at Jamaica Plain, Mass., Tuesday, was one of the most eminent railroad contractors in the country, being especially well known as the builder of the Hannibal and St. Joseph and the Union Pacific railroads. He lived to an advanced age and most of life was an active participant in the public affairs of his time having taken great interest in political matters. He left an estate valued at four millions.

—Among the prominent gentlemen present at the complimentary banquet given at the Union League Tuesday evening to Mr. Cyrus W. Field, prior to his departure around the world were Joseph H. Choate, who presided, Secretary Evarts, Levi P. Morton, Jackson S. Schultz, Rev. Henry M. Field, Samuel McLean, Wm. M. Fliess, Murat Halstead, Cornelius Vanderbilt, D. O. Mills, H. B. Claflin, Henry Hilton, J. P. Morgan, Samuel D. Babcock, E. S. Sanford, David Dows, W. G. Hunt, Geo. Bliss, Edward Cooper. A. A. Low, Edwards Pierrepont. Moses Taylor, John Jay, Isaac H. Bailey, Solon Humphreys, A. B. Cornell, Abram S. Hewitt, Jesse Seligman, David Dudley Field.

—Of Hon Chester W. Chapin, late president of the Boston and Albany railroad, a correspondent of the Berkshire (Mass.) Courier says: He is undoubtedly the ridhest man in Springfield. He is estimated in Wall street at $10,000,000, but those nearest him, who know his careful habits of investments, think this twice as much as he possesses. Although a speculator, he has never taken great risks, and it is difficult to see how he could have accumulated more than the smaller amount named. Mr. Chapin is over 80 years old, and in very feeble health; when his obituary is given to the public, then we shall learn how a poor boy a stage driver, by habits of frugality and great shrewdness, became the richest man it this part of the state.

Captain Eads will sail from New Orleans for Mexico on November 4, accompanied by a party of engineers, who will examine the Isthmus of Tehaun tepec in order to verify the Captain's ideas as to its adaptability to the purposes of a ship railway. Captain Eads will, at the same time, endeavor to secure government sanction for his proposed survey, and to ascertain what the Mexican Congress will do if he decides to make the railway.

The Blast Furnaces.

The Iron Age publishes the statistics relative to the state of the blast furnaces, from which we learn that the condition of the furnaces at the beginning of each of the four quarters of the present year was as follows:

	Jan. 1.	April 1.	July 1.	Oct. 1.
Charcoal	93	102	131	153
Anthracite	105	189	167	143
Bituminous	126	140	115	128
Total	384	431	413	424

To show the changes since 1874, we append a table giving the percentage of furnaces in blast at nearly corresponding dates for seven years past:

	1874.	1875.	1876.	1877.	1878.	1879.	'80.
Charcoal	69	40	32	34	31	38	57
Anthacite	61	42	31	38	39	57	60
Bituminous	46	45	36	36	38	55	59

The local field figures as follows:

	Total number of stacks.	Number reported in blast.	Capacity pr week.	Number reported out of blast.	Capacity pr week.
Pittsburgh	15	9	5,510	6	3,370
Allegheny Valley	4	4	428	0	....
Youghiogheny Valley	6	4	1,115	2	530
Shenango Valley	32	15	4,330	17	4,460
Juniata & Conemaugh Valley	26	17	3,785	9	2,015
Mahoning Valley	17	10	3,255	7	2,350
Eastern, Central and Northern	24	18	5,020	6	1,685
Hocking Valley	13	8	1,235	5	665
Hanging Rock	17	9	1,490	8	1,480
Charcoal	31	23	2,139	8	625
Charcoal	3	1	70	2	198
Total	188	118	28,377	70	17,578

The capacity of all blast furnaces, per week, in the United States, is as follows:

	Tons.
Charcoal	14,000
Anthracite	29,850
Bituminous	35,800
Total per week	79,650
Total above	28,377

Russian Oil Fields.

The Report on the Russian Oil Fields, made by the American Consul to the Secretary of State of the United States has been published. The oil district is at Baker, on the Caspian Sea. The first well was drilled with tools in 1871. Prior to this they had all been dug. In 1850 there were 136 wells; in 1862 there were 220 wells, and in 1872 there were 415. Wells are short lived, but some of them produce large quantities of oil. The Consul notes one that flowed 6,000 barrels a day. The oil has but little value compared to American petroleum. One well is now producing 800 barrels a day, and at the present price it does not pay to save production; it is flowing into the Volga river. The Consul reports that he was witness to one well flowing to an extent to flood the ground in the vicinity and stop work at a refinery in the neighborhood, a number of wells having produced 1,250 to 1,570 barrels of oil in 24 hours. A larger number are now being drilled than formerly, with more satisfactory results, and 15 and 20-barrel wells are numerous. In districts where there is the largest production of oil it is of bad quality, and cannot be sold at any price. Refineries are not running to their full capacity, which is 400,000 barrels a year. In 1879 the amount refined was 175,750 barrels. Fifteen million dollars are invested in refineries, as above stated. Prices for crude oil are nearly nominal. The Government of Baker find it cheaper to use oil than water for many purposes in which the latter is universally employed.

The Public Lands.

From the Annual Report of the Commissioner of the General Land Office we learn that during the fiscal year ending June 30, 1880, the number of acres of public land disposed of by the Government for cash under Home tead acts, the Timber Culture acts, and located with Agricultural College scrip and military bounty land warrants was 9,166,618, against 8,650,219 acres in 1879, an increase of 516,699 acres. The sales during 1880 were larger than during any year since 1868. The following is a comparative statement of disposition of lands in some Southern States and the Territories of Arizona and New Mexico during 1880, as compared with 1879:

	1879. Acres.	1880. Acres.
Alabama	162,773	350,420
Arkansas	208,856	391,567
Arizona	28,201	17,067
Florida	60,845	95,863
Louisiana	27,465	92,680
Missouri	40,862	98,588
Miesissippi	21,235	63,287
New Mexico	37,338	38,360

—showing an increase of 563,267 acres.

The following is a similar table embracing Northern States and Territories:

	1879. Acres.	1880. Acres.
California	379,921	862,792
Colorado	110,980	187,796
Dakota	1,657,811	2,268,809
Idaho	91,400	120,323
Iowa	11,601	9,050
Kansas	2,784,538	1,524,905
Michigan	165,630	250,786
Minnesota	935,788	852,267
Montana	66,154	109,969
Nebraska	1,181,682	1,327,038
Nevada	43,410	31,537
Oregon	120,442	240,058
Utah	103,308	97,819
Washington Territory	245,310	421,617
Wisconsin	131,335	167,073
Wyoming	33,331	44,247

—showing a decrease of 246,555 acres.

During the past twelve years the following have been the sales and locations of public lands in the States and Territories:

	Acres.		Acres.
Kansas	14,057,537	Utah	1,118,459
Nebraska	9,516,969	Louisiana	936 263
California	8,389,412	Mississippi	706.842
Minnesota	7.510,056	Montana	539,888
Dakota	7,414,283	Idaho	486,460
Michigan	3,842,807	Nevada	326.902
Wisconsin	3,558,631	Arizona	197,216
Arkansas	3,128,650	New Mexico	159,293
Oregon	2,463,407	Wyoming	241,186
Alabama	2,184,507	Indiana	24,417
Wash'ton Ter	2,128,850	Illinois	19,812
Missouri	1,826,317	Ohio	8,421
Colorado	1,797,086		
Iowa	1,608 132	Total	76,484,108
Florida	1,226,247		

At a meeting in this city on the 23d inst. of the directors of the New Orleans, Mobile and Texas Railroad Company, E. H. Green, H. Victor Newcomb, C. C. Baldwin and George C. Clark were elected directors in place of others resigned. Subsequentfy George C. Clark was elected president.

American Railroad Journal.

Financial and Commercial Review.

THURSDAY EVENING, October 28, 1880.

Money on call is 2@3 per cent; on time, 3@4 per cent, and on prime mercantile paper 4½@5½ per cent. Exceptional sales of prime paper were made as low as 3½ per cent

The posted rates of the prime drawers of sterling are 4.82@4 82½@4.84½@4.85. The actual rates are 4.81@½@¾ and 4.83½@4 84. Cable transfers are 4.84@½. Prime commercial bills are 4.79½@4.80.

The offerings of Government bonds to the Treasury on Wednesday amounted to $6,249,650, of which $2,500 000 were purchased by the Secretary as follows: $441,000, 6s 1880 at 102.70@102 79 and $2,059,000 6s 1881 at 104.90@105.05. The First National Bank sold $1,150,000 of the 6s 1881 at 104,96.

The Governors of the New York Stock Exchange have admitted to dealings at the board the following named securities:

New York, Lake Erie and Western Railroad—$2,937,000 fourth mortgage, extended bonds, due October 1, 1920, bearing interest at the rate of 5 per cent, and issued in place of 7 per cent bonds that fall due October 1, 1880.

Ohio Central Railroad—$600,000 first mortgage terminal trust 6 per cent bonds, due July 1, 1920. The issue is secured by mortgage on lands, purchased and leased in the Cities of Columbus and Toledo, Ohio, suitable for terminal purposes and necessary for reshipments by water at Toledo. The company have acquired title in fee to 2,600

feet of water front on Toledo harbor, partially docked and improved, and have leased 600 feet additional. Extensive docks and structures are in course of construction. These improvements will cost $300,000.

Galveston, Harrisburg and San Antonio Railroad—$1,000,000 second mortgage 7 per cent gold bonds due Jan. 1, 1905; $300,000 first mortgage La Grange Extension, 6 per cent gold bonds due in 1910.

Missouri Pacific Railroad—$12,519,800 capital stock in shares of the par value of $100 each. The road, including branches, is 676 miles long, with a bonded indebtedness amounting to $19,259,000.

A Geneva dispatch says the contractors of the St. Gothard Tunnel have applied to the Federal tribunal to prolong the time for the completion of the tunnel 700 days. The line will not be opened for traffic until late in 1883.

Pennsylvania Railroad.

The statement of the business of all the lines of the Pennsylvania Railroad Company east of Pittsburg and Erie, for September, 1880, as compared with the same month in 1879, shows

An increase in gross earnings of	$311,015
An increase in expenses of	426,744
A decrease in net earnings of	$115,729

The nine months of 1880 as compared with the same period in 1879, show

An increase in gross earnings of	$5,738,404
An increase in expenses of	3,005,207
An increase in net earnings of	$2,733,197

All lines west of Pittsburg and Erie for the nine months of 1880 show a surplus over liabilities of $2,086,231, being a gain over the same period in 1879 of $1,977 397.

The Lynchburg (Va.) Advance says that a charter has been granted to Thomas Dunlap, Edgar Whitehead and others, incorporating the "Amherst and Nelson Mining and Transportation Company," which proposes to develop the iron and copper interests in Amherst and Nelson counties, and to construct railroads connecting the iron and copper mines with the Virginia Midland railroad at Amherst Court House and Richmond and Allegheny railroad at Greenway, Riverville and Stapleton. This corporation proposes fully to develop the valuable resources and render them immediately available lying between the Midland road and James river. This section contains valuable veins and deposits of iron, copper, manganese, silica, limestone and soapstone.

A new competitor for the grain-carrying trade, in the shape of the Chesapeake and Ohio Railrway, will enter the field within a comparatively short time. This road has, for the past year or so, been engaged in extending the western end of its line, and at the same time seeking a suitable point on the Chesapeake Bay for its eastern terminus. A circular lately issued by the managers of the road give a table showing the comparative distance from all leading Western cities to New York, Philadelphia and Baltimore by means of the various roads terminating at those cities, and the distance from the same Western points to a point on the bay by the Chesapeake and Ohio, and in every case the latter road had the advantage of much shorter lines.

A dispatch from Quebec says that the entire capital, $5,000,000, of the Credit Foncier Franco-Canadienne has been subscribed. Mr. Thorne is visiting Canada for the purpose of seeing if the capital can be doubled with advantage. The last deposit of the provincial loan, contracted in Paris, has been deposited in New York. A loan of £800,000 realized net $3,773,669, leaving $119,-663 as the expense of floating, &c. This is equal to about exchange at 4.62½, while in N w York exchange is given at 4.81.

The Pittsburg Chronicle says that a branch of the New York, Pennsylvania and Ohio Railroad is to be built from Girard to Youngstown ; along the bed of the abandoned canal, to connect with the Pittsburgh and Lake Erie, at the Lake Shore and Michigan Southern depot, in Youngstown. Work will be commenced at once. This will practically give the company a double track from Girard to Youngstown, and greatly increase the facilities, which are at present quite limited for want of room.

Texas and Pacific Railway.

On the 8th of November next the officers and directors of the Texas and Pacific Railway Company will leave for Marshall, Texas, to attend a meeting of the board of directors in that city. The Texas and Pacific road is completed 517 miles west from Shreveport, and at the present time over 5000 men are at work on the Rio extension to El Paso. That work is expected to be completed in about twelve months, and then the management will have 1000 miles of track under its control. At El Paso the Texas and Pacific will connect with the roads running to California and to Mexico. The bonds and stocks of the company represent $40,000 per mile.

The Montreal Star says that Engineers C. G. Hanning and J. Rudd Perry have commenced the survey of the line of the Napanee, Tamworth and Quebec Railway. This company was organized in January, 1879, having secured their charter from the Dominion Government. The company has secured municipal bonuses to the extent of $3,000 a mile, and stock to the extent of $2,000 a mile. The road will run from Napanee northward, following the Napanee River to Yorker, quite an important manufacturing village on the Napanee River, then running northerly to the village of Tamworth, to the Wager Iron Mines. The county of Lennox and Addington is rich in water powers and minerals, which as yet are to a great extent undeveloped, on account of there being no railway facilities.

The earnings of the Southern Pacific Railroad of California for September were :—Northern division, in 1880, $126,000 ; in 1879, $107,086 ; Southern division, in 1880, $321,000 ; in 1879, $132,819. Totals in 1880, $147,000, against $239,-905 in 1879.

The receivers of the Atlantic, Mississippi and Ohio Railroad Company are now prepared to pay with accrued interest the 8 per cent interest funding bonds of the Virginia and Tennessee Railroad, which matured 1st July last. Interest on these bonds will cease after the 1st of November next.

It was proved that the engineer rang the bell and tried to frighten the cow off the track but the farmer's lawyer also proved that the cow rang her bell and tried to frighten the engine off the track, and so the jury decided in his favor.

We see it stated that the request of the St. Gothard Tunnel contractors for 700 days' delay is purely a legal formality and does not imply that the completion of the tunnel will be delayed beyond next summer.

Seventeen thousand dollars of the new issue bonds of the city of Lynchburg (Va.) 6 per cents, to run for twenty years, and redeemable in five years at the pleasure of the city, have been sold at $1,05.

The first sod of the proposed Manitoba and Southwestern Railway was turned by the contractors on the 15th inst.

American Manufactures in Australia.

Recent Australian papers contain many confirmations of the position secured by our manufactures in the markets of the most advanced colonies, and particularly in New South Wales and Victoria, where the exhibitions have been held—that at Melbourne being still in progress. In railway furnishing, locomotives, bridges and weighing machinery, Philadelphia establishments have been successful in securing large contracts, and after one contract is filled have no difficulty in getting others. In fact, the introduction of locomotives, as well as other machinery, was originally on trial, the trial proving their greater efficiency, and resulting in a demand for more. A correspondent of the London Ironmonger quotes a large dealer in Melbourne as saying that "whereas twenty years ago American and other foreign (not English) goods constituted only 5 per cent of his stock, they now amount to 20 or 25 per cent. American goods of many classes, he assures me, are largely preferred to English, not only by the consumers, who can judge of the quality, but by the trade, on account of the careful, practical way in which they are packed," &c.

The Victorian Review, in a recent issue, pays a still more emphatic compliment to our exhibitors, saying that "American manufactures are a perpetual source of wonder and instruction to the foreign observer. In perfection of machinery, scientific division of labor, and completeness of execution there is nothing in the world beside to be compared with them."

The direct shipments of metal goods to Australia are large from New York, and also frequent from Boston, but probably the chief supply goes out by way of England, and goes through English houses in making up their assortments from their Australian customers. It is the practice so to order through English houses from all the Colonies. The actual exports rom New York of tools, hardware, machinery and implements are greater now than ever before, and the Australian Colonies are supplied by sailing vessels, or through England, when, if freights to San Francisco were cheaper, it would be better to send them across the Pacific. There is reason for belief in the permanence of the demand, and of the certainty that our manufacturers can cultivate that market with success.—[Balt. Sun.

The Coal Trade.

The leading coal carrying companies make the following reports of their tonnage for the week ending October 16, and for the year to the same date, compared with their respective amounts carried to the same time last year:

	Week.	1880.	1879.
Reading Railroad	202,891	5,992,896	7,016,210
Schuylkill Canal	23,354	398,497	781,295
Lehigh Valley	131,453	3,860,742	3,728,833
Del., Lack. & Western	104,409	2,684,488	2,959,922
Shamokin Valley	30,508	691,997	718,793
Central New Jersey	117,649	2,848,796	3,159,448
United R. R. of New Jersey	31,824	873,802	687,070
Pennsylvania Coal	34,826	861,400	1,120,210
Delaware and Hudson	78,611	2,292,877	2,657,662
Huntingdon & Broad Top Mt	6,609	346,628	249,580
Penn. and New York.	29,782	949,590	1,044,745
Clearfield, Pa.	34,823	1,312,236	1,252,533

The total tonnage of anthracite coal from all the regions for the week ending October 16, as reported by the several carrying companies, amounted to 680,187 tons, against 580,608 tons in the corresponding week last year, an increase of 99,579 tons. The total amount of anthracite mined for the year is 17,903,785 tons, against 20,626,912 tons for the same period last year, a decrease of 2,723,127 tons. The quantity of bituminous coal sent to market for the week amounted to 81,755 tons against 51,676 tons in corresponding week last year, an increase of 30,079 tons. The total amount of bituminous mined for the year is 3,449,960 tons against 2,716,791 tons for the corresponding period last year, an increase of 733,169 tons. The total tonnage all kinds of coal for the week is 761,942 tons, against 632,284 tons in corresponding week last year, an increase of 129,658 tons, and the total tonnage for the coal year is 21,353,745 tons against 23,343,703 tons to same date last year, a decrease of 1,989,958 tons. The quantity of coal and coke carried over the Pennsylvania Railroad for the first week of October was 143,896 tons, of which 108,901 tons were coal and 34,995 tons coke. The total tonnage for the year thus far has been 5,431,262 tons of which 4,084,668 tons were coal and 1,346,594 tons coke. These figures embrace all the coal and coke carried over the road east and west. The shipments of bituminous coal from the mines of the Cumberland coal region during the week ended Oct. 16 were 36,086 tons, and for the year 1,686,008 tons—an increase of 531,911 tons as compared with the corresponding period of last year. The coal was carried as follows: Baltimore and Ohio Railroad—week 21,494 tons, year, 1,008,675 tons; an increase over 1879, 382,920 tons. Chesapeake and Ohio Canal—week, 12 263 tons; year 496,878 tons; increase over 1879, 143,270 tons. Pennsylvania Railroad—week 2,328 tons; year, 180,455 tons; increase over 1879, 55,722 tons. The total tonnage of the Reading Railroad for the week ending last Saturday, October 23, was 198,000 tons, of which 59,500 tons were sent to Port Richmond, and 48,000 tons shipped from there.—Phil. Ledger, Oct. 25.

Notwithstanding the prodigal way in which the public lands of the United States have been distributed of late years, there still remains a large body, surveyed and unsurveyed, to be disposed of. This is exclusive of Alaska, which is not supposed to contain much land suitable for cultivation. The public lands surveyed last year, as stated in our last issue, amounted to 15,699,258 acres, making with the previous surveys, a total of 752,557,195 acres in all surveyed, and leaving an estimated area of 1,062,231,727 acres yet to be surveyed. The annual area is surveyed is about double the number of acres annually disposed of. How much really arable land remains for the settler to take up cannot, of course, be determined from the land office reports, from which our figures were obtained, nor do the best authorities agree as to the proportion of good land to the whole domain.

A map of the route of the Ocean Beach and Sheepshead Bay Railroad, a new route projected to Coney Island, was filed in the Register's Office in Brooklyn on the 25th inst. The route leads from the westerly side of Ocean-ave., in the town of Flatbush, near the entrance to the racecourse of the Coney Island Jockey Club, southerly to Voorhies land, thence directly to the ocean over the property of the Manhattan Improvement Company. The terminus is east of the Brighton Beach Pavilion. It is probable that a hotel and iron pier will be built at this point. The directors of the new company are R. McKinney, W. S. Wood, W. M. Hoes, W. C. Nicoll, F. A. Gerbaf, F. James and Isaac Egbey.

The property of the Seattle and Walla Walla Railroad, recently purchased by Henry Villard of this city, consists of 21 miles of narrow gauge road, 75 cars, 4 locomotives and large quantities of real estate, including about 600 city lots in Seattle also franchise for the construction of a road across the Cascade mountains via the Snoqualmie Pass to Walla Walla, a distance of 200 miles. Twenty thousand tons of coal monthly is now freighted over the road. The purchaser proposes to increase the freighting capacity to 80,000 tons per month immediately.

Railroad Earnings.

ONLY PLACE OF BUSINESS.

ESTABLISHED 1873.
LONERGAN'S SECRET SERVICE,
T. E. LONERGAN, Proprietor,
82 & 84 Nassau Street, New York.
The investigation of frauds on Railway Companies a specialty.

CARS FOR ONE HORSE, WITH or WITHOUT **Platforms,** OR TO Swing on Trucks.

EVERY **STYLE AND VARIETY** OF CONSTRUCTION.

CARS FOR TWO HORSES COMBINING ALL Valuable Inventions **ELEGANT STYLE.** Light & Durable, **Full Size** AND REDUCED WEIGHT.

47 EAST 27TH STREET.

This Establishment commenced building STREET CARS in 1832, and is famed for superior ELEGANCE of workmanship and SUBSTANTIAL practical results.

Its location, in the PORT of NEW YORK, is most favorable for shipments, and its CARS, CONSTRUCTED in SECTIONS, may be ENTIRELY COMPLETED before being packed for transportation.

VALENTINES VARNISHES

OUR CLAIMS.

We claim that our Finishing Varnishes are unsurpassed in the following qualities:

1. Uniformity. 2. Paleness. 3. Fluency. 4. Reliability. 5. Drying. 6. Hardening. 7. Fulness. 8. Brilliancy. 9. Durability. 10. Economy.

All know it is easy to make a Varnish that has the single quality of DURABILITY but Varnishes which wear well are generally inferior in color and working quality uncertain in laying, too slow in drying, or lacking in body or lustre, and frequently they possess ALL these defects.

In our "RAILWAY-COACH FINISHING" the ten qualities will be found combined and our other Varnishes are as elastic and durable as is practicable for the work on which they are employed.

Those of our Varnishes which have the greatest durability require time for hardening. They have superior elasticity, and ARE DISTINGUISHED FOR THE EXTENT OF SURFACE THEY WILL COVER, WHICH RENDERS THEM ECONOMICAL.

VALENTINE & COMPANY,

Chicago. NEW YORK. Paris.

Patent Stretched and Patent Riveted Short Lap

BELTING.

Our Belts are made from pure Oak Tanned Butts, and of the heart or solid part only. No part of the shoulder being used. Any one not familiar with Belt making can readily detect this by the shortness of the lengths and laps. Long laps are made including the shoulder or thinner and softer part of the Leather, causing the Belt to be, in its enduring qualities, no better than its poorest or thinner parts

Our Belting is warranted to run straight and maintain an even bearing on the pulleys, and sold under the fullest Guarantee.

J. B. HOYT,
D. B. FAYERWEATHER,
HARVEY S. LADEW.

LEATHER BELTING.

Made exclusively from Messrs. J. B. Hoyt & Co.'s Best Oak Butts—shoulders all cut off, only solid leather used—short lengths and short laps—fully warranted.

Rubber Belting and Hose and Packing at lowest prices.

STEPHEN BALLARD & CO.,

Kerite Insulated Telegraph Wire and Cables

Of all kinds made to order, for Ocean, River, Aerial and Subterranean Lines.

The Kerite covering of these Conductors unlike any other, resists effectually the destructive action of Heat and Moisture, and the corrosive agents either in Earth, Air or Water.

☞ Special orders should state whether the Cable is to be exposed to Earth, Air or Water.

FACTORY—SEYMOUR, CONN. **Office, 120 Broadway, New York.**

NEW YORK, LAKE ERIE & WESTERN RAILWAY.

TO THE TRAVELING PUBLIC.

During the Centennial Season—six months, closing November 10, 1876—the Erie Railway carried almos 3,000,000 passengers, without a single accident to life or limb, or the loss of a piece of baggage.

And for a whole year, the official records of the United States Post-Office Department show the arrivals of Erie Railway trains in New York, on time, to be from 15 to 27 per cent. ahead of competing lines.

Facts well worthy the consideration of travelers.

Junction (Philadelphia) Railroad.

In the United States Circuit Court, Philadelphia, on the 28th ult., the prolonged suit of the Philadelphia, Wilmington and Baltimore, Philadelphia and Reading and Pennsylvania Railroad Companies, concerning the right of the two former companies to transport their cars over the 1½ miles of track which, under the name of the Junction Railroad, is practically under the control of the latter company, and which has hitherto claimed exclusive right to operate the same, was decided by Judge McKennan. The proceedings were instituted by Judge Lathrop, of the Central Railroad of New Jersey, and Moses Taylor, for the Baltimore and Ohio Railroad Company, who nearly two years ago applied for an injunction restraining the Pennsylvania Railroad Company from interfering with their rights. The Judge decrees that the Junction Railroad Company must furnish motive power or transport over its road freight or passengers arriving in cars of the Philadelphia, Wilmington and Baltimore Railroad destined for the Philadelphia and Reading Railroad or its connections. It must also transport freight or passengers arriving in cars by the Philadelphia and Reading Railroad destined for the Philadelphia, Wilmington and Baltimore Railroad or its connections. The Pennsylvania Railroad Company is enjoined from hindering or in any way interfering with the performance of the duties in this respect of the Junction Railroad Company, but is not restrained from purchasing exclusively the motive power to transport the cars. In his opinion the Judge thus refers to the corporation respondent:

The Junction Railroad Company is a corporation created by a special act of the Pennsylvania Legislature dated May 30th, 1860, whereby it was authorized to construct a railroad commencing at a point upon the Philadelphia and Reading Railroad at or near the bridge of said company near Peters Island in the river Schuylkill. Thence by the best route to a point upon the line of the Pennsylvania Railroad, within one mile east of George's run, at the village of Hestonville; thence by the line of the Pennsylvania Railroad by the most direct and practicable route to a point upon the line of the Philadelphia and Wilmington Railroad.

By a supplement to this charter, passed in 1861, the Junction Railroad Company was authorized to make a complete line of railway from a point on the Philadelphia and Reading Railroad at or near the bridge at Peter's Island to a point on the Philadelphia, Wilmington and Baltimore Railroad, at or near Gray's Ferry Bridge by the most convenient and practicable route.

By further legislation the company was authorized to borrow $500,000 upon mortgage of its property and franchises, and upon this security a loan of that amount was negotiated upon the authorized guaranty of it by the then companies named. The stock of the company was taken and is now held by the Pennsylvania Railroad Company, the Philadelphia and Reading Railroad Company, and the Philadelphia, Wilmington and Baltimore Railroad Company, except a few shares which are held by individuals.

At the organization of the company in 1861 the President of the Pennsylvania Railroad Company was elected its President, and occupied that position until 1867, during which time the whole line of its road was located definitely between its prescribed termini. Under his direction a large sum, to wit, about $870,000, was expended in its construction, and the whole of the road, except that part between Market and Thirty-fifth street, was completed by it. This intervening part was constructed by the Pennsylvania Railroad Company, and was held by the Supreme Court of Pennsylvania to be the property of that company, and this decision must be regarded as conclusive, so far as the legal ownership of that line is concerned. But in view of the admission that the Junction Railroad may have rights touching the use of the section of road referred to, the decree was entered without prejudice to such rights or to the assertion of them in an appropriate proceeding. Various other facts are alleged in the bills of complaint, and are verified by the accompanying affidavits, which altogether constitute a "strange, eventful" history of the construction of the road. Enough of them have been here stated to indicate the vital object and the essential importance to the public of the construction of the road. The Pennsylvania, the Philadelphia and Reading, and the Philadelphia, Wilmington and Baltimore railroads terminate at Philadelphia. They were unconnected with each other, and so the immense traffic requiring transfer from one to the other was necessarily conducted with great expense, inconvenience, and embarrassment. These difficulties would be almost entirely avoided by the construction of a continuous line only about four miles long from Gray's Ferry to Peter's Island, and accordingly the Junction road was projected and made. A broken line with a gap in the middle of it would not answer the purpose; its continuity was absolutely essential to effectuate the object of its creation, as well as to meet the just expectation of its stockholders and the public. So, in the annual report of the Pennsylvania Railroad Company, February 8, 1863, it is said:

The Philadelphia, Wilmington and Baltimore Railroad Company, the Philadelphia and Reading Railroad Company and the Pennsylvania Railroad Company have organized the Junction Railroad Company, under a charter procured from the Legislature of 1860, and amended at the last session. The object of this line is to connect these three railroads of a continuous line along the west bank of the Schuylkill river, from the Reading Railroad, near Peter's Island Bridge, to the Philadelphia, Wilmington and Baltimore Railroad, at Gray's Ferry, intersecting the Pennsylvania Railroad, near the Wire Bridge at Fairmount, so that an interchange of freight between these lines may be effected without going through the populous parts of the city.

In apparent accordance with the declaration were all the acts and declarations of the Pennsylvania Railroad Company during the progress of construction until the controversy arose as to the ownership of the middle section, and they may, therefore, be fairly regarded as, in a great measure inducing the expenditure of the large sum laid out by the Junction Railroad in its line.

After further reference to the rights and powers of the several corporations interested, the Judge made the following decree:

And now, October 25, 1880, it is ordered and decreed that an injunction be granted until further order of this Court, enjoining and restraining the said Junction Railroad Company, its officers, servants and agents from declining or refusing or in any manner failing to perform the duties required of them in the charter of said company, and especially from declining or refusing to furnish motive power, haul, receive, ship or transport over its road freights or passengers arriving in cars by the Philadelphia, Wilmington and Baltimore Railroad destined for the Philadelphia and Reading Railroad or its connections, or from declining or refusing to furnish motive power, haul, receive, ship or transport freight or passengers arriving in cars by the Philadelphia and Reading Railroad, destined for the Philadelphia, Wilmington and Baltimore Railroad or its connections.

Also, that the said Pennsylvania Railroad Company, its officers, agents, and servants be enjoined and restrained from interfering with or in any manner hindering the said Junction Railroad Company from performing its said corporate duties and transporting freight and passengers as aforesaid.

Last, this injunction shall not be taken to restrain the said Pennsylvania Railroad Company from purchasing exclusively the motive power to transport the cars aforesaid over and upon that portion of the Junction Line which is situated between the north side of Market and Thirty-fifth street in the city of Philadelphia.

Great Western Railway of Canada.

DIRECTORS' REPORT.

The directors now submit to the shareholders the accounts of the company for the half year ended July 31, 1880:

The following statement shows a comparison of the half year's revenue with that of the corresponding period in 1879:

	Jan. 31, 1879.	Jan. 31, 1880.
Gross receipts	£365,771	£437,433
Working expenses, including the transfers to reserve funds	276,971	301,228
	£88,800	£136,205
Interest on bonds and debenture stock, loss on working leased lines, and all net revenue charges	98,972	103,145
	Cr. £10,172	Dr. £33,060
Balance from previous half-year	8,912	1,787
Deficiency	£6,260	.....
Surplus	.....	£34,847

The dividend received on the shares of the Detroit, Grand Haven, and Milwaukee Railway Company out of the profits to December 31, 1879, amounting to $45,000 or £9,246, makes a total available surplus of $44,094.

From this sum the directors recommend the payment of the half year's dividend on the 5 per cent preference stock, amounting to £12,644, and a dividend for the half year on the ordinary shares of 2s per share free of income tax (at the rate of 1 per cent per annum), which will absorb £30,603 leaving a balance of £847 to be carried forward to the next half year's accounts.

The total receipts on the main line and branches, exclusive of leased lines, show an increase of £71,662, or 19½ per cent over those of the corresponding period of last year.

The expenditures, as detailed in the various abstracts appended to the revenue account, and explained in the officers' reports, has exceeded that of the corresponding half of 1879 by £24,258. Of this increase, £9,600 is attributable to the fact that the present half year's revenue bears its full contribution to the various reserve funds, whereas in the accounts for the half year ended July 31, 1879, as explained in the report for that period, only the amount actually expended on renewals was charged. The earnings and working expenses per train mile for the last six corresponding half years compare as follows:

Half-years ended	Earnings per train mile.	Working expenses excluding transfers to reserve funds. Per train mile.	Per cent of gross receipts.
	s. d.	s. d.	
July 31, 1875	4 11¾	4 6	90.32
July 31, 1876	4 10¼	3 6¾	73.63
July 31, 1877	4 9½	3 6¾	64.41
July 31, 1878	4 2	3 2	76.05
July 31, 1879	4 1⅛	3 1⅛	75 92
July 31, 1880	4 11¾	3 5¾	69.78

The reserve funds show the following balances on July 31, 1880:

	Balance Jan. 31, 1880.	Debit or credit during the half year.	Balance at July 31, 1880.
	£	£	£
Ferry steamers renewal fund	21,469	Cr. 4,099	25,568
Locomotive renewal fund	118.987	Dr. 958	118,029
Car renewal fund	30,252	Dr. 4,489	25,763
Rail and bridge renewal fund	32.443	Cr. 134	32,577
Insurance fund	2,055	....	2,055
Leased lines suspense account	Dr. 44,500	Cr. 1,761	Dr. 42,739
	£160,706	£547	£161 253

65 new freight cars have been added to the duplicate working stock, at an expense of £6,720, and charged to the car renewal fund.

It will be observed on reference to the capital account, No. 3, that an amount of £32,400 5 per cent perpetual debenture stock has been issued during the half year, to provide for repayment at maturity of terminable bonds, bearing interest at 6 per cent. The charges to capital account, amounting to £19,677, consist principally of the proportion of the cost of renewing wooden bridges in stone and iron, and the acquirement of bonds of the Wellington, Grey, and Bruce railway under traffic agreements with that Company.

The working of the leased lines for the past half year show a deficiency (including interest and rentals) of £15 201, against £11,200 in the corresponding half year. This apparently unfavorable comparison arises from the amount charged this half year for proportionate contributions to the reserve funds, for which there was no corresponding debit in the accounts of the half year ended July 31, 1879. In conformity with the traffic agreements, an amount of £3,252, being the equivalent of 20 per cent of the half year's earnings on additional traffic interchanged with the Wellington, Grey, and Bruce railway, will be applied on January 1 next to the purchase of the bonds of that Company at par.

An agreement having for its object the acquisition of traffic from the south west by connecting with the Wabash, St. Louis and Pacific railway, via Toledo, was reported and approved at a special meeting of Shareholders held on the 11th of December, 1879. Since that period the Detroit, Adrian and South Western Railway Company has been incorporated, and a road is now in course of construction between the city of Detroit and Butler—a point on the Eel river section of the Wabash system—which will, in connection with the Great Western railway, materially shorten the route from St. Louis and other southwestern points to New York and the northern Atlantic ports. The new railway will have its terminus at Detroit, in the depot of the Detroit, Grand Haven and Milwaukee Railway Company. An agreement has been negotiated with the Wabash, St. Louis and Pacific Railway Company for the conveyance of through traffic by this new route, and will on completion of the Railway be substituted for the previous agreement. By this arrangement a direct connection will be formed with the Wabash system, from which the Directors anticipate a considerable increase of traffic.

It has been already reported that the operations of the Detroit, Grand Haven and Milwaukee railway from the 14th November, 1878, to the 31st December, 1879, resulted in a net revenue surplus of $50,557, and the directors have now to announce that a dividend of 8 per cent on the share capital, amounting to $45,000 or £9,247, has been paid and placed to the credit of the Great Western Company, as per account No. 10. From the 1st of January last the working of the Detroit, Grand Haven and Milwaukee Railway has continued satisfactory, but in the opinion of the directors the traffic is capable of further development, and their anxious attention has been directed to this subject. The capital resources of the company provided under the reorganization will, it is expected, prove sufficient for the purposes then contemplated, but will be inadequate to meet the cost of extending and rearranging the depot at Detroit for the accommodation of the traffic of the Detroit, Adrian and South Western Railway, or for an improved steamboat service across Lake Michigan, rendered necessary by the growing business to and from Milwaukee and the North West. As the additional traffic from these improved arrangements will be directly beneficial to the Great Western, in whose interest, as proprietors of the whole share capital of the Detroit, Grand Haven and Milwaukee Company, it is obviously desirable that the funds required should be raised on the most economical terms, the directors purpose, with the sanction of the shareholders, to make the necessary advances to the Detroit, Grand Haven and Milwaukee Company, by way of temporary loan, or by the guarantee of loans otherwise raised for the purposes indicated. On completion of the arrangements, a formal resolution will be submitted for the confirmation of the proprietors.

The directors have to announce, with much regret, that Mr. John Fell, owing to the pressure of his other engagements, has retired from the Board. The vacancy thus created has been filled by the election of the Earl of Dunmore. Mr. Thomas Barkworth and Lord Dunmore go out of office by rotation; and being eligible, offer themselves for re-election. Mr. John Young and Mr. Thomas Adams, the Auditors in London, and Mr. John James Mason, the Auditor in Canada, go out of office, and are eligible for re-election.

On behalf of the Board of Directors,
FRANCIS D. GREY, President.
LONDON, 9th October, 1880.

The Lynchburg (Va.) Advance says that there are now six furnaces in operation along the line of the Chesapeake and Ohio Railway, west of Staunton, viz: Buffalo Gap Furnace, at Ferrol, making 15 tons per day; Lucy Selina Furnace, at Longdale, making about 30 tons per day. Another furnace at the same point is in process of construction; the Callis Furnace, near Williamson's, making 15 tons per day; Low Moor, at Low Moor, in Allegheny county, making 75 tons per day, to be soon increased to 100 tons. The Quinnimont Furnace, West Va., produces about 30 tons per day. These furnaces all use coke made in West Virginia. The Advance adds that this is merely the beginning of the iron industry in that section.

Articles of association of the Ohio, Fort Wayne and Chicago Railroad were filed at Indianapolis on the 26th ult. The company was organized to build a road from a point on the Indiana and Ohio State line, in Paulding County, to Chicago via Fort Wayne. The capital stock is fixed at $500,000.

The directors of the new Brooklyn Rapid Transit Company, recently elected, are: C. R. Flint, W. B. Dickerman, Lewis A. Hall, Henry A. Root, Thomas A. Painter, jr., M. Furman Hunt, J. C. Hoagland, William Turnbull, E. F. Choate, C. L. Doe, R. C. Shannon, P. F. Sears, Edward H. Tobey. President, C. R. Flint.

It is expected that the Detroit and Michigan Railroad, which is to run from Butler to Detroit, and which will form the link in the Wabash to Buffalo, will be ready about January 1.

The Greenburg and Vernon (Ohio) Railroad will be opened for business on the 1st of December.

New York, Saturday, November 6, 1880.

Entered at the Post Office at New York, N. Y., as Second-Class Mail Matter.

WE publish this week the beginning of our regular correspondence from Boston. Our correspondent is a gentleman of large acquaintance and valuable experience in Boston financial and railway circles and has peculiar advantages for obtaining information desired. The growth of Boston railway and shipping enterprises and the increasing demand for the AMERICAN RAILROAD JOURNAL in New England make this correspondence especialry important and timely.

AMONG the new features adopted by the AMERICAN RAILROAD JOURNAL, as appears on another page of this issue, is a department on counterfeit money It is intended to make this a permanent and authentic feature of the paper, and we believe it is one that will prove of great service and value to our readers. We are to receive from the U. S. Secret Service Division at Washington immediate notice of the discovery of counterfeits, which will be promptly published in the JOURNAL, and information in various forms will be given, through facilities which we have, so that this department may be taken as a trustworthy guide and assistant in checking the circulation of bogus money.

ALTERATIONS and improvements being made in the tables, which are weekly features of the JOURNAL, necessitate the temporary withdrawal of part of them. In the Bond List alterations are desirable, owing to changes among the roads, consolidations, etc., since our tables were revised. The Share List is naturally corrected at this season of the year, and as this is the time when much of the necessary information comes to us from our correspondents and from the railroads, the table, if published now, could not be as symmetrical and complete as we would wish. On these accounts we withhold these two tables until they are perfected and made of greater value than ever before, to accomplish which no efforts will be spared. We have added several important features to the JOURNAL recently and it seems desirable now that some of our tables should appear semi-monthly, monthly and quarterly instead of weekly, thus giving us an opportunity to lay before our readers more information and a greater variety each week. We shall announce the tables as they are to appear from week to week. The table of contents always gives those in the current number, and in future by referring to the files of the JOURNAL any of its tables desired can readily be found, and they will contain as late information as though appearing in each number, as we do not intend to withhold any tables that are of weekly interest. While adding new features to the JOURNAL, our aim is to retain and improve the old ones.

THE project for an elevated railway in Boston is virtually killed by the decision of the State Railroad Commissioners. The position taken by the commissioners seems to be that which good judgment as well as a proper interpretation of the legal bearings would dictate.

THE prospects for the Cape Cod Canal project now seems brighter than they have recently appeared. It is reported that a new Boston company will push the work upon the same line of survey as that upon which the old company started. Driesbach & Skillman are mentioned as the contractors for the work.

THE *Elevated Railway Journal* is very creditably occupying a special field of journalism and is now extending into broader fields than it marked out for itself when starting last year, containing much of interest not only to those directly connected with Elevated railways but others as well. During its first year it has grown into an animated and well filled sixteen page paper, and under the editorial management of Mr. Robert Bryar gives promise of a successful future.

IT must be admitted that some of the less thoughtful and candid of United States papers and people have shown a tendency to decry or deprecate the resources of Canada, and have displayed an inability to appreciate the merits of some of the most important Canadian works and undertakings. But, that this spirit is common among the leading financial and business circles, and the unprejudiced and thinking people of the States, is by no means apparent to those most familiar with the feeling and opinion prevailing in our business centers. Whatever misapprehension concerning Canadian institutions exists is traceable not to natural or willful prejudice but to lack of reliable information. Our people want to be informed and Canada needs to inform them as to her resources. The Canadian press as a rule has not set before the public the advantages of its domain, with the enterprise and enthusiasm which has characterized our journalism in placing before the world the important projects of our country and our time. Our capitalists are made investors through facts and are always eager to receive them; they are ever open to conviction. If prejudice ever blinds their eyes temporarily it never permanently locks their vaults or seals their treasuries. More light upon Canada's vast resources will bring a more cordial appreciation of the value of her important projects, and a more liberal patronage of them from her friendly neighbors in the States.

Apropos to the position of the JOURNAL in this relation we quote the following from a letter written to us by Mr. J. L. McInnis, of Winnipeg, Manitoba, who has recently given some valuable information concerning the Canadian Pacific Railway, in a letter to the *Herald* written in answer to editorial strictures by that paper upon the enterprise.

Of the JOURNAL Mr. McInnis says: "I have read the articles on our Canadian Pacific Railway in your journal and may truthfully say that they are conceived in a far more catholic spirit than any others that I have noticed in United States newspapers on that subject. Whether it is accident or design I cannot of course say, but the newspaper press of the United States shows, as a whole, a surprising amount of misapprehension of our Canadian institutions and public or national works and resources. It cannot, surely, be of any profit to you, as a people, to be oblivious to our resources and intentions and works. We think otherwise of ourselves, in respect to yours, at any rate; and it was that sentiment which prompted my note to the *Herald*."

Boston's Increased Railroad and Shipping Facilities.

Boston congratulates itself upon at last obtaining another connection with the metropolis of the West, through the Grand Trunk Railway extension from Port Huron to Chicago. To establish an entrance into Chicago, and permanent stations in the city, has necessitated the removal of various legal obstructions, which it is said has been accomplished. The Grand Trunk Railway has now a continuous line from Portland to Chicago, which has been obtained through the building of a few sections and the purchase of several short lines of road. With the completion of the laying of steel rails on the Central Vermont road to its junction with the Grand Trunk at St. Johns a line wholly of steel is formed from the Atlantic to Chicago, having Boston, with its excellent harbor facilities, for a terminus. Two thousand miles of railway are included in this system, comprising what is called the Central Vermont and Grand Trunk line; ten thousand cars and six hundred locomotives are owned by it.

The Boston and Lowell, Concord, Northern, and Central Vermont railroads, working in sympathy with the tariff management of the Grand Trunk Railway, form a line through northern New England which will not only prove of advantage to the manufacturing and agricultural interests of that section but, with the through line thus formed, will greatly stimulate the commercial and shipping interests of Boston. The variou

roads forming this new line have always looked upon Boston with favor as a shipping port, and now that the necessary connections are complete and desirable terminal facilities at Chicago secured, the growth of traffic between Boston and Chicago will undoubtedly be largely increased. A large portion of the freight traffic of the Grand Trunk Railway from the West already seeks Boston, coming by way of the Victoria Bridge at Montreal to the Central Vermont Railroad.

With the Boston, Hoosac Tunnel and Western Railway, the Boston and Albany and this new Grand Trunk Line pouring their traffic into Boston it would certainly seem that this New England terminus is to speedily attain the importance as a shipping port that has long been denied it. The opening of the Hoosac Tunnel has vastly increased the flow of western freight to Boston, the Boston, Hoosac Tunnel and Western Railway having had of late fully as much business as it could handle. Boston capitalists are awake to the importance of providing greatly increased shipping facilities for the freight landed on their wharves for export. Arrangements have been completed, (it is said through Ex-Gov. J. Gregory Smith President of the Central Vermont Railroad and Sir Hugh Allan, chief proprietor of the Allan line of steamships), by which the Allan line is to furnish a weekly steamer service between Boston and Liverpool, and a fortnightly service between Boston and Glasgow. The Allan line is a royal mail line and its fleet is probably the largest afloat. For this Boston service twelve steamships of the line will be used, comprising a gross tonnage of 48,266 tons. On next Thursday the first steamship of the Boston-Liverpool line sails from the wharves of the Boston and Albany Railroad at East Boston. It marks an era in Boston's shipping and mercantile history.

—THE value of the taxable property of the state of Tennessee is estimated to have been increased $200,000,000, by the construction of railroads in its territory.

—A PLAN is under consideration for illuminating the Hoosac Tunnel by the use of electric lights. Gov. Long says of the tunnel, that it seems a necessity that the additional track, for which provision was made in the construction of the tunnel, should be laid at once.

—AT THE half-yearly meeting of the Grand Trunk Railway of Canada, held October 28th, at London, England, the report for the half-year ending June 30th, which was published in full in the last issue of the JOURNAL, was unanimously adopted.

—THE Housatonic Railroad passenger receipts for the fiscal year ending Sept. 30, 1880, are reported as being the largest of any year since 1874, being $27,000 in excess of the previous year. It is said that the total freight and passenger receipts of the road for 1880 will show an increase of $142.000 over the year 1879.

—MR. John W. Davis, recently of the Northern Central Railway, has become connected with the Baltimore and Ohio Railroad, as assistant to Mr. Robert Garrett, third vice-president. At the meeting of the directors of the former road, when his resignation was accepted, resolutions were passed expressing acknowledgements of his meritorious services, and regrets that he should be called upon to sever his connection with the company. Mr. Davis also received private letters expressing complimentary appreciation from Ex-President Scott, President Roberts and Vice President Cassatt of the Pennsylvania railroad.

OUR BOSTON LETTER.

[From our Regular Correspondent.]

BOSTON, Oct. 30, 1880.

This week closes with a market higher and more active than last. Closing prices to-day over a week ago show the following changes:

Advanced.

Atchison	124¼	to	128½
Boston and Albany	153⅝	to	155
Boston and Lowell	88½	to	100
Boston and Maine	136½	to	142
Chic. Burl. and Quincy	141	to	145½
Connecticut River	141	to	150
Eastern	33	to	35
Fort Scott, Pfd	110	to	111
Fitchburg	132	to	133
Lawrence and Southern	89	to	90
Little Rock	56½	to	58⅝
Michigan Central	105¼	to	109
Nashua and Lowell	125	to	130
New York and New England	39	to	40
Northern	103	to	106
Norwich and Worcester	148	to	150
Old Colony	120	to	124
Pullman Car Co	121½	to	123¾
Summit Branch	12	to	14⅜

Declined.

Chicago and W. Michigan	73¾	to	71¼
Flint	22	to	21

Atlantic and Pacific subscriptions, which entitle the subscriber on payment of $4,000 to $4,000 of first mortgage 6 per cent bonds of the Atlantic and Pacific Railroad company, and $3,000 of its 6 per cent income bonds, have advanced since the recent decision of the Attorney General declaring this company entitled to its land grants, from $40 premium to $280 premium and are in demand at that price.

The earnings of the Eastern Railroad are estimated at $3,000,000 for the year against $2,500,000 for 1879.

The directors of the Boston and Lowell and the Nashua and Lowell have agreed upon terms by which the two roads can again be run under one management. It will be remembered that these two companies were operated together for many years under a contract whereby the Nashua and Lowell received 31 per cent of the joint earnings, which expired by limitation Dec. 31, 1878, since which time they have been operated separately. The two corporations form part of one connecting line from Boston to Nashua. In New Hampshire they connect with other roads, making with them a through line to the West and Canada. The single terminal mile of the Boston and Lowell at Boston, represents a heavier investment of capital than the entire Nashua and Lowell road. It is now agreed that the Boston and Lowell shall lease the Nashua and Lowell at a fixed rental of $60,000 per year for one hundred years, equal to 6 per cent on the capital stock and 6 per cent on a bonded indebtedness of $200,000. This agreement is subject to ratification by the stockholders who will meet on the 10th of November to act upon the subject.

The annual meeting of the stockholders of the Massachusetts Central Railroad was held in this city last Wednesday. The directors stated that all the old issue of 7 per cent bonds due in 1898 had been retired at 40 cents on the dollar in cash, that $1,500,000 of the new loan of $3,500,000 had been placed, and negotiations were in progress for the balance. It is the intention of the company to have the entire line from Boston to the Troy and Greenfield Railroad at West Deerfield completed before Nov. 1, 1881. The road has been leased to the Boston and Lowell for twenty-five years from its completion at a rental of 25 per cent of the gross earnings. When this is consummated we shall have another trunk line to the West running half way between the Boston and Albany and Fitchburg railroads, and taking a large amount of local traffic that now passes over these roads.

The answer of the Railroad Commissioners to the prayer of the petitioners for a route for an elevated railroad in the cities of Boston, Cambridge and town of Brookline has just been given. The Commissioners decide that the general railroad act contemplates railroads whether constructed on the surface or under or over it, and that when a proposed route is granted the petitioners may construct in such a manner as they choose by tunnel viaduct or trestle. "The law of this State is that if the required number of persons complying with the terms of the statutes desire to construct a railroad through any number of towns and cities, although every inhabitant is opposed to the project, and all the municipal authorities protest against it, and although the board believes there is no exigency for it and that it would be an unmitigated injury to the public, yet the board must grant a route. But the company will not in all cases have the route it prefers. There are certain routes that are forbidden in this State. No railroad can pass through a cemetery or public park without the consent of the persons whose interests would suffer therefrom and no route shall be granted running lengthwise in or through any street, tramway or highway. The power to cross highway streets from side to side exists, and without it railroads would be an impossibility; and if the petitioners desire it, this board must grant routes between the termini mentioned in such petition which, without running lengthwise in any street or crossing any park or common, and without running across any bridge now in existence as a highway or part of a highway, shall run over, under or through some portion of the cities of Boston and Cambridge and the town of Brookline." No roads can be constructed without making full compensation to land owners for land taken and all incidental damage to property must also be paid for, and every land owner may require security for payment of his damage. This decision renders the proposed elevated railway scheme impracticable and virtually impossible.

The Ohio Central Railroad is now in full operation as far as Fostoria. Trains are run from both the Columbus and the Toledo forks into the Sunday Creek coal fields, and connection is made at Fostoria for the Northwest. Bush's station, the junction of the two branches, promises to be quite a point now. The work is nearly completed between Fostoria and Toledo, but there is likely to be some delay in getting the right of way into the latter city.

* For four weeks ended Oct. 2, and each succeeding seven days. † Three weeks only of September in each year.

Personal.

—Captain Eads, the famous engineer is going to Mexico to see about that ship railway across the Isthmus of Tehauntepec.

—Dr. R. H. Gilbert, the elevated railroad projector, has recently been prostrated by severe illness, but is now recovering.

—Col. James A. Rumrill, of Springfield, Mass., was elected Vice-President of the Boston and Albany Railroad Company, at the directors meeting held in Boston Oct. 28th.

—Wesley B ewer, master mechanic at the Cincinnati, Hamilton and Dayton Railroad shops, has invented a new telegraph repeater, by which, it is said, any number of lines can be operated by one man.

—Mr. Cyrus W. Field left New York, Wednesday morning, via the Pennsylvania railroad for San Francisco, whence he sails on the 18th inst. for Japan. He may complete his proposed tour around the world so as to return to New York in about a year.

—Mr. Joseph Hickson the General Manager of the Grand Trunk Railway of Canada, is the recipient of a well merited and valuable compliment, bestowed upon him at the half-yearly meeting of the Company held in London, Eng. on the 28th ult. A gratuity of £2,500 was voted to Mr. Hickson in recognition of his services, especially in connection with the Chicago Extension.

—Hon. Levi P. Morton, the head of the banking houses of Morton, Bliss & Co., of New York, and Morton Rose & Co., of London, is re-elected as a Representative in Congress from New York. Irrespective of all party considerations the re-election of this prominent financier and statesman will be a cause for congratulation among many in business as well as political circles, of both parties, whose confidence and esteem he has deservedly won.

—General Grant is said to have taken rooms at the Fifth Avenue hotel for the winter, intending to spend his time largely in New York, for the next four months at least. He has recently been doing much to awaken interest in the advantages offered by Mexico for the use of capital and American enterprise. His son, Ulysses S. Grant Jr., was married, Monday, to Miss Fannie Chaffee, only daughter of Senator Chaffee, of Colorado, at the Senator's New York residence.

—Hon. A. S. Hewitt is again elected to Congress, and in this choice New York sends to Washington one of her able and most prominent business men. An active participant in the management of the widely known house of Cooper, Hewitt & Co., and a most untiring worker with the venerable Peter Cooper for the interests of the grand philanthropic institute established by him, Mr. Hewitt has a strong constituency in business circles and a warm hold upon a public appreciating his able management of Mr. Cooper's generous charities.

—General Superintendent Charles O. Russell of the Boston and Albany Railroad has just been given a four months vacation, his place to be filled during his absence by Asst. Superintendent Barnes, whose usual duties meanwhile will be performed by Mr. Gallup, General Passenger Agent. Other changes and new appointments recently made on this road are, the appointment of A. B. Underhill as superintendent of motive power, Chas. E. Grover as superintendent of the division between Worcester and Pittsfield, and Wm. H. Russell, Jr. as superintendent of the western division, which includes that part of the road between Pittsfield and Albany and also the North Adams and Pittsfield branch. The assistant superintendent of the western Division is J. B. Chapin.

Atlantic, Mississippi and Ohio Railroad.

By order of the United States Circuit Court at Richmond, Va., on the 30th ult., the sale of the Atlantic, Mississippi and Ohio railroad, which was advertised to be made on the 1st inst., has been postponed until the 10th of next February. This became necessary in consequence of the discovery that the proper notices of sale required by the laws of the State and by the decree of the court to be served on the board of public works and the attorney general of Virginia had not been served, and the advertisement had not been published as required by law.

Mr. J. Condit Smith, of New York, in a letter dated Oct. 19, and addressed to Major John W. Daniel, of Lynchburg, Va., wrote as follows:

"If the sale of the Atlantic, Mississippi and Ohio railroad under the decree of foreclosure made by the United States Circuit Court is postponed for ninety days I am confident of my ability to organize a syndicate that will purchase the railroad property at the sale and pay for the same the amount due on the second mortgage, represented by Francis Skidly and others as trustees, and in addition thereto pay the State of Virginia the sum of five hundred thousand dollars for her interest, and give the present stockholders 33⅓ per cent of the capital stock of the new company."

Baltimore, Cincinnati and Western R. R.

The Baltimore, Cincinnati and Western Railroad Company was incorporated at Wheeling, West Va., on the 26th ult,, with a capital of $5,000,000. The incorporators are Cincinnati and Baltimore capitalists. Ex-Gov. Thomas Young of Ohio will be President. The road will run from Cincinnati to Ironton, O., thence across West Virginia to Virginia and Maryland and on to Baltimore, a distance of 600 miles. Referring to the above, the Baltimore Sun says:

It is learned in Baltimore that this new company has secured charters in Ohio, Virginia, West Virginia and Maryland, and is actively at work, and it is stated that the matter will be pushed to successful completion. Surveys and estimates have been made. It is said that the eastern division of the road, through Virginia and Maryland to Baltimore, crosses a fine farming country and passes numerous towns and villages, many of which have no railroad connections. It is also claimed that there are 610,000 acres of coal ten feet thick, or 6,400,000,000 tons, along 100 miles of the proposed route undeveloped. The terminus in Baltimore is to be in the county, opposite Canton, where there is a harbor with 25 feet depth of water. The road will cross the Baltimore and Ohio road near Washington Junction, on the Main Stem. The total estimated cost of the line, including everything, is $25,000,000.

In the suit commenced by the State of Michigan some weeks since against the Lake Shore and Michigan Southern Railroad Co., to collect back taxes, a verdict has been rendered in favor of the State for $83,484. The case will be taken to the Supreme Court.

OTHER CHECK LETTERS.

The following is a list of banks having plates bearing check letters other than A, B, C, D:

5s National Bank of the Republic, Boston, Mass.
Charter number 379; Check letters E, F, G, H.
5s Manufacturers' National Bank, Amsterdam, N. Y.
Charter number 2239; Check letters E, F, G, H.
5s Lycoming National Bank, Williamsport, Pa.
Charter number 2227; Check letters E, F, G, H.
10s } First National Bank, Hoboken, N. J.
20s } Charter number 1444; Check letters on 10s D, E, F, and 20s B.
20s Merchants' National Bank, New Bedford, Mass.
Charter number 799; Check letters B, C, D, E,

NEW ISSUE OF U. S. TREASURY NOTES,

NOT COUNTERFEITED.

1s In centre is portrait of George Washington.
2s Portrait of Thomas Jefferson.
5s Portrait of Andrew Jackson.*
10s Portrait of Daniel Webster.*
20s Portrait of Alex. Hamilton.
50s Portrait of Benjamen Franklin.
100s Portrait of Abraham Lincoln.
500s Vignette representing Victory divested of her Armor.
1000s Portrait of DeWitt Clinton, ex-Governor of New York State.

* Only notes of the new issue counterfeited.

Counterfeit Note List.

HOW TO USE THE LIST.

All Paper Money in the United States is printed in sheets of four notes of one denomination on each sheet. Each bill bears a letter called the check letter, usually A, B, C or D, which appears on its upper left hand, and lower right hand corner. The notes are always numbered in their order on the sheets; thus all notes lettered A, will bear the number 1 or a number which divided by 4 will leave 1 remainder; the number accompanying B divided by 4 will leave 2 remainder, C, 3 remainder, D, no remainder. All genuine notes with letters A and C will have odd numbers and all with B and D even numbers.

The counterfeiter makes his plate commonly from one bill and rarely prints more than one of the four letters. As soon as a spurious bill is discovered measures are taken to redeem all good bills of that denomination, bearing the same letter. This leaves the counterfeit alone in the field.

All bills bearing the letters given in the foregoing list should be refused by all non-experts.

We can assure our subscribers that there are no counterfeit bills on paper currency of the United States, which are known to the Secret Service Division at Washington at this date.

The National Bank notes printed in Italics are stolen and are worthless.

Banks starred do not exist, and the whole issue is fraudulent.

Common Law.

NATIONAL BANKS, WHEN LIABLE FOR FRAUDS OF OFFICERS.

PENNSYLVANIA SUPREME COURT, MAY 3, 1880.

STECKEL VS. FIRST NATIONAL BANK OF ALLENTOWN.

Plaintiff, who was a depositor in a National bank, requested a certificate of deposit drawing interest for a portion of his deposit. The teller of the bank gave him a certificate which purported to be issued by B. & Co., a private banking firm, and informed him in the presence of the cashier of the bank that this was the bank's certificate, upon which assurance plaintiff accepted it. The members of the firm were the managing officers of the bank, but had a separate place of business in the same town. Held, that the bank was liable to the plaintiff for the amount of his deposit.

Action by Alfred P. Steckel and others to recover $3,251 63, a balance of money alleged to be deposited with defendant. The opinion states the case. The court below directed judgment for $251 in favor of plaintiffs, from which they took a writ of error.

E. I. Fox, Evan Holben, and D. D. Roper, for plaintiffs.

Edward Harvey, R. E. Wright, Jr., and G. & H. Lear, for defendant.

The plaintiff kept an account with the corporation defendant, and were in the habit of making deposits and drawing checks in the usual manner. William H. Blumer was the president of the bank; his son, Jacob Blumer, was the cashier. Three of the directors, including the said William H. Blumer, composed the banking house of William H. Blumer & Co., which carried on business but a few hundred feet distant from the First National Bank of Allentown. The plaintiffs having money on deposit with the bank, and being desirous of obtaining interest bearing certificates therefor, called at the bank for that purpose. Dr. A. P. Steckel, one of the plaintiffs, testifies as to what occurred, substantially as follows: "I went to the bank every week or two to make my deposits; sometime in August, when I made deposit, I asked the teller, George Straub, does the First National Bank take any money on certificates? He said, 'yes, sir; do you want to leave us some?' I said, 'no, not to-day.' I asked him whether the First National Bank issued certificates of deposit, and as a matter of course pay interest, and he said 'yes'; then I came there again in September, 1878, and made my ordinary deposit in the bank, and after we were through I said to the teller that I would take the First National Bank certificates for $700. I filled out a check, and he handed me a certificate; I looked at the certificate for $700; it was to be made on demand, and asked him, 'is this the First National Bank certificate?' the answer was, 'yes, sir, it is;' I then said, 'this reads Blumer & Co.; I want this distinctly understood, I want nothing but the First National Bank certificates; he answered me that this was one and the same thing; that it should pass to the credit of the company, the same as it was before. With this assurance I took that certificate. This was in the presence of the cashier of the bank, Jacob A. Blumer." Two other certificates, aggregating, with the one above mentioned, the sum of $3,000, were obtained under circumstances not essentially different. There was evidence that the president of the bank recognized them as binding upon the bank, and offered to reinstate the plaintiffs as they were before, when the bank examiner was through his examination. That examination, however, resulted in the closing of the bank.

We must assume the jury would have found the facts as testified to by the plaintiff Steckel. The facts established, we have a case of palpable fraud. It is not an answer to say the plaintiffs ought not to have been deceived, and with ordinary care would not have been. The fact that the Blumers were respectively president and cashier of the National Bank, as well as leading members of the banking house of Blumer & Co, was calculated to mislead and deceive, and when told in positive terms that the certificates, although signed by Blumer & Co., were the certificates of the bank, the plaintiffs may readily have believed it was.

It was urged, however, that even if there was a fraud it does not affect the bank; that an agent can only act within the scope of his authority; and that a bank is not bound by the fraudulent representations of one or more of its officers. There is no doubt as to the general rule that an agent can only bind his principal so long as he acts within the scope of his authority; but we do not think the principle applies in this case. A bank is responsible for the safe keeping of the money of a depositor, and it cannot set up fraud of its own officers as an answer to a demand for repayment. Public policy forbids it. The plaintiffs, after ascertaining the fraudulent character of the transaction, tendered the certificates to the bank and demanded the payment of their original deposit. In other words, they rescinded the contract on the ground of fraud. If their allegations are true, they had a right to do so, and proceed upon the original cause of action.

The question of fraud should have been submitted to the jury. What has been said sufficiently covers the points involved.

Judgment reversed and a venire facias de novo awarded.

Baltimore and Ohio Sleepers.

On the 1st inst. the Baltimore and Ohio Railroad Company commenced running their own sleeping cars instead of the Pullman coaches heretofore in use on that road and its connections. One of these new sleepers, the "Mount Clare," built for the company at Dayton, Ohio, was on exhibition in Baltimore on Saturday last, and is thus described by the Sun of that city:

The new sleeper has all the accommodations characteristic of the Pullman and the Wagner sleepers, improved, it is claimed, in several particulars. It has fourteen sections, seven on each side of the aisle. The car, when the upper berths are closed, does not have the appearance of a sleeper, owing to the fact that the under sides of these berths present a flat surface decorated with embossed leather, in imitation of bronze casting, relieved by strips of dark molding, producing the effect of a richly paneled cornice the entire length of the car. Above this cornice are ventilating windows, of stained glass, and so arranged that the aperture can be graduated at pleasure. These windows are protected by wire gauze outside, which also prevents the entrance of cinders. The "headlining," or ceiling of the upper portion of the car, is handsomely painted on wood. To this ceiling are suspended eight double lamps, with argand burners, which serve to brilliantly illuminate the car, without dazzling the eye or casting a shadow. The seats are wide and comfortable, (with arm rests which justify the name,) the outer sides resembling easy chairs of antique pattern. The seats and backs are upholstered in crimson plush. The windows, two to each section, are divided by narrow strips only, extend down to the arm-rest and give ample light. They are supplied with double sashes of one glass each, and are impervious to wind or dust. The floor of the car is covered with a thick velvet carpet of neat figure, in dark colors. The ladies' toilet department and gentlemen's lavatory, at opposite ends of the car, are fitted up with every requisite, including appliances for hot and cold water. The interior woodwork, as well as the moveable card tables, seats and section partitions, is of black walnut, smoothly finished in oil. The exterior is painted a rich olive color, (which is the uniform color of passenger coaches on the Baltimore and Ohio railroad,) relieved by gilt-panel striping and ornamental figures of unique design. * * * A "combination" car, recently built at Mount Clare works, was also exhibited to the visitors, who united in its praise. This car has six sleeping sections, with lower berths only, occupying about one-half of the car, while the other half is furnished with comfortable reclining chairs. This car will be run on the Pittsburg Division of the road.

The Secretary of the Interior has appointed A. B. Nichols (the engineer of the Bureau of Railroad Accounts), Hoyt Sherman, of Iowa, and J. B. Bloom, of New York, as Commissioners to examine the recently completed portion of the Atlantic and Pacific Railroad from Albuquerque fifty-two miles westward, in New Mexico. The Commissioners are directed to meet for this purpose at Albuquerque on the 6th of November.

On the 30th ult. the Baltimore and Ohio Railroad Company took possession of the entire lines of telegraph on the Pittsburg Division, which have hitherto been operated in connection with the Western Union Telegraph Company, when all connections with that company were severed and the wires transferred to the offices of the American Union Telegraph Company at Pittsburg, Connellsville and Cumberland. This change adds about five hundred miles of line and some fifty new offices to the system of telegraph lines operated by the Baltimore and Ohio Railroad Company and the American Union Telegraph Company.

Interest paid by United States, $47,589,861 30; interest repaid by transportation of mails, &c., $13,838,862 81; interest repaid by cash payments: 5 per cent net earnings, $655,198 87; balance of interest paid by United States, $33,095,799 62.

The foregoing is a correct statement of the public debt, as appears from the books and Treasurer's returns in the Department at the close of business, October 30, 1880.

JOHN SHERMAN,
Secretary of the Treasury.

A correspondent of the Boston Journal, writing from Montreal, Canada, under date October 29th, says that the Grand Trunk Company have a charter to build a road from a point near Victoria Bridge southwest to the village of Dundee, a little hamlet situated on the Canadian frontier, in the county of Huntington, a distance of 70 miles. There has been built during the past season some 40 miles of this new railway. The line passes through a well-to-do agricultural country, and when completed it will form a connection with the Rome, Watertown and Ogdensburg Railroad at Potsdam Junction, N. Y. The South Shore Company have also obtained a charter for a road to pass over the same route as that now built by the Grand Trunk Company. This fact will doubtless prevent the construction of a new road, as contemplated by the South Shore Company.

John King, Jr., Receiver of the Ohio and Mississippi Railway, has filed his statement for September in the United States Court, showing cash on hand September 1, $301,351 52; receipts for September, $578,897 76; disbursements, $606,544 20; cash on hand September 30, $273,705 08.

American Railroad Journal.

Financial and Commercial Review.

THURSDAY EVENING, November 4, 1880.

The quotations for call loans at the Stock Exchange this afternoon is 4@5 per cent. For money for the remainder of the year stockbrokers are bidding 5 per cent.

The leading drawers of sterling this afternoon reduced their posted rate for demand bills to 4.84. The actual rates are 4.83@4.83½ and 4.81@4.81½. Cable transfers are 4.83¾@4.84¼, and prime commercial bills are 4.79½@4.79¾.

By referring to the public debt statement, given on another page, it will be seen that there has been a decrease in the debt during the month of October of $7,103,754 68, and since 1st July last of $33,681,867 36. The total amount of the debt, principal and interest, is $2,112,035,914 72, and cash in the Treasury $203,545,486 76, leaving net $1,908,490,427 98. Of the bonded debt $217,699,550 bears 6 per cent interest, $469,651,050 bears 5 per cent, $250,000,009 bears 4½ per cent, $789,347,800 bears 4 per cent, (including $979,200 refunding certificates,) and $14,000,000 bears 3 per cent. Interest has ceased upon $5,615,665 26, and $397,257,162 37 bears no interest. In addition to the above there are outstanding $64,623,512 6 per cent bonds, which were issued to the Pacific Railroad Companies. The amount of legal tender, old demand notes, etc., outstanding is $346,741,841, and the amount of fractional currency is $7,181,861 37.

The payments made from the Treasury by warrants during the month of October, 1880, were as

follows: On account of civil and miscellaneous, $6,336,536 84; War, $2,879,575 89; Navy, $1,085,882 71; Interior (Indians), $551,880 26; Interior (Pensions), $4,234,288 09; total, $15,088,113 79. The above does not include payments made on account of the interest or principal of the public debt of the United States.

Offers of bonds to the Government on Wednesday amounting to $1,086,500 were declined by the Treasury Department. The Assistant Treasurer was authorized to accept the 6s of 1880, but the offers were small and the prices were not considered favorable. Notice was given that preference would be given to the 6s which mature at the close of the present year.

The closing quotations on Thursday were: Adams Express, 118@120; American Express, 64@64¼; American Union Telegraph, —@61¾; Am. Dist. Tel., 73@73½; Atlantic and Pacific Telegraph, 39⅞@40½; Canada Southern, 66@66½; Central Pacific, 82⅝@82¾; Chicago, Burlington and Quincy, 147¾@148¾; Chicago and Alton, 133@137; Chicago, Milwaukee and St. Paul, 103⅝@103¾; Columbus, Chicago and Indiana Central, 18¼@18½; Hannibal and St. Joseph 41@41⅛; do., pref., 88¼@88½; Lake Shore and Michigan Southern, 120¾@121¼; Louisville and Nashville, 168½@169; Morris and Essex, 115¾@116; Manhattan Elevated, 36⅛@36¾; Metropolitan Elevated, 108@109; Michigan Central, 107⅝@107⅞; New York Central and Hudson River, 136@136⅛; New York, Lake Erie and Western, 43⅛@43¼; do. pref., —@78⅝; New York, Ontario and Western, 24⅜@24⅝; Northern Pacific, 28½@29; do. pref., 52⅝@52⅞; Ohio and Miss., 35¾@36; do. pref., 78½@79½; Philadelphia and Reading, 45¼@45¾; St. Louis, Iron Mountain and Southern, 48½@48⅞; St. Louis, Alton and Terre Haute, 29¾@30¾; do. pref., —@100; United States Express, 52@53½; Wells Fargo Express, 113@114; Western Union Telegraph, 97¼@97⅜; Wabash, St. Louis and Pacific, 44⅛@44⅜; do. pref., 78⅞@79.

The Fidelity Trust Insurance and Safe Deposit Company of Philadelphia, the trustees of the consolidated mortgage bonds of the Philadelphia and Reading Railroad Company, have filed a petition in the United States Circuit Court, asking for an injunction restraining the receivers of the Philadelphia and Reading Railroad Company from appropriating the funds in their possession to the payment of interest on the general mortgage bonds of the company, until certain specified sums shall be set aside in the sinking fund for the redemption of the consolidated mortgage bonds, which take precedence of the general mortgage loan. The Court ordered the masters appointed under the receivership to take testimony pertinent to the issues, and directed further that in the proceedings under the petition leave is given for holders of the general mortgage and improvement bonds of the company to intervene.

Delaware and Hudson Canal Co.

The following is a comparative statement of business of the railroads owned and leased by the Delaware and Hudson Canal Company during the month of September :

1879.	Gross Earnings.	Net Earnings.
Pennsylvania Division.	$112,762 04	$62,132 15
Albany and Susquehanna	105,362 00	55,325 75
Rensselaer and Saratoga	181,574 20	132,900 85
New York and Canada	47,294 69	14,218 41
Totals	$447,092 93	$264,577 16
Previous totals	2,685,304 51	1,143,948 45
Totals to date	$3,132,397 44	$1,408,525 61

1880.	Gross Earnings.	Net Earnings.
Pennsylvania Division.	$117,136 09	$49,459 62
Albany and Susquehanna	158,930 36	78,008 00
Rensselaer and Saratoga	196,560 92	118,762 41
New York and Canada	56,959 07	27,090 03
Totals	$529,636 44	$273,320 06
Previous totals	3,285,113 87	1,371,294 88
Totals to date	$3,814,750 31	$1,644,614 94

—showing an increase in net earnings on the Albany and Susquehanna Division of $22,682 55, and on the New York and Canada Division of $12,871 62 ; against a decrease on the Pennsylvania Division of $12,672 53, and on the New York and Canada Division of $12,871 62—making the net increase for the month $8,742 90 ; to which add previous increase in net earnings ($227,343 43), making the total increase in net earnings to the close of September, $236 089 33.

Northern Central Railway.

The following is a comparative statement of the gross earnings, operating expenses and net earnings of the Northern Central Railway Company for the month of Septembes 1879 and 1880.

	1880.	1879.
Gross earnings	$164,093 30	$126,837 07
Operating expenses.	272,355 61	263,861 95
Net earnings	$191,737 69	$162,975 12

—showing an increase in gross earnings of $37,-256 23, in expenses of $8,493 66, and in net earnings of $28,762 57.

For the nine months ending September 30, 1879 and 1880, the gross earnings, expenses, etc., were :

	1880.	1879.
Gross earnings	$3,584,105 54	$2,902,498 71
Operating expenses	2,419,172 03	2,160,489 69
Net earnings	$1,164,933 51	$742,009 02

—showing an increase in gross earnings of $681,-606 83, in expenses of $258,682 34, and in net earnings of $422,924 49.

Judge Nelson, of the United States Court, at St. Paul, Minn., in rendering his decision upon the application of the Northern Pacific Railroad Company for an injunction to prevent the Moorehead and Barnesville Railroad Company, otherwise the St. Paul, Minneapolis and Manitoba, from building a bridge across the Red River, held that the Court had no authority to prevent the construction of the bridge merely upon the representation of the Northern Pacific that it would cut off trade upon the river from the Northern Pacific. If the bridge is built without legislative authority, or in defiance of legislative matters, that is a matter for the State courts. If it shall hereafter be proved to be a nuisance or an obstruction to navigation, the Federal Courts will interfere, but not otherwise. Accordingly the construction of the bridge will proceed.

Great Western Railway of Canada.

The gross earnings, working expenses and net profit of the Great Western Railway of Canada for the month of September, 1879 and 1880, were :

	1880.	1879.
Gross receipts	$426,600	$347,300
Working expenses, including transfers to reserved funds	257,700	225,400
Net profit	$168,900	$121,900

—showing an increase in earnings of $79,300, in expenses of $32,300, and in net profit of $47,000.

For the two months ending September 30, 1879 and 1880, the receipts, expenses, etc, were :

	1880.	1879.
Gross receipts	$824,700	$671 000
Working expenses	518,200	449,100
Net profit	$306,500	$221,900

—showing an increase in earnings of $153,700, in expenses of $69,100, and in net profit of $84,600.

California Southern Railroad.

Articles of incorporation of the California Southern Railroad Company were filed on the 20th of October at San Diego, according to the terms of the contract with a syndicate of Boston capitalists, who have subscribed $2,000,000 to carry forward the work. The capital stock is $2,-900,000 ; paid in, $116 000. The incorporators are : Benjamin Kimball, of Boston ; Henry B. Williams, of San Francisco ; M. A. Luce, John A. Fairchild, Joseph O. Osgood and George N. Weaver. President, Benjamin Kimball ; Treasurer, Thomas Nickerson, of Boston. The points designated in the corporation papers are from the bay of San Diego to the town of San Bernardino, but it is the purpose to build to a point of junction with the Atlantic and Pacific road, San Bernardino being now named as the nearest known point, the law requiring two points to be named. The preliminary surveys have been completed, and the permanent location is now being made. The grade stakes run from a point on the bay at National City, thence along the bay shore and through the city northerly. The Boston syndicate are under a contract to complete to San Bernardino on or before January 1, 1882. Material is on the way, rails having been shipped from England, and Chief Engineer Osgood will push the work. San Diego will be the terminus of a transcontinental railroad within a year from this date.

The earnings of the Central Pacific Railroad Company for the month of October 1880, were $2,145,000 ; for the month of October, 1879, $1,-809,021 ; earnings first ten months, 1880, $16,-251,694 ; for the first ten months, 1879, $14,329,-151.

The New York, Boston and Chicago Railroad Company, in its report to the State Engineer and Surveyor, says that nothing has been done since the organization of the stockholders. The capital stock by charter is $15,000,000 ; subscribed, $333,000 ; paid, $33,300.

Boston and Albany Railroad.

From the report of the directors of the Boston and Albany Railroad Company, which was presented at a meeting of the stockholders held in Boston on the 28th ult., we learn that the gross earnings for the year ending September 30, 1880, were $7,741,118, the expenses $5,248,500, and the net income $2,492,618; for the year ending September 30, 1879, the earnings were $6,427,462, the expenses $3,723 824, and the net income $2,703,638—showing an increase in gross earnings of $1,313,655, with an increase in expenses of $1,524,676, making a decrease in the net income of $211,021.

From the net revenue of the year 1880, as above stated, there were paid: for rentals, $75,000; for interest on funded debt, $470,000; and for dividends $1,600,000. In addition to which $300,000 were carried forward to the improvement fund, and $47,618 added to surplus, which with the surplus from previous years, makes a total surplus, September 30, 1880, of $2,531,319. Last year, (in addition to the payment for rentals of $75,000, interest on funded debt $470,000, and dividends, $1,600,000,) the amount carried forward to improvement fund was $450,000; and added to surplus, $108,638. The number of passengers carried the past year was 5,993,297, and the number of tons of freight 3,810,539, against 5,199,160 and 2,738,096 in 1879, being an increase of more than 800,000 passengers and 600,000 tons of freight. The total train mileage was 5,450,729, against 4,889,772 last year. The number of tons of freight carried one mile was 375,452,804, the largest since 1873, and an increase of 50,000,000 since last year. The average rate of passenger fares a mile was 2.08 against 2.14 last year, and the average rate for a ton of freight a mile was 1.207, the rate last year being 1.073.

The Coal Trade.

The leading coal carrying companies make the following reports of their tonnage for the week ending October 23, and for the year to the same date, compared with their respective amounts carried to the same time last year:

	Week.	1880.	1879.
Reading Railroad ...	205,195	6,198,092	7,266,600

Clearfield, Pa.....	40,112	1,352,348	1,289,182

The total tonnage of anthracite coal from all the regions for the week ending October 23, as reported by the several carrying companies, amounted to 636,670 tons, against 607,832 tons in the corresponding week last year, an increase of 29,038 tons. The total amount of anthracite mined for the year is 18,540,744 tons, against 21,233,844 tons for the same period last year, a decrease of 2,693,100 tons. The quantity of bituminous coal sent to market for the week amounted to 86,956 tons against 66,006 tons in corresponding week last year, an increase of 20,950 tons. The total amount of bituminous mined for the year is 3,536,686 tons against 2,785,924 tons for the corresponding period last year, an increase of 750,762 tons. The total tonnage all kinds of coal for the week is 723,826 tons, against 673,838 tons in corresponding week last year, an increase of 49,988 tons, and the total tonnage for the coal year is 22,077,430 tons against 24 019,768 tons to same date last year, a decrease of 1,942,338 tons. The quantity of coal and coke carried over the Pennsylvania Railroad for the second week of October was 151,434 tons, of which 119,347 tons were coal and 32,087 tons coke. The total tonnage for the year thus far has been 5,582,676 tons of which 4,204,015 tons were coal and 1,378,661 tons coke. These figures embrace all the coal and coke carried over the road east and west. The shipments of bituminous coal from the mines of the Cumberland coal region during the week ended Oct. 23 were 35,387 tons, and for the year 1,721,896 tons—an increase of 519,793 tons as compared with the corresponding period of last year. The coal was carried as follows: Baltimore and Ohio Railroad—week 22,164 tons, year, 1,030,839 tons; an increase over 1879, 324,742 tons. Chesapeake and Ohio Canal—week, 11 688 tons; year 508,566 tons; increase over 1879, 140,816 tons. Pennsylvania Railroad—week 1,536 tons; year, 181,991 tons; increase over 1879, 54,235 tons. The Reading Railroad for the week ending last Saturday, October 30, sent 64,300 tons to Port Richmond, and 45,200 tons shipped from there.—Phil. Ledger, Nov. 1.

Interest and Dividends.

—The Board of Directors of the Pennsylvania Railroad Company have declared upon the capital stock of the company, out of the profits, a semi-annual dividend of 3 per cent, payable clear of State taxes on the 30th of November, to stockholders of record on the 30th of October, and an extra dividend of one per cent, for the purpose of distributing a portion of the shares purchased from the city of Philadelphia. The option is given to the shareholders of accepting the extra dividend of 1 per cent in scrip, convertible into stock of the company at par when presented in sums of $50, provided that the privilege of converting the scrip into shares shall expire Dec 21 next, after which all scrip outstanding shall be redeemed in cash at its face value.

—The Directors of the Cincinnati, Hamilton and Dayton Railroad Company have declared a dividend of 2 per cent on the capital stock of $3,500,000, out of the earnings of six months ending September 30. The gross earnings for the six months were $1,473,482, the expenses $1,368,142, and the net earnings, $105,340—leaving a balance, after paying $70,000 for dividend, of $35,340.

—The Receivers of the Philadelphia and Reading Railroad Company will pay, on November 9th, on account, the one-half of the July coupon of the general mortgage bonds of said company, returning the coupons to the holders stamped "half paid." They will also pay, on the same date, the entire July coupon of the general mortgage deferred sterling scrip.

—The Pullman Palace Car Co. has declared the usual quarterly dividend of two per cent on the capital stock of the company, payable Nov. 15, at the Farmers' Loan and Trust Company, New York, New England Trust Company, Boston, and the Company's office Chicago.

—The directors of the Boston and Albany Railroad Company, at their meeting on the 25th ult., declared a semi-annual dividend of four per cent, payable November 15th. They also voted to make dividends hereafter payable quarterly, beginning December 30.

—The Cincinnati, Sandusky and Cleveland Railroad Company has declared a semi annual dividend of 3 per cent on the preferred stock, payable Nov. 1.

—The Receivers of the Lehigh and Wilkesbarre Coal Company will pay, November 15, 3½ per cent interest on the registered income bonds issued for funding coupons of the company's consolidated mortgage bonds.

—The New York, Providence and Boston Railroad Company (Stonington Railroad) has declared a quarterly dividend of 2 per cent, payable Nov. 10.

—The Middlesex (Boston) Horse Railroad Company has declared a semi-annual dividend of 3½ per cent, payable Nov. 15.

—The Somerville (Boston) Horse Railroad Company has declared a semi-annual dividend of 3 per cent, payable Nov. 1.

—The Northwestern Equipment Trust Company of Pennsylvania has declared a semi-annual dividend of 5 per cent, payable on demand.

—The Seaboard and Roanoke Railroad Company has declared a dividend of 4 per cent for the past six months, payable on demand.

—The Boston and Chelsea Horse Railroad Co. will pay a semi-annual dividend of $1 per share on demand.

—The Lynn and Boston Horse Railroad Company has declared an annual dividend of six per cent, payable November 8.

—The Nashua and Lowell Railroad Co. has declared a dividend of 3½ per cent, payable Nov. 1.

Nashua and Lowell Railroad Lease.

The Boston and Lowell and the Nashua and Lowell Railroads were operated together for many years under a joint contract, which expired by its own limitation two years ago. The Boston and Lowell Company at that time declined to renew the old contract, but offered to lease the Nashua Railroad on terms not satisfactory to the latter company. The roads have been operated separately ever since, and although both parties were ready to admit the mutual advantages to both of a single management in many respects, they have till recently been unable to agree upon the terms of such single management. The directors of the two companies have now agreed upon the basis of a lease by the Boston and Lowell of the Nashua and Lowell Railroad for one hundred years at a rental of $60,000 per annum, which is equivalent to 7½ per cent upon the capital stock of the leased road, subject, however, to ratification by the stockholders of both companies who will meet on the 10th inst. to act upon the subject.

The Boston Journal, from which the above is obtained, says there is very little doubt entertained as to the action of the stockholders in both cases. The lessor party will get as rental a little more than it has paid its stockholders the past year by way of dividend (7 per cent), while the lessee company will not only realize the full amount of rental from the earnings of the leased road but can operate the two roads together at a diminished cost, equal to at least one-fifth of the entire rental, thus reducing the rental from 7½ to 6 per cent or thereabouts. The Journal adds:

Prominent railroad men say that it would be highly advantageous, both to the railroad companies and to the travelling public, if this single management could be extended north through the State of New Hampshire to White River Junction, a policy heretofore forbidden by the lawmakers of that State. Until that can be done, these parties say, this line of roads to the West can never compete successfully with the other great through lines, working under joint control as an entire route. New Hampshire now forms the missing link which separates the port of Bos-

ton from the Grand Trunk route, and thus prevents the development of one of the largest and best railroad lines between Chicago and the East. If this difficulty is overcome—as it must be, sooner or later—the port of Boston will again come to the front as a point of shipment to Europe.

Messrs. Walker, Clark, & Co., contractors on the Missouri Division of the Northern Pacific Railroad, having completed the grading to Glendive Creek, have been ordered to turn their entire force of several hundred men on to the Yellowstone Division, and are already at work, and will grade to Fort Keogh, 50 miles, this winter. Large contracts have been let for ties, and the company has already contracted for rails to be made this winter for the whole division, 320 miles. This is said to be the richest division in lands on the whole road.

A circular has been issued announcing the consolidation, October 16, 1880, of the Toledo and Ann Arbor Railroad Company and the Toledo, Ann Arbor and Northeastern Railroad Company resulting in the organization of the Toledo, Ann Arbor and Grand Trunk Railway Company.

The shipment of iron ore from the Menominee Range to Escanaba, which began in 1877, has grown to such immense proportions that a double track railway is seriously needed.

The Marietta branch of the Port Huron and Northwestern railroad will be finished and cars running to Marietta by December 1.

Pennsylvania R. R. Co.

TREASURER'S DEPARTMENT.

PHILADELPHIA, November 1, 1880.

The Board of Directors has this day declared a semi-annual dividend of THREE PER CENT and an extra dividend of ONE PER CENT on the Capital Stock of the Company, clear of all taxes, payable on and after November 30th to stockholders as registered on the books of the Company at 3 o'clock P. M. October 30th, 1880.

For the purpose of distributing a portion of the shares purchased from the city of Philadelphia, the option is given to the shareholders of accepting the extra dividend of ONE PER CENT in scrip, convertible into the stock of the Company at par when presented in sums of Fifty Dollars; provided the said option shall be exercised on or before December 21st, 1880, after which date all outstanding scrip will be paid in cash.

JOHN D. TAYLOR,
Treasurer.

DIVIDEND NOTICE.

THE LOUISVILLE AND NASHVILLE RAILROAD COMPANY has declared a dividend upon its capital stock of ONE HUNDRED PER CENT, payable in stock to the stockholders of record on the 13th November, 1880, and intend to increase the number of its shares of capital stock to that extent and for that object; and further notice is hereby given that the transfer-books of this company will be closed on the 13th November, and reopened on the 1st day of December, 1880. W. RANNEY, Secretary.

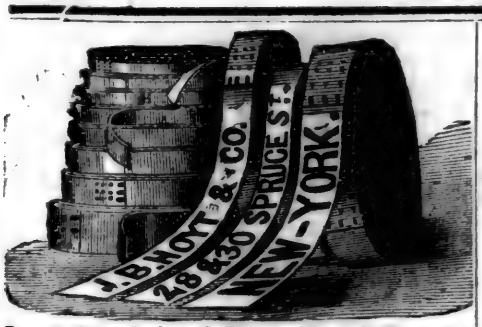
VALENTINES VARNISHES

OUR CLAIMS.

We claim that our Finishing Varnishes are unsurpassed in the following qualities:

1. Uniformity. 3. Fluency. 5. Drying. 7. Fulness. 9. Durability.
2. Paleness. 4. Reliability. 6. Hardening. 8. Brilliancy. 10. Economy.



All know it is easy to make a Varnish that has the single quality of DURABILITY; but Varnishes which wear well are generally inferior in color and working quality, uncertain in laying, too slow in drying, or lacking in body or lustre, and frequently they possess ALL these defects.

In our "RAILWAY-COACH FINISHING" the ten qualities will be found combined and our other Varnishes are as elastic and durable as is practicable for the work on which they are employed.

Those of our Varnishes which have the greatest durability require time for hardening. They have superior elasticity, and ARE DISTINGUISHED FOR THE EXTENT OF SURFACE THEY WILL COVER, WHICH RENDERS THEM ECONOMICAL.

VALENTINE & COMPANY,

Chicago. NEW YORK, Paris.

Patent Stretched and Patent Riveted Short Lap

BELTING.

Our Belts are made from pure Oak Tanned Butts, and of the heart or solid part only. No part of the shoulder being used. Any one not familiar with Belt making can readily detect this by the shortness of the lengths and laps. Long laps are made including the shoulder or thinner and softer part of the Leather, causing the Belt to be, in its enduring qualities, no better than its poorest or thinner parts

Our Belting is warranted to run straight and maintain an even bearing on the pulleys, and sold under the fullest Guarantee.

Counterfeit $1,000 Coupon Bonds, Acts of July 17, and August 5, 1861.

TREASURY DEPARTMENT,
WASHINGTON, D. C., November 1, 1880.

The following information concerning the counterfeit $1,000 Coupon Bonds, Acts of July 17, and August 5, 1861, has been furnished by experts of the Bureau of Engraving and Printing of this Department, and is published for the information and guidance of all concerned:

BODY OF BOND.

In the 1,000 counter, composed of nine sections at each side of the portrait of Chase, in the section at the left of the lower ball of the figure 1 in 1,000, the letter "S" in "Stat" is entire in the counterfeit. In the genuine only the upper half of the "S" is seen. Also, to the right of the letter "S" in the word "Register's" will be found a break in the hair line surrounding the portrait of Chase, about one-sixteenth of an inch in length, which does not appear in the genuine. The counterfeit differs from the genuine in the mitering in the four corners of the green border. Near the extreme corner, inside of the lathe-work border, a uniform white figure, in the shape of a heart, with the apex pointing towards the corners, will be observed on the counterfeit, and this figure is the same on all four corners; in the genuine these figures are irregular, having no symmetrical form. In the words "are indebted unto," below the portrait of Chase, the heavy black line in the centre of the face of the first letter "A" is omitted in the counterfeit. In the title, "United States of America," in the ruled shade on the left-hand side of the spur of the letter "U" at the bottom on the counterfeit are seven short lines, forming but a slight shade under that part of the letter, while in the genuine there are ten lines, about one-sixteenth of an inch in length, forming a shade the same width as the shade at the bottom of the letter. On the right of the spur at the bottom of the letter "U" on the counterfeit, where the ruled shade touches the bottom of the letter "N" four lines only touch the "N;" on the genuine seven lines touch the "N." On the counterfeit, three lines of the shade on the right spur at the bottom of the letter "t" in "United" touch the bottom of the letter "e;" on the genuine the shade does not touch the "e." The shading in the top loop of the first "S" in "States" fills the loop on the counterfeit, while on the genuine there is a slight blank space in the lower right hand part of the loop. There is a blank space in the shading of the bottom loop of the same letter on the counterfeit in the lower right part; on the genuine the blank space is directly over the point in the bottom of the letter. On the lower loop of the second "s" in the counterfeit the ruled shaded lines fill the whole loop, while in the genuine there is a blank spot free from ruling. In the fringe on the left side of the cravat on the portrait of Chase on the counterfeit there will be observed two deep graver cuts running at right angles across the fringe; these two cuts do not appear on the genuine. On the red seal under the scales is a right-angle bar containing thirteen stars; on the counterfeit these stars are small and badly formed, the points not being well defined, while in the genuine they are larger and well pointed. This also applies to all the stars on the red seal The signature at the lower right hand on the counterfeit is engraved and printed in a grayish-colored ink and afterwards tampered with by the use of writing fluid; while in the genuine bond the signature is written. No reliance can be placed on the relative sises of the bonds, as the genuine vary in size, which is accounted for by the stretch and shrinkage of the paper on which they are printed; nor to differences in the relative positions of portions of the bond printed in different colors, the printing being done by separate impressions for each color. The title, as well as all the engraving on the bond, varies in every particular from the genuine; but the points mentioned are some of the most prominent discrepancies.

COUPONS.

On the counterfeit coupons the hair line of the letter "s" in the word "months" extends above the body stroke of the small script letters; in the genuine the hair line terminates abruptly with the body stroke. Also the letter "t" in the same word is not crossed in the genuine, while in the counterfeit the letter is prominently crossed on the right side. On the counterfeit the hair line of the second "e" in the word "bearer" extends to the dot or ball of the letter "r"; but in the genuine the hair line does not join the dot there, leaving a blank space. On the counterfeit the body stroke of the capital letter "B," in the word "Bond," extends to the top of the upper bow of the letter, while in the genuine the stroke falls considerably short of reaching the top of the bow. On the counterfeit, between the initials "L. E." of the engraved signature, the period is of a triangular shape, with its lower point inclined to the left; on the genuine the period is smaller and more elongated, with its point directed to the bottom of the coupon. On the counterfeit the upper curved hair line of the "$" mark connects with the ball on the top, giving an angular appearance to the ball; on the genuine the hair line curves gracefully, and connects with the ball on the right. The figure "1" adjoining the "$" mark on the counterfeit is in the form of a double curve, while in the genuine it is straight.

It should be stated that only the coupons maturing January 1, 1881, are attached to the counterfeit bonds received at this office, and above comparisons of genuine have been made only with these coupons.

J. K. UPTON,
Acting Secretary.

Rapid Transit Across the Brooklyn Bridge.

Rapid Transit in Brooklyn is likely to be affected by a new feature entering into the influences that tend to hasten it, in the recent election of Mr. William R. Grace as Mayor of New York. The bearings of the incoming New York Mayoralty upon the matter are thus set forth by the *Tribune:*

On October 9, Charles R. Flint, a partner of Mr. Grace in the firm of W. R. Grace & Co., subscribed for all the stock of the Brooklyn Rapid Transit Company. The subscription was made by Mr. Flint for himself and twenty-seven others. The stock may be said to have been snatched up by Mr. Flint, as the subscription books had not been opened longer than five minutes by the secretary of the Brooklyn Rapid Transit Commission when the subscription was made.

It has been the aim of every rapid transit company organized in Brooklyn to obtain permission from the trustees of the Brooklyn Bridge to cross the structure to the New York side. The pressure upon the trustees to obtain this permission will be intensified as the bridge nears completion. The addition of Mr. Flint's company to the list of applicants is likely to greatly embarass the trustees. They will probably think that Mr. Grace's attention has already been called to rapid-transit problems in Brooklyn through the investment of his partner, Mr. Flint, and that he will look with impatience on any delay in the completion of the bridge and the settlement of the question of its occupancy by some railroad company. Mr. Grace will have the power, as Mayor of New York, to influence greatly the future management of the bridge. In the first year of his term, June 2, 1881, the terms of all the present bridge trustees expire. Half the members of the new Board will be appointed by the Mayor, Controller and President of the Board of Aldermen of New York. It is apparent now that Mr. Grace will have as his associates on this appointing Board men in per-

fect sympathy with himself; Mr. Kelly is to be his own successor as Controller, and the Paesident af the Board of Aldermen is likely to be named by him.

Eames Vacuum Brake.

We heard a gentleman (evidently a stranger in New York) ask a friend with whom he was coming down town the other morning, how the elevated roads could have been successfully operated if they had come into general use before the invention of the vacuum brake. The New Yorker who had answered all previous interrogatories readily enough, said, "Oh, we could have—have—why of course they would have to—that is to say, I really dont know." We immediately applied our brain to the solution of the puzzling question without any better success, indeed we were forced to the conclusion that whilst it might be possible to operate an elevated road with the old hand brake, it would certainly be extremely hazardous and highly impracticable. The Eames Vacuum brake is undoubtedly one of the greatest conservators of safety in railway traveling (elevated or surface) that the mechanical mind of the XIXth century has given to the world, and it is not at all surprising that it is being so universally introduced.—[Elevated Railroad Journal.

The Assyrian Monarch.

The following description of this fine steel steamship which has been built for the Royal Exchange Shipping Company, London, by Earle's Shipbuilding and Engineering Company, Hull, Eng., is from the London Times of October 23d:

The Assyrian Monarch is the largest steel steamer which has been built at Hull, and she looked remarkably well as she left the Victoria Dock for her trial trip. She is of the following dimensions: length, 360 feet; breadth of beam, 43 feet; depth of hold, 32 feet 6 inches. Her gross register is 3,316 tons and 2,163 tons net. She has four masts, the fore and main masts carrying yards, a large spread of fore and aft canvas being provided for the mizzen mast and the jigger. The vessel is of the spar deck construction, and all her hatches and steam winches are protected by breakwaters of iron with a teak rail. This inner bulwark is provided at intervals with freeing ports, so that in case a sea breaks over and fills them they may quickly be relieved of the water. The engines by which the steamer is propelled are on the compound surface condensing principle and of 500-horse power nominal, the cylinders being of 46 inches and 87 inches diameter, with a 57-inch stroke. Steam is supplied by three double ended cylindrical boilers, fitted with four of Fox's patented corrugated furnaces, and working to a pressure of 80 pounds per square inch. The engines were built by Earle's Company from specifications by Mr. W. R. Esplen, consulting engineer, Liverpool. The engines, which are fitted with Brown's patent reversing gear, proved very handy, and it is a fact which speaks highly for their construction that from leaving Hull to getting back to that port at 7 o'clock in the evening it was not necessary to stop them once for heated bearings. During the trial on the measured mile at Withernsea the engines ran at a speed of from 55 to 57 revolutions per minute, the steam pressure being 78 pounds and the vacuum 28 inches. The indicated horse power was 2,500 and notwithstanding a strong northeasterly roll, which caused the ship at times to labor heavily, the mean of the four runs over the measured mile was 12.66 knots per hour. The large saloon which is a most sumptuously furnished apartment, with sleeping berths beneath, as well as the officers' quarters, are heated with steam from the main boilers. Steam is supplied to six winches and a windlass from a very large donkey boiler placed in the 'tween decks. In the engine-room there are three large condensers capable of supplying sufficient fresh water for 500 head of cattle, for the emigrants she may carry, and for the crew. There is also a large ventilating fan for supplying fresh air to the 'tween decks when the vessel is carrying cattle or emigrants, and it is anticipated that this, with many other sanitary arrangements, will enable a large cargo of cattle to be carried without loss or depreciation during transit.

Russian Palace Cars.

The following is a description of a pair of palace cars recently constructed at a factory in Bohemia for a Russian Railroad officer:

They are on trucks, like American cars, and about 53 feet long, with entrances at the ends. (The cars belong together.) One has a kitchen, with sleeping accommodations for the cook, a buffet room finished in carved ebony and supplied with elegant table ware, and finally a dining room finished in beautiful woods, with antique carved chairs for twelve persons, an elegant extension table, and lighted with a central chandelier bearing twenty-five wax candles, besides four other lights. Berths can be made up in this room also. In the connecting car is a bath room provided with hot and cold water, a Field boiler heating the water for this and for warming the car also. There is a passage along the side of the car from which open in order a nursery, a music room, a bed room and an office room all connected by an annunciator and speaking tubes with the servants' quarters. In the nursery is a child's bed, with drawers underneath for linen, and a berth opposite for the nurse, with a closet at one end. The music room is reported to be fairy-like in its beauty, with purple carpets, curtains and arm chair, with an ebony piano on one side and on the other an elegant fireplace in the French style, in which in winter a cheerful fire adds to the steam heat which warms the other rooms of the car. There is also in this room a carved wardrobe carrying a chronometer, a round table of ebony and a chandelier, while the ceiling is hung in white satin gathered in the centre with a golden rosette. The bed room is hung with dark blue damask, and the bed on the gilt French bedstead is covered with sky-blue satin and shaded by a canopy held up by gilt hooks. The velvet carpet and the chairs correspond. The curtains are bordered with fine lace (what a chance for sparks and cinders). The walls as high as the bed are hung with dark blue velvet. This bed room opens into a toilet room provided with every convenience. The office has a dark carpet and hangings, and is provided with a simple walnut cylinder desk. Noise is reduced by thick carpet and hangings. Adjoining is a little room with a sofa and a mirror in a carved oak frame over one end, so arranged that when the car is at the end of the train one may lie on the sofa and see in the mirror the reflection of the country which the train has just passed.

Obstructions to Navigation.

In the United States Supreme Court at Washington on the 8th inst. the following decision, among others, was rendered:

No. 32.—The New Orleans, Mobile and Texas Railroad Company, plaintiff in error against the State of Mississippi; in error to the Supreme Court of Mississippi. This was a suit brought by the State against the railroad company to compel the latter to remove a stationary bridge which it had erected over the Pearl River, on the between Louisiana and Mississippi, and to replace it with a draw bridge which would not impede navigation. The action was instituted in a State Court, but early in the proceedings the railroad company filed a petition for an order of removal to the United States Circuit Court. The order was denied. Upon appeal the action of the State Court was approved by the Supreme Court of Mississippi, and the case now comes here on a writ of error. This Court holds that the case was one arising under the Constitution and Laws of the United States; that it was therefore properly removable to the United States Courts; that the petition for an order of removal should have been granted, and that all the proceedings in the State courts subsequent to the filing of the petition were null and void. The judgment of the Supreme Court of Mississippi is reversed with costs, and the cause remanded, with instructions to proceed in conformity to this opinion. Opinion by Justice Harlan, Justice Miller dissenting, and Justice Field not participating.

Canada Pacific Railway.

The pleasant news comes to hand that the Canada Pacific line has been opened west of Winnipeg as far as Portage la Prairie, a distance of some seventy miles. This is a great fact for the prairie country. Present contracts provide for the completion of the road to a distance of one hundred miles west of Winnipeg this year, and a further hundred miles by next Fall. The settlers on this prairie region, embracing in all 200 miles, will thus soon be brought into close communication with the general railway system. This benefit follows as the result of the alteration of the route from that adopted by the Mackenzie Government. Under their instructions the line was laid via the narrows, north of Lake Manitoba. Had this been carried out the fine region lying between Winnipeg and Birtle Creek would have been left without railway facilities, and the road graded through a region comparatively worthless. It was a happy thought to alter the alignment, and by this means afford prompt railway facilities to an important and rapidly growing population.—[London (Ont.) Free Press.

The Report of the Naumkeag Street Railway Company, Salem, Mass., for the year ending September 30, 1880, presents the following facts and figures: Capital stock paid in, $70,000. Funded debt $35,900, of which $35,900 is in six per cent bonds due in 1885, and $30,000 in six per cent bonds due in 1895; unfunded debt, $34,461 04—total gross debt, $149,681 99. The assets are $70,680 05. Amount of permanent investments, $195,064 06. Total property and assets, $244,746 05. Addition to property for year, $4,674 80. Total income from all sources, $66,955 08; total expense of operating, $48,554 23—net income above operating expenses, $18,400 85. Interest for year, $5,966 03; surplus for year, $12,404 82; total surplus, Sept. 30, 1880, $54,885 01. Number of miles run for the year, 219,799 17. Number of passengers 11,000,292. Rate of fare, 10, 7, 6¼, and 6 cents on main road, and 10, 8, 1-3, 5, 4 1-6, and 4 cents on branches.

From Ottawa, November 8th, we learn that the loan negotiated by the Manitoba Southwestern Colonization Railway, of which Dr. Schultz is President, amounts to $12,000,000. The company, it is said, get something over three thousand acres of land per mile in alternate blocks, six miles on either side of the line, and the entire length of the road when completed will be seven hundred miles. The company pay the Government $1 per acre for the land, and place a value of $5 per acre on it, the price at which the Government will dispose of these alternate blocks. The $400,000 paid to the Government recently was only the first instalment.

Work on the main line of the North and West Branch Railroad, extending on the east side of the Susquehanna River from Catawissa to Pittston, which was begun in 1874, is to be completed under guarantees from the Pennsylvania Coal Company.

Track laying has begun on the Utah Eastern Railroad at Coalville, Utah.

ALTERATIONS and improvements being made in the tables, which are weekly features of the JOURNAL, necessitate the temporary withdrawal of part of them. In the Bond List alterations are desirable, owing to changes among the roads, consolidations, etc., since our tables were revised. The Share List is naturally corrected at this season of the year, and as this is the time when much of the necessary information comes to us from our correspondents and from the railroads, the table, if published now, could not be as symmetrical and complete as we would wish. On these accounts we withhold these two tables until they are perfected and made of greater value than ever before, to accomplish which no efforts will be spared. We have added several important features to the JOURNAL recently and it seems desirable now that some of our tables should appear semi-monthly, monthly and quarterly instead of weekly, thus giving us an opportunity to lay before our readers more information and a greater variety each week. We shall announce the tables as they are to appear from week to week. The table of contents always gives those in the current number, and in future by referring to the files of the JOURNAL any of its tables desired can readily be found, and they will contain as late information as though appearing in each number, as we do not intend to withhold any tables that are of weekly interest. While adding new features to the JOURNAL, our aim is to retain and improve the old ones.

MEXICO, it is to be hoped, having passed through its trying revolutionary period, is now entering upon a second stage; that in which commercial enterprises may find guarantee of safety and encouragement. The attention of railroad projectors and capitalists is turned in that direction to a marked degree, and a promising field seems now opened to them, if the government of Mexico does not allow prejudice and corruption to stand as barriers to the development of its resources.

THE underground rapid transit plans are drawing nearer to completion and the perfection of them and the beginning of active work may reasonably be expected at an early day. The stockholders of both the New York Underground Railway Company and the Broadway Uudergrouud Connecting Railroad Company will probably have a definite plan laid before them next Monday for the contemplated consolidation of the two companies. It is proposed to make the capital stock of the consolidated company $11,000,000 of which $10,000,000 is to be contributed by the New York Underground Railway Company.

A NO less important result than the establishment of a new route to the Pacific will be effected by the junction of the Southern Pacific and the Atchison, Topeka and Santa Fe Railroads. Soon after the opening of the new year the junction is likely to be accomplished, the two lines to meet in the vicinity of Mesilla, near the southern border of New Mexico and the line separating Texas from Mexico. Work is being pushed with great vigor by both lines and arrangements will soon be under way for an exchange of traffic. The influence of the new line upon transcontinental traffic will be great, but a still greater and more important feature of its projection and completion will be seen in connection with its timely approach to the fields of the most promising Mexican railway enterprises now springing into activity. The projectors of the new line, with far seeing discernment have undoubtedly secured for it an important part in the proposed system of Mexican railroads.

THE recent decision of Judge Thayer in the U. S. Circuit Court at St. Louis, noted elsewhere, is a very important one with regard to the rights of the public to the use of the telephones and telegraph. Certain telephone patents which were owned by the Western Union conflicted, to a considerable extent, with those owned by the Bell Telephone Company. An arrangement was made by which the Telephone Company obtained control of these patents and agreed to deliver messages for transmission to no telegraph company but the Western Union. Many persons who put telephones into their houses wished to send messages by other companies, but were told that such messages could not be sent owing to a contract by which they were bound not to deliver such messages to any telegraph company. Many patrons of the telephone became restive, and a suit was brought to compel the Bell Telephone Company to connect the office of the American Union Telegraph with its wires, which resulted in an order that such connection be made on the ground that the contract alluded to was contrary to public policy.

CAPTAIN MOTT, of the Rhode Island, which went ashore in Narragansett Bay last Saturday, is deserving of the highest praise for chivalrous and brave conduct during the trying hours of the disaster. His noble action, while being most enthusiastically spoken of by those whose lives he saved, has not received the public recognition it merited. The tendency of the press in matters relating to transportation disasters by rail or water is to throw blame and criticism, oftentimes indiscriminately and unintelligently, upon employers and employees. It is an easy matter for a writer to sit in a snug and comfortable office and give wise after-thoughts and advice to men who have used every possible precaution and have strained every nerve, or it may have been have given up their lives, in an earnest endeavor to avert an impending evil. It is quite another thing in the midst of a desperate death struggle to think wisely, to act bravely and to prove ones self an unselfish hero; and when this is done the press should be as ready to give its hearty recognition as it has been to give its willing criticism. By Captain Motts' cool decision and presence of mind every passenger was saved while the vessel was a complete wreck. Standing with the passengers on the vessel which was known to be fast going to pieces, he cheered and encouraged them by his manly and kind bearing, averting all semblance of a panic among those in his charge, and at last, when daylight came, safely landing them under great difficulties in little groups by small boats commanded by himself. Captain Mott has proved himself one of those men whom emergency sometimes brings forward to demonstrate the possibilities of heroism and self possession under trial.

Railways in Sicily.

A correspondent of the Naples Piccolo, writing from Sicily, says that the line of railway from Messina to Palermo is on the point of completion, and that probably the King and Queen of Italy will be present at its inauguration. The completion of this important and expensive line has been delayed for twenty years, for the concession was granted under the dictatorship of Garibaldi in 1860. Palermo will now be reached from Rome by land (with the exception of the short passage of the Straits of Messina), in thirty-six hours. The writer urges the necessity of completing the chain of railways in Sicily "by continuing the line from Siracusa to Licata—already in course of construction—further west to Girgenti, Sciacca, and Castelvetrano, thus uniting the province of Girgenti and its commercial traffic with the line from Palmero to Trapani. At the same time the various ports ought to be enlarged and improved, especially those of Sciacca, famous for its coral banks; Marsala, where there are important manufactories of wine, under English and Sicilian direction; and Catania, the commerce of which port has lately greatly increased, and may rival

that of Messina. Such completion of railway lines and improvement of ports would put an end to the shameful isolation from the Continent and foreign ports under which till now Sicily has suffered."

Finances of Georgia.

According to the recent message of the Governor of Georgia the balance in the State Treasury at the close of the fiscal year, September 30, 1878, was $295,789 68. During the year, from October 1, 1878, to September 30, 1879, inclusive, the receipts amounted to $1,847,790 54, making a sum total in the treasury of $2,143,580 22. The disbursements during that fiscal year were $1,212,671 60, leaving a balance in the treasury, September 30, 1879, of $930,918 62. During the year from October 1, 1879, to September 30, 1880, inclusive, the receipts were $4,589,015 64, making a sum total in the treasury of $5,519,934 26. The disbursements during the fiscal year amounted to $4,833,683 78, leaving a cash balance in the treasury September 30, 1880, of $686,250 48. One large transaction reported was the item of $2,298,000. This was the funding of the 7 per cent indorsed bonds of the Macon and Brunswick, North, and South, and Memphis Branch Railroads in 6 per cent. State bonds under the act of 1877.

OUR BOSTON LETTER.

[From our Regular Correspondent.]

BOSTON, Nov. 8, 1880.

A fair amount of business and generally advanced prices is the history of the market for the past week. Closing prices to-day over those of Oct. 30 show the following changes:

Advanced.		
Atchison	128½	to 133¾
Boston and Lowell	100	to 102½
Boston and Maine	142	to 142¼
Cheshire	53	to 55
Chic. Bur'l. and Quincy	145½	to 158
Chicago and W. Michigan	71¼	to 73
Cin., San. and Cleveland	19	to 19¾
Central of Iowa	10¾	to 13½
Flint and Pere Marquette	21	to 22
Fitchburg	133	to 135
Fort Scott Gulf, Pfd	111	to 115
Fort Scott Gulf, Com	52	to 55
Little Rock	56⅝	to 58½
New York and New England	40	to 41⅛
(Hartford and Erie 7s)	42¾	to 43⅝
Summit Branch	14⅜	to 18
Wisconsin Central	10¾	to 13⅛
Wisconsin Central, Pref.	26	to 28
Declined.		
Boston and Albany	155	to 154½
Eastern	85	to 84
Lawrence and Southern	90	to 89
Norwich and Worcester	150	to 148
Old Colony	124	to 123
Pullman Palace Car Co.	123¾	to 122

Atlantic and Pacific subscriptions have advanced from $280 to $560 premium.

The most remarkable advance in the last two weeks has been in Summit Branch Railroad which in that time has steadily gone up from $12 to $18 or 50 per cent on its market value. Formerly the road paid dividends of 3 per cent semi-annually, but for the past four years has been conducted at a loss. The railroad is only twenty miles long, and the company depends for its success upon the operations of the Lykens Valley Coal Co., which it owns. The annual report for 1879 showed a large profit and loss account on the wrong side of both the Railroad and the Coal Company. The operations for the past year, however, show increased earnings and decreased expenses, with the greater part of the gain in the last two months of the fiscal year.

The annual statement of the Pullman Palace Car Company for the year ending July 31, 1880, appears as follows:

Earnings from all sources		$2,635,468
Disbursements:		
Operating expenses etc.	$955,047	
Rent of leased lines	264,000	
Interest on bonds	168,979	
Dividends	472 876	
		1,860,902

FINANCIAL STATEMENT.

Assets:		
472 cars including franchises		$8,588,614
Patents, United States and Foreign		184,383
Amount invested in other car Associations controlled and operated by this Co		2,440,621
Cash, supplies, accounts R. E., etc		2,066,695
		$13,280,313
Liabilities:		
Capital stock		$5,990,200
Bonds:		
8s due 1881	$328,000	
8s due 1887	445,000	
8s due 1892	820,000	
7s due 1888	767,000	
7s due 1885	116,000	
		2,476,000
Amt. received form old cars		419,003
Surplus, Guarantee fund		15,728
Depreciation acct. to provide for possible depreciation in patents, etc		800,000
Income account		3,579,382
		$13,280,313

The scheme for a ship canal across the narrow part of Cape Cod has been considerably before the public lately and some extravagant stories as to the cost and size of the canal are in print. The Cape Cod Ship Canal Co. was incorporated in 1870 for the purpose of constructing a ship canal from some convenient point in Buzzards Bay through the town of Sandwich to some convenient point in Barnstable Bay. Under the charter the work was to be commenced within two years. Their charter was renewed three times and finally in 1878, they were required to commence work within two years from March, 1878, and complete the canal within three years after they commenced work. The company had made no preparation to go forward, were in no condition to build the canal, and in fact their charter had been on the street for sale. In 1880 Henry M. Whitney, Hoeum Horsford, and others procured a charter for the Cape Cod Canal Co., and it was provided that unless the Cape Cod Ship Canal Co. should have actually expended $100,000 for work actually performed upon a canal within the l cation before Nov. 1, 1880, then all its interest in lands acquired, materials used, and work done, should be forfeited to the new company. The Cape Cod Ship Canal Co. having failed to do the necessary amount of work have forfeited their charter, and the other company composed of Massachusetts men have now the exclusive right to carry on the enterprise. Engineers are now at work, although it will take some months to make the necessary soundings to determine the final location and to obtain estimates. Then if the work appears feasible, the parties are prepared to go forward and construct the canal. If it should be proved that the foundation is rock, and the engineers should find the work impracticable, that is impracticable as compared with the benefit, it will be abandoned. The distance required to be excavated is about seven miles, and the estimated cost about $4,000,000.

The average difference for 10 years on coal from Philadelphia to Boston and Newport, Fall River and Providence was 42 cents a ton. From New York it was an average of 55 cents a ton, and in winter season it sometimes runs as high as 80 cents a ton.

The cutting of this canal would enable vessels to come through to Boston as cheaply as they can go to ports on the Sound, for the larger quantity of coal to be brought here would compensate for the longer distance. Now the quantity of coal likely to pass through this canal amounts to about three millions of tons, and a saving of 50 cents a ton on that quantity is a basis for a revenue that will warrant the building of the canal.

Interest and Dividends.

—The directors of the North Pennsylvania Railroad Company have declared a Quarterly Dividend of 1½ per cent (less five per cent of the amount retained for contingent fund) payable on the 24th inst.

—The regular quarterly dividend, at the rate of 7 per cent per annum, on the guaranteed stocks of the Cleveland and Pittsburg Railroad Company will be paid Dec. 1 at the office of the Farmers' Loan and Trust Company, No. 26 Exchange place.

—The Ontario Silver Minning Company has declared its sixty-first dividend for the month of October, payable November 15, at Wells, Fargo & Co. The payment of this dividend will make the total amount of the distributions to the stockholders $3,050,000.

—Payment was commenced on the 9th inst. of one-half of the 3 per cent interest on the July coupons of the general mortgage loan of the Philadelphia and Reading Railroad Co, objections formerly made thereto having been withdrawn. The payments will amount to about $295,299, and the coupons are stamped "half paid."

Cincinnati Iron Market Report.

[By E. L. HARPER & Co.]

CINCINNATI, Nov. 9th, 1880.

The increased demand has continued, and sales of several additional round lots have been closed for quick delivery. Prices range about as follows:

FOUNDRY.		
Hanging Rock Char. No. 1	$26@$28	4 mos.
Strong Neutral Coke No. 1	25@ 26	4 mos.
American Scotch No. 1	21@ 23	4 mos.
GREY FORGE.		
Neutral Coke	$21@$23	4 mos.
Cold Short	20@ 21	4 mos.
CAR WHEEL AND MALLEABLE.		
Hanging Rock Cold Blast	$42@$45	4 mos.
Hanging Rock Warm Blast	33@ 35	4 mos.
Southern Car Wheel	35@ 40	4 mos.
Lake Superior Nos. 1 and 2	33@ 35	4 mos.
Lake Superior Nos. 3 to 5	35@ 37	4 mos.

It is expected the George's Creek and Cumberland Railroad will be completed by the 6th of November, and that coal will be shipped over it from the mines of the American and Maryland companies early this winter.

New York, Lackawanna and Western Railroad.

The line of the New York, Lackawanna and Western Railroad from Binghamton to Buffalo is described as follows in the official documents filed in the counties through which the road is to pass:

The line runs parallel with the New York, Lake Erie and Western track from Binghamton to the east line of Steuben county; thence continuing on in the county last mentioned in a northwesterly direction up the Cohocton river through the town of Corning to the village of Painted Post; thence up the valley of the Cohocton river on the south side of the New York, Lake Erie and Western Railroad, through the towns of Erwin, Campbell and Bath to the village of Bath; thence continuing on in the same course in said county through the towns of Avoca Cohocton and Wayland to a point on the line of Livingston county; thence in a westerly direction through the northeasterly corner of the town of Dansville in the county last mentioned to a point in said town three-fourths of a mile east of the village of Dansville; thence in a westerly direction through the towns of Sparta and Groveland in the county last mentioned to Shakers' Crossing on the Dansville and Mt. Morris Branch of the New York, Lake Erie and Western; thence crossing the track of said railroad and the Genesee river and continuing on in a north by westerly course through the towns of Leicester and York in the county last mentioned to a point in the county line between Livingston and Genesee counties, about five miles east of Pavilion; thence in a westerly direction through the town of Pavilion, crossing the Rochester and State Line Railroad at Pavilion Center and continuing in the same course through the towns of Bethany and Alexander, crossing the Attica branches of the New York, Lake Erie and Western Railroad about two miles north of the village of Alexander, thence on the same course through the towns of Alexander and Darien in said county to the county line of Erie county; thence through the towns of Alden, Lancaster, Cheektowaga, Amherst and Tonawanda in the county last mentioned, crossing Tonawanda branch of the New York, Lake Erie and Western near the line of the city of Buffalo, thence continuing on in said town of Tonawanda crossing the Niagara Falls branch of the New York Central near the line of the city of Buffalo; thence due south about 1¾ miles to the tracks of the International Bridge. The route is almost alongside of the Erie or one of its branches for its whole length, with probably no station more than three or four miles from an Erie station.

The Cape Cod Canal.

Mr. Henry M. Whitney writes to the Boston Journal the following letter in refutation of certain statements which had previously appeared in that paper in reference to the Cape Cod Canal.

First—I have not been present at any "conference of New York and Boston capitalists," and to the best of my knowledge and belief no such conference has been held.

Second—No "practical consolidation of the Boston and New York companies" has been "effected," and to the best of my knowledge and belief none is likely to be, if by the "New York Company," the organization known as the "Cape Cod Ship Canal" Company is intended.

Third—Neither Messrs. Driesbach & Skillman nor any other contractor has received any assurances from me that they will have the contracts.

Fourth—It is not expected by myself, or any of my associates, that "by the first of January several hundred Italians will be at work again on the line of the canal," nor that "when spring opens fully eighteen hundred men will be at work in the big trench."

Fifth—It is not "expected" by us that "$10,000,000 or $12,000,000 will be expended in excavating the immense basin."

The simple facts in reference to the proposed Cape Cod Canal Company are these:

The Legislature granted to myself and associates a charter for building this canal, in case of failure by the former company, this charter to take effect Nov. 1. We did not say to the Legislature that we would absolutely build the canal, but we said that if we were granted the charter we would have careful investigation made into the cost and the practicability of the enterprise, and if these investigations were satisfactory, we would endeavor to find the necessary means to do the work. As yet the company has not been organized, the difficult engineering questions have not been determined, no effort has been made to raise capital for the work, and so far as I am aware, none is likely to be made at present. This much has already been done; we have consulted eminent engineers like James B. Francis, of Lowell, George S. Green, Jr., of New York, and Clemens Herschel of Boston, and others, and their general opinion is that the engineering questions can be satisfactorily solved, and that the cost of a suitable ship channel will not exceed such a sum as will render impracticable the building of the canal. But the enterprise is not one that will warrant the expenditure of $10,000,000 or $12,000,000.

When the engineers have made their report, it may be of interest to the public to know their conclusions, and I shall take pleasure in communicating the same. Until that time nothing further can be said in relation to the project.

A large locomotive has recently been constructed for use on the New York Central and Hudson River Railroad. It is named "William H. Vanderbilt." It is an "eight-wheeler," with driving wheels six and a half feet, thirty-three inch truck wheels, fifty inch boiler, and cylinders eighteen by twenty-four inches, and is furnished with air brakes and the "new spark arrester," somewhat improved. It is claimed that this locomotive can draw twenty loaded coaches.

The Old Colony Steamboat Company has decided to build a new iron steamboat to run between New York and Fall River. She is to be constructed on the cellular system (double hull), and of the best materials. She will be 390 feet long on the water line, 404 feet on deck, 52 feet breadth of hull, 89 feet extreme breadth, 18½ feet depth of hold, and will have a single beam engine of 15 feet stroke and 110 inches diameter of cylinder.

The Richmond and Allegheny Railroad Company has notified the Board of Public Works of Virginia of the completion of fifty miles of its road and its desire that the same should be inspected.

The work of grading on the extension of the Delaware, Lackawanna and Western Railroad at Binghamton by Messrs. Smith & Ridley, contractors was commenced on the 20th ult.

Ontario Pacific Junction Railway.

A general meeting of the shareholders of the Ontario Pacific Junction Railway Company was held in Toronto on the 21 inst., Mr. J. D. Edgar, President of the Company, in the chair. The President stated that he had received official information from Ottawa that the main line of the Canada Pacific would be at once proceeded with from Lake Nipissing westward. The feeling of the meeting was strongly in favor of securing the immediate construction of the line from Gravenhurst to Lake Nipissing, and the following resolution, offered by Mr. John Stuart, President of the Hamilton and Northwestern Railway Company, seconded by Mr. Robert Jaffray, Director of the Midland Railway Company, was unanimously adopted—both the mover and the seconder having expressed themselves in favor of united and earnest action on the part of the railways interested in the connection with the Canadian Pacific:

Resolved, That this company is in a position to undertake the construction of a line of railway from Gravenhurst to connect with the eastern terminus of the Canadian Pacific Railway at Lake Nipissing on receiving from the Lieutenant Governor in Council a bonus or subsidy of $8,000 per mile; and that in view of the absolute necessity for the immediate construction of the line in order to place the Ontario system of railways in connection with the Canada Pacific Railway, this company do apply to the Lieut.-Governor in Council to grant such bonus or subsidy and to impose as a condition of such grant just and fair conditions for securing full running powers and other rights of use for the other railways over the line of this company, and such other conditions as are contemplated by the twenty-fifth section of Charter 166 of the Revised Statutes of Ontario; and this company hereby agrees to accept such grants, subject to the conditions which may be imposed by the Lieut.-Governor in Council.

Messrs. Fisk & Hatch have just issued a pamphlet giving a detailed description of the Chesapeake and Ohio Railway. The holders of securities of the company, and others will find in the pamphlet much of interest concerning the improvements in the road and its new connections which are nearing completion.

Legal Notes.

TELEPHONE AND TELEGRAPH CONTRACT AGAINST PUBLIC POLICY.

In State ex rel. American Union Telegraph Co. vs. Bell Telephone Company of Missouri, Judge Thayer, of the St. Louis Circuit Court, has delivered an interesting decision. There was an application for mandamus to compel the defendant to connect the plaintiff's office with its wires, and give it the use of telephonic facilities. The defendant contended that it could not be compelled to do so, because by the terms of its license from the patentee of the invention it was forbidden to connect with any telegraph office or permit any telegraph company to become one of its subscribers. The court observed: "Bearing in mind that the respondent serves the public as a common carrier of messages, not by keeping offices and agents of its own to which the entire public may resort, but by applying instruments to private residences and offices, and thereby enabling its subscribers to communicate directly with each other, and it becomes evident that this clause of the contract, if enforced as a valid provision, would compel the respondent to discriminate against a class of individuals or corporations engaged in a particular calling, to the extent of denying them any telephonic facilities whatsoever. In other words, a corporation created under the laws of this State, and endowed with large privileges, among others with the right to appropriate private property (presumptively on the theory that such a corporation is a public servant), is compelled by the natural operation of this provision of the contract, to withhold facilities for the transaction of business from one class of citizens which it accords to others. In my judgment, this clause of the contract is indefensible when called in question by any person or corporation injuriously affected thereby. In so far as the contract between the respondent and the patentee compels the former to discriminate against one class of its would be customers, and to deny them the same privileges and service which it accords to others, the contract is invalid. It is not possible to admit the principle that a railroad, telegraph or telephone company may avoid the performance of any part of the paramount duty they owe to the entire public, by contract obligations which they may enter into even with the patentee of an invention. If the principle were conceded, it is quite obvious that such corporation might readily avoid the performance of any public duty that became inconvenient or burdensome. It would become possible to discriminate at pleasure both against individuals or classes." "If the relator, owing to the peculiar nature of its business as a telegraph company, shall attempt to make such use of the telephone as the respondent seems to anticipate, the question as to the legality of such use can only be tried and determined when the emergency arises, and in some appropriate form of proceeding."—[Albany Law Journal.

PROMISSORY NOTE—ALTERATION OF.

HAMILTON VS. WOOD.

NIBLACK, J.—Action upon a note of which the following is a copy:

"$160.00. No.——.Due this September 12, 1874. December 25, 1875. One day after date, we promise to pay, etc., with interest at the rate of ten per cent per annum after maturity," etc. The note was executed on the 12th of September, 1874. The words "December 25, 1875," were written in the note, and it was verbally agreed by the parties that this last named date was the date from which interest on the note should be computed, and one day after which the same should become due. The note passed by indorsement by the payees to the appellee, who, while he was the owner and holder of the same, struck out and erased therefrom the words "December 25, 1875," without the knowledge or consent of appellants or either of them.

Held, The 25th day of December, 1875, was the day from which interest on the note should be computed, and the note was to be considered as due one day after that date. This date, written in the note by the parties with such understanding, constituted the real date of the note and that the intentional erasure of such words by the appellee, without the knowledge or consent of the appellants, amounted in legal effect to a destruction of the note itself. Judgment reversed.

CHECK—EXTENSION OF TIME.

BOWEN VS. POLARD.

HOWK, J.—A contemporaneous verbal agreement between the payee and drawer of a check, that the former will not present it to the drawer for payment until he wishes to use the money, was held to be valid and binding on a former presentation of this case to the court; also, that such agreement was a sufficient excuse for delay in presenting such check for payment. In an action on such a check, an answer that the check was not paid because not presented for payment within a reasonable time is not sufficient.—[Indiana Supreme Court.

ENDORSEMENT OF TREASURY DRAFTS.

Among the regulations prescribed by the Treasury Department are the following:

"Treasury or post office drafts must not be paid until the endorsements conform to the following regulations:

* * * * * * * *

"8. Drafts will be paid to any one of several joint holders or co-trustees, executors, administrators, or guardians, but in the execution of a power to a third party to collect, all must join. In case of the death of either, the survivors will be recognized as having full authority, upon due proof of such death and survivorship."

In a recent case it was held by William Lawrence First Controller that:

1. It may sometimes be advisable to require treasury drafts to be endorsed in such forms as would transfer similar negotiable instruments by the law of the State where the claimant resides.
2. But the rights of creditors of the government are to be determined by the laws of the United States, and "regulations" made by the head of a department in pursuance of an act of Congress, are law.
3. The regulations of the Treasury Department of October 22, 1878, as to the indorsement of drafts, adopt the common law rules applicable to (1) executors and administrators, (2) guardians, and (3) partners. They (1) modify common law usages in some cases; (2) they do not provide for all cases which may arise; and (3) cases will arise in which it may require construction to determine if they are applicable.
4. Joint owners of a draft who are not partners are within the regulations which authorize the payment of such draft on the endorsement of the payees.
5. When a draft is issued to a partnership firm by name, and all the partners subsequently and successively die intestate, the administrator of the last surviving partner has the legal title in and is authorized to endorse the draft.
6. He will in such case be required to show by proper evidence (1) who were all the members of the firm, (2) their death, (3) that the last survivor died intestate, and (4) who the administrator is.
7. If the last survivor die testate his executor can endorse.
8. The proper fiscal officer of municipal corporations, quasi corporations, and similar political bodies, will be required to produce evidence of his authority, unless he be such officer as that he may be recognized from public notoriety. But executive officers will sometimes require record evidence of authority, when local courts would take judicial notice of the official character of many such officers.
9. The "regulations" authorize one of several ordinary trustees to endorse drafts.—[Washington Law Reporter.

Manufacturing Notes.

—The Harrisburg Car Works have secured an order from the New York Central Railroad for the building of 1,000 cars of various kinds, which will keep them busy for weeks.

—Mr. Chas. T. Holloway, of Baltimore, has just completed 13 of his patent chemical fire engines of large size and handsome finish for the Pennsylvania Railroad Company. The engines will be used at different stations along the line of the road.

—A contract has been made with the Edgar Thomson Steel Works and with an English company for 13,000 tons of steel rails, to be used on the Selma, Rome and Dalton, East Tennessee, Virginia and Georgia and the Memphis and Charleston railroads. About 4,000 tons of rails will be put upon the Selma road as soon as possible.

—Swift's Iron and Steel Works, Cincinatti, are rolling rails for a standard gauge road in Kentucky and have just finished large orders for Illinois roads. They are doing a large business not only in rails, but also in sheet and bar iron, and they report better prices, having sold within the past few days several thousand tons of pig iron at prices advanced over those prevailing a month ago.

—The Chester Steel Casting Co., of Chester, Pa., (office 407 Library-st. Philadelphia.) are manufacturing large quantities of crank shafts, crossheads, gearings, piston heads, etc., among their various other castings, making a specialty of railroad work. They turn out castings weighing from ¼lb. to 10,000 lbs. The introduction of their steel seems to be eminently successful; it is said that 15,000 crank shafts and 10,000 gear wheels made of it are now in use.

The Monday Creek branch of the Columbus and Hocking Valley Railroad is nearly completed. This branch will form a junction with the main line at Nelsonville and with the Straitsville branch at Oreville, including in its route the several stations of Bessemer, Orbiston, Lee, Longstreth, Carbon Hill and Crafts. It is designed to run passenger trains over this branch.

The President has appointed Charles W. Slaigle, of Fairfield, Iowa, Otis P. G. Clark, of Newport, R. I., and A. B. Nichols, of Philadelphia, Penn., Commissioners to examine and report upon fifty miles of railroad constructed by the Northern Pacific Railroad Company west of the Missouri River.

Personal.

—Sir. Alex T. Galt was in New York last week, to sail for Liverpool from this port.

—Mr. A. Pope has been appointed general passenger agent of the "Associated Railways of Virginia and the Carolinas."

—The name of Hon. Levi P. Morton has been mentioned as a not improbable member of the next Cabinet; as Secretary of the Treasury.

—Colonel H. C. Lemmert is said to be the man for the new office of General Manager of the Ohio Central Railroad Company.

—Col. J. Richardson of the Utah and Northern Railroad, says that standard-gauge railroad from Ogden to Boise City, Idaho, is going to be built right away.

—Mr. Hungerford, formerly of the Ogdensburg and Lake Champlain railroad, has taken the position of Superintendent of the Denver and Rio Grande Railway, and will be located at Denver, Colorado.

—Mr. Samuel Nott has been elected Superintendent of the Hartford Water Board. Mr. Nott is well known among railroad men, having for many years been Superintendent of the Hartford, Providence and Fishkill Railroad.

—Mr. Thurlow Weed, New York's venerable encyclopœdia as well as one of her most respected citizens, is the original of one of the profiles in that familiar silhouette of the first railroad passenger train that ever ran in this country.

—Baron Alphonse Rothschild, the chief financier of his famous family, is said to be a most untiring worker. He is the head of the French branch of the house and can usually be found at his bank in the morning earlier than his employees.

—Colonel Thomas A. Scott and Messrs. William T. Walters, of Baltimore, and Jay Gould and Russell Sage, of New York, with a dozen or more other railroad men and capitalists are off on an extended tour of inspection of the Texas and Pacific Railway and its branches in Texas and adjacent states.

—Mr. Moberly, who has just returned to Huntsville from Lake Nipissing, Ontario, reports that the work of the preliminary survey of the Ontario and Pacific Junction Railroad is being rapidly pushed toward Lake Nipissing, with the location party closely following up the surveyors.

—Mr. John Donohoe, who died at Susquehanna, Pa., November 2, was probably the oldest locomotive engineer in this country. He was ninety-eight years of age. For twenty-six years he had been in the employ of the Erie road, and was familiarly known as "Uncle John" by many railroad men in this country and Europe.

—Hon. William J. Sewell, formerly Superintendent of the West Jersey Railroad, has been elected Vice-President, of the company; a position which, in this case, entails about the same duties and responsibilities as the office of President: Pres. Roberts being also President of the Pennsylvania and the Northern Central.

—Gov. Long and Council, of Massachusetts, and the State Railroad Commissioners, who have been recently examining the state railroad property at Hoosac Tunnel and vicinity, have given Hon. G. Clinton Gardner very complimentary expression of their appreciation of his able management of the important railroad interests entrusted to him, as manager of the tunnel and State road.

—Hon. Dr. Schultz, President; David Sutherland, Director; John Young, Secretary, and Mr. P. J. Brown of the Southwestern Manitoba Railway were in consultation with the Government officials at London, Ontario, last week, concerning the location and plans of the road to run from Winnipeg to Headingly. Work upon the road has been commenced, about six miles having been already constructed.

—Mr. E. H. Green, of New York, Vice-President of the Louisville and Nashville Railroad Company, has been making an extended southern trip. He left New Orleans on his return Wednesday noon. Last week Friday he and his travelling associates were banqueted at Nashville by the merchants of that city, Col. John C, Burch, Secretary of the United States Senate, presiding.

—The report that Mr. H. Victor Newcomb has retired from the presidency of the Louisville and Nashville Railroad Company, which we have seen quoted among our exchanges, is inauthentic. Mr. Newcomb thought seriously of retiring from active work, on account of ill health, last spring, but fortunately since that time it has not proved necessary to take any action upon his contemplated resignation.

—Mr. William D. Hatch, son of Mr. A. S. Hatch, of Messrs. Fisk & Hatch, who has received his business education in that well known banking house, is intending, it is said, to go into business for himself the first of January. He has many friends in financial circles and will start in his business enterprise with substantial elements and most encouraging prospects of success. He has just been unanimously admitted to membership in the Stock Exchange.

A Large Locomotive.

The Syracuse Herald says that the Schenectady Locomotive Works have just completed for the New York Central and Hudson River Railroad a powerful locomotive which is designed to accomplish the work of two. The locomotive now finished is called the William H. Vanderbilt. She is an eight-wheeler, with driving wheels six and a half feet, thirty-three inch truck wheels, fifty inch boiler and cylinders eighteen by twenty-four inches, and is furnished with the Westinghouse air brakes and the new spark arrester, somewhat improved. This locomotive was an experiment, and upon her success much depends. In the event of success three or four others of the same model were to be built at once in the Schenectady shops. It is claimed that this locomotive can draw twenty loaded coaches, which certainly would be a vast improvement, as the old model engines have had trouble with sixteen, even when two engines were drawing the train. Colonel Reuben Allen, the veteran engineer, who has charge of the new engine, says that she works to a charm, and he seems decidedly proud of her, and he has a right to be, for she is a perfect beauty.

The Pleasantville and Ocean City Railroad, a narrow-gauge railroad eight miles long, extending from Pleasantville, on the Philadelphia and Atlantic City Railroad, to Somer's Point, N. J., was formally opened on the 26th ult. It is to be operated in connection with the Philadelphia and Atlantic City narrow-gauge Railroad.

The gross earnings of the Philadelphia and Erie Railroad for the month of September, 1880, were $322,736 62; expenses, $212,870 51; net earnings, $109,866 11. The net earnings for the nine months of 1880 were $970,228 18; the net earnings for the nine months of 1879 were $592,093 12—increase, $379,135 06.

American Railroad Journal.

Financial and Commercial Review.

THURSDAY EVENING, November 11, 1880.

The rate for call loans at the Stock Exchange during the day has been from 4@6 per cent., chiefly 5 per cent, while as high as 6 per cent has been paid; but a small part of the loans to-day were made as low as 4 per cent. At the close, loans on stock were offered down to 2 per cent.

The posted rates of the prime drawers of sterling are 4.81½@4.83½. The actual rates are 4.80½@4.81 and 4.82½@4.83. Cable transfers are 4.83@4½. Prime commercial bills are 4.79¼@¾.

Up to noon to-day none of the United States 6s which mature Dec. 31st next had been offered to the United States Assistant Treasurer here for the sinking fund at any price, so that the amount of bonds bought by the Treasury since November 1st is only $13,000, at 102¾.

The following circular relative to the payment of United States 6 per cent bonds, issued under the act of Feb. 8, 1861, and known as "6s of 1880," was issued by the Secretary of the Treasury on the 10th inst.:

Notice is hereby given to the holders of United States 6 per cent bonds issued under the act of February 8, 1861, and commonly known as the "6s of 1880," that said bonds, with the accrued interest thereon, will be paid at this department Dec. 31, 1880, and that the interest on said bonds will cease on that day. These bonds which are in denominations of $1 000, with coupons, and $1,000, $5,000, and $10,000, registered, bear the inscription "Loan of 1861," but should not be confounded with the bonds known as "6s of 1881,"

issued under the acts of July 17 and Aug. 5, 1861, and March 3, 1863. Holders of these 6s of 1880 are advised that if the bonds are received at this department within a sufficient time prior to their maturity to admit of the necessary examination payment therefor can be made more promptly at maturity. The department will receive the bonds at any time, and hold them for that purpose, redeeming them in the order of the,r receipt. All bonds forwarded for redemption should be addressed to the "Secretary of the Treasury, Loan Division, Washington, D. C.," and all registered bonds should be assigned to the "Secretary of the Treasury for redemption." Where parties desire checks in payment for registered bonds, drawn to the order of any one but the payee, they should assign them to the "Secretary of the Treasury for redemption for account of [here insert the name of the person or persons to whose order the check should be made payable]" The bonds of this loan (6s of 1880) will also be purchased meanwhile in the usual manner, at the office of the Assistant Treasurer of the United States at New York, each Wednesday, in such amounts as the surplus revenues will permit, provided they can be procured upon satisfactory terms.

The Governing Committee of the New York Stock Exchange have admitted to dealings at the Board the following securities:

Atchison, Topeka and Santa Fe Railroad Company. Capital stock $25,000,000, divided into 250,000 shares of $100 each (244,036 shares issued). Road expands from Atchison, Kan., to boundary of the State, single track, 470.58 miles, also operating a number of short branch roads, making the aggregate mileage of road controlled 885.14 miles. It also operates and controls in the State of Colorado the Pueblo and Arkansas Valley Railroad 148.72 miles; from a junction with the above at La Junta, southwesterly to the southern boundary of Colorado, 96.37 miles. There is also completed from Pueblo westward to the Canon City Coal mines about 40 miles, making a total completed in Colorado of 285.09, miles and in the Territory of New Mexico, the New Mexico and Southern Pacific Railroad, from the eastern boundary of the Territory to San Marcial, with a branch to the city of Santa Fe, 374 miles, making a total mileage of 1,544.23 miles.

International and Great Northern Railroad Company. First mortgage six per cent gold bonds; additional issue of $400,000, in bonds of $1,000 each, for forty miles of road completed since February, 1880.

Chicago, Milwaukee and St. Paul Railway Company. Bonds of the Hastings and Dakota Division; additional issue of $525,000, in bonds of $1000 each, for thirty-five miles of road completed since May last.

New York and Texas Land Company, Limited, 30,000 shares ($50 each) of capital stock, $1,500,000, and $6,000,000 of Land scrip, which is receivable by the company in payment of 75 per cent of the price for the company's land. The property of the company consists of about 5,000,000 acres of land in the State of Texas. The stock of the company is now all owned by the company. Holders of second mortgage and convertible bonds of the International, and the Houston and Great Northern Railroad Companies, and Purchasing Committee certificates, are entitled to receive for each $1,000 of said bonds, with unpaid coupons, or certificates, six shares of $50 each ($300), stock of the New York and Texas Land Company, Limited, and $1,200 Land scrip.

A dispatch from Portland, Oregon, via San Francisco, November 6, says: "Col. J. Richardson, one of the leading spirits of the Utah Northern Railroad, was in the city this week, and he brings information, which may be accepted as authentic, that Jay Gould and associates of the Union Pacific Railroad have raised all the necessary funds and completed all the arrangements for building a standard gauge railroad from Ogden to Boise City, Idaho Territory, a distance of about 250 miles. The narrow-gauge road already built from Ogden to a point 40 miles north, will be utilized by laying a third rail. The railroad will be completed within eight months. The Grande Ronde branch of the Oregon Railway and Navigation lines to Baker City, Oregon, will be completed about the same time, and there will then remain only 100 miles to complete another transcontinental railway.

Pennsylvania Railroad Dividends.

The Pennsylvania Railroad Company paid 6 per cent interest on all installments of subscriptions to its capital stock up to October 30, 1855, and since that date has declared and paid the following dividends:

	Per cent.
1856—May, 4 per cent; Nov., 4 per cent...	8
1857—May, 4 per cent; Nov., passed.....	4
1858—May, 3 per cent; Nov., 3 per cent...	6
1859—May, 3 per cent; Nov., 3 per cent..	6
1860—May, 3 per cent; Nov., 3 per cent..	6
1861—May, 3 per cent; Nov., 3 per cent..	6
1862—May, 4 per cent; Nov., 4 per cent..	8
1863—May, 4 per cent; Nov., 5 per cent..	9
1864—Feb., 30 p. ct. in stock; May, 5 p. ct. in cash; Nov., 5 per cent. in cash 10 per cent stock subscription privilege at par, making total pure dividend of.....	40
1865—May, 5 per cent; Nov., 5 per cent...	10
1866—May, 5 per cent; Nov., 4 per cent..	9
1867—May, 5 per cent in stock and 3 per cent in cash; Nov., 3 per cent in cash	11
1868—May, 5 per cent in stock and 8 per cent in cash; Nov., 5 cent in cash.....	13
1869—May, 5 per cent; Nov., 5 per cent..	10
1870—May, 5 per cent; Nov., 5 per cent...	10
1871—May, 5 per cent; Nov., 5 per cent...	10
1872—May, 5 per cent; Nov., 5 per cent...	10
1873—May, 5 per cent in cash; Nov., 5 per cent in scrip	10
1874—May, 5 per cent; Nov., 5 per cent...	10
1875—May, 4 per cent; Aug., 2 per cent; Nov. 2 per cent....	8
1876—Feb., 2 per cent; May, 2 per cent; Aug., 2 per cent; Nov., 2 per cent.....	8
1877—Feb, 2 per cent; May, 1½ per cent	3½
1878—Nov., 2 per cent	2
1879—May, 2 per cent; Nov., 2½ per cent	4½
1880—May, 3 per cent; Nov., 3 per cent in cash, 1 per cent in scrip.....	7
Making a total of.....	229
To this should be added the bonus received by stockholders on stock received at par in payment of dividends and in privileged subscriptions	32½
A grand total of.....	261½

It will be seen by reference to the above statement that the company never passed a dividend previous to 1877, except in November, 1857. In August, 1877, the dividend was passed in consequence of the loss of property and revenue by the great riots of that year, and there were no declarations of dividends from that date up to November, 1878. Up to May, 1875, the dividends were half-yearly, but in August of that year they were made quarterly, and so continued up to the suspension in August, 1877. Since then the company has returned to the half-yearly system.

The capital stock of the new Parallel Railroad of Connecticut, $5,000,000, it is claimed has all been subscribed for by New York and Connecticut parties. The following are the directors of the company: Sheldon Collins, Walter Webb, Charles D. Ingersoll, and C. V. Sidell, of New York City; W. W. Douglass, of Providence; William T. Minor, of Stamford; H. R. Parrott and A. L. Winton, of Bridgeport; S. E. Olmstead, George R. Cowles and Edward K. Lockwood, of Norwalk, and Thomas C. Ingersoll, of New Haven.

The Citizens' National Bank, the new bank recently organized at Cincinnati, with a capital of $1,000,000, opened for business last week.

The Coal Trade.

The leading coal carrying companies make the following reports of their tonnage for the week ending October 30, and for the year to the same date, compared with their respective amounts carried to the same time last year :

	Week.	1880.	1879.
Reading Railroad ...	211 912	6,410,001	7,389.514
Schuylkill Canal	20,816	440,332	815,148
Lehigh Valley	109,820	4,086,551	3,913,130
Del., Lack. & Western.	86,364	2,865,559	3,143,308
Shamokin Valley	32,017	750,647	756.255
Central New Jersey..	131,249	3,099,309	3,368,286
United New R. R. of Jersey	29,351	930,833	747,198
Pennsylvania Coal ..	23,918	908,587	1,187,591
Delaware and Hudson	80,300	2,446,043	2,808,194
Huntingdon & Broad Top Mt.....	9,934	360,486	263,104
Penn. and New York.	33,220	1,013,895	1,091,480
Clearfield, Pa.....	38,582	1,890,930	1,330,728

The total tonnage of anthracite coal from all the regions for the week ending October 30, as reported by the several carrying companies, amounted to 641,789 tons, against 577,060 tons in the corresponding week last year, an increase of 64,729 tons. The total amount of anthracite mined for the year is 19,183,119 tons, against 21,811,807 tons for the same period last year, a decrease of 2,628,688 tons. The quantity of bituminous coal sent to market for the week amounted to 100,880 tons against 99,304 tons in corresponding week last year, an increase of 1,496 tons. The total amount of bituminous mined for the year is 8,637,714 tons against 2,885,263 tons for the corresponding period last year, an increase of 752,451 tons. The total tonnage all kinds of coal for the week is 742,619 tons, against 676,394 tons in corresponding week last year, an increase of 66,225 tons, and the total tonnage for the coal year is 22,820,838 tons against 24,697,070 tons to same date last year, a decrease of 1,876,237 tons. The quantity of coal and coke carried over the Pennsylvania Railroad for the third week of October was 144,925 tons, of which 112,585 tons were coal and 32,340 tons coke. The total tonnage for the year thus far has been 5,727,601 tons of which 4,816,600 tons were coal and 1,411,001 tons coke. These figures embrace all the coal and coke carried over the road east and west. The shipments of bituminous coal from the mines of the Cumberland coal region during the week ended Oct. 30 were 49,610 tons, and for the year 1,771,006 tons—an increase of 519,165 tons as compared with the corresponding period of last year. The coal was carried as follows : Baltimore and Ohio Railroad —week 22,503 tons, year, 1,053,341 tons ; an increase over 1879, 318,000 tons. Chesapeake and Ohio Canal—week, 21 084 tons ; year 529,649 tons ; increase over 1879, 143,687 tons. Pennsylvania Railroad—week 6,025 tons ; year, 188,016 tons ; increase over 1879, 57,479 tons. The Reading Railroad for the week ending November 6, carried 132,700 tons of coal, of which 10,800 tons were sent to Elizabethport and 11,000 tons shipped from there, and 34,400 tons sent to Port Richmond and 34,500 tons shipped from there.—Phil. Ledger, Nov. 8.

The North Atlantic City Railroad Company has been incorporated and chartered, and the $2,000 per mile required by the law of New Jersey deposited with the State Treasurer. The road will run north from the Inlet at Atlantic City three miles to North Atlantic City. The directors are George W. Stever, William Smedley, Isaac A. Braddock, E. Z. Collings, John S. Doughty, David Headley and Henry Fowler. The officers are: President, Wm. Smedley, of Byrn Mawr ; Secretary, David Headley, of Philadelphia ; Treasurer, Isaac A. Braddock, of Haddonfield.

It is said that the Dominion Government has changed the terminus of the Thunder Bay branch of the Canada Pacific Railway from Fort William to Prince Arthur's Landing.

In regard to the payment of lost Government bonds, Judge Lawrence, First Comptroller of the Treasury, has rendered a decision holding that when a Government bond payable " to bearer " has been lost, the Government may, after a sufficient time, make payment thereof on clear proof of the ownership and upon the execution of a proper bond of indemnity.

The Pittsburg, Cincinnati and St. Louis Railway will receive, until Nov. 20th, proposals from contractors for the excavation of a tunnel near Gould's Station on the line of the r ad, seven miles west of Steubenville, Ohio. The tunnel is to be 3,300 feet long and the contract is to include the partial timbering of the tunnel and the excavation of its approaches. Proposals or letters of inquiry should be sent to Chief Engineer M. J. Becker, Columbus, Ohio.

The Dakota extension of the Chicago and Northwestern Railway has been completed to Fort Pierre, on the Missouri River, 750 miles west of Chicago. The company has built about 320 miles of road in Dakota Territory during the year. The company is also building 276 miles of new road in Iowa, 129 miles in Wisconsin and 44 miles in Michigan. It purchased the Toledo and Northwestern Railroad, two miles long, and has added 274 miles of new track to it.

The Pittsburg and Chicago Railroad Co., in which General James Negley, of Pittsburg, and Delos E. Culver, of New York, are the prime movers, is making active preparations to build extensions into the rich ore fields of Lawrence county.

Roswell P. Flower has been elected President and James W. Hyatt Vice-President of the Danbury and Norwalk Railroad Company.

Paine & Webber,

BANKERS AND BROKERS,

Buy and sell Stocks and Bonds on commission in all markets. Correspondence solicited.

Pennsylvania R. R. Co.

TREASURER'S DEPARTMENT.

PHILADELPHIA, November 1, 1880.

The Board of Directors has this day declared a semi-annual dividend of THREE PER CENT and an extra dividend of ONE PER CENT on the Capital Stock of the Company, clear of all taxes, payable on and after November 30th to stockholders as registered on the books of the Company at 3 o,clock P. M. October 30th, 1880.

For the purpose of distributing a portion of the shares purchased from the city of Philadelphia, the option is given to the shareholders of accepting the extra dividend of ONE PER CENT in scrip, convertible into the stock of the Company at par when presented in sums of Fifty Dollars; provided the said option shall be exercised on or before December 21st, 1880, after which date all outstanding scrip will be paid in cash.

JOHN D. TAYLOR,
Treasurer.

DIVIDEND NOTICE.

THE LOUISVILLE AND NASHVILLE RAILROAD COMPANY has declared a dividend upon its capital stock of ONE HUNDRED PER CENT, payable in stock to the stockholders of record on the 13th November, 1880, and intend to increase the number of its shares of capital stock to that extent and for that object; and further notice is hereby given that the transfer-books of this company will be closed on the 13th November, and reopened on the 1st day of December, 1880. W. RANNEY, Secretary.

New York, Oct. 13, 1880.

PITTSBURG, CINCINNATI AND ST. LOUIS RAILWAY COMPANY,

OFFICE of the CHIEF ENGINEER, COLUMBUS, Ohio, Nov. 5, 1880.

NOTICE TO CONTRACTORS.

Sealed propoposals will be received at the office of the undersigned until Saturday, November 20, 1880, for the excavation of a tunnel 3,300 feet long and the partial timbering of the same, together with the excavation of the approaches near Gould's Station, on the line of the Pittsburg, Cincinnati and St. Louis Railway, 7 miles west of Steubenville, Ohio.

Plans and specifications of the work can be seen at this office after November 1, 1880, or they will be sent by mail to parties applying for the same.

M. J. BECKER, Chief Engineer,
Pittsburg, Cincinnati and St. Louis Railway Co.

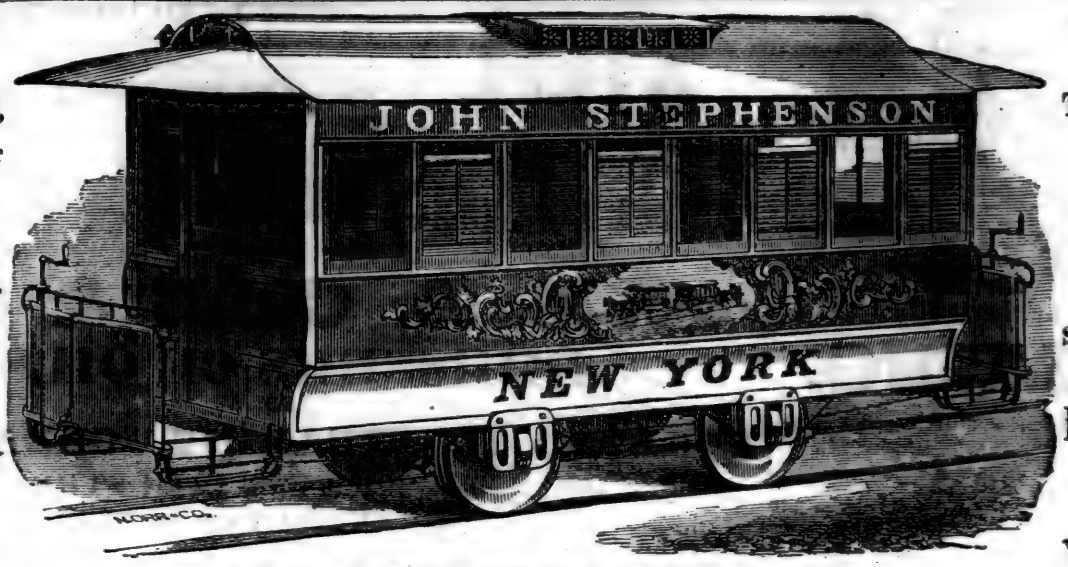
STEEL CAR PUSHER

Made entirely of STEEL. ONE MAN with it can easily move a loaded Car.

Manufactured by
E. P. DWIGHT,
407 Library St.,
PHILADELPHIA.

ESTABLISHED 1873.



LONERGAN'S SECRET SERVICE,

T. E. LONERGAN, Proprietor,
82 & 84 Nassau Street, New York.

The investigation of frauds on Railway Companies a specialty.

CARS FOR ONE HORSE, WITH or WITHOUT **Platforms,** OR TO Swing on Trucks.

EVERY **STYLE AND** VARIETY OF CONSTRUCTION.

CARS FOR TWO HORSES COMBINING ALL Valuable Inventions, **ELEGANT** STYLE. Light & Durable, **Full Size** AND REDUCED WEIGHT.

47 EAST 27TH STREET.

This Establishment commenced building **STREET CARS** in 1832, and is famed for superior ELEGANCE of workmanship and SUBSTANTIAL practical results.

Its location, in the PORT of NEW YORK, is most favorable for shipments, and its CARS, CONSTRUCTED in SECTIONS, may be ENTIRELY COMPLETED before being packed for transportation.

VALENTINE'S VARNISHES

OUR CLAIMS.

We claim that our Finishing Varnishes are unsurpassed in the following qualities:

1. Uniformity. 3. Fluency. 5. Drying. 7. Fulness. 9. Durability.
2. Paleness. 4. Reliability. 6. Hardening. 8. Brilliancy. 10. Economy.

All know it is easy to make a Varnish that has the single quality of DURABILITY but Varnishes which wear well are generally inferior in color and working quality uncertain in laying, too slow in drying, or lacking in body or lustre, and frequently they possess ALL these defects.

In our "RAILWAY-COACH FINISHING" the ten qualities will be found combined and our other Varnishes are as elastic and durable as is practicable for the work on which they are employed.

Those of our Varnishes which have the greatest durability require time for hardening. They have superior elasticity, and ARE DISTINGUISHED FOR THE EXTENT OF SURFACE THEY WILL COVER, WHICH RENDERS THEM ECONOMICAL.

VALENTINE & COMPANY,

Chicago. NEW YORK. Paris.

Patent Stretched and Patent Riveted Short Lap

BELTING.

Our Belts are made from pure Oak Tanned Butts, and of the heart or solid part only. No part of the shoulder being used. Any one not familiar with Belt making can readily detect this by the shortness of the lengths and laps. Long laps are made including the shoulder or thinner and softer part of the Leather, causing the Belt to be, in its enduring qualities, no better than its poorest or thinnest parts

Our Belting is warranted to run straight and maintain an even bearing on the pulleys, and sold under the fullest Guarantee.

J. B. HOYT,
D. B. FAYERWEATHER,
HARVEY S. LADEW.

LEATHER BELTING.

Made exclusively from Messrs. J. B. Hoyt & Co.'s Best Oak Butts — shoulders all cut off, only solid leather used—short lengths and short laps—fully warranted.

Rubber Belting and Hose and Packing at lowest prices,

STEPHEN BALLARD & CO.,
16 & 18 Chambers St,

A. G. DAY,
MANUFACTURER OF
Kerite Insulated Telegraph Wire and Cables

Of all kinds made to order, for Ocean, River, Aerial and Subterranean Lines.

The Kerite covering of these Conductors unlike any other, resists effectually the destructive action of Heat and Moisture, and the corrosive agents either in Earth, Air or Water.

☞ Special orders should state whether the Cable is to be exposed to Earth, Air or Water.

FACTORY—SEYMOUR, CONN. **Office, 120 Broadway, New York.**

C. B. HOTCHKISS, General Agent.

NEW YORK, LAKE ERIE & WESTERN RAILWAY.

TO THE TRAVELING PUBLIC.

During the Centennial Season—six months, closing November 10, 1876—the Erie Railway carried almos 3,000,000 passengers, without a single accident to life or limb, or the loss of a piece of baggage.

And for a whole year, the official records of the United States Post-Office Department show the arrivals of Erie Railway trains in New York, on time, to be from 15 to 27 per cent. ahead of competing lines.

Facts well worthy the consideration of travelers.

E. S. BOWEN, General Superintendent.
JNO. N. ABBOTT, General Passenger Agent.

PASSENGER CARS

Of the Finest Finish, as well as every description of CAR WORK, furnished at Short Notice and at Reasonable Prices by the

HARLAN & HOLLINGSWORTH COMPANY, Wilmington, Del.

EAMES VACUUM BRAKE CO.,
RAILWAY TRAIN BRAKES,

P. O. BOX 2,878. SALES OFFICE, 15 GOLD ST., NEW YORK. Represented by THOS. PROSSER & SON.

THE EAMES VACUUM BRAKE is confidently offered as the most efficient, simple, durable and cheapest power Brake in the market. Can be seen in operation upon over fifty roads.

Railroads in Mexico.

GENERAL GRANT ON MEXICO'S VALUABLE RESOURCES AND PROMISING FIELDS FOR AMERICAN ENTERPRISE.

A number of prominent railread men and capitalists met General Grant in New York last week, at a dinner tendered to him at Delmonico's by Mr. Romero, formerly Mexican Minister to the United States. Mr. Romero in a brief speech laid before his guests the question of the establishment of closer commercial relations between the United States and Mexico, and the desirability of perfecting railroad systems that should more closely unite the interests of both countries. He gave strong assurances of Mexico's willingness to give all encouragement possible to the building of railroads, and of her anxiety to receive the help of American capital and enterprise. General Grant, in a very comprehensive speech, made a strong and practical presentation of the needs of Mexico, of the causes which have retarded her development, and of the inducements now offered to capitalists and railroad projectors for developing her valuable but much neglected resources. His views were based largely upon personal obervations made last winter, and, coming from so practical and experienced an authority, have attracted much attention, and will have great influence upon the important subject.

He mentioned as one of his chief objects in going to Mexico last winter that of trying to learn in what ways relations of friendship and commerce might be established between the two nations. In speaking of the advantages offered to the United States in an interchange of commerce with Mexico, he said: "I found that we were large consumers of tropical products and that that was increasing in a double ratio—first, by an increase in our population, and then again by an increase in the wealth of our inhabitants. All these products—sugar, coffee and tobacco being the leading articles—we derive from countries that trade but very little with us—countries that collect their revenues to a larger degree by levying duties on their exports, which we have to pay, and then forcing us to ship our products to a European market to get the sterling in exchange with which to pay these bills. If I remember correctly—four years ago I could have told you accurately—but if my memory serves me right we are paying out annually $300,000,000 in current exchange yearly, all of it in sterling exchange, for such products. I believe, and was convinced after my visit to Mexico, that that country was capable of producing all that we have to import now of this character and with a large surplus to provide for our increased consumption. It is a neighboring Republic, with institutions like our own, and her wants which must be supplied from abroad, are just such as we could furnish her. If Mexico were developed so as to have an incentive to cultivate her soil she would want agricultural implements and many such articles. As the people became wealthy they would want carriages and wagons, all sorts of machinery, all of the rolling stock for railroads—iron probably would come from England, because they would get it from there cheaper—harness, boots and shoes, clothing and a thousand and one other articles we could furnish, so that we could pay largely for what we received in the produce of our manufactories, thereby adding to the commerce of our country and benefitting the two Republics alike. While I was there I was met with this subject all the time. I found the people there very much interested in the development of their own resources."

He discovered during his conversations with Mexican people, that some of them entertained a feeling of hostility to a connection with the United States, and a suspicion on the part of some of them that they would be in danger of constantly losing territory. His answer to expressions of this kind was that while twenty years ago such apprehensions would have been well founded, now the local incentives being removed through the change in our Southern tendencies and institutions, "ninety-nine out of every hundred people in the United States, who think upon the subject would be indignant at the suggestion of an acquisition of territory from a friendly power by any unfair or filibustering means; and further that if there was any danger whatever of the United States ever wanting to take territory from our neighbors, the best method in the world to secure themselves against such a result would be to cultivate friendly and commercial relations with us and not to seek to go abroad to establish relations with nations beyond the seas, keeping aloof from their neighbors. That might lead to hostilities and hostilities might lead to the acquisition of territory, even where people were not in favor of it at the time." He found that these views and explanations were well received by the people, who showed an earnest desire to have railroads built in their country to develop it.

He spoke at some length of the obstacles that for many years had retarded the development of Mexican resources, under the oppressive and monopolizing power of Spain, the frequent revolts and wars, and internal political strifes that have marked the history of that country, and said that when her trials and difficulties were taken into consideration, Mexico was entitled to a great deal of credit for the position which she now occupies among civilized nations. He dated the time which her republican institutions have had for growth and development from 1867, the close of her last war, and thought that the results of the thirteen years of growth were certainly creditable. Of the safety of capital invested in enterprises there and of what the opening of railroads would do for the development of the country, he said: "I am perfectly satisfied that with the building of railroads and of telegraphs there need be no more apprehension for the safety of capital invested in Mexico than in our own country. The building of railroads will give employment to labor and will give them rapid transit from one part of the country to another; the telegraph will give them instantaneous information of what is going on in all parts of the country and anything like an uprising can be suppressed at once—suppressed in the bud. I look for a bright and prosperous and rapid future for Mexico and it must result in a very large commerce with some part of the world. If we take advantage of the time, it will accrue to the benefit of the United States more than to that of any other country except Mexico,

and Mexico will be necessarily the most benefited of any other country. At present, owing to the lack of railroads, they have very little to export that will bear transportation, except their bullion. Their exports now, as I learned while I was there, amount to about $35,000,000 a year. Of that sum quite or near $30,000,000 a year is in bullion, and only about $5,000,000 of all her exports are from the products of her soil. Even that is raised somewhere near the coast, where they can easily get transportation. As I have said, I have no doubt that with the building of railroads they will be able to export $200,000,000, not a dollar of which will be bullion."

In regard to the Mexican government being able in the present condition of the country to pay anything toward the building of railroads, he thought it was not to be expected, however willing the government might be to do so. The revenues of the government are very limited, about $21,000,000 being the maximum receipts of one year, under a heavy rate of taxation, though they are increasing somewhat. In relation to what might be expected of the government in the future he said that "after the railroads are built and the country has had time to develop as a consequence of these roads, then the country will in all probability be rich so that she can pay. But at present it would be impossible for her to pay any considerable amount in the shape of subsidies to be used in the building of these roads. If there is anything incoming from that source it is something that will have to be waited for. The money will have to be furnished by the builders of the road, and they will have to wait for the development of the country for their subsequent returns."

The population of Mexico is about nine millions, of which probably seven millions are of the old Aztecs. General Grant describes them as being a home loving people, who do not like to take their families with them away from the house of their ancestors, many of them probably occupying the same place which their ancestors did a thousand years ago. Of the fitness of these 7,000,000 Aztecs for such labor as would be needed in opening railroads he said; "They are a peaceable, quiet, innocent, inoffensive, very religious and virtuous people, and they are willing to work and very industrious where they can see the wages coming in Saturday night. They are a good class of labor for developing the country around near where they live. They furnish as good labor as can be found—as industrious and willing workmen as can be found anywhere in the world—and the men will go a considerable distance from their homes and stay at work, without moving their families, however. But then, as they are scattered all over the country, as you advanced you could get a new set of workmen. You could not commence at the northern border of Mexico with a set of workmen and keep them until you get all through but you could get new sets in the villages as you went along. Labor is now very cheap. It will of course enhance in value and very rapidly as the country developes. I visited, while I was there, some of the mines, and the labor is all performed there by natives. A Mexican mining camp is a very much pleasanter sight than one of our mining camps. There is an entire absence of the drinking saloons and the gambling houses and the theatres, and the absence of the bowie knives and revolvers is very noticeable. As it is now labor would vary from thirty cents to fifty cents a day in silver. But it will enhance. Then, when you came to the labor in the terras calientas—that is, in the low lands—where there is the yellow fever, labor would be scarce, and it would not do half the work it does on the table-lands above, and you would have to pay $1 a day. It would not average fifty cents a day—probably not as much as that."

In the opening part of his speech General Grant invited the asking of any questions that might occur to those present, and several inquiries were made in an informal manner, among others one by Mr. Dillon as to whether it would not be desirable for American capitalists interested in the construction of roads there to receive liberal charters and legislation and build without any expectation of subsidies. In reply and closing his speech General Grant said: "That is a matter of which railroad men have to be judges. But if they wanted to build the railroad rapidly they would have to furnish the money to build it at first and trust to the development of the country enabling it to pay the subsidies. They cannot expect to build the road with the subsidies. In getting your Pacific road built you built twenty miles of road and turned that right in, and that could be used in the construction of another twenty miles. You had to furnish the capital only for twenty miles of road. If I were going to build a road there I should say get a right of way without charge, exemption from taxation and the introduction of all material used in the construction of the road free from duty for a certain number of years, have the entire control of fixing tariffs, &c., after it was built, and let the government come in only when the road paid more than ten per cent. over cost, and say how the surplus over ten per cent. should be divided between the government of Mexico and the owners of the road."

A decision has been rendered by Justice Miller, in his capacity as Circuit Court Judge for the district of Kansas, in the case of the Missouri, Kansas and Texas Railroad Company, argued before him some time since. The directors of the railroad company asked that the control of the road, which went into the hands of the Union Trust Company of New York, as receiver, about six years ago, be restored to them. Justice Miller decides that the railroad company will be entitled to the possession of their road upon payment of the past due interest coupons upon their bonds. These the directors of the railroad company offered in their cross bill to pay.

The Fitchburg Railroad's Terminal Improvements.

Since the Fitchburg Railroad secured its seven years' contract with the State for the operation of the Troy and Greenfield Railroad between North Adams and Greenfield, it has taken measures to increase its facilities at this end of the Tunnel Line for landing traffic that will very largely add to its capacity to increase the business of this city, especially in exports. Some time since the managers of the road purchased Hittinger's wharf in the Charlestown District. Since then they have purchased the wharf next south of the above mentioned wharf, from the Tudor heirs. This leaves only the wharf owned by the Tudor Company, between the property of the road and Charles River Bridge. A large gang of men has recently commenced work for the purpose of changing the Hittinger and Tudor wharves, so that ocean steamships can use them. This will require the widening of the dock between them. It is probable that a large grain elevator will be built at the head of the wharves, fronting upon Water street, the street leading to the Navy Yard entrance. This site will be an excellent one for the purpose, as grain for export can be carried down to vessels at either wharf, and that for the local trade can be delivered upon the Water street side of the elevator. Application has been made to the Harbor Commissioners by the road for leave to build a pile structure over a large portion of the space lying between Warren Bridge and the new freight stations. This is for the purpose of increasing the capacity of the yard room of the Charlestown freight yard. An addition of 400 feet is also being made to the outward freight depot, which will make this depot 1400 feet in length, or the longest in the country. It is also contemplated to make one of the depots for inward freight, which is parallel to the outward one, and is now 1,000 feet long, of the same length as the first one.

Preparations have also been commenced within a few days for the construction of a new yard for depots for hay and lumber and other freights, which will be one of the most extensive in the country. This new yard will extend from the Lowell Road to the Eastern, alongside of the tracks of the Fitchburg Road, and will measure some 2500 feet in length. The site of the new yard is now under water, which will require the construction of a wall its whole length, and the area between this wall and the present tracks is to be filled up before the new depots can be built. The work of constructing the driveway to connect the yard with Prison Point Bridge has been in progress for some time. Directly opposite the site of this new yard, upon the other side of the main tracks of the railroad, in the triangle formed by the Fitchburg, Eastern and Grand Junction tracks, gravel trains are now at work filling in the flats recently purchased for the Fitchburg Railroad. Room was made here last spring for several additional freight tracks, but within a few days the work of filling in these flats has recommenced with the intention of filling up the whole area, thus making room for the construction of several miles of track and accommodations for several thousand freight cars, which will be received here and retained until they are wanted at the different depots or wharves.—[Boston Journal, Nov. 10.

—The commencement of work upon the New York Underground Railway, which was considered probable before the middle of November is delayed by the taking of necessary steps effecting the consolidation of the New York Underground Railway Co., and the Broadway Underground Connecting Railroad Co. The two companies were to consider plans for the consolidation last Monday, but the time of meeting was postponed for one week, when it is thought the details of the consolidation will be completed.

New York, Saturday, November 20, 1880.

Entered at the Post Office at New York, N. Y., as Second-Class Mail Matter.

AMONG the new features adopted by the AMERICAN RAILROAD JOURNAL, as appears on another page of this issue, is a department on counterfeit money It is intended to make this a permanent and authentic feature of the paper, and we believe it is one that will prove of great service and value to our readers. We are to receive from the U. S. Secret Service Division at Washington immediate notice of the discovery of counterfeits, which will be promptly published in the JOURNAL, and information in various forms will be given, through facilities which we have, so that this department may be taken as a trustworthy guide and assistant in checking the circulation of bogus money.

ALTERATIONS and improvements being made in the tables, which are weekly features of the JOURNAL, necessitate the temporary withdrawal of part of them. In the Bond List alterations are desirable, owing to changes among the roads, consolidations, etc., since our tables were revised. The Share List is naturally corrected at this season of the year, and as this is the time when much of the necessary information comes to us from our correspondents and from the railroads, the table, if published now, could not be as symmetrical and complete as we would wish. On these accounts we withhold these two tables until they are perfected and made of greater value than ever before, to accomplish which no efforts will be spared. We have added several important features to the JOURNAL recently and it seems desirable now that some of our tables should appear semi-monthly, monthly and quarterly instead of weekly, thus giving us an opportunity to lay before our readers more information and a greater variety each week. We shall announce the tables as they are to appear from week to week. The table of contents always gives those in the current number, and in future by referring to the files of the JOURNAL any of its tables desired can readily be found, and they will contain as late information as though appearing in each number, as we do not intend to withhold any tables that are of weekly interest. While adding new features to the JOURNAL, our aim is to retain and improve the old ones.

THE forthcoming report of Controller Knox will be looked for with interest. The present scarcity of bank bills will lead many persons to examine the tables showing the extent to which the circulating medium of the country has decreased within a year. That it should have decreased in spite of the large influx of gold from abroad, and the large production from our own mines, is a singular fact. Bank bills of a small denomination have been held within the past few days at a premium, and many banks have been obliged to compel their customers to take coin. Heretofore the volume of the currency has been measured with considerable accuracy, but it seems to many people as though two or three hundred millions of dollars had mysteriously disappeared from circulation and could not be accounted for. What has become of it?

THE New York Court of Appeals has affirmed the decision of the lower court, that the structures of the elevated roads are for all purposes of taxation real and not personal property. The counsel for the roads held that as the structures were erected in public streets which were not taxed, and that therefore iron standing or lying in them was no more a realty than iron in a public warehouse, but this view was overruled. During the last few years elevated roads have come into existence, and telegraph poles and telephone wires have increased with great rapidity. It has long been evident that legal assistance would be needed to determine new and existing rights and privileges of such roads and telegraph and telephone companies. The decision referred to establishes an important principle that will often be quoted in suits analagous that will undoubtedly arise hereafter.

THE growth of Boston's export and import trade stimulates activity among leading railroad and shipping managers of that port in improving terminal and shipping facilities, and important water front alterations are under way and proposed. Among the principal improvements being made are those recently begun by the Fitchburg Railroad, as described in another column. This road, whose important western connections via the Hoosac Tunnel, brings to it a large and rapidly increasing amount of traffic, is one of the greatest feeders that will throw freight into the Boston ocean steamships. It has valuable terminal facilities and the increasing number of shipping lines proposed from Boston whence the Allen line has just started, and where two or three more companies are said to be seeking dock room, are likely to bring this water front and others, not so easily available perhaps, into full requisition.

THE society of associated miners of the Bouches de Rhone, in the south of France, are to have a tunnelling machine for the purpose of constructing a tunnel nearly 10 miles long between their mines in the basin of Fuveau and the sea. During the last three years they made many experiments with machinery intended for tunneling, at an aggregate expense of about $40,000, and recently they have made some trials with the tunneling machine of J. Dickinson Brunton, invented for the purpose of cutting the tunnel beneath the Channel. The machine consists of revolving cutting disks placed at different angles, and so directed as to remove the rock in considerable quantities directly without the use of explosives. Mr. Brunton has estimated that in a tunnel of 7½ feet in diameter, he could progress at the rate of about two feet an hour through calcareous rock. We will simply say to the miners of the Bouches de Rhone, that if they will visit the Hoosac Tunnel, they will find some interesting hieroglyphics cut into the Hoosac Mountain that will speak to them more eloquently of tunneling machines than any words of ours. The early contractors of the Hoosac Tunnel, can no doubt relate some very interesting experience with regard to such machines, and the State Treasurer of Massachusetts can point to some items of expense incurred in the trial of such machines, that convinced the inhabitants of that State at least, of the uselessness of such contrivances. The contractors of the Mont Cenis and St. Gothard reaped the benefit of the Massachusetts experiments, and threw away tunneling machines working without explosives, forever. It is said that there are "serious objections to the use of explosives for removing the rock," in the prospective tunnel in the south of France; this may be true, but we apprehend that the difficulty will at length be surmounted by an adjustment of explosive forces in a suitable compound, and not by tunneling machines with revolving cutters.

Minneapolis and St. Cloud Railroad.

At the annual meeting of the Stockholders of the Minneapolis and St. Cloud Railroad Company, held at Minneapolis, Minn., on the 4th inst., the following Board of Directors was elected: H. T. Welles, Isaac Atwater, H. C. Burbank, J. H. Corkey, Chas. A. Gilman, H. O. Cowles, L. W. Collins, J. A. Wilson, S. Mills, R. J. Mendenhall, J. P. Wilson and R. S. Underhill.

This company has a swamp land grant of ten sections of land per mile, from St. Cloud to Pigeon river, on the north shore of Lake Superior, which is within a short distance of the line of the Canadian Pacific railway. The company also has a land grant from the United States of ten sections per mile for the same distance, making in

all a land grant of twenty sections per mile, amounting to about 4,000,000 acres.

The road when completed will form a connection between the Northern Pacific and other Minnesota railroads with the Canadian Pacific on the north shore of Lake Superior. It will also open up that great lumber and mineral region on the north shore and beyond. It will, without doubt do a large lumber and other business and will also take some business from the Canadian Pacific, east and west from the point of junction.

The company has a perpetual charter, and one of the best ever granted in any State. It has the right to connect its branches with all the railroads without any further legislation.

The charter of the company, together with all its rights and franchises, it is understood, are for sale to any party who will build the road.

Hoosac Tunnel and Troy and Greenfield Railroad.

The grading for the second track between North Adams and Vermont is nearly finished, but it will be some time before the steel rails arrive. The State has begun to straighten the highway near Braytonville so as to make a straight crossing there. It will require the removal of from 300 to 400 yards of rock, which will be broken up for ballast. Engineer Locke thinks that the work of laying a second track in the tunnel, part of last winter's appropriation being for that purpose, will begin as soon as the grading toward Vermont is done. The grading and ballasting in the tunnel will be on the north side of the present track, and from 70,000 to 80,000 yards of ballast will be necessary, that obtained at Braytonville being taken to the tunnel. There is a good deal of rock in the tunnel which can also be broken up for that purpose. Part of the work at least can be done this winter. The steam-shovel will be kept at work as long as the weather permits.

The appropriations of last year contemplated double tracking the road only from the Eastern portal, through the tunnel to the Vermont line a distance of about thirteen miles, but estimates are now being made for double tracking the remainder of the road to Greenfield, thirty-one miles further. If this meets the approval of the legislature it will not be improbable that within a year the State of Massachusetts will have another double track road running through its entire length.

Nashua and Lowell Railroad.

A meeting of the stockholders of the Nashua and Lowell Railroad Company was held in Boston on the 10th inst. to ratify the lease of their road to the Boston and Lowell Railroad Company, which had been previously agreed upon by the directors of both companies. The meeting was called to order by the President, F. A. Brooks, who read the call for the meeting; after which the lease was read by the clerk. The lease is for 99 years, at the rental of $60,000 annually, and includes the Stony Brook, Peterboro' and Wilton Railroads. Whenever $100,000 shall be added to the gross receipts of the road for the year ended Oct. 1, 1880, an additional sum of $2,000 for every six months of each year of such increased earnings shall be paid as rental. Another provision is that in case of thirty days' default in the payment of any semi annual installment of the interest the lessor corporation may seize its property. The equipment of the Nashua and Lowell is inventoried as follows: 16 locomotives, 16 passenger cars, 7 baggage cars, 4 milk cars, 38 eight-wheeled box cars, 118 short box cars, 71 long platform cars, 55 short platform cars, 186 coal cars, 2 snow plows and derricks and wreck cars all valued at $207,325.

The President stated that no unpleasant relations had existed between the two corporations, and that if the proposed lease was effected the stockholders would have a small cash balance in their treasury, and their road under lease at 7½ per cent on its capital stock. The expense of managing the road as it had been managed this last year was $8,000, or one per cent more than the expense of managing it as a part of another line. For these and other reasons Mr. Brooks thought it extremely desirable that the action of the directors should be ratified.

A motion being then made to ratify the lease, voting was commenced, which resulted in 6,236 votes being cast, of which all but 58 were in the affirmative. The lease is therefore ratified, so far as this corporation is concerned. The meeting then adjourned.

OUR BOSTON LETTER.

(From our regular correspondent.)

BOSTON, Nov. 15, 1880.

Another week with a fair amount of business and generally advanced prices. Closing prices compared with those a week ago show the following changes:

Advanced.		
Boston and Albany	154½	to 156
Boston and Maine	142¼	to 142¾
Cedar Rapids and Mo.	137¾	to 140
Central of Iowa	34	to 34½
Chic. Burl. and Quincy	158	to 158¾
Concord	90½	to 92
Conn. and Passumpsic	72	to 80
Connecticut River	150	to 155
Detroit, Lans. and Northern	105½	to 106
Eastern	34	to 34⅞
Fort Scott and Gulf, Com	55	to 56½
Fort Scott and Gulf, Pfd	115	to 119
Flint and Pere Marquette, Pfd	71½	to 74
Little Rock and Ft. Smith	58½	to 59½
Louisiana and Missouri River	10	to 11
Manchester and Lawrence	153¾	to 157
Nashua and Lowell	130	to 135
Iowa Falls and Sioux City	45	to 50
Metropolitan Horse	68	to 69½
Middlesex	113¼	to 115⅛
Northern	106	to 110¼
Old Colony	123	to 123½
Port., Saco and Ports	107	to 108¼
Revere Beach and Lynn	102	to 103
Vermont and Massachusetts	23	to 23¼
Wisconsin Central, Com	12	to 13⅓
Wisconsin Central, Pref.	26	to 29
Declined.		
Atchison, Topeka and Santa Fe	133¾	to 133⅜
Cin., San. and Cleveland	19¾	to 18⅜
Chicago and W. Michigan	73	to 72½
Norwich and Worcester	148	to 147⅞
Pullman Palace Car Co.	122	to 121½
Rutland, Pfd	28	to 27
Sc. Kansas and Western	69	to 68

Mexican Central subscriptions which entitle the subscriber on payment of $4,250 in instalments to $5,000 in 1st Mortgage Bonds, $1,000 in Income Bonds and 40 shares of stock of The Mexican Central Railroad Company, have advanced during the week from a premium of $255 to a premium of $850. These subscriptions carry with them the privilege of subscribing to any future subscriptions that may be offered by this same company under the same grant.

The accounts of the Kansas City, Ft. Scott and Gulf Railroad made up to the first of October show that the net earnings of the road up to that time will provide for all bond interest and 8 per cent dividends on the preferred stock for the year and leave a surplus of 1 per cent for the common stock. This leaves the net earnings for October, November and December to be applied to dividends on the common stock. Last year the earnings for those three months were $96,456, $91,989 and $94,682 respectively, or a total of $283,127. The earnings for the month of October, 1880, are 25 per cent greater than those for October, 1879, which if continued for the remaining two months will swell the earnings of the fourth quarter of the year 1880 to $350,000. The capital stock of the road is $4,000,000, but the stock of the "Fort Scott Branches" to the amount of $662,500 is guaranteed the same dividends as the stock of the main line and will doubtless eventually be exchanged for it. If the expenses for the last quarter of 1880 are not over 50 per cent of the receipts there will be $145,000 besides the 1 per cent previously earned to be applied to the common stock. These facts may account for the recent activity of the stock in our market and its advance from 50 to 56½.

The Southern Kansas and Western railroad is soon to be bought up by the Atchison, Topeka and Santa Fe in the same manner as the Kansas City, Lawrence and Southern was purchased, and in whose interests the Southern, Kansas and Western was built.

The bonds of the Southern Kansas and Western are already guaranteed by the Atchison, and now it is proposed to exchange the stock of this road for the 5 per cent bonds of the Atchison at 75 per cent of its par value. The amount of stock is very limited, and like all the good things is entirely controlled by the syndicate of railroad gentlemen in Sear's Building.

The earnings of the Eastern railroad are published this week, but fall short of our estimate made October 30. We estimated $3 000,000; the company report earnings of $2,905,056. The gross and net earnings of the Eastern railroad for the past five years are as follows:

	Gross.	Net.
1876	$2,470 971	$185,418
1877	2,508.107	597,230
1878	2,452 935	629,792
1879	2,485,977	994.785
1880	2,905,056	1,084,927

and the percentages of total net income to capital stock and net debt for the same years are as follows:

1876.	1877.	1878.	1879.	1880.
2.47	3.025	3 21	5.00	5.50

The interest charge on the $13,000,000 mortgage certificates, which is now about $585,000, will be raised after September, 1882, to $780,000 by reason of the rate being changed from 4½ per cent to 6 per cent. Besides the above mentioned indebtedness the road owed according to the last published statement of its finances about $2,000,000, divided between bills payable, current accounts and accrued interest.

* For three weeks only of October in each year. † Three weeks only of September in each year.

Manufacturing Notes.

—The Niles Iron Company's rolling mill is to be removed from Niles to Hazleton, near Youngstown, Ohio.

—The Topeka rolling mills, Kansas, are busy turning out rails for the Santa Fe and Kansas Pacific roads.

—The Pottsville Iron and Steel Company, having a capital of $450,000, is soon to locate works at Pottsville, Pa.

—The Pittsburgh Locomotive Works are constructing thirty heavy locomotives for the Texas and Pacific Railroad.

—The Lehigh Car Wheel & Axle Works at Catasauqua, Pa., have completed 1000 box cars for the New York, Lake Erie and Western, and are now at work on 300 drop-bottom coal cars for the same road.

—Riehle Bros., proprietors of the Philadelphia Scale and Testing Machine Works, report brisk business. They are at work on large contracts for the South and West and also for work nearer home.

—Preparations are being made by Park, Bros. & Co., for casting the first steel shaft ever manufactured for a steamboat in America, at their Black Diamond Steel Works, Pittsburgh, Pa.

—The use of iron sleepers is becoming general in Germany. The Berg-Mark Railway exchanges all the old worn-out wooden sleepers for iron ones. Tenders were recently received by the Royal Prussian Railway Board for nearly 5000 tons of iron sleepers.

—The Baldwin Locomotive Works, Philadelphia, have recently entered orders for about 100 first-class locomotives; of which twenty are for the Chicago and Northwestern Railway Co, thirty-four for the Denver and Rio Grande, and thirty for the Philadelphia and Reading.

—A company has just been formed in Chicago for the manufacture and sale in the state of Illinois of the Orvis Smoke Consumer. The name of the company is the Orvis Smoke Consuming and Fuel Saving Co. and its President is H. C. Grannis, vice-president of the Union National Bank.

—Since the first of January, 1880, the Fairbanks Scale Works, at St. Johnsbury, Vt., have turned out on an average over one railroad track scale for each working day. Their production thus far this year is said to be much in advance of any previous year. They are smelting 30 tons of iron per day and are behind their orders.

—The Low Moor Furnace, at Low Moor, Alleghany Co., Virginia, on the 20th of October cast 75 tons of foundry pig iron; and was put in blast on the 11th of October. This furnace is said to be one of the most active in Virginia. Its manager is Mr. William Richards, formerly assistant to Mr. Julian Keanedy of the Edgar Thomson Steel Works Pittsburg.

—A remarkable activity is being shown in Virginia iron interests, among other indications of which is the firing up this week of a new furnace in Lynchburg, built by a company which will mine its own ores a few miles down the river, and will work about 400 hands in all. Another company have made a contract to ship 30,000 tons of ore to Pennsylvania. The Virginia Midland Railroad will have its utmost capacity tested in accommodating the demand for the transportation of ores.

—A manufacturer whose business requires the use of large amounts of emery has been trying an experiment with the ashes of Anthracite coal, and he affirms that he has got good results from the ashes as a substitute for the finer grades of emery. He took ashes and saturated them with water, the liquid being poured off after standing an hour or two, then being poured off again, and so on until he obtained several grades, down to a substitute for emery flour. When dried the deposit cuts readily and leaves a satisfactory surface.

—The number of recent railroad accidents resulting from misplaced switches draws a great deal of attention to the necessity of providing the most perfect system possible for switching and signaling. The utmost care may be taken by railroad officials, it would seem, in selecting a competent class of switch tenders, and yet the liability to accidents is not averted. The desirability of mechanically moved switches is thus brought prominently forward, and now it seems to be demanded that a most thorough trial of a switch like the Wharton Switch, one that has been accessible for years, should be made. If any invention will take the moving of switches out of the hands of careless or incompetent men the public are entitled to have its merits carefully considered. The Railroad Commissioners of Massachusetts have just severely reprimanded the management of an eastern road for not providing a better system of switches and signals.

Organization.

—The directors of the Hannibal and St. Joseph Railroad have re-elected the following officers:—William Dowd, president; Myron P. Bush, first vice president; John A. Hilton, secretary; Walter J. Hilton, treasurer.

—The stockholders of the Union Ferry Company (Brooklyn) have elected the following directors:—Henry E. Pierrepont, Nathan D. Morse, Charles E. Bill, Abraham B. Baylis, Abiel A Low, Samuel McLean, James S. T. Stranahan, Horace B. Claflin, Simeon B. Chittenden, James How, Walter N. Degrauw, Bryan H. Smith, Ripley Ropes, Peter C. Cornell and James A. Perry.

—The officers of the Manhattan Elevated Railway Company recently elected, are:—President, William R. Garrison; Vice President, R. M. Galloway; Secretary, F. E. Worcester; Treasurer, John E. Body. The directors are C. K. Garrison, Wm. R. Garrison, Geo. J. Forrest, John Baird, John P. Kennedy, Arthur Leary, Jose F. de Navarro, Horace Porter, E. F. Winslow, Wm. Foster, Jr., H. F. Dimock, R. M. Galloway, and Mortimer Ward.

—The Ohio Central Railroad Company having accepted the road from the contractors, Brown, Howard & Co., are now operating the same with the following general officers: Daniel P. Eells, President, Cleveland; Samuel Thomas, Vice President, Columbus; B. G. Mitchell, Secretary and Treasurer, New York; A. P. Eells, Assistant Secretary and Treasurer, Cleveland; G. G. Hadley, General Manager, Columbus; Calvin S. Brice, General Counsel, Lima. Mr. G. G. Hadley, General Manager, has announced the following appointments: W. H. Vanoegrift, Superintendent; W. H. Andrews, Auditor and Cashier; Hudso Fitch, General Freight and Ticket Agent; J. B. Mogan, Master Mechanic; S. A. Trowbridge, Paymaste Joseph Burwell, Car Accountant.

OTHER CHECK LETTERS.

The following is a list of banks having plates bearing check letters other than A, B, C, D:

5s National Bank of the Republic, Boston, Mass.
Charter number 379; Check letters E, F, G, H.
5s Manufacturers' National Bank, Amsterdam, N. Y.
Charter number 2239; Check letters E, F, G, H.
5s Lycoming National Bank, Williamsport, Pa.
Charter number 2227; Check letters E, F, G, H.
10s } First National Bank, Hoboken, N. J.
20s } Charter number 1444; Check letters on 10s D, E, F, and 20s B.
20s Merchants' National Bank, New Bedford, Mass.
Charter number 799; Check letters B, C, D, E,

NEW ISSUE OF U. S. TREASURY NOTES,

NOT COUNTERFEITED.

1s In centre is portrait of George Washington.
2s Portrait of Thomas Jefferson.
5s Portrait of Andrew Jackson.*
10s Portrait of Daniel Webster.*
20s Portrait of Alex. Hamilton.
50s Portrait of Benjamen Franklin.
100s Portrait of Abraham Lincoln.
500s Vignette representing Victory divested of her Armor.
1000s Portrait of DeWitt Clinton, ex-Governor of New York State.

* Only notes of the new issue counterfeited.

Counterfeit Note List.

HOW TO USE THE LIST.

All Paper Money in the United States is printed in sheets of four notes of one denomination on each sheet. Each bill bears a letter called the check letter, usually A, B, C or D, which appears on its upper left hand, and lower right hand corner. The notes are always numbered in their order on the sheets; thus all notes lettered A, will bear the number 1 or a number which divided by 4 will leave 1 remainder; the number accompanying B divided by 4 will leave 2 remainder, C, 3 remainder, D, no remainder. All genuine notes with letters A and C will have odd numbers and all with B and D even numbers.

The counterfeiter makes his plate commonly from one bill and rarely prints more than one of the four letters. As soon as a spurious bill is discovered measures are taken to redeem all good bills of that denomination, bearing the same letter. This leaves the counterfeit alone in the field.

All bills bearing the letters given in the foregoing list should be refused by all non-experts.

We can assure our subscribers that there are no counterfeit bills on paper currency of the United States, which are known to the Secret Service Division at Washington at this date.

The National Bank notes printed in Italics are stolen and are worthless.

Banks starred do not exist, and the whole issue is fraudulent.

Railroad Law.

MAIL AGENT ON RAILROAD A PASSENGER.

PHILADELPHIA COMMON PLEAS, Sept. 4, 1880.

PRICE VS. PENNSYLVANIA RAILROAD CO.

Where a railway company received a gross sum for transporting the mails and route agents over its lines, held, that such route agent was a passenger and the company were liable where he was killed by reason of its negligence while traveling on its trains.

ACTION for the death of plaintiff's husband, who was killed while travelling as mail-route agent on one of defendant's trains, by a collision caused by defendant's negligence. The jury found for plaintiff for $5,000, subject to the opinion of the court upon the question whether deceased was, at the time of his death, a passenger or employee of defendant. Other facts appear in the opinion.

Barton & Sons, for plaintiffs.

Hampton & Dalzell, for defendant.

EWING, P. J. While lawfully on the train of the defendant company on the way from Blairsville to Pittsburgh, the husband and father of the plaintiffs was killed by a collision of trains resulting from the gross negligence of defendant's agents. He was not an employee of the company; he was in his proper place, guilty of no misconduct or negligence. The plaintiffs are clearly entitled to recover unless precluded therefrom by the terms of the first section of the act of 4th April, 1868 (P. L. p. 58), which is as follows:

"That when any person shall sustain personal injury or loss of life while lawfully engaged or employed on or about the roads, works, depots and premises of a railroad company, or in or about any train or car therein or thereon, of which such person is not an employee, the right of action and recovery in all such cases against the company shall be such only as would exist if such person were an employee. Provided, that this section shall not apply to passengers."

The plaintiff's husband was "route agent" for the United States post-office department, travelling daily over defendant's road from Allegheny city to Blairsville and return, in charge of the United States mails, receiving and delivering mails at intermediate stations, and assorting and delivering the mails at the termini of the trip.

Under the statutes and regulations of the post-office department the defendant company received a gross sum for transporting the mails and the route agent; likewise furnishing a car properly fitted for the purpose. Is the case governed by the act of assembly above quoted?

At common law the action would have abated at the death of A. J. Price. If plaintiffs are entitled to recover it is by virtue of the 26th section of the act of 21st April, 1846, chartering the company and the act of 15th April, 1851. The right to recover in such cases being a statutory right, the Legislature had power to modify and restrict that right as to any or all classes of persons. We are, therefore, unable to see that the fact that Mr. Price was at the time of the injury in the employ of the United States government has any effect on the question. We know of no sanctity or superior right created by such employment, nor do we conceive that it would affect the question had the deceased been on an inter-State route. The right to recover is based wholly on the laws of Pennsylvania. This act of 1868 has received authoritative construction in Kirby vs. Penn. R. R. Co. 76 Penn. St. 506, and in Richard vs. U. Pa. R. R. Co., 7 W. N. C. 77. The terms of the act are very broad. It includes all persons lawfully employed in or about the roads, trains, cars, etc., of the railroad company. The terms of the section being so broad the minds of the Legislature seem to have been directed to the danger of going beyond the supposed evil intended to be remedied and the proviso is added: "This section shall not apply to passengers."

To our minds it is very clear that Price was lawfully employed on the train of the defendant, at the time of his injury, and unless saved by the proviso as to passengers, the plaintiffs cannot recover.

Was Price a passenger? Webster defines a passenger: "One who travels in some conveyance as a stage coach or steamboat." The fact that a man is employed on his travels does not exclude him from being a passenger in the popular acceptation of the term, nor does it in view of the statute, else why the proviso excepting passengers? While in our view of the case the deceased was carried for hire, in view of the many authorities, some of which will hereafter be referred to, we deem it immaterial as to whether or not he was carried for hire or carried free, nor is it material that he was carried on the contract of another with defendant.

In the case of Collett vs. L. & N. W. Railway, 16 Q. B. 984, plaintiff was a mail agent travelling in the course of his employment on defendant's train. The mail and agents were carried under the directions of the act of Parliament and regulations similar to those of our case—except that the agent was to be carried free. Plaintiff was injured by negligence of defendant's servants. It was held to be immaterial that he was carried under a contract with the government. That he was a passenger carried by consent of the company, to whom they owed the duty to carry safely.

In the case of Nolton vs. Western R. R. Co. 15 N. Y. 444, plaintiff was a mail agent carried under the same statute and orders as was Price, when he (plaintiff) was injured by the gross negligence of defendant's employees. Held, that he was entitled to recover as a passenger to whom the company owed a duty.

In Yeomans vs. Contra Costa Steam Nav. Co., 44 Cal. 71, the plaintiff was agent or passenger for Wells, Fargo & Co., and was carried under a contract of the express company with the defendant, whereby the defendant agreed to carry the freight and messenger for a fixed monthly compensation. The plaintiff, while on the car of the defendant company, was injured by reason of the negligence of defendant's servants. Held, that the plaintiff was a passenger and entitled to recover.

In Blair vs. Erie R. R. Co., 66 N. Y. 313, the plaintiff was an express agent on the train in the course of his business in pursuance of a contract, whereby the railroad company contracted to transport the freight of the express company for a certain consideration, and to transport the money safes and messengers free of charge. Plaintiff was allowed to recover. In argument of the case the court treated the agent as a passenger, carried without hire.

In Hammond vs. N. E. R. R. Co., 6 Richardson (D. C.), 130, the plaintiff was a route agent in performance of his duty when injured by the negligence of the defendant's employees. The conditions were precisely similar to those of our case. The court held plaintiff entitled to recover, clearly putting it as a case of a passenger, although not in terms calling him such.

In Penn. R. R. Co. vs. Henderson, 1 P. G. Smith, 315, plaintiff's husband was a drover in charge of his cattle on defendant's train, he riding on a drover's pass, directing the conductor of the passenger car attached to stock train to pass the bearer in charge of his stock in certain cars. In an exhaustive opinion the court held the plaintiff entitled to recover for the death occurring by the negligence of defendant's agents. Throughout the whole opinion the decedent is treated as a passenger; numerous other cases are to the same effect. In most of these cases the person injured was employed on the train, the travel being but an incident of the employment.

In the case before us, while Price was employed, he was not in any way responsible for the running of trains. The conductor had no more power over him and no less than over any other passenger on the train. He had his proper place on the train, but that and his regular travel was all that distinguished him from the other passengers.

The case of the Penn. R. R. Co. vs. Henderson and several of the other cases cited, had been decided before the passage of the act of 1868. It is a fair presumption that the Legislature had this class of cases in view when the proviso excepting passengers was inserted. Being of the opinion that the deceased, at the time of his injury, was a passenger on defendant's train within the meaning of the proviso of the act of 1868, the plaintiff is entitled to recover.

Railroads in Vermont.

The annual report of Railroad Commissioner D. P. Webster, of Putney, Vt., contains the following facts concerning Vermont Railroads:

There are now operated in the State 728.71 miles of road, 75.37 miles of sidings. The total earnings of all the roads from July 1878, to July, 1880, are as follows: From passengers, $1,811,828 65; freight, $4,117,255 71; mails, $173,959 45; express, $75,433 14; other sources, $256,829 77; making the total $6,439,306 72; miles run by passenger trains reported, 2,455,449; freight trains, 3,778,311; other trains, 177,560; total number of passengers carried one mile, 12,314,558; tons freight one mile, 284,789,442; total operating expenses, $4,416,541.05. As to dividends, the Passumpsic Road has earned and a dividend paid of $90,048 on its preferred stock; the Vermont Valley 2 per cent. on its common stock, $20,000; the Montpelier and Wells River 2 per cent. on its common stock, $16,000; the Rutland and Burlington, on its preferred stock, $66,500.

The Pennsylvania Railroad Company has now in the field a party of engineers surveying a route for a line of railroad on the Atlantic coast of New Jersey, commencing at the terminus of the Freehold and Jamesburg Railroad, at Manasquan, thence along the beach to Seaside Park, crossing Barnegat Bay to Sheepshead Point on the mainland, and thence westward to Whitings on the New Jersey Southern Railroad, whence there is now a railroad to Pemberton, Mount Holly and Philadelphia. Most of the right of way between Whitings and Barnegat Bay has been secured, and it is believed the road will be put under contract next week. It is probable that trains from Philadelphia to Long Branch will be run over the new line in June next. The time required by this route from Camden to Seaside Park will be one hour, the distance being twelve miles less than from Camden to Atlantic City.

A certificate of incorporation has been filed with the Secretary of State of Ohio of the Ohio Central Railroad Company (branch line to be known as Mineral division), from Corning in Perry county to South Shawnee,

COUNTERFEIT COIN LIST.

GOLD COINS.

$1.

Standard weight 25.8 grains, least current weight 25.67 grains.
There are some counterfeits dated 1851-1852, light in weight. The new gold dollar 11-20th of an inch in diameter as counterfeited is dated 1861, light in weight, but very deceptive.

$2 50.

Standard weight 64.5 grains, least current weight 64.18 grains.
Some coins dated 1846, weighing only 48 grains instead of 64½—are in circulation.

$3.

Standard weight 77 4 grains, least current weight 77.02 grains.
Excellent counterfeits of this denomination have been issued and circulated.

$5.

Standard weight 129 grains, least current weight 128.36 grains.
The issues of 1844-1845-1847 have been imitated. The 1845 piece is 10 grains too light ; the 1847 coin is 13 grains too light.

$10.

Standard weight 258 grains, least current weight 270 grains.
The issues of 1801 and 1810 have been extensively counterfeited.

$20.

Standard weight 516 grains, least current weight 513.42 grains.
This coin has been sawed in two pieces, the center taken out and platinum or some other metal substituted. The *ring* is not perfect. Experts have also bored holes in the side and taken out about seven dollars worth of gold and then soldered the holes with gold.

The English Sovereign

has been imitated by plating so that the counterfeit is worth about three dollars and nearly as heavy as the genuine.

SILVER COINS.

Ten Cents.

Standard weight 38.58 grains.
Spurious dimes dated 1853 and 1875 are in circulation, the date 1875 has the appearance of a genuine coin.

Twenty-five Cents.

Standard weight 26.45 grains.
There are many deceptive quarters. Those bearing dates 1828 and 1860 are the most dangerous ; others bearing dates 1853, 1857, 1861 are not so well executed.

The Canadian 25 Cent Coin

has been extensively counterfeited. Large quantities of them have been circulated in the South and West.

Fifty Cents.

Standard weight 192.9 grains.
Half dollars have been successfully counterfeited. The one most likely to deceive is dated 1842, thickly plated ; another good imitation is dated 1876, plated with silver, exact weight, and good ring. The counterfeit bearing date 1874 is not likely to be taken.

One Dollar.

Standard weight 412.5 grains.
Counterfeits of the new one dollar silver coin first appeared about the first of April, 1878. The general appearance is good, the milling is well done, but the color is such as to readily distinguish it from the genuine. Look out for other new counterfeits better executed.

The Trade Dollar.

Standard weight 420 grains.
This coin has been variously and extensively counterfeited. One early imitation was dated 1876, made of a composition formed principally from type metal. The milling on the edge of the piece is very well done, but the piece is too thick and the inscription IN GOD WE TRUST, beneath the figure of Liberty, upon the obverse, is imperfect. This counterfeit was extensively circulated in the East Indies, China, Japan and other Oriental countries.
Many other imitations of the trade dollar have been produced and the latter specimens appear almost perfect. One of the last imitations is finely finished ; the various devices of the impress are accurate and distinct. and the ring is perfect. The piece is very deceptive, but it is about 1-32 of on inch undersize, and 115.5 grains underweight. It is of a dark color after having been handled, and has a smooth, greasy or quicksilvery feeling when rubbed between the thumb and fingers.

Note.

The Trade Dollar authorized to be coined by act of Congress February 12. 1873, has been formally recognized as a coin of the United States. The Trade Dollar was demonetized July 22, 1876, and its coinage was suspended by order of the Secretary of the Treasury, February 22 1878. The circular of the Treasury Department of July 25, 1878, declares : "The United States Trade dollar also is not a legal tender, and therefore has only a bullion value." The average bullion value, of full weight trade dollars, is ninety-three cents and two tenths of a cent each. The Trade Dollar was intended for exportation abroad. It excels the Mexican silver dollar by two-tenths of a cent, and is of equal finoness (900) with the United States legal tender silver dollar and contains seven and one half grains more standard silver. At present though demonetized and refused by many banks and all Government offices, trade dollars are generally taken in trade without discount and may be commercially rated at the price they command for exportation. There is no allowance for abrasion in silver coins.

Tests.

Counterfeit silver pieces made of block tin washed over with quicksilver are easily detected by the ring. A genuine silver piece will feel rough enough under rubbing, while the counterfeit feels smooth and oily. Experienced persons detect spurious coins by the weight. The jeweler uses nitric acid for the detection of debased gold and silver. Scratch the coin with the knife and then apply the acid to the scratch. If the acid boils up greenish, the coin is bad ; but if it turns white the coin is good. The following test for determining whether silver is good or bad is known as the "Mint Test," although the tests employed at the Mint are weight and size :

24 grains nitrate of silver.
30 drops nitric acid.
1 ounce water.

A drop of this mixture will have no effect upon genuine silver but will blacken a debased coin. Persons handling large amounts of coin must rely upon the eye and the sense of touch.

New York and New England Railroad.

The Bostor Journal says that the time for the completion of this railroad line through to the Hudson River at Fishkill, where by a ferry it will make a connection with the Newburg branch of the Erie Railway, is rapidly approaching, and then adds:

The work of preparing for the crossing of the river at this point is being rapidly prosecuted, and the managers of the railroad have advertised for the excavation of some 200,000 cubic yards of material from the flats in the river at this point, which is to be used in preparing the extensive terminal grounds that will be required at this end of the road.

Although there are only some eight or ten miles of rails remaining to be laid upon the new extension between Waterbury and Brewster's, it is now expected that this extension will not be opened for traffic until about the first of January, instead of the present month, as at first contemplated, the necessity of thoroughly ballasting the new section before opening it, accounting for most of the delay.

From Brewster's to New York City the road will have the option of two different routes, one via the Harlem Railroad to the Grand Central Depot, and the other via the Northern New York, running from Brewster's to the Harlem River at High Bridge, where the Elevated Railroad will enable passengers to go to any part of the city. As the elevated roads are soon to establish a baggage service over their lines this line will offer a favorite route to the public.

Nearer home the work of developing the capacity of the New York and New England Railroad to handle a large traffic is being actively carried on, especially upon the extensive terminal grounds upon the South Boston Flats. The piles for the foundation of the new grain elevator, some two thousand in number, are nearly all driven, and large quantities of stone, brick, &c., are accumulating near its site for the construction of the elevator. A large gang of carpenters are also at work upon the warehouse or shed, 800 by 200 feet, which is to be erected between Docks One and Two. The floor, which consists of two layers of plank, one of them creosoted, is nearly completed, and the work of erecting the huge girders for the room, 200 feet in length, will be commenced in a few days. Besides the above work, important additions to the accomodations upon the 25-acre lot have been made and others are underway. The work of filling in the 50 acres of flats purchased of the Boston and Albany Railroad is also being actively pushed. A portion of this lot has already been filled up and leveled off, and can be made available for tracks and depots, upon the opening of the road through to the Hudson, an event which is confidently looked for next spring. The work of completing the section from Brewster's to the Hudson is now in the hands of contractors. Taken in connection with the work upon the new passenger station at the foot of Summer street, which is now partially completed and in use, and the construction of a second track and sidings along the line, together with large additions constantly being made to the equipments of the road, it will be seen that the managers of the corporation will be fully prepared to handle the traffic which is now so rapidly developing, and which must result in this road securing its share of the prosperity now dawning upon the whole country.

At a meeting of the stockholders of the Cincinnati Northern (formerly Miami Valley Narrow-gauge) railroad held in Cincinnati on the 15th inst., the action of the Directors in issuing bonds to the amount of $1,000,000 for completing and equipping the road was ratified. A large force is employed now in the completion of the road from Cincinnati to Waynesville.

Justice Miller, of United States Supreme Court at Washington has rendered a decision in the Missouri, Kansas and Texas Railroad case which is to the effect that the Missouri, Kansas and Texas Company is entitled to possession of its road on the payment of coupons, which in their cross bill they have offered to pay.

Personal.

—Capt. J. B. Eads with his engineering party were at Galveston, Texas, Tuesday, en route for Vera Cruz.

—Mr. N. K. Ackerman, of Chicago, President of the Illinois Central Railroad was at the Windsor Hotel New York, this week.

—The venerable Peter Cooper is said to be the oldest voter in New York, casting his first vote for President Monroe.

—Mr. Willard Black, formerly of Philadelphia, and Miss Annie Scott, niece of Col. Thos. A. Scott, were married at Cedar Rapids, Ia., last week.

—The recent death of Sir Thomas Bouch, the engineer of the Tay bridge, is ascribed to grief and anxiety, caused by the fearful disaster last December.

—Mr. Charles Crocker, President of the Southern Pacific Railroad, and his family have been stopping in New York for several weeks at the Windsor Hotel.

—Mr. H. B Richardson submitted the plans which were finally adopted by the commissioners for the proposed new City Hall at Albany, and he has been appointed architect to the commission.

—Among the railroad men who were conspicuous in the late campaign was Mr. William Dowd, President of the Hannibal and St. Joseph Railroad, who came very near being elected Mayor of New York.

—Hon. Thurlow Weed celebrated his eighty-third birthday, Monday, when he received a large number of his friends of a public and private life, in an informal manner.

—Mr. H. F. Gillig, general manager of the American Exchange in London, is coming to New York early in December to complete the organization and extension of that undertaking.

—The directors of the Massachusetts Central Railroad Company have organized with Hon. George S. Boutwell, president, and George F. Seymour, treasurer and clerk.

—Capt. John Routh, who for twenty years has been a conductor on the Pennsylvania Railroad, is to take charge of the railroad switches, side tracks, engines, cars., etc., of the Lucy furnace, Pittsburgh.

—The number of Prussian millionaires is said to be only 1195. The richest of them are the Rothschilds of Frankfort, Krupp of Essen, and Bleichbroder of Berlin. Prince Bismarck is also reckoned among the millionaires.

—Mr. Emmons Blaine, the second son of Senator Blaine, a graduate of Harvard College and for the last two years a member of the Harvard Law School, has accepted a position in the office of the General Manager of the Chicago and Northwestern Railroad, at Chicago.

—Governor Foster and others with him who were interested in the building of the Ohio Central railroad from Toledo to the coal mines at Corning, Ohio, just completed, left $12,000 behind them on a recent visit to the Corning mines toward building two schoolhouses and a church apiece for the white and colored miners.

—Mr. Wm. W. Griscom, of Philadelphia, read a paper, at the Franklin Institute, in that city, Wednesday night, setting forth the nature of his new electric motor, the principal novelties of which are in the construction of the electro-magnet and some mechanical details, whereby the power is said to be very much increased.

—Mr. Loring S. Richardson, for several years the general passenger and ticket agent of the Ogdensburg and Lake Champlain Railroad, where he was very popular and esteemed as an executive officer of marked capacity, has taken the position of auditor of the Denver and Rio Grande Railroad, with headquarters at Colorado Springs, Col.

—Hon. Thomas Allen, President of the St. Louis, Iron Mountain and Southern Railway has been elected to Congress from St. Louis. The large majority given him shows the confidence which the city on the Mississippi has in his fitness for the position, and in his ability to champion the river improvements and railroad and other interests of much importance to St. Louis.

Construction.

—The Central Vermont Railroad Co. have fitted up a very handsome depot at Montpelier, Vt.

—2,800 tons of steel rails have been laid on the Indianapolis and St. Louis road within the last four months.

—An extensive depot building is to be erected at Cleveland by the New York, Pennsylvania and Ohio Railroad Co.

—Work on the double track of the West Jersey Railroad is progressing. The line will be finished by spring.

—The Lexington and Southern Railroad Co. have given out the contracts for grading its line from Nevada to Carthage.

—The Milwaukee, Lake Shore and Western Railway Co., have completed their western extension to Wausau, 20 miles from Norrie, and 210 miles from Milwaukee.

—David Ryan, of Berwyn, has been awarded the contract for straightening the tracks of the Pennsylvania Railroad at Green Tree, Pa. The work has already commenced at Malvern.

—It is estimated that it will take 400,000 feet of oak ties and 100,000 feet of clear pine for the proposed renewing of the wood work of the Dubuque bridge.

—The work of laying the new line of tracks by the Union Freight railroad managers of Boston, on Commercial street from Charter street to Atlantic Avenue is nearly completed. This will give a double track from Charter street to Rowe's wharf.

—An Elevated railroad is being talked up for St. Louis, a river front of 14 miles and an average width for the city of 4 miles having made rapid transit seem desirable. It is proposed to run a main stem from Carondelet to the upper end of the city, passing along Seventh street in the central portion, with collateral branches extending to the fair-grounds and Forest park.

Interest and Dividends.

—The Northern (N. H.) Railroad Company has declared a dividend of $3 per share payable Dec. 1

—The Catalpa Mining Company has declared a dividend of $60,000 (20 cents per share), payable Dec. 15.

—The Boston, Concord and Montreal Railroad Company has declared a dividend of 3 per cent payable Nov. 20.

—The Catawissa Railroad Company has declared dividends of three and one-half per cent on its preferred stocks, payable November 18.

—Coupons of the mortgage bonds of the New York, Lake Erie and Western Railroad due Dec. 1 will be paid at the office of the company, No. 187 West street.

—The Homestake Mining Company has declared its monthly dividend of Thirty cents per share for October, payable Nov. 25, at the office of Messrs. Wells, Fargo & Co., No. 65 Broadway; also an extra dividend of same amount, payable at the same time and place.

American Railroad Journal.

Financial and Commercial Review.

THURSDAY EVENING, November 18, 1880.

The quotation for call loans at the Stock Exchange this afternoon is 4@5 per cent.

The foreign exchange market is steady for bankers' 60 day sterling on the basis of 4.80¼@¾ for prime, and strong and active for short on the basis of 4.82¼@¾, and for cable transfers on the basis of 4.82¾@4.83¼. Prime commercial bills are 4.78¾@4.79¼. The posted rates for prime bankers' sterling are still 4.81@4.83.

The Treasury to-day bought $105,000 6's of 1880 at 102¾.

Government bonds were strong throughout. The 4s advanced to 111⅞ and the 4½s to 112½—the highest prices yet made.

Governor Collum, of Illinois, has issued his proclamation calling in for payment $257,460 of the State bonds outstanding, to be presented on or before January 1, 1881, after which day interest will cease. This practically wipes out the State debt. After all is paid there will remain in the State Treasury about $100,000.

According to the message of Governor Colquitt of Georgia, the State finances are in a sound condition. There is a surplus of nearly $1,000,000 in the treasury, and $200,000 outstanding State bonds can be redeemed. The State has 50 gold mills, with nearly 500 stamps in operation, and there are other mineral deposits which have attracted the attention of capitalists.

The stock of the Richmond and Danville Railroad Company has been regularly placed on the

call list of the Baltimore Stock Exchange. The capital stock of the company represents $3,886,400. The net earnings in the year ended 30th September last were $796,847 41. Interest on bonds and other fixed charges were $570,893 48, leaving $225,953 93, nearly 6 per cent on the capital stock.

The closing quotations on Thursday were: Adams Express, 119@121; American Express, 65@66; American Union Telegraph, 59½@61; Am. Dist. Tel., 75@76; Atlantic and Pacific Telegraph, 40½@41½; Canada Southern, 68@68½; Central of New Jersey 79⅜@79½; Central Pacific 84¼@84½; Chicago and Northwestern, 114¾@114⅞; do. pref., 140@140½; Chicago, Burlington and Quincy, 164¾@165; Chicago and Alton, 138@138¼; Chicago, Milwaukee and St. Paul, 104⅞@105; do. pref., 117@118½; Chicago, Rock Island and Pacific, 122@122½; Cleveland, Columbus, Cincinnati and Indianapolis, 81⅝@81¾; Columbus, Chicago and Indiana Central 21⅜@21½; Delaware and Hudson Canal, 89¼@89⅜; Delaware, Lackawanna and Western, 99½@99⅝; Hannibal and St. Joseph —@42; do. pref., 91½@91¾; Illinois Central, 118⅞@119; Lake Erie and Western, 32⅝@33; Lake Shore and Michigan Southern, 116⅛@116¼; Morris and Essex, 116¾@116⅞; Manhattan Elevated, 36¾@37; Metropolitan Elevated, 112¼@113; Michgan Central, 110@110¼; New York Elevated, 118½@119; New York Central and Hudson River, 142@142½; New York, Lake Erie and Western, 44@44½; do. pref., 74½@75; New York, Ontario and Western, 27⅞@28; Ohio and Miss., 36¼@36⅜; Pacific Mail, 46¾@47; St. Louis and San Francisco, 39½@40; do. pref., 52@52¼; do. 1st pref., 80@81; St. Louis, Iron Mountain and Southern, 49¼@49½; St. Louis, Alton and Terre Haute, 38½@39½; do. pref., —@110; Union Pacific, 96⅛@96¼; United States Express, 52@53; Wells Fargo Express, 112@114; Western Union Telegraph, 97⅝@97¾; Wabash, St. Louis and Pacific, 42⅝@42¾; do. pref., 77¼@78⅜.

The following quotations of sales of Railwa and other securities, for the week, are in addition to those given elsewhere in our columns:

New York.—Atchison, Topeka and Santa Fe, 134¾; Am. Dock and Imp. bonds, ass., 117; Boston, Hartford and Erie 1st, 43; Buffalo and Erie 7s, new, 123; Chesapeake and Ohio 1st pref., 26¼; do. 1st, Series B, 72¼; do. cur. int., 42; Chicago, St. Paul, Minn. and Omaha, 43½; do. pref., 83⅜; do. consol., 103½; Central Iowa, 24¾; do. 1st pref., 76¾; do. 1st, 108½; Chicago, St. Louis and New Orleans, 38¾; do. 2d inc., 80; Col., Chi. and Ind. The engineering corps which started from Toledo, Ohio, in September to survey the Wabash Canal, and investigate the practicability of making a ship canal, have finished the survey of the St. Jo feeder to St. Mary's and St. Joseph Rivers and tributaries, and report that the water supply is ample for feeding the canal west of Fort Wayne, and that there will be no trouble to procure water between that place and Toledo. A very favorable report will be made to Congress this winter.

Manhattan Railway Company.

The following statement was read at the meeting of the stockholders of the Manhattan Railway Company on the 10th inst. by Mr. Navarro :

NEW YORK, Nov. 9, 1880.

To the Stockholders of the Manhattan Railway Company :

The following statement exhibits for your information and study, a summary of the business of this company for the fiscal year ending Sept. 30, 1880 :

Gross earnings	$4,612,975 56
Operating expenses	2,644,825 24
Net earnings	$1,968,650 32
Fixed charges	2,458,958 33
Showing a loss during the year of	$190,308 01
The "Surplus" on Oct. 1, 1879 was	301,216 57
Deficiency Oct. 1, 1880	$189,091 44

The following statements of the results of this year compared with those of the year preceding, and a few general remarks pertaining thereto may prove of interest.

The gross earnings were :

For the year ending Oct. 1, 1879	$3,500,000
For the year ending Oct. 1, 1880	4,600,000
Increase, 33 per cent	$1,100,000

The total passengers carried were :

For year ending Oct. 1, 1879	45,900,000
For year ending Oct. 1, 1880	60,800,000
Increase, 33 per cent	14,900,000

The average number of miles operated was :

For year ending Oct. 1, 1879	20 miles.
For year ending Oct. 1, 1880	27 miles.
Average increase, 33 per cent	7 miles.
Total mileage, Oct. 1, 1879	23 miles.
Total mileage, Oct. 1, 1880	32 miles.
Increase	9 miles.

The net earnings were :

For the year ending Oct. 1, 1879	$1,556,000
For the year ending Oct. 1, 1880	1,968,000
Increase, 26 per cent	$412,000

It will thus be seen that the passengers and gross earnings have about kept pace with the average increase of miles operated during the year, and this fact becomes worthy of note when it is remembered that much of the new road at present runs through portions of the city not yet built up and inhabited. It is evident that the increase of this great city must necessarily be on the lines of these roads.

The expenses of operating and maintaining have been about 57 per cent of the gross earnings for the year. This is larger than was anticipated. The main causes producing this result were : loss of traffic consequent upon rebuilding the Ninth avenue line, though trains had to be kept running, and the completing of the Second avenue line only to Sixty-seventh street. The Second avenue line is now running through to Harlem river. The roads have ample facilities for carrying very many more passengers than they now do, without materially increasing the expenses for so doing. To encourage this traffic all the new cars placed on the line are of the most approved and attractive kind. The new engines are from plans designed to develop the requisite hauling power with the least expense to produce it.

The direct benefits resulting to the Manhattan Company from the added mileage above spoken of are clearly shown in a decreased capitalization per mile operated, and a proportionate reduction in consequence, of the amount of "fixed charges" required to be paid by this company.

The shareholders undoubtedly possess a franchise (under the tripartite agreement and leases) which will prove of great value, and one well worth protecting and preserving. The connection soon to be made with the New York and Northern Railroad at 155th street and Eighth avenue, over the bridge now nearly completed, ought to add largely to the revenues of this company, while similar advantages will undoubtedly accrue on the east side, when close connection is made with the large and growing population north of the Harlem river by means of the bridge to be built by the Suburban Rapid Transit Company and the New Haven Railroad Company, at the terminus of the Second avenue line.

It is a source of thankful satisfaction that, of the nearly sixty-one millions of passengers carried over the lines during the year, not one has been killed or injured through carelessness or blame on the part of the company's agents. It is believed that the carefully devised rules adopted for the government of employes, as well as the protection of passengers, and the able and complete enforcement of them by the officers of the company, has contributed largely to this gratifying result.

With the requisite economy pervading all branches of the service, and other favorable results to be derived from careful and competent management, we, as stockholders in the Manhattan Company, need not be considered unduly sanguine if we look forward to largely augmented net earnings, and, consequently, an enhanced value to the company's securities.

Illinois Central Railroad.

During the month of October, 1880, the traffic on the lines operated by this company was : (estimated)

In Illinois	$675,091 60
In Iowa (Leased Lines)	185,033 00
Total	$860,124 00

The traffic for the same month in 1879, on the same mileage was : (actual)

In Illinois	$625,948 94
In Iowa (Leased Lines)	181,910 21
Total	$807,859 15

During October, 1880, the Land Sales were 2,141 08 acres for $13,196 92, and the cash collected on Land Contracts was $13,516 63.

L. A. CATLIN, Secretary.

North Pennsylvania Railroad.

The dividend periods of this company are quarterly, beginning May 25 and continuing quarterly thereafter at the rate of 6 per cent per annum for the first two years from the date of the lease ; for the next succeeding two years thereafter at the rate of 7 per cent per annum ; for the next succeeding two years thereafter at the rate 8 per cent per annum. These payments are subject to a 5 per cent deduction from the face of each dividend payment to go to the formation and maintenance of a contingent fund. The dividends have been paid regularly in the past from the date of the lease, which was May 14, 1879. Notice is already given that the November quarterly dividend of 1½ per cent will be paid, less 5 per cent for contingent fund, on the 24th instant.

The Pennsylvania Company has assumed control of the Massillon and Cleveland railroad, which will hereafter be operated as the Massillon branch of the Pittsburg, Fort Wayne and Chicago railway, with Mr. George S. Griscom as Superintendent.

RAILROAD AND CANAL DIVIDEND STATEMENT.

Showing the amount of Stock Outstanding, the Dividend Periods and the date of last Dividend.

Commerce of New York.

The foreign imports at New York for the month of October, 1880, are officially stated as follows:

	1879.	1880.
Entered for consump'n.	$16,262 046	$15,544 936
Do. for warehousing....	4,504,436	6,920,298
Free goods..	9,939,689	11,500,527
Specie and bullion....	18,303,539	16,248,590
Total entered at port..	$49,009 710	$50 214,351
Withdrawn fr.wareh'use	7,140,151	9,036,000

The foreign imports at New York for ten months from January 1, were:

	1879.	1880.
Entered for consump'n	$133 501,823	$197.844,038
Do. for warehousing..	58 204,088	100,213,196
Free goods.....	76,802,040	104,418,365
Specie and bullion....	58,503,528	49,758,972
Total entered at port..	$327,011,429	$452.234,571
Withdrawn fr. wareh'se	57,427,658	77,464,532

The duties received at New York for the ten months ending with October, were:

	1879.	1880.
January	$7,655,552 67	$11,960,677 78
February	8,229,362 06	12,254,602 24

Do. exclusive of specie	292 285,236	346,236,050

New Use for Mineral Wool.

Mr. Wentworth Scott recommends the employment of mineral wool as a disinfectant. By impregnating the mineral wool with carbolic acid, thymol, or iodine, for instance, and passing a current of air through the mass, which, for such purpose is conveniently contained in a box or case the opposite sides of which are perforated, the air will be incapable of communicating disease germs, however foul it may previously have been: If eucalptus oil or other odorous substance be substituted for the preceding, the wool will impart an agreeable fragrance to the air currents passing through it. The mineral wool may be renewed at any time, even if charged with much dust and organic matter, by simply baking in a hot oven for a short time, and can then, of course, be charged again. Mr. Scott proposes to use these hygienic screens in connection with the doors and windows of hospitals, schools, public buildings, and private dwellings. A form of safety respirator, for the use of nurses, and others, on the same principle, is also suggested.

Old Colony Railroad.

The earnings of this road for the years ending September 30, 1879 and 1880 were as follows:

	1879.	1880.
From passengers ...	$1,493,768 24	$1,797,238 55

Sundry worthless acc'ts..	6,715 08	
		77,297 93
Surplus Sept. 30, 1880.....		$754,619 04

In this surplus account is contained the proportion of the dividend to be made Jan. 1, 1881, derived from four months' earnings of the railroad, and the taxes for the current year, which are payable in November. The balance is invested in supplies and materials necessary for the operation of the road.

In the foregoing accounts are included the earnings, expenses, and rental of the Boston, Clinton, Fitchburg and New Bedford Railroad for the year. As our accounts for the year 1879 covered only eight months of the operations of this road, its earnings and expenses for the remaining four months are added for comparison.

Gross earnings for the year ending Sept. 30, 1880....		$3,518,769 56
Gross earnings for the year ending Sept. 30, 1879.. ....$2,828,487 38

Taxes for the year ending Sept. 30, 1880		$92,719 95
Taxes for the year ending Sept. 30, 1879		91,922 59
Increase in taxes paid		$797 36
Balance of interest for year ending Sept. 30, 1880		$327,841 53
Balance of interest for year ending Sept. 30, 1879		374,180 95
Decrease in interest account....		$46,339 42
Net income from business in year ending Sept. 30, 1880....		$492,260 53
Net income from business in year ending Sept. 30, 1879....		412,104 91
Increase in net income....		$80,155 62

The foregoing tables show that the business has been fairly prosperous during the current year. The expenses have been considerably increased by liberal expenditures upon the road and equipment, as will appear later in the report. The connection with the Boston, Clinton, Fitchburg and New Bedford Railroad Company has proved advantageous.

The equipment has been improved and increased by the purchase of seventy-two freight cars and fifty coal cars; and two new locomotives have been bought and five have been built in our shops to take the place of the same number of old ones sold or broken up. Four passenger cars and two baggage cars, forty-seven freight cars and twenty-nine coal and gravel cars have also been built to replace old ones.

Four thousand tons of steel rails, and 200,951 new sleepers have been laid down. The track has never been in better condition than it now is, there being 161 miles of steel track in the main line, and 52 miles on the leased line.

New station houses have been built at Monument Beach and Barrowsville and a new freight house at Marlboro'. In Boston an addition to the train house 225 feet long and 70 feet wide has been built, and in South Boston a new freight house of corrugated iron 254 feet in length by 87 feet in width; 27,737 feet of new side track have been laid, and extensive improvements made on the road-bed and fences. New draw bridges have been built in the bridges over the Neponset and Wareham Rivers, and a new iron draw bridge over Fort Point Channel. The above improvements have been charged to the expense accounts and paid for from earnings.

Lands for the use of the company, costing $3,123 60, have been purchased at various points, and a very important purchase has been made at Fall River. The company has heretofore done all its business in connection with the New York boats, and most of its local freight business at this important station upon lands leased from the Fall River Iron Works Company. The rental paid last year was $15,000, in addition to the taxes on the property, $3,579 87. The company has before attempted, without success, to purchase this property. In the past year the desired opportunity offered and the company has purchased about 416 481 feet of land and wharves at a cost of $280,500. By the removal of buildings and alteration and extension of tracks greatly increased facilities for business have been obtained. A new freight house, 329 feet in length and 60 feet in

width, for the local business of Fall River, is nearly ready for occupancy. The cost of these lands and buildings has been added to the construction accounts.

During the year 4000 shares of new stock have been sold for $136,750. The money derived from this source has been used to meet the indebtedness incurred by the purchase of the lands at Fall River and to pay the maturing liabilities. Notes amounting to $210,250 have been paid, and of the bonds falling due October 1, 1880, $127,500 have been retired and canceled. For the payment of the bonds, $50,000 has been received from the Trustees of the Sinking Fund established by the South Shore Railroad Company. The outstanding debt has thus been reduced by the sum of $337,750. Of the debt $81,645 26 is in the form of notes payable, and of this $50,000 has been paid at the date of this report.

The business with New York has been very large during the year. The rates for both freight and passengers have been low, but the profits have been satisfactory. The steamboat company, in which our interest is large, has carried a considerable amount to its reserved profit account, and is now nearly free from debt. It is proposed to build a new boat, to be in all respects equal to the Providence and Bristol, to be ready to run upon the line in the course of the next year.

During the year the sum of $70,582 85 has been paid in settlement of claims growing out of the Wollaston disaster. This has been paid out of the surplus reserved for the purpose in the accounts of last year. All claims have been adjusted. There are some small accounts still to be paid, the payment having been delayed by attachments under trustee process or otherwise.

The increase in our business renders it imperatively necessary to construct a double track between Somerset Junction and the stations in Fall River, Some progress has been made in this direction by purchase of land and grading the road. As there may be some difficulty in procuring by purchase all the land necessary for this purpose, the directors ask for authority to take the same under an act of the Legislature, to be applied for at the next session. A vote for this purpose will be presented at the annual meeting, upon which the Directors ask favorable action by the stockholders.

In the next year $265,500 of bonds issued by the Cape Cod Railroad Company, and $125,000 of bonds issued by the South Shore Railroad Company, which have been assumed by this company, become due. The directors have already sufficient power, under votes of the stockholders, to provide means for their payment. They now bear interest at the rate of seven per cent, and can be funded at a much lower rate.

The earnings of the company show a considerable surplus over its current expenses and interest charges, and the dividends paid of six per cent on the capital free from all taxes.

In the expenses is included the cost of valuable and expensive improvements made to the property of the company, by which its value is increased. But in our long line of road, with increasing business, the demand for improvements and increased facilities at many points is constantly urged upon us. The cost of such improvements and additions can only be met by using a part of our income for the purpose, or by increasing the capital, and the directors have considered it the best policy, for the past year at least, to use the income, after paying a dividend of six per cent upon the stock, for the improvement of the property. Out of the net income of the year $70,000 has been credited to improvement account, to be applied to future improvements to the property

The business of the company has been safely done, and there are but few unsettled claims now outstanding

The equipment of the road is as follows: 65 passenger 1 freight, and 13 switching locomotives; 213 passenger, 55 baggage, 632 long box 32 (20 ft.) box, 71 short box, 6 short caboose, 682 long platform, 40 cattle, 72 six wheel stone, 28 short platform and 1,000 coal and gravel cars. Number of miles run by passenger trains, 1,357,725; by freight trains, 790,641; by gravel trains, etc., 318,192—total miles run in 1880, 2,466,558, against 2,016,908 in 1879, an increase of 449,650. Number of passengers carried in 1880, 5,526,279; in 1879 4,619,636. Passenger carried one mile, in 1880, 89,502,519; in 1879, 51,307,736. Tons of merchandise carried the past year, 1,371,449; do. in 1879, 1,013,696. Tons carried one mile in 1880, 51,169,628; do. in 1879, 42,450,366.

President.—CHARLES F. CHOATE.

Directors.—Uriel Crocker, Fred. L. Ames, Chas. F. Choate, Samuel L. Crocker, William J. Rotch, John J. Russell, Thomas J. Borden, Royal W. Turner, Francis B. Hayes, Ephraim N. Winslow, John S. Brayton, Elisha W. Willard, George Marston.

Treasurer.—JOHN M. WASHBURN.

Superintendent.—J. R. KENDRICK.

Articles of incorporation have been filed with the Secretary of State of Ohio of the Cincinnati, Georgetown and Portsmouth Railroad Company, being a reorganization of the Cincinnati and Portsmouth Railroad Company, by purchasers at judicial sale.

The Pittsburgh, Titusville and Buffalo Railway Company has raised the money and will begin work at once on the branch from Brocton and Buffalo, thus making an actual commencement on their part of the numerous proposed lines which will form a new network of railways, of great importance to oildom.

PITTSBURG, CINCINNATI AND ST. LOUIS RAILWAY COMPANY,

OFFICE of the CHIEF ENGINEER, COLUMBUS, Ohio, Nov. 5, 1880.

NOTICE TO CONTRACTORS.

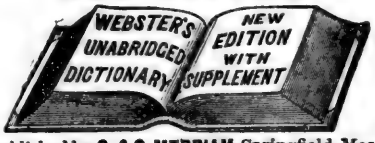
Sealed propoposals will be received at the office of the undersigned until Saturday, November 20, 1880, for the excavation of a tunnel 3,300 feet long and the partial timbering of the same, together with the excavation of the approaches near Gould's Station, on the line of the Pittsburg, Cincinnati and St. Louis Railway, 7 miles west of Steubenville, Ohio.

Plans and specifications of the work can be seen at this office after November 3, 1880, or they will be sent by mail to parties applying for the same.

M. J. BECKER, Chief Engineer,
Pittsburg, Cincinnati and St. Louis Railway Co.

Pennsylvania R. R. Co.

TREASURER'S DEPARTMENT.



PHILADELPHIA, November 1, 1880.

The Board of Directors has this day declared a semi-annual dividend of THREE PER CENT and an extra dividend of ONE PER CENT on the Capital Stock of the Company, clear of all taxes, payable on and after November 30th to stockholders as registered on the books of the Company at 3 o,clock P. M. October 30th, 1880.

For the purpose of distributing a portion of the shares purchased from the city of Philadelphia, the option is given to the shareholders of accepting the extra dividend of ONE PER CENT in scrip, convertible into the stock of the Company at par when presented in sums of Fifty Dollars; provided the said option shall be exercised on or before December 21st, 1880, after which date all outstanding scrip will be paid in cash.

JOHN D. TAYLOR,
Treasurer.

The Coal Trade.

The leading coal carrying companies make the following reports of their tonnage for the week ending November 9, and for the year to the same date, compared with their respective amounts carried to the same time last year :

	Week.	1880.	1879.
Reading Railroad ...	140,502	6,550,507	7,562,591
Schuylkill Canal	13,025	453,358	834,939
Lehigh Valley	115,014	4,201,565	4,033 642
Del., Lack. & Western.	83,598	2,949.474	3,223 776
Shamokin Valley	16 183	766,730	770,226
Central New Jersey..	63,724	3,168,027	3,441,228
United New R. R. of Jersey	22,596	953,430	775,109
Pennsylvania Coal ..	27,181	936,068	1,222.033
Delaware and Hudson	68,777	2,514,820	2,874,643
Huntingdon & Broad Top Mt.....	8,636	369,122	267,885
Penn. and New York.	26,236	1,040,132	1,118,829
Clearfield, Pa.....	35,520	1,426,460	1,367,943

The total tonnage of anthracite coal from all the regions for the week ending November 6, as reported by the several carrying companies, amounted to 564,191 tons, against 569,005 tons in the corresponding week last year, a decrease of 4,814 tons. The total amount of anthracite mined for the year is 19,752,759 tons, against 22,382,645 tons for the same period last year, a decrease of 2,629,886 tons. The quantity of bituminous coal sent to market for the week amounted to 92,803 tons against 47,333 tons in corresponding week last year, an increase of 45,470 tons. The total amount of bituminous mined for the year is 8,727,643 tons against 2,932,537 tons for the corresponding period last year, an increase of 795,046 tons. The total tonnage all kinds of coal for the week is 653,994 tons, against 616,338 tons in corresponding week last year, an increase of 40,656 tons, and the total tonnage for the coal year is 23,780,402 tons against 25.315,242 tons to same date last year, a decrease of 1,834,840 tons. The quantity of coal and coke carried over the Pennsylvania Railroad for the fourth week of October was 158,886 tons, of which 124,140 tons were coal and 34,246 tons coke. The total tonnage for the year thus far has been 5,885.987 tons of which 4,440,740 tons were coal and 1,445,247 tons coke. These figures embrace all the coal and coke carried over the road east and west. The shipments of bituminous coal from the mines of the Cumberland coal region during the week ended Nov. 6 were 44,919 tons, and for the year 1,815,925 tons—an increase of 510,476 tons as compared with the corresponding period of last year. The coal was carried as follows : Baltimore and Ohio Railroad—week 21,721 tons, year, 1,075,341 tons ; increase over 1879, 306,143 tons. Chesapeake and Ohio Canal—week, 17 964 tons ; year 547,613 tons ; increase over 1879, 145,051 tons. Pennsylvania Railroad—week 5,234 tons ; year, 193,249 tons ; increase over 1879, 59,560 tons. The Reading Railroad for the week ending last Saturday, November 13, carried 187,000 tons of coal, of which 12,700 tons were sent to Elizabethport and 13,400 tons shipped from there, and 45,500 tons sent to Port Richmond and 34,500 tons shipped from there.—Phil. Ledger, Nov. 15.

The earnings of the Chesapeake and Ohio Railway for the month of October, 1880, were $211,819.95 ; for the month of October, 1879, $183,325.69—increase in 1880, $28,494.26. For the first ten months in 1880, $2,200 617.21 ; for the first ten months in 1879. $1,607,814.73—increase in 1880, $592,802.48.

The last rail was laid on the 15th inst. upon the Wisconsin and Minnesota Railroad between Abbotsford and Eau Claire, completing a new line from Central Wisconsin to St. Paul.

The Capital Stock of the Ohio Central Railroad Company has been increased from $4,000,000 to $4,400,000.

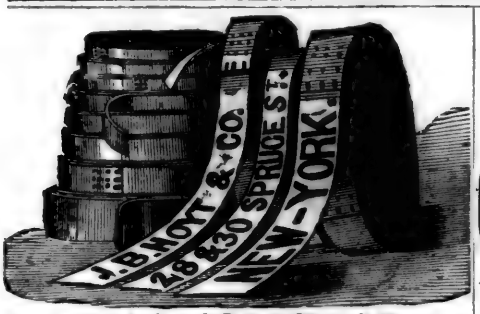
VALENTINES VARNISHES

OUR CLAIMS.

We claim that our Finishing Varnishes are unsurpassed in the following qualities:

1. Uniformity. 3. Fluency. 5. Drying. 7. Fulness. 9. Durability.
2. Paleness. 4. Reliability. 6. Hardening. 8. Brilliancy. 10. Economy.



All know it is easy to make a Varnish that has the single quality of DURABILITY, but Varnishes which wear well are generally inferior in color and working quality, uncertain in laying, too slow in drying, or lacking in body or lustre, and frequently they possess ALL these defects.

In our "RAILWAY-COACH FINISHING" the ten qualities will be found combined, and our other Varnishes are as elastic and durable as is practicable for the work on which they are employed.

Those of our Varnishes which have the greatest durability require time for hardening. They have superior elasticity, and ARE DISTINGUISHED FOR THE EXTENT OF SURFACE THEY WILL COVER, WHICH RENDERS THEM ECONOMICAL.

VALENTINE & COMPANY,

Chicago. NEW YORK. Paris.

Patent Stretched and Patent Riveted Short Lap

BELTING.

Our Belts are made from pure Oak Tanned Butts, and of the heart or solid part only. No part of the shoulder being used. Any one not familiar with Belt making can readily detect this by the shortness of the lengths and laps. Long laps are made including the shoulder or thinner and softer part of the Leather, causing the Belt to be, in its enduring qualities, no better than its poorest or thinner parts

Our Belting is warranted to run straight and maintain an even bearing on the pulleys, and sold under the fullest Guarantee.

STEAM NAVIGATION, COMMERCE, FINANCE, BANKING, MACHINERY, MINING, MANUFACTURES.

SECOND QUARTO SERIES, VOL. XXXVI., No. 48.] NEW YORK, NOVEMBER 27, 1880. [WHOLE No. 2,327, VOL. LIII.

The First Railroad in New York City.

PERIL OF OLD TIME CITY TRAVEL—EARLY DAYS OF THE 4TH AVENUE STREET CAR LINE.

Gliding along over the elevated rails on a twenty minutes uptown trip, whizzing past third story lights, plunging into and out of electric glare and patches of darkness, up in the region of singing telegraph wires and sign-bearing chimnies standing like sentries on the lower housetops, there is hardly time to think of danger before the little puffing engine with a consequential snort and a jerky good-night has landed you on a solid platform safe and thankful that the elevated road has made a warm dinner possible to you. There is no time to be timid in these days of a-mile-a-minute locomotives, and probably there is not much more cause for fear than there was in the time of racing stage coaches and ambitious drivers, whose measure of glory was the number of collisions in which they came out at the "top of the heap." Fifty years ago in New York the peril of city travel was as much in the minds of those going up-town as it is to-day. There was great rivalry among the stage lines where the degrees of rapid transit depended upon the fleetness of horses and the recklessness of drivers, and the danger arising from it was one of the strong arguments used in favor of giving street cars a trial.

It is not a little interesting to look back upon the enthusiasm felt in the laying of the first car track in New York. By an ordinance of the city in January 1832, permission was given to "The Harlaem Railroad Co." to lay its tracks from 23d street "through the center of the 4th, or Broadway avenue, to Harlaem River, at a point about 300 yards above the bridge." We said at the time, that is the editorial "we" of THE AMERICAN RAILROAD JOURNAL Jan. 14, 1832, said: "It is intended that this road shall be constructed in the most permanent manner, with double tracks, and the cost to be about $50,000 per mile. Application will be made to the legislature at its present session for permission to continue the railroad down to 14th street; and to such other part of the city as the corporation may permit. There is little doubt but this will prove a profitable investment to the stockholders, even if no other use should be made of it than for passengers. It is, however, so located as to meet the road now in contemplation from Albany to New York, on the east side of the Hudson river, a more particular account of which we hope to be able to give in our next number." Mr. John Stevens, of Hoboken, N. J., wrote to the JOURNAL, Jan. 18, 1832; "It would surely be a very important object to render it practicable to continue the railroad through Broadway as far as Trinity Church, opposite Wall street. That this can be effected, without any impediment to the passage of carriages of every description, I feel the utmost confidence." Broadway was more like a country road in those days, and it is a matter of no little surprise, as well as a particularly good piece of fortune for New York, that the city fathers did not fall wholly kindly to Mr. Stevens' idea of giving the up-town people (14th street was then decidedly "up-town") a chance to exchange their morning drives and promenades to Trinity, for the novel luxury of street car rides. The Board of Aldermen, however, on May 4th, 1832, granted the railroad company the privilege of laying a single track from 23d street, down Broadway to Prince street, and also down the Bowery to Prince street. There was some opposition though even to this extension, as is shown from the fact that at the meeting of the Aldermen the vote stood ten in favor to three against granting the privilege.

The ceremony of breaking ground for the first railroad in the city, was an event of great importance, and was duly celebrated as such after the old substantial manner of those hearty days, on the 25th of February, 1832. New York turned out en masse on "Murray Hill and the Fourth avenue," and made a day of it. Thirteen drill holes had been driven into the solid rock, for the projectors began their attacks upon the most solid obstacles, and the "ground breaking" was really a breaking of rock. With the explosion of thirteen heavy blasts and an unlimited amount of pent up rhetoric and enthusiasm the first railroad was welcomed to the Island, which within half a century was destined to be the scene of that wonderful form of rapid transit construction which is the marvel of the world and the envy of many cities whose aspirations are greater than their needs or enterprise and daring, whichever it may be. The President of the "New York and Harlaem Railroad Company," Campbell P. White, Esq., being in Washington, at his post in Congress, the chief address of the day was delivered by John Mason, Esq., vice-president. There was cheering and shouting which made the rocks ring, and then the boys went off in rabbit hunting and coasting parties over the wilds of Murray Hill and beyond, while the dignitaries betook themselves to Hinton's, at the old Shot Tower Hotel, where a collation was spread and most zealous and interesting efforts made to launch the success of the Harlem Railroad project in seas of champagne and apple jack. It was a night of hilarity and good feeling, and with the celebration of Washington's birthday two days before made the week one of unusual gayety and importance to the worthy and celebration loving citizens.

An illustration of the way in which the project was received by the press is seen from the following comment in the *Courier & Enquirer* of the day of the celebration, which, as General James Watson Webb's paper, will be well remembered by all good Whigs of that time as one of the leading dailies of fifty years ago; "Thus commences a single link in that great chain of internal improvement which is to reach from New York to Buffalo, and which, without fatigue and at moderate expense, will carry our citizens to Albany in a few hours." The company after once starting its work had a great deal to encounter in the opposition to the extension of the line to the lower parts of the city. Up among the pasture lands and rocks of Murray Hill only natural obstacles had to be encountered, but down in the inhabited parts of the city below 23d street a strong opposition arose from timidity and motives of rivalry, and also from a fear that through granting a right of way the use of steam locomotion might be forced into the thoroughfares. The strongest objection, however, was remedied by the legislature en-

acting that no carriage or vehicle should be propelled by any other than horse power through any street south of 14th street. There was no little risk assumed by the projectors, as the life of the road, by a provision of the charter, was entirely in the hands of the city fathers, who were empowered to remove it at a months notice if it should prove to interfere with the future regulations of the city, or the ordinary uses of any street or avenue, of which the Mayor, Aldermen and Commonalty were to be the sole judges.

One morning in June, 1832, the editor of the AMERICAN RAILROAD JOURNAL, as he says in the paper that day, took a short walk and passed the scenes of track laying of the down town extension and expresses himself as "gratified to find that the rails, or rather the stone sills for the reception of the iron rails, are laid between 14th and 12th streets and that they will in a very short time be completed as far down as Prince street; when our citizens will have an opportunity of witnessing the manner of laying rails along paved streets, as well as the greater safety of using carriages on a railroad in cities, than in any other way, as they move directly forward and are entirely under the control of the driver, who can check his horse with one hand and move his lever, which stops the carriage, with the other. There will be no racing and in truth no *danger* to be apprehended." The road was completed from Prince street to 84th street in the Spring of 1834. From Prince street to 14th street it consisted of a single track laid on granite sleepers, while from 14th to 84th street it was a double track most of the way, though above 23d street wooden sleepers were used. The cars were divided into three distinct apartments, or some of them were, each apartment accommodating eight or ten persons. They were entered at the side, and in their make up were considered quite luxurious. Cars were run for the first time over a part of the road, to "Murray's Hill," in June, 1833, a little over a year after the ground was broken. In June of the following year cars were run to Yorkville every half hour, and people congratulated themselves on the frequency of the trips. It was announced with great satisfaction at the time that during the first year "probably 150,000 passengers have rode upon it;" the New York and Harlem, more familiarly known as the Fourth avenue line, between City Hall and 86th street, carried 8,281,126 passengers during the year ending October 1, 1879.

With the elevated roads carrying 60,000,000 passengers a year and their managers able to claim that not one passenger was killed or injured last year through carelessness or fault of their agents, the following from an earnest plea in the JOURNAL of June 21, 1834, in favor of an extension of the "Harlaem Railroad" and safer methods of travel than the stages afforded, seems at least quaint. "The cars are elegant and commodious, drawn by horses. The fare is 12½ cents. When the road shall have been brought down to Wall street, as it should and will be—when the citizens become satisfied that it is not only easier, and cheaper, but far less dangerous than the omnibuses—thousands will ride where there are now only hundreds; and thousands will ride out and take the fresh air and a view of the green fields, who now never or seldom enjoy that luxury; those living at the extremes may intercharge civilities without the expense of a hack, or the inconvenience of being jammed into an omnibus, and *the risk of a race on Broadway with a rival line.*"

Boston and Providence Railroad.

The earnings of this road for the year ending September 30, 1880, were:

From passengers		$776,362 87
" freight		486,724 85
" rents		19,895 08
" express		30,202 34
" mails		11,240 49
		$1,323,925 63

And the expenses were:

Repairs of roadbed & track	$78,425 74	
" locomotives	55,501 94	
" passenger cars	50,133 62	
" freight cars	38,475 54	
" bridges	30,586 92	
" building, etc.	40,478 58	
Renewal of ties	19,718 35	
Agents and station service	164,808 99	
Passenger train service	48,312 54	
Freight train service	22,983 77	
Fuel for locomotives	86,379 72	
Locomotive service	75 639 50	
Oil and waste	10,658 26	
Station supplies	15,336 76	
Salaries of officers & clerks	29,254 00	
Taxes	81,048 84	
Attleboro Branch rent	11,560 70	
Interest account	47,026 77	
All other expenses	46 907 32	
		948,772 86
Balance carried to profit and loss		$375,152 77
Add balance from previous year		434,503 52
Total		$809,656 29
Dividend paid May 1, 1880, $4 per share		$160,000 00
Dividend payable Nov. 1, 1880, $4 per share		160,000 00
Estimated depreciation in Providence, Warren and Bristol Railroad stock.		98,345 00
Balance to new account		391,311 29
Total, as above		$809,656 29

The gross receipts for the fiscal year, 1879-'80, were $1,323,925 63, the expenses $948,772 86, and the net earnings $375,152 77; for the fiscal year, 1878 '79, the gross receipts were $1,178,238 29, the expenses $846,862 16, and the net earnings $331,376 13—showing an increase in gross receipts of $145,687 34, in expenses of $101,910 70, and in net earnings of $43,776 64. The report says:

A dividend of $5,740 on your investment in the Union Freight Railway was credited to interest account.

One year's back dividend on the preferred stock of the Providence, Warren and Bristol Railroad has been carried to the reduction of the common stock.

The investment in this short road of 18.6 miles was made in 1873, at a high cost in currency, and by the assent of the stockholders for the time being, for the purpose of holding some control of the eastern shore of Narragansett Bay.

The common stock can be of little or no value for an indefinite period. The profit and loss account of most railway corporations represent no money reserve, and as that of this road simply represents the gradual accumulation of over forty years expended on branches, road-bed, stations and equipment, your directors have thought it proper to reduce the valuation of these common shares to five dollars each, by a direct charge to profit and loss account, thereby making the balance sheet more strictly accurate.

By this measure, any receipts from the investment in the Providence, Warren and Bristol Railroad may hereafter be legitimately carried to the reduction of the present debt, largely represented by the purchase of the Providence, Warren and Bristol stock, to the reduction of interest account, or to the direct earnings of the corporation, as circumstances may require.

The equipment has been kept efficient by the purchase during the year of three locomotives, three passenger cars, one baggage car, ten dump and twenty-four box cars.

Four miles of track have been renewed with steel during the year. There are three miles of main track still equipped with iron, and in the several branches there are eight miles of steel rails.

All of the above mentioned purchases and outlays, have been charged directly to expenses.

The number of miles run by trains during the year was 852,292; do. in previous year, 811,856—increase, 40,426. Number of passengers carried during the year, 3,574,104; do. previous year, 3,206,488—increase, 367,616. Number of passengers carried one mile during the year, 42,990,453; do. previous year, 37,959,303—increase, 5,031,150. Tons of freight moved during the year, 669,468; do. previous year, 593,346—increase, 76,122.

TRIAL BALANCE, September 30, 1880.

Construction and equipment	$4,612,774 38
Stoughton Branch	85,400 00
Providence, Warren and Bristol Railroad Stock	152,065 00
Union Freight Railroad Company Stock	79,014 42
Real estate	198,450 34
Cash and cash funds	60,671 17
Notes receivable	77,825 00
Materials on hand	150,118 21
Balances due from other roads, etc.	82,263 70
	$5,498,577 82
Capital stock	$4,000,000 00
Seven per cent bonds, due 1893	500,000 00
Notes payable	380,000 00
Unpaid dividends	5,225 50
Dividend No. 88, due Nov. 1, 1880	160,000 00
Balances due other roads, etc.	62,040 43
Profit and loss	391,311 29
	$5,498,577 22

President.—HENRY A. WHITNEY.

Directors.—Henry A. Whitney, T. P. I. Goddard, J. Huntington Wolcott, William R. Robeson, Francis M. Weld, Joseph W. Balch, Royal C. Taft.

Treasurer.—B. B. TORREY.

Superintendent.—A. A. FOLSOM.

Articles of incorporation have been applied for at Ottawa, for a company to be known as the Ottawa and Western Railroad. The object is to secure a through line between Montreal and Chicago independent of the Grand Trunk. This is to be done by utilizing the North Shore Railway from Montreal to Ottawa, building a line to Toronto and there making connection with Credit Valley and Great Western Railways.

AMERICAN Railroad Journal. ESTABLISHED 1831.

PUBLISHED WEEKLY BY THE

AMERICAN RAILROAD JOURNAL COMPANY,

No. 31 PARK ROW, NEW YORK.

JOHN H. SCHULTZ - - - - President.

Subscription, Five Dollars per annum, in advance.

BRANCH OFFICE:

New York, Saturday, November 27, 1880.

Entered at the Post Office at New York, N. Y., as Second-Class Mail Matter.

AMONG the new features adopted by the AMERICAN RAILROAD JOURNAL, as appears on another page of this issue, is a department on counterfeit money It is intended to make this a permanent and authentic feature of the paper, and we believe it is one that will prove of great service and value to our readers. We are to receive from the U. S. Secret Service Division at Washington immediate notice of the discovery of counterfeits, which will be promptly published in the JOURNAL, and information in various forms will be given, through facilities which we have, so that this department may be taken as a trustworthy guide and assistant in checking the circulation of bogus money.

ALTERATIONS and improvements being made in the tables, which are weekly features of the JOURNAL, necessitate the temporary withdrawal of part of them. In the Bond List alterations are desirable, owing to changes among the roads, consolidations, etc., since our tables were revised. The Share List is naturally corrected at this season of the year, and as this is the time when much of the necessary information comes to us from our correspondents and from the railroads, the table, if published now, could not be as symmetrical and complete as we would wish. On these accounts we withhold these two tables until they are perfected and made of greater value than ever before, to accomplish which no efforts will be spared. We have added several important features to the JOURNAL recently and it seems desirable now that some of our tables should appear semi-monthly, monthly and quarterly instead of weekly, thus giving us an opportunity to lay before our readers more information and a greater variety each week. We shall announce the tables as they are to appear from week to week. The table of contents always gives those in the current number, and in future by referring to the files of the JOURNAL any of its tables desired can readily be found, and they will contain as late information as though appearing in each number, as we do not intend to withhold any tables that are of weekly interest. While adding new features to the JOURNAL, our aim is to retain and improve the old ones.

NEVER has this country or any other country witnessed the transportation of such an immense amount of freight as the way bills of our through roads have indicated for the last month. A few days ago the exceptional facilities of the New York Central road were hardly adequate to take the business that was offered. It was only by employing passenger engines and passenger train men that a blockade was avoided. The large increase of freight traffic upon the Boston and Albany gave rise to a unfounded report that the management intended to lay two additional tracks from the Hub to the Hudson. On the Fitchburg Road there are two thousand cars upon the side track in spite of the large number that are received and discharged daily and it is announced that the company are to build two large freight houses and provide other terminal accommodations as speedily as possible. The end is not yet; for as the resources of the great West are developed and proper terminal facilities provided at New York and Boston, grain and other freight will gradually augment until the present extraordinary amount of freight will be an every day affair.

AN interesting article published elsewhere shows how Railroads put an end to the practice of lawyers "riding the circuit" and made important changes in legal procedure. To-day the recent decline in coffee, of which the United States uses more than any single nation in the world, and five times as much as Great Britain, is owing to the same cause. Railroads recently constructed from Rio Janeiro, bring the coffee more speedily from the plantations, and steamers, which have taken place of sailing vessels, have greatly shortened the journey from Brazil. The trade in coffee is going through the same change as the trade in tea. The day for large firms buying immense quantities. to carry, has gone by. Orders by telegraph, shipments by steamer and small purchases have succeeded the slow but magnificent methods of a few years ago. If we look across the water we shall see evidences of the great influence that American railroads are weilding upon British national affairs. Our through trunk lines have so cheapened breadstuffs in the European market that the English and Irish farmers cannot compete with the American farmer, and pay the rents that they have paid in years past, and the present agrarian agitation in Ireland is the result. Europe has recognized the great importance that American systems of transportation have assumed; and the transactions of the national convention of shipowners were telegraphed entire to the London press and to the principal cities of Great Britain.

"The Railroads and the People."

In a recent article in *Scribner's Monthly* nearly if not quite all the abuses that have resulted during the past few years from the rapid increase of corporate bodies are attributed to railroad corporations. Mr. Thurber, after rehearsing dramatically several instances of freight discrimination, and several alleged cases of bribery by certain railroad managers, and quoting impartially from committe reports, public lectures and newspaper clippings, asks: "Can Americans, whose forefathers abolished the law of primogeniture and entail to avoid the evils of vast accumulations of wealth in the hands of individuals, afford to leave unregulated new agencies far more potent to that end than any which were at that time dreamed of?"

We have no time to discuss State laws affecting corporations generally, but if the statutes of the several States are examined, Mr. Thurber will find that upon no subject have legislatures enacted so many laws as upon that of railroad corporations. Several States have a Board of Railroad Commissioners, who are paid by a tax levied upon the railroad companies themselves, are transported whither they choose to go without expense, and are clothed with almost unlimited power. Such boards exercise general supervision over all railroads in their province, have access at any time to the books of every railroad company, compel compliance with the laws, insist upon repairs or the purchase of additional rolling stock when they deem it necessary, investigate the causes of any accident, demand copies of all leases, contracts and agreements for transporting freight and passengers, or any other information regarding the condition, management and operation of railroads.

Railroad Commissioners in the several States can and do hear and adjust all complaints concerning location of roads, stations, times of running trains, nuisances, mechanical appliances, discrimination in freight or passenger rates and other matters in dispute between citizens and railroad corporations, and from their decision there is often no appeal. Some States give their railroad commissioners or other State officers power to prescribe within certain limits rates for freight and passengers, and others, New York among the number, establish an arbitrary tariff for passenger rates, without regard to the "cost of service" or "what the tariff will bear." Most States provide that no railroad shall receive for transportation of freight a greater sum than is at the same time charged or received for the transportation of the like class and quantity of freight from the same original point of depar-

ture to a station at a greater distance on its road in the same direction, and that all persons shall receive *equal facilities* for the transportation of themselves or merchandise. The penalty is in some instances a considerable sum of money to be forfeited for each offence and to be recovered by the party aggrieved in an action of tort.

As we recall the various statutes of the different States we are surprised, not that railroad corporations are *unregulated*, but that they have been *regulated* so much by legislatures. The tendency is toward even greater restriction; the legislature of Vermont, according to newspaper report, has recently passed a statute forbidding a railroad corporation in that State to run even an engine on Sunday. Any one who has ever tried a case against a large corporation before a jury, or who has ever served as a member of a State legislature, well knows that there is a public opinion already created, the tendency of which is at least not to favor corporate bodies; and in too many cases this opinion, encountered among commercial bodies, as well as at jury trials and in legislative halls, is but the unhealthy growth of an unwarranted and unjust prejudice.

With regard to the charges of bribery and tampering with legislators made by Mr. Thurber against railroad managers, we say let all persons or corporations guilty of such crimes be punished as speedily as possible. We do not apprehend, however, that under a fair and full examination it would be shown, any more than it has been by Mr. Thurber's peculiar citations and assertions, that legislative bribery is more frequent, or that official corruption is more common to-day than it was twenty-five years ago, before this "tremendous development of corporate life" occurred. On the contrary we have reason to believe that it is becoming less frequent. At the last session of the legislature of Connecticut the whole State was shaken from one end to the other when it was discovered that the members had received season tickets at a nominal rate. The largest railroad corporation in Massachusetts and New England will not even issue trip passes to members of the State legislature, although the State is a large owner of its capital stock. Again, during the past year many railroads have, without the intervention of legislatures or a request from their patrons, voluntarily reduced passenger and freight rates upon branch roads not affected by competition.

If Mr. Thurber will look back for eleven years only and produce his way bills for eighteen hundred and sixty-nine, and tell us how much it cost him to get a ton of merchandise from Chicago to the seaboard, he may after all admit that railroads have, so far at least, been the benefactors and not the enemies of the people of this country. If he will recall the disastrous attempts of capitalists to control the wheat market last spring he may conclude that the time has not yet arrived when this vast country (any more than its "trade and transportation") can be controlled by any corporation or combination of men.

The article in *Scribner's Monthly* says that the revenues of railroads "under the present system are practically unlimited, all production and commerce in the sections through which they run being tributary to them, and extraordinary expenditure for counsel fees, election expenses or bribery funds are simply re-imposed upon the public," and to illustrate "the extent to which this power to tax is exercised" mentions the reputed wealth of several prominent railroad men. The relation between these fortunes specified and the taxation of sections through which railroads pass is perhaps not clearly evident, though the illustration serves a very good purpose in bringing to mind what the railroads and their projectors have done in making the sections they have opened productive of a revenue, not only of local but of wide-spread and national benefit, the tendency of which is to equalize and reduce taxation in the broadest sense, and the most lasting and beneficial manner. To the enterprise and ability of railroad projectors, conspicuously to most of those whose names were used for the illustration, is largely due our system of internal improvements which has made possible the vast increase to our State and national wealth and the development of our resources, witnessed during the past quarter of a century That they have been benefitted by their labors is fortunately a fact; but as great as has been their personal benefit how vastly greater has been the colossal wealth and abundance of resource which the railroads have given to the country and to the people!

In a new country like ours individuals as projectors of internal improvements could do but little by themselves; combined ability and capital could do and have done much; and corporations were an absolute necessity. Did it ever occur to the author of the article in question and to others who are assailing railroad corporations, that their illogical and inconsiderate affirmations resemble the talk of political demagogues? Did it ever occur to such men that selfishness and not the public good may lie at the bottom of this clamor against corporations without whose benefit the Empire State to-day and all New England and the great West would have been retarded twenty-five years in the march of improvements and civilization? It is a delicate thing to deal with the motives of men; but events develop largely the influences that work, unwelcomed though they be, with this uneasy class of so-called reformers. Passing events and circumstances attending the declamations against railroad and other corporations seem to indicate that closely allied to this clamor is the element which might be willing to have all the interests of the community, except its own, disturbed by the doctrines of Jacobins and Communists.

—It is rumored that a company is to be formed for the construction of a railroad from Boston to Nantasket Beach, the proposed route being from Boston through South Boston to Savin Hill, Commercial Point Neponset, Squantum, Quincy Point, North Weymouth and Hingham to Nantasket, terminating near the head of Long Beach. Another rumor is to the effect that the Old Colony Company contemplates building a branch road from Atlantic, running near Quincy Point and through North Weymouth to Nantasket.

The Steamer Anthracite.

Chief Engineers Loring, Ayers and Magee have reported to the Navy Department the result of their examination of the little steamer Anthracite. The vessel is constructed of iron and is schooner rigged, her length being 86 feet 4 inches and breadth 16 feet 1 inch. For twenty-four consecutive hours, on the 13th and 14th of August last, she was submitted to a thorough test at the Brooklyn Navy Yard. Though the schooner's speed was not ascertained the test was in other respects highly satisfactory. It was made for the purpose of ascertaining the cost of the horse power in water and fuel, to which end all the water evaporated by the boiler was carefully measured by tanks especially constructed for the purpose, and all the coal was accurately weighed, bag by bag, as it was brought on board for immediate consumption. The following passage is quoted from the report of the Board of Naval Engineers:

The especial feature of the vessel is her machinery, the boiler pressure carried being greatly larger than that in ordinary use under other systems. It was to demonstrate that such high pressure could be safely and efficiently utilized to furnish the motive power to a vessel on an ocean voyage that the Anthracite was sent across the Atlantic. Her successful passage and the efficient condition of the machinery upon her arrival here ought, we think, to remove all doubts as to the practicability of the system. Its economy, its superiority to the systems now in vogue and its future career must be determined by experience, of which the record and results of the trial will form an item.

Judge Key, in the United States Circuit Court, Nashville, Tenn., on the 18th inst., rendered a decision in the case of the Southern Express Company against the Louisville and Nashville Railroad Co. He granted a preliminary injunction, to continue until further order or decree of the court, restraining the railroad company from imposing upon or exacting from the plaintiff in the conduct of express business on the New Orleans, Mobile and Texas Railroad and Western Railroad of Alabama any terms or conditions not imposed at the time, and from disturbing in any way the enjoyment of the Southern Express Company of the facilities and means of conducting the express business on the lines mentioned.

The Richmond and Allegany Railroad has called on the State of Virginia to surrender another $50,000 in bonds deposited in the State treasury as security for the faithful performance of the work, the company having completed another twenty-five miles of railroad in accordance with agreement.

The George's Creek and Cumberland railroad has been completed to Jackson Mine, at Lonaconing, Md. There is about two and a-half miles on the west side of Lonaconing to be completed yet.

The Shenandoah Valley railroad is now in running order from Waynesboro', Va., to the Shenandoah iron works.

* For three weeks only of October in each year. † Three weeks only of September in each year.

Personal.

—Controller Knox is to address the Boston Merchants' Association at a dinner to-day, on the subject of "National Banking on the Gold Basis."

—Mr. E. F. Bishop of Bridgeport has been elected President, and Mr. Geo. W. Beach of Waterbury, Conn,, Superintendent of the Naugatuck Railroad.

—Mr. William J. Bradley, son of Justice Bradley of the Supreme Court of the United States was married to the daughter of Senator Cameron at Harrisburg, last week.

—Mr. Joseph Crawford, formerly Assistant Superintendent af the Shamokin Division, Northern Central Railroad, has been appointed Superintendent of the West Jersey Railroad.

—Col. Thos. A. Scott and the directors of the Texas and Pacific Railroad arrived at the end of the road, in Callahan County, Texas, on the 13th, when Mr. Scott drove the last spike on the last rail laid to that date.

—Mr. Edmund York, of Sacramento, Cal., has received the appointment of Assistant Chief Engineer of the Mexican Central Railway, building from the City of Mexico to the Rio Grande. Mr. York was formerly a member of the California State Engineer corps.

—Mr. William B. Thompson, Superintendent of the railway mail service, is certainly entitled to the sincere thanks of the business community for the enterprise he is showing in providing fast mail accommodations. He has just completed arrangements with the managers of Southern railways for a schedule of mail service that will gain an entire business day between Boston and New Orleans.

—Mr. William A. Paine and Mr. Wallace G. Webber, constituting the banking firm of Paine and Webber, 48 Congress Street, Boston, were this week admitted to membership in the Boston Stock Exchange. Both gentlemen have had a valuable experience in financial matters, having been connected with prominent Boston banks and banking houses. They have a large circle of business acquaintances and friends and are most cordially recommended to those of our city or elsewhere who have dealings in the financial market of Boston, or occasion to make investments in the securities made specialties of in that city, or in other stocks and bonds; the firm doing a general banking and brokerage business.

OUR BOSTON LETTER.

(From our regular correspondent.)

BOSTON, Nov. 23, 1880.

The past week has been characterized by an uninterrupted appreciation in value of all classes of railroad securities, with the most marked advance in those whose ability to earn their regular dividend is unquestioned. Closing prices compared with those a week ago show the following changes:

Advanced.

Boston and Albany	156	to	160
Atchison, Topeka and Santa Fe	133⅜	to	142
Boston and Maine	142¾	to	147
Boston and Providence	144	to	148
Boston and Lowell	103½	to	109
Cheshire	55	to	59
Chic. Burl. and Quincy	158¼	to	171
Chicago and W. Michigan	72½	to	73¼
Fitchburg	135	to	141
Fort Scott and Gulf, Pfd	119	to	120
Fort Scott and Gulf, Com	56⅜	to	62½
Kansa City, Lawrence and S.	89	to	92
Little Rock and Ft. Smith	59½	to	62
Marquette, Houghton and O. Com.	18⅝	to	22
New York and New England	41½	to	42½
(Hartford and Erie 7s)	43⅜	to	43⅞
Ogdensburg and L. Champ. Com.	22½	to	25
Old Colony	128½	to	124
Phil., Wilmington and Balt.	71⅛	to	73⅛
Pullman Palace Car Co.	121⅛	to	125
Revere Beach and Lynn	103	to	107
Rutland, Pfd	27	to	28¾
Summit Branch	18	to	20¼
Wisconsin Central, Com	13⅓	to	14¼
Wisconsin Central, Pref.	29	to	30
Flint and Pere Marquette, Com	22	to	25⅞
Flint and Pere Marquette, Pfd	74	to	80

Declined.

Cin., San. and Cleveland	183⅜	to	163⅜
Eastern	84⅞	to	83¾

The accounts of our Massachusetts railroads made up to September 30, 1880 have been submitted to the Railroad Commissioners, and in most cases the showing is very satisfactory.

The Boston and Albany earned for the year ending Sept. 30, 1880, 9.7 per cent net on its capital stock. The operating expenses were 63.6 per cent of the gross earnings.

The Boston and Maine earned for the year ending Sept. 30, 1880, 10 per cent net on its capital stock. The operating expenses were 55 per cent of the gross earnings.

The Boston and Lowell for the same time earned 6 per cent net on its capital stock. The operating expenses were 70 per cent of the gross earnings.

The Boston and Providence earned for the year ending Sept. 30, 1880, 9 5 per cent net on its capital stock. The operating expenses were 62 per cent of the gross earnings.

The Old Colony earned for the year ending Sept. 30, 1880, 7 per cent on its capital stock. The operating expenses were 63 per cent of the gross earnings.

The Fitchburg Railroad earned for the year ending Sept. 30, 1880, 8.5 per cent net on its capital stock. The operating expenses were about 67 per cent of the gross earnings.

The New York and New England road earned for the year ending Sept. 30, 1880, 1.45 per cent on its capital stock. The operating expenses were 67 per cent of the gross earnings.

The Boston, Revere Beach and Lynn narrow gauge railroad, earned 8 per cent net last year, and since its statement was published the stock has been in demand at advanced prices.

A large extent of wharf property on Mystic river between the navy yard and the Charlestown bridge has been bought and bonded in the interest of the Fitchburg Railroad Co. The piers are being enlarged and the channel improved, it is understood for the use of the Allan Line of steamers.

RAILROAD EARNINGS—MONTHLY.

Richmond, York River and Chesapeake Railroad.

At the annual meeting of the stockholders of the Richmond, York River and Chesapeake Railroad Company, held in Richmond, Va., on the 11th inst., the report of Mr. Thomas Clyde, the president of the board of directors, was presented showing that the gross earnings for the fiscal year were $172,335 21, expenses $96,368 41, making the net revenue $75,966 90, which to a large extent was expended in improving the road, &c. The gross receipts for the year just ended, as compared with those of the preceding year, show an increase of 38.9 per cent. The president in his report says that within the last few months of the fiscal year just closed purchases and combinations of properties have been concluded by connecting lines and interests from which may reasonably be expected a much larger increase in the business of the road, hence the board of directors have judged it to be the best and most economical policy to expend the revenues upon the property, thus preparing it at all times to meet the requirements of the rapidly increasing business in a prompt and efficient manner, in preference to making dividends upon its stock, looking to the permanent welfare and value of the road. The following officers and directors were elected for the ensuing year: Thomas Clyde, president; A. S. Warren, vice president; Reuben Foster, W. H. Gwathmey, B. F. Clyde and A. Stewart, directors.

Sealed proposals will be received at the office of the Engineer of Maintenance of Way, 233 South Fourth street, Philadelphia, until 9 A. M. of November 30, for all the graduation and masonry required to complete the roadbed for about fifteen miles of the Philadelphia and Long Branch Railroad, extending from Whitings to Barnegat Bay.

The last rail of the Watchung Railroad, which connects Orange with the Newark Branch of the New York, Lake Erie and Western Railroad, was laid on the 17th inst.

COUNTERFEIT COIN LIST.

GOLD COINS.

$1.

Standard weight 25.8 grains, least current weight 25.67 grains.
There are some counterfeits dated 1851-1852, light in weight. The new gold dollar 11-20th of an inch in diameter as counterfeited is dated 1861, light in weight, but very deceptive.

$2 50.

Standard weight 64.5 grains, least current weight 64.18 grains.
Some coins dated 1846, weighing only 48 grains instead of 64½—are in circulation.

$3.

Standard weight 77 4 grains, least current weight 77.02 grains.
Excellent counterfeits of this denomination have been issued and circulated.

$5.

Standard weight 129 grains, least current weight 128.36 grains.
The issues of 1844-1845-1847 have been imitated. The 1845 piece is 10 grains too light ; the 1847 coin is 13 grains too light.

$10.

Standard weight 258 grains, least current weight 270 grains.
The issues of 1801 and 1810 have been extensively counterfeited.

$20.

Standard weight 516 grains, least current weight 513.42 grains.
This coin has been sawed in two pieces, the center taken out and platinum or some other metal substituted. The *ring* is not perfect. Experts have also bored holes in the side and taken out about seven dollars worth of gold and then soldered the holes with gold.

The English Sovereign

has been imitated by plating so that the counterfeit is worth about three dollars and nearly as heavy as the genuine.

SILVER COINS.

Ten Cents.

Standard weight 38.58 grains.
Spurious dimes dated 1853 and 1875 are in circulation, the date 1875 has the appearance of a genuine coin.

Twenty-five Cents.

Standard weight 26.45 grains.
There are many deceptive quarters. Those bearing dates 1828 and 1860 are the most dangerous ; others bearing dates 1853, 1857, 1861 are not so well executed.

The Canadian 25 Cent Coin

has been extensively counterfeited. Large quantities of them have been circulated in the South and West.

Fifty Cents.

Standard weight 192.9 grains.
Half dollars have been successfully counterfeited. The one most likely to deceive is dated 1842, thickly plated ; another good imitation is dated 1876, plated with silver, exact weight, and good ring. The counterfeit bearing date 1874 is not likely to be taken.

One Dollar.

Standard weight 412.5 grains.
Counterfeits of the new one dollar silver coin first appeared about the first of April, 1878. The general appearance is good, the milling is well done, but the color is such as to readily distinguish it from the genuine. Look out for other new counterfeits better executed.

The Trade Dollar.

Standard weight 420 grains.
This coin has been variously and extensively counterfeited. One early imitation was dated 1876, made of a composition formed principally from type metal. The milling on the edge of the piece is very well done, but the piece is too thick and the inscription IN GOD WE TRUST, beneath the figure of Liberty, upon the obverse, is imperfect. This counterfeit was extensively circulated in the East Indies, China, Japan and other Oriental countries.
Many other imitations of the trade dollar have been produced and the latter specimens appear almost perfect. One of the last imitations is finely finished ; the various devices of the impress are accurate and distinct, and the ring is perfect. The piece is very deceptive, but it is about 1-32 of on inch undersize, and 115.5 grains underweight. It is of a dark color after having been handled, and has a smooth, greasy or quicksilvery feeling when rubbed between the thumb and fingers.

Note.

The Trade Dollar authorized to be coined by act of Congress February 12, 1873, has been formally recognized as a coin of the United States. The Trade Dollar was demonetized July 22, 1876, and its coinage was suspended by order of the Secretary of the Treasury, February 22. 1878. The circular of the Treasury Department of July 25, 1878, declares : "The United States Trade dollar also is not a legal tender, and therefore has only a bullion value." The average bullion value, of full weight trade dollars, is ninety-three cents and two tenths of a cent each. The Trade Dollar was intended for exportation abroad. It excels the Mexican silver dollar by two-tenths of a cent, and is of equal fineness (900) with the United States legal tender silver dollar and contains seven and one half grains more standard silver. At present though demonetized and refused by many banks and all Government offices, trade dollars are generally taken in trade without discount and may be commercially rated at the price they command for exportation. There is no allowance for abrasion in silver coins.

Tests.

Counterfeit silver pieces made of block tin washed over with quicksilver are easily detected by the ring. A genuine silver piece will feel rough enough under rubbing, while the counterfeit feels smooth and oily. Experienced persons detect spurious coins by the weight. The jeweler uses nitric acid for the detection of debased gold and silver. Scratch the coin with the knife and then apply the acid to the scratch. If the acid boils up greenish, the coin is bad ; but if it turns white the coin is good. The following test for determining whether silver is good or bad is known as the "Mint Test," although the tests employed at the Mint are weight and size :

24 grains nitrate of silver.
30 drops nitric acid.
1 ounce water.

A drop of this mixture will have no effect upon genuine silver but will blacken a debased coin. Persons handling large amounts of coin must rely upon the eye and the sense of touch.

Construction.

—The Marshalltown and North Eastern Railway Company has been organized at Des Moines, Ia, and is to build a line to connect with the Chicago, Milwaukee and St. Paul Railroad.

—At least 20,000 men are employed on the various lines of railroad now building in Mexico. A thousand men are at once to be put to work on the new road between San Louis Potosi and Tampico.

—The Southern Pacific Railroad is laying side tracks at Gage, twenty miles east of the Miembres river, New Mexico. Gage will be the base of supplies for some time to come, and is 199 miles east of Tuscon and 1,178 miles from San Francisco.

—It is expected that work will soon be begun on the extension of the Cincinnati, Wabash and Michigan Railway, from Goshen to Benton Harbor, Mich., on the north, and from Anderson to Rushville on the south.

—A narrow gauge railway, with cars to be run by steam, is to be built around the city of Denver, connecting the surburban precincts. A company has been incorporated for the purpose with a capital of $1,000,000. The road is expected to be in operation by April or May.

—The Ottawa and Western Railway scheme includes the building of a new line connecting Montreal with Chicago, independently of the Grand Trunk. From Toronto a connection will be made with the Credit Valley and Great Western railways, and so with the American system of railways.

—Preparations are making to get out a large quantity of sleepers for the standard gauge of the New Brunswick Railway this winter, and the work of the widening of the road will be undertaken next spring. Besides the extension to the Intercolonial at River Ouelle, an extension to Presque Isle is also talked of either by extending the road from Caribou or by an independent branch from the main line.

—Railroad officials have recently been looking over the country from Bellows Falls to Springfield and Windsor, with reference to building a railroad over that route on the Vermont side, and also from Windsor to Cornish, Claremont and Greenfield, N. H. It is said that a road on this last line would make the shortest route to Boston for all middle and northern Vermont.

—The work of building a new railroad from a point between Broadford and Connellsville, crossing the Youghiogheny river and striking a line to Washington, Pa., where a connection is made with the Hempfield road, is being pushed forward rapidly by the Baltimore and Ohio Railroad. This will tap the Connellsville coke region, and give the Baltimore and Ohio a new Western outlet.

—A party of surveyors are at work with a view to deepen the Fairford river and drain the surplus water of Lake Manitoba into Lake Winnipeg to prevent the drowning of land on the banks of the former. The work is estimated to cost a very large sum of money, and will, it is thought, effect to some extent navigation.

—Messrs. George Harris, of Wrightsville, and William H. Black, of Sunbury, Pa., have been awarded the contract by the United States government for putting in Lock No. 6, Great Kanawha Improvement, located on the left bank of the river, about four miles below Charleston, West Virginia. The contract is a very extensive one, and will occupy about two years time with a working force of over one hundred men

---

The gross earnings of the Cheshire Railroad for the year ending September 30, 1880, were $581,222, and the expenses $469,397, leaving $111,825 ; paid on bonds, etc., $47,153 ; net earnings, $64,672. This is an increase in the earnings over last year of $93,773, an increase in expenses of $59,703, and an increase in the net earnings of $34,289.

Organization.

—The old board of directors of the Monadnock Railroad Company have been re-elected, with H. K. French as president.

—At the annual meeting of the Port Rowan and Lake Shore Railroad Company at Port Dover, Ontario, William Collier, formerly of Patterson, N. J., was elected President and John E. Sterns Vice-President.

—The old board of directors of the Boston and Providence Railroad Company have been re-elected and the following officers chosen :—Henry A. Whitney president; Benjamin B. Torrey, treasurer; A. A. Folsom, superintendent; and Winslow Warren, clerk.

—The Edison Electric Light Company has elected the following Board of Trustees: Norvin Green, Tracy R. Edson, James H. Banker, Robert M. Galloway, E. P. Fabbre, Walter G. Miller, Robert L. Cutting, Jr., George P. Lowrey, John O. Green, J. F. de Navarro, Thomas A. Edison, Henry Villard and Lewis Roberts.

—The Memphis and Charleston Railroad Company has elected the following directors: E. Norton, George P. Beirne, E. W. Cole, F. H. Cossitt, W. W. Garth, L. Hanour, Napoleon Hill, C. M. McGhee, J. C. Neely, J. D. Rather, R. J. Wilson, Joseph Wheeler and Addison White. The old officers of the road are retained.

—The Third Avenue Railroad Company (New York) has elected the following directors :—Henry Hart, William Remsen, Louis Lyon, Thurlow Weed, Robert G. Remsen, Henry Morrison, John M. Samler, Samuel Willets, Malthy G. Lane, Henry C. Hoyt, John Watson, Archibald McMartin and Daniel. S. McElroy.

—A charter has been issued to the Combination Steel and Iron Company, formed for the purpose of doing business in the city of Chester, Pa. The capital stock is $200,000, in shares of $100 each. The directors are John Roach, New York; Charles A. Weed, Stamford, Conn.; Samuel Chalfin, New York; Jerome Keeley, Philadelphia, and John B. Beach, Chester.

—The following directors of the Lynn and Boston Railroad Company have been chosen: Amos F. Breed, Asa A. Breed, Philip A. Chase, of Lynn: Isaac Stebbins, William R. Pearmain, of Chelsea; William Sprague, Boston; John Reed, Boston; Thomas P. Proctor, Boston: E. Francis Oliver, Boston; George W. W. Dove, Andover. The directors have chosen Amos F. Breed, President, E. Francis Oliver, Treasurer and Clerk, and S. A. Green, Superintendent.

Interest and Dividends.

—The American Express Company has declared a dividend of $2.50 per share, payable Jan. 3.

—The Connecticut River Railroad Company has declared a dividend of $4 per share, payable Jan. 1.

—The Iowa Falls and Sioux City Railroad Company have declared a dividend of $1 per share, payable Dec. 1.

—The Car Trust of Pennsylvania announces a quarterly dividend of 1½ per cent on series C, D and E stock payable at the office of the Pennsylvania Company December 1.

—The Directors of the Fitchburg Railroad have declared a dividend of 3½ per cent from the earnings of the road for the past six months, payable the 13th proximo. This increase of ½ per cent over that of several previous semi-annual dividends indicates that the forthcoming report of the Company for the past year will make a favorable exhibit.

—The Delaware and Bound Brook Railroad Co., have declared a quarterly dividend of 1½ per cent on the capital stock of the company, less 5 per cent (retained for the contingent fund), said dividend to be credited to the stockholders as registered on the books of the company on the 18th, and payable on the 22d of November.

—The Board of Directors of the Chicago, Burlington and Quincy Railroad Company met in Boston on the 17th inst, and declared the usual quarterly dividend of two per cent cash. The question of a stock dividend was discussed, but it is understood that no definite action was taken and that the matter is still under consideration.

Manufacturing.

—Sixteen bridges are among the orders to be filled on the books of the Pittsburgh Bridge Co., some of them to go to Maryland.

—About thirty-three per cent more iron ore has been received at Ashtabula Harbor thus far this season than in the corresponding period of last year.

—The Edgar Thomson Steel Company are said to have sold all their production of steel rails for a year in advance, about 100,000 tons.

—Active business is reported at the Crescent Steel Works, Pittsburgh, Pa.; 472 men are employed on orders from nearly every State in the Union.

—The Glenwood Steel Works have been sold to parties connected with the National Tube Works at McKeesport, Pa. It is understood that the intention is to manufacture steel tubing for locomotive and other boilers, and that a portion of the old structure will be removed to give place to a new building.

—The passenger engine built by the Baldwin Locomotive works, which was designed to run ninety miles or the whole distance between New York and Philadelphia in ninety consecutive minutes, has justified all that was claimed for it having made several of the trips in the exact time, drawing six or seven cars.

—The Antietam Iron Works, located near the mouth of Antietam creek, in the Sharpsburg district, belonging to the Messrs. Ahl, of Newville, Pa., after a suspension of operations for several years, have been again put to work, and will afford employment to a large number of operatives in that region.

—The Pittsburgh Telegraph says that the Pittsburgh Spring Company has been experimenting with coke as a substitute for coal in nearly every department of its establishment, with most satisfactory results. Mr. French states that it effects a very important saving of expense, and avoids almost all the dirt and smoke, unavoidable when coal is used.

—Over 4,500 men are employed in the railroad shops of Altoona, Pa., and from $150,000 to $200,000 are paid them monthly. About ninety new locomotives were erected last year, 200 and upwards repaired and some 5,000 freight and passenger cars were turned out during the past year, not counting the vast number repaired.

—Colonel E. A. L Roberts, the Titusville torpedo millionaire, has invented an engine which it is expected will run 80 miles an hour and 100 miles without stopping. It will weigh 76,000 pounds. The driving wheels will be six feet in diameter, which is about half a foot beyond those of the ordinary engine. There will be a water chamber on the locomotive arranged in such a manner as to admit compressed air from the air pump to the top of the chamber, by which means a stream of water may be forced upon any hot bearing connected with the engine or tender, which provision is expected to meet that long standing difficulty in connection with hot boxes. The engine will be completed in the early part of the coming year.

American Railroad Journal.

Financial and Commercial Review.

WEDNESDAY EVENING, November 24, 1880.

Six per cent has been the ruling rate for call loans during the day, secured by stock collateral, and six per cent was bid for money for the remainder of the year. In the last half hour the rate for call loans at the Stock Exchange was offered down to 1½ per cent. The highest rate paid by stock brokers was 6 per cent, plus a commission of 1-16 of 1 per cent, and the lowest 1½ per cent.

The postal rates of the prime drawers of sterling are 4.81 and 4.83. The actual rates are 4.80@¼ and 4.82@¼. Cable transfers are 4.82¼@¾. Prime commercial bills, are 4.78¼@¾.

The Secretary of the Treasury refused the offer of 6s of 1880 at 102.87, but will continue purchases at 109¾.

The annual report of the United States Treasurer for the fiscal year 1880, submitted to the Secretary of the Treasury on the 22d inst., shows that on Nov. 1 bonds were held on account of the Pacific Railroad sinking funds, established by the act approved May 7, 1878, as follows: For the Union Pacific Railroad Company—Pacific Railway bonds, currency 6s, $192,000; funded loan of 1881, 5 per cent, $256,450; funded loan of 1907, 4 per cent, $81,950; total, $180,400. For the Central Pacific Railroad Company—Pacific Railway bonds, currency 6s, $119,000; funded loan of 1881, 5 per cent, $194,900; funded loan of 1907,

4 per cent, $198,300; total, $512,200. The Treasurer says: "The third section of the act provides that in making investments for these funds the Secretary of the Treasury shall prefer the 5 per cent bonds of the United States, unless, for good reasons appearing to him, and which he shall report to Congress, he shall at any time deem it advisable to invest in other bonds of the United States. Attention is invited to the disadvantage of investing these sinking funds in the bonds of the United States at the present high market rates, and it is suggested that the consent of Congress, by joint resolution, be obtained to the purchase for the purpose of any bonds of the United States, or of the first mortgage bonds of the two railroad companies authorized by section 10 of the Act of Congress of July 2, 1864, (13 Statutes 356,) and section 1 of the act of Congress of March 3, 1865, (13 Statutes 504,) which are the only lien upon the property of those companies prior and paramount to that of the United States."

The closing quotations on Wednesday were: Adams Express, 118@119½; American Express, 65@65½; American District Telegraph, 77@77½; Atlantic and Pacific Telegraph, 40@40½; Canada Southern, 72⅛@72¼; Central of New Jersey 81¼@81⅜; Central Pacific 85¼@86; Chicago and Northwestern, 124⅞@125; do. pref., 146½@147; Chicago, Burlington and Quincy, 170½@171½; Chicago and Alton, 141⅜@141⅝; Chicago, Milwaukee and St. Paul, 110⅛@110¼; do. pref., 123@123½; Chicago, Rock Island and Pacific, 124⅛@124⅞; Cleveland, Columbus, Cincinnati and Indianapolis, 82@82½; Columbus, Chicago and Indiana Central, 20½@21; Delaware and Hudson Canal, 89¾@90; Delaware, Lackawanna and Western, 100¾@101; Hannibal and St. Joseph 43½@43⅝; do. pref., 92⅞@93⅛; Illinois Central, 121⅞@122; Lake Erie and Western, 32⅜@32½; Lake Shore and Michigan Southern, 122½@122¾; Morris and Essex, 119¾@120⅛; Manhattan Elevated, 36@36⅛; Michigan Central, 115@115¼; New York Central and Hudson River, 146⅜@146⅝; New York, Lake Erie and Western, 47½@47⅝; do. pref., 78½@7 9½; New York, Ontario and Western, 29¾@29⅞; Ohio and Miss., 36¾@36⅞; Pacific Mail, 47¼@47½; St Louis and San Francisco, 39½@40; do. pref., 52¾@53; do. 1st pref., 81@82; St. Louis, Iron Mountain and Southern, 52⅛@52⅜; St. Louis, Alton and Terre Haute, 32⅞@33⅛; do. pref., 109⅜@109⅝; Union Pacific, 102¼@102⅜; United States Express, 53@54½; Wells Fargo Express, 112@114; Western Union Telegraph, 98⅜@98⅝; Wabash, St. Louis and Pacific, 42¾@43¼; do. pref., 78¾@78⅞.

The following quotations of sales of Railwa and other securities, for the week, are in addition to those given elsewhere in our columns:

In the United States Supreme Court at Washington on the 22d inst., in the case of the Pennsylvania Company, plaintiff in error, vs. Joseph E. Roy, who was injured by the breaking down of a berth in a Pullman sleeping car on one of the leased lines operated by the Pennsylvania Company, it was decided that the railroad company was responsible, notwithstanding the fact that the car was owned by a separate company. The case was remanded for a new trial, however, on the ground that evidence tending to increase the damages was improperly admitted in the court below.

Philadelphia and Reading Railroad.

Comparative statement of gross receipts, tonnage and passengers, of the Philadelphia and Reading Railroad Company, for the month of October, 1880 and 1879:

	1880. Month.	1880. Year to date.
Gross receipts:		
Railroad traffic	$1,563,794 50	$14,936,665 62
Canal traffic	111,891 99	708,387 61
Steam colliers	62,041 78	545,961 94
Richmond coalbarges	8 570 50	91,243 32
Total Railroad Co.	$1,746,298 77	$16,282,258 49
Reading Coal & Iron Company	1,260,026 37	10,376,553 12
Total of all	$3,006,325 14	$26,658,811 61
Tonnage and passengers:		
Tons of coal on railroad	719,415 11	6,410,004 04
Tons of merchandise	527,944 12	5,409,398 12
Passengers carried	921,470	9,048,277
Coal transported by steam colliers	44,388 00	498,916 00
Tons of coal mined:		
By Coal and Iron Co.	361,198 15	3 066,602 09
By tenants	133,493 02	1,096,722 15
Total mined from lands owned and controlled by Co. & from leasehold estates	494,691 17	4,163,325 04

	1879. Month.	1879. Year to date.
Gross receipts:		
Railroad traffic	$1,409,028 46	$11,797,694 01
Canal traffic	51,463 52	717,372 48
Steam colliers	57,003 78	594,470 76
Richmond coal barges	25,415 01	149,513 98
Total Railroad Co.	$1,542,910 77	$13,259,051 23
Reading Coal and Iron Co.	1,034 202 73	9,136,394 91
Total of all	$2,577,113 50	$22,395,446 14
Tonnage and passengers:		
Tons of coal on railroad	852,199 10	7,369 884 18
Tons of merchandise	531,760 02	4,328,797 14
Passengers carried	784,429	7,233,559
Coal transported by steam colliers	54,061 00	551,775 00
Tons of coal mined:		
By Coal and Iron Co.	440,464 02	3,880,960 03
By tenants	140,324 19	1,168 001 01
Total mined from lands owned and controlled by Co. and from leasehold estates	580,789 01	5,048,961 04

Comparative statement of business of the Philadelphia and Reading Railroad Company for October, 1880:

	1880. Month.	1880. Year to date.
Gross receipts	$1,746 298 77	$16,282,258 49
Gross expenses	1,125,643 43	11,809,975 69
Net profit	$620,655 34	$4,472,282 80

	1879. Month.	1879. Year to date.
Gross receipts	$1,542,910 77	$13 259,051 23
Gross expenses	1,068,382 00	9,772,833 27
Net profit	$474,528 77	$3,486,217 96

Comparative statement of business of the Philadelphia and Reading Coal and Iron Company for October, 1880:

	1880. Month.	1880. Year to date.
Receipts	$1,260,026 37	$10,876,553 12
Expenses	1,119,267 66	10,002,597 48
Profit	$140,758 71	$373,955 64
Net profit of all	761,414 05	4,846,238 44

	1879. Month.	1879. Year to date.
Receipts	$1,084,202 73	$9,136 394 91
Expenses	1,016,920 83	9,992,408 58
Profit	$17,281 90	Loss $856,013 67
Net profit of all	491,819 67	2,680,204 29

The foregoing statistics of the Railroad and Coal and Iron Company show an increase of $269,603 38 over October last year, and for the eleven months of the company's fiscal year that have passed, an increase of $2 216,034 15 over the corresponding period of last year.

New York, Lake Erie and Western R. R.

The gross earnings, working expenses and net earnings of the New York, Lake Erie and Western Railroad for the month of September, 1879 and 1880, were:

	1878.	1880.
Gross earnings	$1,492,495	$1,786,417
Working expenses	930,395	1,028,299
Net earnings	$562,100	$758,118

—showing an increase in gross earnings of $293,922, in working expenses of $97,904, and in net earnings of $196,018.

For the fiscal year ending September 30, 1879 and 1880, the earnings, expenses, etc., were:

	1878-'79.	1879-'80.
Gross earnings	$15,942,022	$18,698,108
Working expenses	11,174,698	11,648,925
Net earnings	$4,767,324	$7,049,183

—showing an increase in earnings of $2,751,086, in expenses of $469,227, and in net earnings of $2,281,859.

New York, Ontario and Western Railroad.

It is officially announced that the new owners of the New York, Ontario and Western Railroad will build from Middletown to Cornwall, on the west bank of the Hudson River, and thence to Weehawken; that estimates and plans have been prepared for a reduction of the grades on the existing road, and that within 15 months the company will have in operation a line of 425 miles of first-class railroad, including branches, from tidewater to Rochester, on which there will be no bonded debt. Large elevators, cattle yards, and other terminal facilities, superior to any now in existence, are also in contemplation at Weehawken. Gen. E. F. Winslow is to be the President, and Walter Katte, formerly Chief Engineer of the elevated railways, has been appointed Chief Engineer for the construction of the railroad and all the improvements.

From Galveston, Texas, Nov. 17th, we learn that application has been made for a charter for the New York, Texas and Mexican Railway, to run from Richmond through the counties of Fort Bend, Wharton, Jackson, Victoria, and Goliah, to Brownsville, with branches to Matagorda Bay, Corpus Christie and the mouth of the Rio Grande. The incorporators are New York, Paris and Texas men.

Boston and Chelsea Railroad.

The Boston and Chelsea Railroad Company has just executed a lease of its road to the Middlesex Railroad Company for 99 years, at six per cent per annum, payable semi-annually, free from all taxes and assessments of every kind. This lease has been assigned to the Lynn and Boston Railroad Company with the assent of the Boston and Chelsea Company, without, however, releasing the Middlesex Company, from which company the rent is to be received in the shape of a dividend of three per cent to each stockholder, paid semi-annually, by the Middlesex Rail oad. The Boston and Chelsea has for many years been operated by the Lynn and Boston under a former lease to the Malden and Melrose Company—assigned to the Middlesex and by that company to the Lynn and Boston, which was decided by the Supreme Court to be invalid, no power being conferred by law upon the companies to make such lease. In 1879 the Legislature passed an act authorizing a lease, and this power has now been exercised. The capital stock of the Boston and Chelsea is $110,000, which is to be increased 10 per cent to pay for the expense incurred in the rebuilding of Chelsea Bridge and the reconstruction of the tracks on the bridge and the construction of a temporary bridge. With this addition the stock will be $121,000.—[Boston Journal

The Philadelphia and Reading Railroad Company's Deferred Income Bonds.

The petition of the Philadelphia and Reading Railroad Company in reference to the issue of deferred income bonds was presented to Judge McKennan, in the United States Circuit Court, at Pittsburg, on the 18th inst. The prayer of the petitioners is as follows:

First. That the Court will approve the issue of obligations of the Philadelphia and Reading Railroad Company to be known as "Deferred Income Bonds" of the character set forth in this petition, and in the Exhibit B, thereto annexed, and that the said Company may be authorized to execute the said obligations in such form as they may deem advisable, and dispose of them in the manner and on the terms herein set forth, and to do and perform any and every corporate act that may be necessary or convenient in the premises.

Second. That the said Railroad Company may be authorized to approve or adopt the form of application of guarantors of issue of 686,000 deferred income bonds of $50 each, set forth as Exhibit B to the petition, or any modification thereof that may be agreed to by the said Company, with the approval of the Masters, and that the said Company be further authorized to make with the guarantors of the said issue of "deferred income bonds," or their representatives, whatever agreements or contracts may be required for effecting the objects set forth in this petition, and in the said "form of application," or any modification thereof as aforesaid, and to do and perform any and every corporate act that may be required for this purpose.

Third. That whatever money shall accrue from either the issue or guarantee of the said deferred income bonds shall be paid to the Receivers, and the net proceeds thereof shall be appropriated to the payment of the floating debt of the two companies, and that the collateral securities thereby released shall be surrendered to, and held by the said Receivers.

The Court issued the appended decree:

"And now Nov. 18, upon filing the petition of the Philadelphia and Reading Railroad Company, and of Edwin M. Lewis, Stephen A. Caldwell and Franklin B. Gowen, Receivers. It is ordered and decreed by the Court that the prayer of the said petition be granted, and that the said The Philadelphia and Reading Railroad Company be, and is hereby authorized and empowered to enter into the proposed agreements for the guarantee of the proposed subscription and issue of deferred income bonds, and to execute and issue under the seal of the said company $34,800,000 of such Deferred Income Bonds, on which interest is to be deferred to a dividend of six per cent on the common stock of the said company, and thereafter to take all revenues up to six per cent and then to rank *pari passu* with the common shares for further dividend, said right to this participation in the surplus revenues of the company to take effect as of December 1, 1880. The said deferred income bonds to be issued at 80 per cent of the par value, or $15 per bond, payable in installments as proposed in said petition, and before selling or disposing of said bonds in the market, the privilege or option of taking a pro rata share to be first offered to the stockholders of the said Company, and whatever money shall accrue from said issue or guarantee, shall be received by the Receivers, and be applied by them to the payment of the floating debt of the Company, and the redemption of the securities pledged therefor."

Railways and Lawyers.

In the olden time, when railways had not come into existence, and all traveling had to be done by road, on horseback, or in rumbling coach or chaise, going circuit was a formidable undertaking, involving much expenditure of both time money, and so great an obstacle was the absence of good roads and travelling conveniences found to be, that though Assizes were directed to be held twice in every year in every county in the kingdom, an exception had to be made in favor of the remote parts, and especially of the four northern counties of Westmoreland, Cumberland, Durham and Northumberland, where they were held only once a year, viz., in the summer. Indeed, so important a feature was the question of roads and locomotion considered "upon the northern iter," that when the business of any Assize town extended into the Commission day of the next town counsel were privileged to appear in court on that day without their robes; the reason being that ordinarily these would have been consigned to the baggage-wagon, or the clerks, and were already en route for the next circuit town. Long after the reason for it had ceased to exist this rule was religiously observed by the members of the northern circuits as one of their especial privileges, and on the last occasion of its observance, not many years ago, we recollect how shocked the judge who, in the days of his youth had been at the equity bar, looked at the indignity put upon him, as he supposed, by this want of dress, and his puzzled and not altogether satisfied look, even after the explanation had been given and the privilege claimed.

In those days there was a certain amount of romance and adventure in circuit life—when Thurlow rode the western circuit on a horse procured "on trial;" Eldon went the "northern iter" on a hired horse, but was obliged to borrow one for the youth who rode behind him, in charge of the saddle-bags, in the capacity of clerk; and North, afterward Lord Keeper Guilford, when riding the Norfolk circuit, got mellow and had to be put to bed in a public house, while the "rest of the company went on for fear of losing their market" Campbell's "Lives of the Chancellors," vol. iii, p. 441. Even the perils of the road had to be shared by the gentlemen of the long robe in comparatively recent times. Thus we find that Mr. Wood and Mr. Holroyd (both of whom were afterward raised to the bench), when crossing Finchley Common on their way to join the Northern Circuit, were stopped by a gentleman of fashionable appearance, who rode up to the side of the carriage and begged to know "what o'clock it was." Mr. Wood, with the greatest politeness, drew out a handsome gold repeater, and answered the question; upon which the stranger, drawing a pistol, presented it to his breast and demanded the watch. Mr. Wood was compelled to resign it into his hands, and the highwayman, after wishing them a pleasant journey, touched his hat and rode away. The story became known at York, and Mr. Wood could not show his face in court without some or other of the bar reminding him of his misfortune by the question, "What's o'clock, Wood?" Law and Lawyers, vol. i, p. 142, 1840.

With a body representing the bar of England—for in those days even chancery barristers went Circuit—and some Circuits reckoned nearly 300 members—and thus fenced round with rules, the institution of the mess became a prime necessity. Those were the days when, in the words of a song, written and sung by a distinguished member of the Northern Circuit, as it originally existed, many of the juniors might have sung:—

> "All round the Circuit I goes without a guinea,
> All round the Circuit for two months and a day,
> And if any body axes me the reason why I goes it,
> It's because I don't know how to earn it any other way."

So numerous a body—often for a fortnight in one town—could not be held together without rules for its guidance and control, and the appointment of officers whose duty it should be to execute them. These were as necessary for the guild in its perambulations as when located in its inns of court; and the Grand Court with its attorney and solicitor general, its crier, its messengers, its Masters of the Revels and Poet Laureate, and even its bishop, had its distinct sphere of usefulness as well as its comic side. The High Jinks themselves tended to repress irregularities and malpractices, while adding to the hilarity and amusement of the members. The more serious business was of course transacted before dinner; but even in the after-dinner "quips and cranks" and uproarious mirth and chaff, a salutary hint could often be conveyed, and a warning given to one who was hovering on the brink of malpractice, and be the means of averting future unpleasantness and severe measures. These were, besides, but the reflection of the revels of the inns of court, where, as in the Middle Temple Hall, the Master of the Revels, after dinner, sang a "carol or song, and commanded other gentlemen there then present to sing with him and the company; or when, as in Gray's Inn, after dinner "a large ring was formed round the fireplace," when the "Master of the Revels taking the Lord Chancellor by the right hand, he with his left took Mr. Justice Page, who joined to the other serjeants and benchers, danced about the coal-fire, according to the ceremony, three times, while the ancient song, accompanied with music, was sung by one Toby Aston, dressed as a barrister," in 1778.

In those days when men were accustomed to sit far into the night, it was but natural that the mighty intellects and reverend seniors, after the labors of the days, should unbend a little under the influence of old port, and seek relaxation in

the flow of the soul and interchange of chaff, as well as reason.

One ceases to wonder that an occupant of the Woolsack, when a member of the Oxford Circuit, should have occupied the office of crier, holding a fire-shovel in his hand as the emblem of his office; that Lord Eldon, while he was attorney-general of the Northern Circuit mess, indicted Sir Thomas Davenport at the Grand Court at York, for murdering a boy "with a certain blunt instrument of no value, called a long speech;" or that Serjeant Prime was fined by the Grand Court of his Circuit for setting a boy to sleep by his eloquence. There even seems no incongruity in the practical jokes of those days that have since become historical; the hoax upon "Jack Lee" at York, with the dummy brief, Rex, vs. Inhabitants of Hum Town, drawn up by Wedderburn and Davenport; or that practiced on Boswell at Lancaster, when he moved for a writ of quare adhæsit pavimento; or that a late chief baron had been crowned with a punch-bowl at York, "in the days when he went circuiting;" and that such men as Alderson, Tindal, Serjeant Cross and others joined in a quadrille to the tune of "Fol de rol rol," "but Alderson setting off wrong, put the rest out, and the whole was soon a scene of confusion."

The palmy days of Circuit life, however—when the Grand Court flourished and revelry ran high were in the times when locomotion was difficult when turn-pike trusts were not, and roads were bad; and people and their business could afford or were obliged to wait. Then the advent of the legal army was an event in the dreamy life of an Assize town; Assize balls and other festivities abounded, and a Circuit "Bespeak" was an honor sought after by the lessee of the local theatre at every Assize town. We can still remember threading our way, with a late baron of the Exchequer (then a gay circuiteer), to the Theatre Royal, Durham, and listening to a noble army of two announcing to the villain of the play that resistance was useless, as they had surrounded the house. The glories of the festivities on an Assize Sunday at the residence of John Jones, at Ystrad, in his time a leader of the old Carmarthen Circuit, and the dinners of "Lawyer Fawcett" to the members of the Northern Bar, in Lord Eldon's time, when there were such struggles between the claims of "consultation" and the host's old port, are enshrined in history; while the hospitality extended to the Northern Circuit by the Lord of Lowther Castle was continued down to a very recent period (curiously enough, this having originated at a time when there was only one Assize in the year in those parts, it was given only during the summer Assizes).

But times have changed since then. As the Arab Sheik said to the author of "Eothen," "Puff! puff! there is nothing like steam;" it has displaced the stage-coach, the chaise, and even the roadster. The baggage wagon lingered longest, but even it had to succumb a quarter of a century ago on most Circuits, though it still exists on the western, and might, until recently, have been seen at the accustomed times in the Temple ready for the reception of the baggage of the Circuit; but so little were its uses dreamed of, that it has ere now been mistaken for a prison-van. Now the leader or the junior, who, by the aid of the midnight mail and the Pullman car, can be in London to-day and in the remotest part of the country to morrow, is no longer placed under circumstances favorable to the cultivation of the old Circuit life and its attendant associations. The clannish or tribal spirit has vanished, and that cosmopolitan idea—the outcome of the steam engine and other facilities for inter communication—which would obliterate nationalities, has left its impress indelibly marked on this as on other institutions.

The gross earnings of the Providence and Worcester Railroad Company for the year ending Sept. 30, 1880, were $1,069,644 21, an increase over the previous year of $149,791 96. The net income is $318,575 64, after deducting $107,306 66 paid for land purchased and charged to expense account—an increase really in the net income of $75,587 08. Two dividends of 3 per cent each have been paid during the year, and the surplus carried to profit and loss account is $261,970 24. The debt of the company has been diminished this year $171,834 50.

The gross earnings of the Housatonic Railroad for the year ending September 30, 1880, were $740,997, an increase of $141,837 over the previous year, but the operating expenses were increased by building new station and engine houses and laying steel rails from $429,379 in 1879 to $574,013 in 1880, leaving the net earnings $3,283 less than the previous year.

At a meeting of the bondholders of the Rochester and State Line Railroad, held in this city on the 22d inst., a committee consisting of Adrian Iselin, Jr., Anson Phelps Stokes, and Walston H. Brown was appointed to devise a scheme of reorganization. The new company is to be called the Lake Ontario, Rochester and Pittsburg Railroad Company.

Resolutions of the stockholders of the Cincinnati, Wabash and Michigan Railway, providing for an extension of the road from Goshen to Benton Harbor, Mich., on the north, and from Anderson to Rushville on the south, were filed in the office of the Secretary of State of Indiana on the 15th inst.

The Chicago, Clinton, Dubuque and Minnesota and Wisconsin Valley Railroads and their branches having been transferred to the Chicago, Milwaukee and St. Paul Railway Company, will be operated as the Dubuque division of that road. The Wisconsin Valley Railroad will be called the Wisconsin Valley division.

Application has been made at Austin, Texas, for a charter for the New York, Texas and Mexican Railway, to run from Richmond, Texas, to Brownsville, with branches to Matagorda Bay, Corpus Christi and the mouth of the Rio Grande. The incorporators are New York, Paris and Texas men.

The last spike was driven on the 15th inst. on the track in Nebraska completing the new trunk line of the Chicago, St. Paul, Minneapolis and Omaha railway from St. Paul to Omaha.

The gross earnings of the Naugatuck (Conn.) Railroad for the year ending September 30, 1880, were $592,151, and the net earnings $242,063. In 1879, the gross earnings were $516 594, and the net $222,265.

The stockholders of the Boston and Lowell Railroad have accepted the terms of lease of the Nashua and Lowell Railroad by a vote of 4,046 in favor, to 6 against acceptance. The lease is now a settled fact, as the Nashua and Lowell company had previously accepted it.

The Ontario and Pacific Junction Railway will apply next session for an Act authorizing them to extend their line from Lake Nipissing to a point on the Ottawa river south of Lake Temiscamingua.

The Scioto Valley Railroad Company expect to run trains through from Columbus to Ironton by January 1.

Track laying on the Central Ohio reached East Toledo on the 20th inst.

PITTSBURG, CINCINNATI AND ST. LOUIS RAILWAY COMPANY,

OFFICE of the CHIEF ENGINEER,
COLUMBUS, Ohio, Nov. 5, 1880.

NOTICE TO CONTRACTORS.

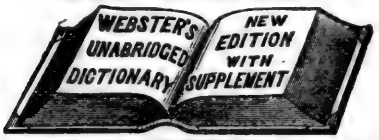
Sealed propoposals will be received at the office of the undersigned until Saturday, November 20, 1880, for the excavation of a tunnel 3,300 feet long and the partial timbering of the same, together with the excavation of the approaches near Gould's Station, on the line of the Pittsburg, Cincinnati and St. Louis Railway, 7 miles west of Steubenville, Ohio.

Plans and specifications of the work can be seen at this office after November 5, 1880, or they will be sent by mail to parties applying for the same.

M. J. BECKER, Chief Engineer,
Pittsburg, Cincinnati and St. Louis Railway Co.

Pennsylvania R. R. Co.

TREASURER'S DEPARTMENT.



PHILADELPHIA, November 1, 1880.

The Board of Directors has this day declared a semi-annual dividend of THREE PER CENT and an extra dividend of ONE PER CENT on the Capital Stock of the Company, clear of all taxes, payable on and after November 30th to stockholders as registered on the books of the Company at 3 o,clock P. M. October 30th, 1880.

For the purpose of distributing a portion of the shares purchased from the city of Philadelphia, the option is given to the shareholders of accepting the extra dividend of ONE PER CENT in scrip, convertible into the stock of the Company at par when presented in sums of Fifty Dollars; provided the said option shall be exercised on or before December 21st, 1880, after which date all outstanding scrip will be paid in cash.

The total tonnage of anthracite coal from all the regions for the week ending November 13, as reported by the several carrying companies, amounted to 590,010 tons, against 575,300 tons in the corresponding week last year, an increase of 14,710 tons. The total amount of anthracite mined for the year is 20,342,769 tons, against 22,957,825 tons for the same period last year, a decrease of 2,615,056 tons. The quantity of bituminous coal sent to market for the week amounted to 97,065 tons against 50,510 tons in corresponding week last year, an increase of 46,555 tons. The total amount of bituminous mined for the year is 8,827,503 tons against 2,983,305 tons for the corresponding period last year, an increase of 844,198 tons. The total tonnage all kinds of coal for the week is 687,075 tons, against 625,810 tons in corresponding week last year, an increase of 61,265 tons, and the total tonnage for the coal year is 24,170,272 tons against 25,941,130 tons to same date last year, a decrease of 1,770,858 tons. The quantity of coal and coke carried over the Pennsylvania Railroad for the first week of November was 146,313 tons, of which 105,219 tons were coal and 41,094 tons coke. The total tonnage for the year thus far has been 6,088,173 tons of which 4,587,077 tons were coal and 1,501,106 tons coke. These figures embrace all the coal and coke carried over the road east and west. The shipments of bituminous coal from the mines of the Cumberland coal region during the week ended Nov. 13 were 47,585 tons, and for the year 1,863,510 tons—an increase of 496,974 tons as compared with the corresponding period of last year. The coal was carried as follows : Baltimore and Ohio Railroad —week 20,080 tons, year, 1,095,142 tons ; increase over 1879, 281,674 tons. Chesapeake and Ohio Canal—week, 22 310 tons ; year 569,924 tons ; increase over 1879, 144,034 tons. Pennsylvania Railroad—week 5,194 tons ; year, 194,444 tons ; increase over 1879, 61,264 tons. The Reading Railroad for the week ending November 20, carried 190,000 tons of coal, of which 9,400 tons were sent to Elizabethport and 9,500 tons shipped from there, and 41,500 tons sent to Port Richmond and 27,000 tons shipped from there.—Phil. Ledger, Nov. 22.

The survey for a narrow gauge railroad from Bethlehem station to Bethlehem street, Littleton, N. H., has been commenced. It is the intention to have the road built this winter and completed for next season's travel.

The gross earnings of the New London Northern Railroad for the year ending September 30, 1880, were $591,346, the operating expenses $431,618, and the net earnings $159,728.

Efforts are being made in Gardiner and Franklin county, Me., to extend the narrow gauge railroad, running from Farmington to Phillips, to Gardiner.

SWIFT'S IRON AND STEEL WORKS,

26 West Third St., CINCINNATI, O.,

Manufacturers of all Weights of Standard and Narrow-Gauge Rails by most Approved Process. Also Rail Fastenings, Steel and Bloom Boiler Plate, Tank, Sheet and Bar Iron.

GET THE BEST.

THE PERFECTED STYLOGRAFIC PEN.

A. T. CROSS, PATENTS.

Is the best Fountain Pen ever made. Carries its own ink. Never wears out, never blots, never leaks. Writes well on smooth or rough surfaces.

Our latest pattern, LITTLE GIANT, is only 3 inches long, writes 50 large pages without refilling. Just right for Vest pocket. Price $2 50. With ring and silk neck-cord $3 00. Short Pen (5 inches) $3 00. Long Pen (6½ inches) for Desk $3 50 to $5 00.

The only genuine stampt, A. T. Cross, Patent. Beware of imitations.

We manufacture all requisites for Office and Library. Many of our goods are unique. ILLUSTRATED CATALOGUE mailed FREE.

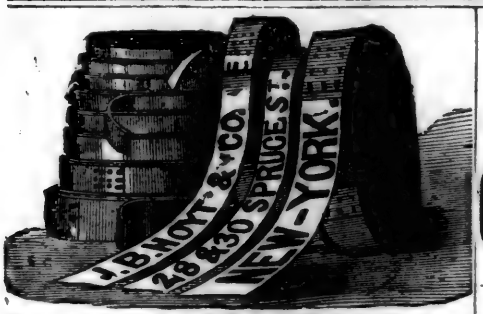
Its location, in the PORT of NEW YORK, is most favorable for shipments, and its CARS, CONSTRUCTED in SECTIONS, may be ENTIRELY COMPLETED before being packed for transportation.

VALENTINES VARNISHES

OUR CLAIMS.

We claim that our Finishing Varnishes are unsurpassed in the following qualities:

1. Uniformity. 3. Fluency. 5. Drying. 7. Fulness. 9. Durability.
2. Paleness. 4. Reliability. 6. Hardening. 8. Brilliancy. 10. Economy.



All know it is easy to make a Varnish that has the single quality of DURABILITY, but Varnishes which wear well are generally inferior in color and working quality, uncertain in laying, too slow in drying, or lacking in body or lustre, and frequently they possess ALL these defects.

In our "RAILWAY-COACH FINISHING" the ten qualities will be found combined, and our other Varnishes are as elastic and durable as is practicable for the work on which they are employed.

Those of our Varnishes which have the greatest durability require time for hardening. They have superior elasticity, and ARE DISTINGUISHED FOR THE EXTENT OF SURFACE THEY WILL COVER, WHICH RENDERS THEM ECONOMICAL.

VALENTINE & COMPANY,

Chicago. NEW YORK. Paris

Patent Stretched and Patent Riveted Short Lap

BELTING.

Our Belts are made from pure Oak Tanned Butts, and of the heart or solid part only. No part of the shoulder being used. Any one not familiar with Belt making can readily detect this by the shortness of the lengths and laps. Long laps are made including the shoulder or thinner and softer part of the Leather, causing the Belt to be, in its enduring qualities, no better than its poorest or thinnest parts

Our Belting is warranted to run straight and maintain an even bearing on the pulleys, and sold under the fullest Guarantee.

J. B. HOYT,
D. B. FAYERWEATHER,
HARVEY S. LADEW.

LEATHER BELTING.

Made exclusively from Messrs. J. B. Hoyt & Co.'s Best Oak Butts—shoulders all cut off, only solid leather used—short lengths and short laps—fully warranted.

Rubber Belting and Hose and Packing at lowest prices.

Locomotives of Fifty Years Ago.

EXHILARATING EXCURSIONS BEHIND HORSES ON THE BALTIMORE AND OHIO RAILROAD.—FAST TIME BY THE FIRST AMERICAN LOCOMOTIVES.—"THE ATLANTIC," "OLD IRONSIDES" AND PETER COOPER'S.—THE WONDERFUL FULFILLMENT OF A RIDICULED PROPHECY.

Three-quarters of a century ago, Mr. Oliver Evans, a native of Pennsylvania, after trying in vain to create an interest in his ideas of internal improvements, which were twenty-five years ahead of the opinions of the age, reproached his contemporaries for the sluggishness of their enterprise in the following prophecy: "The present generation will use canals, the next will prefer railroads with horses; but their more enlightened successors will employ my steam carriages on railways, as the perfection of the art of conveyance. In the mean time the steam carriages may be tested even on the present turnpikes." Mr. Evans' prophetic wisdom was ridiculed at the time; his zeal met with scanty encouragement aside from that which a great mind finds in the stimulus of its own workings; his efforts in their behalf drew little sympathy to his philanthropic conceptions, and it was left to time to prove their greatness and value. In him it may be said that the world first found an enthusiastic champion of the possibilities of substituting steam for horse power on railroads. He conceived the idea of his high pressure steam engine and the employment of it for moving carriages on ordinary roads about a hundred years ago, or in 1784, and during the ten years following he urged the adoption of railroads with steam engines as superior to canals; an idea so entirely original then, and seemingly so preposterous as to brand its originator as a man of erratic mind. He began the construction of a locomotive in 1799, which, with its carriage, was completed in about four years, after many interruptions, and the overcoming of almost insurmountable obstacles. It was understood that a railroad was to be built on which the locomotive was to be tested, but being disappointed in this he successfully tried his invention as a street carriage in Philadelphia in the winter of 1803–4, to the wonderment of at least twenty thousand spectators. Six years after in public addresses and other ways he advocated the building of a railroad from Philadelphia to New York, and tried to form a company for that purpose, though without any encouraging results, notwithstanding he offered to apply the whole of his own fortune to the enterprise.

America was not over prompt in utilizing her own ideas of steam locomotion for railroads, probably on account of our then comparatively crude facilities for producing mechanical work, and it was not until the famous English locomotives, "The Novelty" and "The Rocket," had demonstrated the possibilities of iron horses that American ingenuity was turned toward the construction of steam engines for railroads, to any extent or with much encouragement. Numerous inventions were being brought out in those days pertaining to the propelling of carriages over common roads, and in that direction inventors were turning their attention, the opinion prevailing that locomotives to be used on rails were not feasible on account of the rails as then constructed, mostly of wood, not being able to withstand the strain. One of the first incentives to American inventors to try their skill upon locomotives was held out by the Baltimore and Ohio Railroad Company, which, in 1832, offered liberal inducements for the construction of locomotives wholly of American manufacture. About seventy miles of the Baltimore and Ohio Railroad were then in use, the cars being drawn by horses, which made good time with the passenger cars, an average of six or seven hours for the seventy miles. An illustration of the enthusiasm felt over the building of the Baltimore and Ohio road, and the rapid transit afforded by it, is seen in the following extract from a letter published in the AMERICAN RAILROAD JOURNAL, of July 14, 1832. "The journey on the railroad from Baltimore to Point of Rocks, as far as which it has been completed, is one of the most exhilarating excursions both for the mind and body which can be imagined. While the velocity with which the cars are whirled, the ease of their motion, the exemption from dust, and the perfect safety of the conveyance keep the animal spirits in a state of delightful excitement, the wondrous evidence afforded by the invention of the power of the human intellect in almost annihilating the two greatest enemies to its advancement—time and space—gives food for reflection of the most animating and gratulatory kind. * * * * The country through which the road runs is generally interesting, the cars are comfortable, the horses fine, and the company always in good spirits—nolens volens, we might almost say."

There were several railroads in process of construction on January 1st, 1832, of which the Baltimore and Ohio road had by far the greatest number of miles in use, at that date 60 miles of its proposed 250 being completed. Sixteen miles of the Albany and Schenectady, twenty of the Charleston and Hamburg, nine of the Mauch Chunk and six of the Quincy, near Boston, were in use at that time, with a number of other railroads under way and projected. The chief encouragement for the use of steam, however, was furnished by the Baltimore and Ohio, and the Charleston and Hamburg roads, the latter, which was to be 135 miles long having a contract for carrying the United States mail. The inducements held out by these roads and the success of English locomotives stimulated our inventors to a remarkable degree, and resulted in the production of a great variety of arrangements supposed to be of untold value to the world. The first locomotives of American manufacture that were found by the Baltimore and Ohio Company to possess any degree of efficiency were one invented by Peter Cooper, and one constructed at York, Penn., by Messrs. Davis & Gartner. Of Mr. Cooper's locomotive Chief Engineer Knight of the Baltimore and Ohio road, in his report Oct. 1, 1832, said, that it might succeed to the scale and rank of practical efficiency, "with such modifications as practice and the well-known mechanical skill of its projector will probably suggest." This engine was used chiefly in constructing the road, and for the transportation of freight. The first locomotive of Messrs. Davis & Gartner that proved successful was capable of conveying fifteen tons, including the weight of the cars, at the rate of fifteen miles

per hour on a level, but it weighed only three and a half tons, and on account of its lightness could not be advantageously used upon ascending grades. A new locomotive of enlarged dimensions was soon constructed by them for the Baltimore and Ohio road, which as the chief engineer considered after a month's trial, combined "all the requisite efficiency as regards capacity and motive power." This locomotive, named the "Atlantic," was put on the road in the fall of 1832. Its weight, including the fuel in its furnace and water in its boiler, was six and a half tons. The travelling or road wheels as they were called, were three feet in diameter, and motion was communicated to them from the steam engine, by means of a spur driver working in a pinion on the middle of their axle: the diameter of the driver being twenty-eight inches and of the pinion fourteen inches. The two cylinders were upright and about ten inches in diameter. Their connecting rods worked the two cranks standing at right angles to each other on the axis of the driver. The boiler was tabular and stood in an upright position. The speed of the "Atlantic" was about twenty miles an hour, it being estimated with enthusiasm that, when the contemplated road was completed, the locomotive could make the entire distance between Baltimore and Washington with a train containing two hundred passengers in two hours. The fuel used was exclusively anthracite coal. It is interesting to know the cost of running a locomotive in those days as is shown in the figures we give below, which may be called the daily expenses of the "Atlantic" when she was making about eighty miles a day and doing the work, as was then exultingly claimed, of twelve men and forty-two horses. The figures also give an indication of the value of skilled labor in 1832:

Engineer	$2.00
Assistant	1.50
One ton anthracite coal	8.00
Oil	50
Repairs	2.50
Interest	75
Contingencies	75
	$16.00

It remained, however, for Matthias W. Baldwin, of Philadelphia, to construct the first American locomotive, that in regard to speed could be considered a rival of "The Novelty," which had been accredited with its mile-a-minute in the celebrated trial of speed and power between "The Novelty" and "The Rocket" on the Liverpool and Manchester Railroad. "The Novelty," by the way, was not much heard of after the trial of speed on account of its want of adaptation to purposes of utility; while Stephenson's Rocket which in the trial had taken the palm for power and efficiency, was used for a long time on the railroad between Lowhill and Manchester, making an average of about twenty-five miles an hour. Meanwhile Mr. Baldwin was experimenting and had turned out a number of stationary engines and a miniature locomotive which was successfully tested in the rooms of a museum in 1831. But his first important construction was the "Old Ironsides," which in the late fall of 1832 was tried on the Philadelphia, Germantown and Norristown Railroad, then using horse power on its six miles line between Philadelphia and Germantown. Mr. Baldwin was at that time accredited by the JOURNAL with having "outdone all who have constructed locomotives before him; and we may say also, the most sanguine anticipations of the friends of railroads." The "Old Ironsides" fast record has been stated in articles recently published as being thirty miles an hour with its usual train, but better time was claimed for it by an eye witness, who gave it a record of a mile in fifty-eight seconds, in a trial over a straight road, with no cars attached, and another computer gave the speed even at the rate of a mile in fifty-two seconds These estimates, however, may be best taken, perhaps, with slight grains of allowance; for a worthy desire to outdo the locomotives on the other side of the water may have influenced somewhat the statements of watches, whose internal arrangements and veracity were not unlikely to be a little shaken by the dizzy flight over rails none too smoothly laid. The success of this locomotive and encouragement received from several railroad companies (prominent among which was the Charleston and Hamburg, which took his second engine in 1834) gave Mr. Baldwin facilities for pursuing his occupation and established for him a lasting reputation. The important works bearing his name have since turned out over five thousand locomotives.

The "Old Ironsides" was constructed on the basis of Stephenson's locomotive, though it was considered superior in simplicity and compactness. In an article in the AMERICAN RAILROAD JOURNAL of Jan. 19, 1833, introducing a republication of a letter to the *Philadelphia National Gazette* from an eye witness of the trial of "Old Ironsides," while a slight admission was made of a possible over-estimating of speed, was the following prophecy: "At sixty or forty or even twenty miles the hour, a complete revolution would be effected in the mode of doing business; and it will be done, too, before many years." Inventors were busy at work then developing the powers of the iron horse, as they have been ever since, and though we may look with pride upon the handsome locomotives which do us faithful service today—constructed in such marvelous beauty of form and action as to seem almost creatures of life and instinct, and developed to a perfection which makes them as sensitive to the will of their drivers as are the keys of a piano to the touch of its master, we may still look back with wonder and hearty admiration upon those rude but fleet constructions of fifty years ago.

Telegraphic Communication in Africa.

A project for constructing an electric line from end to end of Africa has the sanction of the African Exploration Committee of the Royal Geographical Society of England. A report made to that society on the subject speaks in sanguine terms of its feasibility, with particulars of probable cost and revenue. The route is thus described:

"The Egyptian government at one end is prepared to carry forward its line, which already extends southward some distance beyond Khartoum, as far as Gondokoro. At the other end the government of Cape Colony is expected to extend the existing line in British South Africa to Pretoria, in the Transvaal. It is now proposed to continue the line from the southern limits of Egyptian territory to Mtesa's capital, and thence round the western shore of the Victoria-Nyanza, and on to Unyamyembe; from thence to branch out westward to Ujiji and eastward to Mpwapwa, Bagameyo and Zanzibar; from Bagameyo to conduct the wires in a southwesterly direction to the head of Lake Nyassa, where they would be carried to Livingstonia, and down the Shire and Zambesi, and thence southward to Pretoria. The whole distance from Khartoum to Pretoria, is 3,335 geographical miles, or, allowing for deviations, just 4,000 miles."

This is claimed to be no more difficult than was similar work accomplished in Australia and India.

Old Colony Railroad.

At the annual meeting of the stockholders of the Old Colony Railroad Company, held at Middleboro', Mass., on the 23d ult., the report of the directors for the fiscal year ending September 30, 1880, (a full abstract of which was given in the JOURNAL of the 20th of November) was presented and accepted and placed on file, and the following board of directors elected for the ensuing year: Charles F. Choate, Cambridge; Frederick L. Ames, Easton; Thos. J. Borden, Fall River; John S. Braytor, Fall River; Uriel Crocker, Boston; Samuel L. Crocker, Taunton; Francis B. Hayes, Boston; George Marston, New Bedford; William J. Rotch, New Bedford; John J. Russell, Plymouth; Royal W. Turner, Randolph; Elisha W. Willard, Newport; Ephriam N. Winslow, Hyannis. The following votes were then passed:

Voted to authorize the Directors to apply to the Legislature of Massachusetts for power to locate upon such land as they may deem necessary to construct a double track, with sidings, between Somerset Junction and the State line of Rhode Island, and to accept said power if granted and to make said location.

Voted, To authorize the Directors to locate and construct any branch tracks they may deem necessary from the main line in Fall River to and upon the lands and wharves recently purchased of the Fall River Iron Works Corporation.

The following preamble and resolution were also passed by a considerable majority:

Whereas, We, the stockholders of the Old Colony Railroad, believing that many of the accidents which occur on railroads are due to the use of intoxicating liquors, therefore,

Resolved, That the President, Superintendent and Directors are hereby instructed to take especial care that no persons shall be hereafter employed by the corporation who use intoxicating liquors as a beverage.

New Orleans Pacific Railway.

At a meeting of the directors of the New Orleans Pacific Railway Company at New Orleans on the 24th ult., a resolution was unanimously adopted to submit to the stockholders the question of the consolidation of the New Orleans Pacific and the Texas Pacific Railways. After the passage of the resolution, Gov. Brown, speaking for Col. Thomas A. Scott, said:

He understands by your vote that it is the unanimous wish of this direction that a consolidation should take place, and that there should be a continuous line of railway under one management from the city of New Orleans by way of Shreveport, Fort Worth, and El Paso, and as much further as we may extend our line, even to the Pacific Ocean. Believing as he does that you will co-operate to this end, he is more encouraged than ever to push forward the work to completion from your city to the Pacific coast.

New York, Saturday, December 4, 1880.

Entered at the Post Office at New York, N. Y., as Second-Class Mail Matter.

ALTERATIONS and improvements being made in the tables, which are weekly features of the JOURNAL, necessitate the temporary withdrawal of part of them. In the Bond List alterations are desirable, owing to changes among the roads, consolidations, etc., since our tables were revised. The Share List is naturally corrected at this season of the year, and as this is the time when much of the necessary information comes to us from our correspondents and from the railroads, the table, if published now, could not be as symmetrical and complete as we would wish. On these accounts we withhold these two tables until they are perfected and made of greater value than ever before, to accomplish which no efforts will be spared. We have added several important features to the JOURNAL recently and it seems desirable now that some of our tables should appear semi-monthly, monthly and quarterly instead of weekly, thus giving us an opportunity to lay before our readers more information and a greater variety each week. We shall announce the tables as they are to appear from week to week. The table of contents always gives those in the current number, and in future by referring to the files of the JOURNAL any of its tables desired can readily be found, and they will contain as late information as though appearing in each number, as we do not intend to withhold any tables that are of weekly interest. While adding new features to the JOURNAL, our aim is to retain and improve the old ones.

ANOTHER new steamship line just starting from Boston indicates the rapid increase of commerce between that city and the Old World. The Great Western is the name of the new line, which is soon to commence fortnightly trips between Boston and Bristol. Being connected with London and other large cities in England by the Great Western Railway, Bristol is considered an exceedingly desirable point from which to distribute American produce.

A NEW through trunk line from New York to the West has been opened this week by the Baltimore and Ohio Railroad Company's connection with the Bound Brook route of the Central Railroad of New Jorsey. The first through train over this route left this city Wednesday morning. The recentlega ldecision, a full account of which we have previously published, gave the Baltimore and Ohio Railroad the right to use the much litigated Junction road in Philadelphia, which had always been a missing link in the Baltimore and Ohio's system. Immediately upon the rendering of this decision the negotiations were commenced which have just resulted in the establishment of the fourth trunk line to the West from this city,

THE announcement of the completion of arrangements with the Northern Pacific Railroad Company by Messrs. Drexel, Morgan & Co., Winslow, Lanier & Co. and August Belmont & Co., for the placing of that railroad company's bonds, was one of the important events of the week in New York financial circles. The syndicate having bought outright $10,000,000 of these bonds have the option of $10,000,000 annually for three years, which makes the possible amount of the transaction $40,000,000. The bonds bear six per cent interest, interest and principal payable in gold, have forty years to run and are secured by a mortgage upon the line of the road and the valuable land grant of the company, estimated at 45,000,000 acres exclusive of sales up to the present time. Among the banking houses associated with this syndicate are Messrs. Drexel & Co., of Philadelphia; J. S. Morgan & Co., of London, and Drexel Harjes & Co., of Paris; Lee, Higginson & Co. and Brewster, Basset & Co. of Boston; Johnston Brothers & Co., of Baltimore, and the Bank of Commerce, the Third National Bank, Messrs. L. Von Hoffmann & Co., J. & W. Seligman & Co., J. S. Kennedy & Co., Kuhn, Loeb & Co. and Woerishoffer & Co. of this city.

THE people on the line of the Long Island Railroad have reason to rejoice over the advantages which will accrue to them through the control of the railroad coming into the hands of Mr. Austin Corbin. It was announced on Monday that Messrs. Drexel, Morgan & Co., who held about 35,000 of the 66,000 shares, had sold the controlling interest of the road to a new company, of which probably some of the members will prove to be Boston capitalists, though Mr. Corbin is the only member made known at the present writing. The new company propose to greatly improve the road, and it will doubtless be speedily taken out of the hands of the receiver, where through mismanagement it was placed about three years ago. Instead of catering to the variable interests of remote summer resorts at the sacrifice of more important interests along its main line, the aim of the new owners evidently will be to accommodate the vast number of Long Island residents doing business in New York, and the farmers from Hunters' Point to Montauk, who need the cheapest and quickest route possible to this city. This, at least, would seem naturally to be the aim of sagacious business men, such as the leading spirit of the new company would be likely to have associated with him. Mr. Corbin's course as President of the Manhattan Beach Improvement Company, and his ability shown in connection with that and other important enterprises, give guarantee of business like management for the Long Island road, and unsparing and skillful efforts for the improvement of its working.

Sunday Trains.

The question of running trains on Sunday will undoubtedly be discussed in several of our legislatures during this winter. In the States of Massachusetts, Connecticut and Vermont the matter has already been much debated. We are informed that the Legislature of Vermont was the first to take action upon the subject by prohibiting railroads from running cars or engines on Sunday, in any part of the State. What other States will do remains to be seen. Manager Gardner of the Massachusetts State road has again declined to allow a regular train to be run from Albany to complete the daily Boston and Cincinnati line. Mr. Gardner simply carries out the instructions of the Governor and Council who say in effect that there is a statute which declares "Whoever travels on the Lord's day except from necessity or charity, shall be punished by fine not exceeding ten dollars for every offense." They say that additional trains upon Sunday are not necessary or required for charitable purposes. The passage of freight trains has been justified we suppose, on the ground that it was necessary to prevent the single track of the Troy and Greenfield Road from becoming blocked, as no one would maintain for a moment that it was more necessary to send a car load of hogs to Boston one day sooner than to prevent East bound through passengers from spending the Sabbath in Troy or Albany.

The position taken by the Governor and council is extremely inconsistent with the manner in which the statute is enforced. There is not a town or city in the State where men and women do not travel on every Sunday in the year for pleasure, and for pleasure alone.

Nay more, the State holds stock in the Boston and Albany and the New York and New England Railroads both of which run trains on every day in the week without one word of remonstrance even. The State built the Hoosac Tunnel and the Troy and Greenfield Railroad, and by its legislative acts has invited all railroads to make connections with them. One Railroad Company, the Boston, Hoosac Tunnel and Western, has built its road and other roads are being built upon the implied contract that all railroads in the State should be treated alike. Why this statute is enforced in one instance and ignored in all other cases the railroad commissioners wisely do not attempt to explain. They say very properly that their jurisdiction only embraces controversies arising between two corporations and that the State railroad is not a corporation, and cannot be made a party to an adjudication in its own tribunals without special legislation to that effect. The sovereign State has not submitted its policy, in a matter involving moral considerations, to a tribunal of its own servants; it "has not put its conscience into commission," but it alone can say whether it favors Sunday trains or not.

New York, Lake Erie and Western R. R.

A synopsis of the annual report of the New York, Lake Erie and Western Railroad Company shows the business of the road for the year ending Sept. 30, 1880, as follows: The gross earnings arising from the operations of the road and its branches for the fiscal year were $18,693,108 86, and the working expenses, $11,643,925 35, leaving earnings over expenses, $7,049,183 51, to which, adding income from other sources, ($783,956 65,) makes a total of $7,833,140 16. Deducting for interest on funded debt, ($3,963,872 69,) and rental of leased lines and other charges, ($2,078,646 76,) $6,042,519 45, leaves a surplus of $1,790,620 71. This, together with $738,119 34 received during the year from the assessments paid on the stock of the Erie Railway Company, has been expended in double track, buildings, equipment, docks at Buffalo and Jersey City, and other improvements to the road and property. The working expenses have been 62 per cent of the earnings, a decrease of 8 per cent from the previous year. The increase in the merchandise tonnage over the previous year was 846,004 tons; in the tonnage movement, (or tons one mile,) 219,996,380 tons; in the earnings, $2,150,228 75, and in the rate per ton per mile, .019 cent. The decrease in the coal tonnage from the previous year was 342,753 tons, and in tonnage movement, (or tons one mile,) 68,106,712 tons; but the earnings from this source increased $7,405 59, owing to an increased rate per ton per mile, which was .738 cent in 1880 against .640 cent for 1879. The increase in the total tonnage was 503,251 tons; in the tonnage movement, (or tons one mile,) 151,339,073 tons; in the earnings, $2,157,634 34, and in the rate per ton per mile .56 cent being .836 cent for 1880, against .780 cent for 1879. The increase in number of passengers carried was 596,904; in the number carried one mile, 31,344,486; in the earnings, $564,007 43, and in the train mileage 87,838 miles; but the earnings per passenger per mile decreased from 2.91 cents in 1879 to 2.41 cents in 1880. The total increase in gross earnings of the road and branches, including express, mails, &c., was $2,751,086 28, while the working expenses increased only $469,226 40. This is due to the greater economy with which the line can be worked, with improved facilities, as notwithstanding the large increase in freight tariff the freight train mileage decreased 295,946 miles. The increase in the average train load was 25½ tons, and in the average haul 6 miles. The increase in the average number of passengers per train was 8, and in the average miles traveled by each 2½ miles. The expenses per ton per mile were .534 cent—a decrease from the previous year of .027 cent. The expenses per passenger per mile were 1.361 cents—a decrease from the previous year of .233 cent.

OUR BOSTON LETTER.

(From our regular correspondent.)

BOSTON, Nov. 30, 1880.

The past week has been characterized by continued activity in railroad stocks and the trading has been distributed over the whole list. As compared with those a week ago closing prices show the following changes:

Advanced.		
Boston and Albany	160	to 162
Boston and Maine	147	to 149
Boston and Providence	148	to 150
Boston and Lowell	109	to 109½
Chicago and W. Michigan	73¼	to 73½
Cin., San. and Cleveland	16⅜	to 17
Conn. and Passumpsic	80	to 81
Connecticut River	155	to 156
Fitchburg	141	to 155
Fort Scott and Gulf, Com	62½	to 64½
Little Rock and Ft. Smith	62	to 63½
New York and New England	42½	to 45
(Hartford and Erie 7s)	43⅛	to 45½
Old Colony	124	to 127
Northern	110¼	to 112
Rutland, Pfd	28¾	to 30¾
Summit Branch	20¼	to 21½
Declined.		
Atchison, Topeka and Santa Fe	142	to 141½
Chic. Burl. and Quincy	171	to 170
Eastern	33¾	to 33¼
Lawrence and Southern	92	to 91½
Flint and Pere Marquette, Com	25⅞	to 25
Flint and Pere Marquette, Pfd	80	to 77
Louisiana and Missouri River	11	to 10
Marquette and Ontonagon	22	to 21
Ogdensburg and L. Champ.	25	to 23
Boston, Revere Beach and Lynn	107	to 106⅛

Atlantic and Pacific subscriptions are selling at a premium of $458. Mexican Central subscriptions at $850 and Sonora Railway subscriptions at 30 per cent premium.

It is generally accepted now among Boston people that some kind of a consolidation will be effected between the Atchison and the Chicago, Burlington and Quincy Railroads. The Atchison will undoubtedly declare a scrip dividend or something equal to it, and the recent immense advance in Chicago, Burlington and Quincy by the purchases of the insiders indicates something good coming in that direction.

The earnings of the Summit Branch road for the year ending Sept. 30, 1880, shows an

Increase in gross earnings	$116,800
Decrease in expenses	12,398
Net gain in revenue	$129,198

A large share of this gain was made in the month of September as the figures for that month will show. For the month ending Sept. 30, 1880,

Increase in gross earnings over 1879	$51,448
Decrease in expenses over 1879	3 639
Net gain	$55,087
Increase of coal on hand	$12,463

The above gain for the year was made in the face of a decrease in coal mined of 40,089 tons on a tonnage of 283,031 tons. The net earnings for the past three months are as follows: August, $40,000, September, $55,000; October, $55,000; from which it appears that the road is now earning fixed charges and one per cent a month on the stock.

The bonded debt consists of $1,000,000 7 per cent bonds of which enough remain in the treasury unissued to pay off all floating liabilities.

Importance of the Railway Mail Service.

One of the greatest improvements of the service is stated by the Postmaster General, in his Report prepared for transmission to Congress, to be the abolition of distributing Post Offices, and the enforcement of a close and thorough distribution of all mail matter in transit upon railroad lines, thereby expediting the delivery of matter to all parts of the country by many hours. A necessary consequence of this innovation was the subordination of all Postmasters in everything affecting the distribution and dispatch of mails to the General Superintendent of the Railway Mail Service and the Division Superintendents under his orders, thus securing uniformity of practice. The report of the Superintendent of the Railway Mail Service shows that during the past year only one piece of matter out of every 3432 handled by the employes of that service was incorrectly distributed. Every such error was promptly detected and the employe who committed it notified of the fact. The classification of mail matter has been so changed as to correspond very nearly with that of the Universal Postal Union, and the reduction of rates of postage on a large class of correspondence has been followed by no decrease of revenue. The privilege of registration, previously restricted to letters, was extended in 1878 to all other mail matter, and the registry system has been greatly improved by the introduction of through registered pouch exchanges and other means to secure the safety of registered matter, so that the loss for the past year was only one out of every 6250 pieces handled.

—J. J. Palmer, of Wayne, and Michael Lalley, of Detroit, have taken the contract of grading and preparing for the rails, upwards of twenty miles of the Manistee Railroad, which is to be a branch of the Flint and Pere Marquette road, to run to Manistee, Mich.

—The Chicago, Milwaukee and St. Paul Railroad Company has finished the survey for a line of road from Mason City to Council Bluffs, a distance of nearly 200 miles.

20s.

Quebec. Quebec Bank, Toronto Branch. Raised from 4. Old issue. Dated 1856. Recalled. The issues of this Bank since 1863 have green backs.

Personal.

—Young Mr. Gladstone, a son of the Premier, was among President Hayes' recent callers.

—Mr. Franklin B. Gowen, president of the Philadelphia and Reading Railroad Company, is to sail from this city for Europe to-day.

—Mr. W. Fahnestock, son of Mr. H. C. Fahnestock has purchased a seat in the New York Stock Exchange, at the price, it is said, of $21,000.

—Lord Coleridge, Chief Justice of Common Pleas has been appointed Chief Justice of the Queen's Bench, vice Sir Alexander Cockburn, deceased.

—Mr. H. G. Taylor has been appointed to the position of master of transportation of the Credit Valley Railway, with headquarters at Toronto, Ont.

—Mr. Geo. DeB. Keim has been elected president pro tem. of the Philadelphia and Reading Railroad Company, during Mr. Gowen's absence in Europe.

—Hon. Abram S. Hewitt has purchased, it is said for $500,000, the block of buildings on Lexington Avenue, extending from Forty-second to Forty-third streets, in this city.

—Mr. H. N. Turner has been appointed manager of the through freight traffic of the Montreal and Boston Air Line, with headquarters at Boston. For the past eight years Mr. Turner has been the general freight and passenger agent at Worcester of the Worcester and Nashua Railroad.

—Mr. H. D. Newcomb, father of Mr. H. Victor Newcomb, the retiring president of the Louisville and Nashville Railroad Company, was one of the founders of that road. From the organization of the company to the day of his death, in 1874, he was continuously in its service in the capacities successively of Director, Vice-President and President.

The Supreme Court of Vermont has adjourned without deciding the Central Vermont Railroad case.

Organization.

—The annual meeting of the New York, Lake Erie and Western Railroad Company was held at their office in this city, Tuesday. The entire old board of directors was re-elected.

—Messrs. W. D. Bishop, L. W. Cutler, Russel Tomlinson, Horace Nichols, O. B. King, M. Hemenway, G. W. Beach, R. M. Bassett and F. J. Kingsbury are the recently elected directors of the Watertown and Waterbury Railroad.

—The directors of the new Toledo and Northern Ohio and Indiana Northern Railroad are Messrs. F. W. Vanderbilt, D. O. Mills, J. E. Burrell, Amasa Stone, J. H. Wade, Judge Best, Clem Studebaker, and Judge Osborne.

—Messrs. Charles F. Woerishoffer, Horace Porter J. H. Schiff, George M. Pullman and E. F. Winslow have been elected directors of the New York, Ontario and Western Railroad. It is said that Gen. E. F. Winslow is to be president.

—E. O. Lamphone, of Chicago, has been elected General Manager of the Chicago, Texas and Mexican Railroad, at Dallas, Texas. The citizens of Dallas have suberibed $50,000. Fifty miles of the road southwest from Dallas have been located, and construction will be begun at once.

—At the annual meeting of the Richmond, York River and Chesapeake Railroad held at Richmond, Va., the following officers were elected: Mr. Thomas Clyde, President; Mr. A. S. Warren, vice president; Messrs. Reuben Foster, W. H. Gwathmey, B. F. Clyde and A. Stewart, directors.

—A special meeting of the directors of the Louisville and Nashville Railroad Company, was held in this city Tuesday, at which President H. Victor Newcomb handed in his resignation, which was accepted, and a resolution of thanks was unanimously passed to him for his services. Mr. E. H. Green, formerly First Vice President, was elected President; Mr. E. P. Alexander, formerly Second Vice-President, was chosen First Vice-President, and Mr. C. C. Baldwin, one of the newly elected Directors, was chosen Second Vice-President. Mr. Newcomb still retains his position as director. In his letter of resignation he says that he is compelled to adopt that course by absolute command of his physicians.

COUNTERFEIT COIN LIST.

GOLD COINS.

$1.

Standard weight 25.8 grains, least current weight 25.67 grains.

There are some counterfeits dated 1851-1852, light in weight. The new gold dollar 11-20th of an inch in diameter as counterfeited is dated 1861, light in weight, but very deceptive.

$2 50.

Standard weight 64.5 grains, least current weight 64.18 grains.

Some coins dated 1846, weighing only 48 grains instead of 64½—are in circulation.

$3.

Standard weight 77 4 grains, least current weight 77.02 grains.

Excellent counterfeits of this denomination have been issued and circulated.

$5.

Standard weight 129 grains, least current weight 128.36 grains.

The issues of 1844-1845-1847 have been imitated. The 1845 piece is 10 grains too light ; the 1847 coin is 13 grains too light.

$10.

Standard weight 258 grains, least current weight 270 grains.

The issues of 1801 and 1810 have been extensively counterfeited.

$20.

Standard weight 516 grains, least current weight 513.42 grains.

This coin has been sawed in two pieces, the center taken out and platinum or some other metal substituted. The *ring* is not perfect. Experts have also bored holes in the side and taken out about seven dollars worth of gold and then soldered the holes with gold.

The English Sovereign

has been imitated by plating so that the counterfeit is worth about three dollars and nearly as heavy as the genuine.

SILVER COINS.

Ten Cents.

Standard weight 38.58 grains.

Spurious dimes dated 1853 and 1875 are in circulation, the date 1875 has the appearance of a genuine coin.

Twenty-five Cents.

Standard weight 26.45 grains.

There are many deceptive quarters. Those bearing dates 1828 and 1860 are the most dangerous ; others bearing dates 1853, 1857, 1861 are not so well executed.

The Canadian 25 Cent Coin

has been extensively counterfeited. Large quantities of them have been circulated in the South and West.

Fifty Cents.

Standard weight 192.9 grains.

Half dollars have been successfully counterfeited. The one most likely to deceive is dated 1842, thickly plated ; another good imitation is dated 1876, plated with silver, exact weight, and good ring. The counterfeit bearing date 1874 is not likely to be taken.

One Dollar.

Standard weight 412.5 grains.

Counterfeits of the new one dollar silver coin first appeared about the first of April, 1878. The general appearance is good, the milling is well done, but the color is such as to readily distinguish it from the genuine. Look out for other new counterfeits better executed.

The Trade Dollar.

Standard weight 420 grains.

This coin has been variously and extensively counterfeited. One early imitation was dated 1876, made of a composition formed principally from type metal. The milling on the edge of the piece is very well done, but the piece is too thick and the inscription In God We Trust, beneath the figure of Liberty, upon the obverse, is imperfect. This counterfeit was extensively circulated in the East Indies, China, Japan and other Oriental countries.

Many other imitations of the trade dollar have been produced and the latter specimens appear almost perfect. One of the last imitations is finely finished ; the various devices of the impress are accurate and distinct, and the ring is perfect. The piece is very deceptive, but it is about 1-32 of on inch undersize, and 115.5 grains underweight. It is of a dark color after having been handled, and has a smooth, greasy or quicksilvery feeling when rubbed between the thumb and fingers.

Note.

The Trade Dollar authorized to be coined by act of Congress February 12, 1873, has been formally recognized as a coin of the United States. The Trade Dollar was demonetized July 22, 1876, and its coinage was suspended by order of the Secretary of the Treasury, February 22. 1878. The circular of the Treasury Department of July 25, 1878, declares : "The United States Trade dollar also is not a legal tender, and therefore has only a bullion value." The average bullion value, of full weight trade dollars, is ninety-three cents and two tenths of a cent each. The Trade Dollar was intended for exportation abroad. It excels the Mexican silver dollar by two-tenths of a cent, and is of equal finoness (900) with the United States legal tender silver dollar and contains seven and one half grains more standard silver. At present though demonetized and refused by many banks and all Government offices, trade dollars are generally taken in trade without discount and may be commercially rated at the price they command for exportation. There is no allowance for abrasion in silver coins.

Tests.

Counterfeit silver pieces made of block tin washed over with quicksilver are easily detected by the ring. A genuine silver piece will feel rough enough under rubbing, while the counterfeit feels smooth and oily. Experienced persons detect spurious coins by the weight. The jeweler uses nitric acid for the detection of debased gold and silver. Scratch the coin with the knife and then apply the acid to the scratch. If the acid boils up greenish, the coin is bad ; but if it turns white the coin is good. The following test for determining whether silver is good or bad is known as the "Mint Test," although the tests employed at the Mint are weight and size :

24 grains nitrate of silver.
30 drops nitric acid.
1 ounce water.

A drop of this mixture will have no effect upon genuine silver but will blacken a debased coin. Persons handling large amounts of coin must rely upon the eye and the sense of touch.

Contract by Letter.

The following propositions in respect to contract by letters are established by the cases :

1. Where the offer is made by letter, and is accepted by letter posted within a reasonable time, the contract is complete, although the acceptance may be delayed or may not be received, owing to the fault of the post. Dunlop vs. Higgins, 1 H. L. Cas. 381. Tayloe vs. Merchants' Fire Ins. Co. 9 How. 390 ; Trevor vs. Wood, 36 N. Y. 307 ; Abbott vs. Shepard, 48 N. H. 14 ; Averill vs. Hedge, 12 Conn. 436 ; Wheat vs. Cross, 31 Md. 99 ; S. C. 1 Am. Rep. 28 ; Washburn vs. Fletcher, 42 Wis. 152.

The latest English case illustrating proposition 1 is Household Fire and Carriage Accident Ins. Co. vs. Grant, C. P. Div. It was there held that a contract is binding upon the proposer as soon as a letter of acceptance, properly directed to him, has been posted by any person to whom the proposal has been made, notwithstanding such letter never reaches him, provided that there is no unreasonable delay in accepting the proposal, and that the ordinary and natural mode of transmitting the acceptance is through the post. This case was affirmed in the Court of Appeal, July 1, 1879, by Thesiger and Baggallay, L. JJ., Bramwell, L. J., dissenting, 41 L. T. (N. S.) 298.

2. If the delivery of the letter of offer is delayed by the fault of the sender, the offer is extended until its arrival. Adams vs. Lindsell, 1 B. & Ald. 681. This was where the letter of offer was misdirected by the sender's fault, and was consequently delayed two days in transmission, and before receipt of the acceptance he sold the goods to a third person. To the same effect, McTier vs. Frith, 6 Wend. 103 ; Averill vs. Hedge, 12 Conn. 436

3. If undue delay or failure of delivery of the letter of acceptance is caused by the fault of the accepting party, there is no contract. As where the accepting party put his letter to be forwarded into the hands of an agent, the contract is not concluded so long as the letter remains in the agent's hands, even where the agent is the postmaster. Thayer vs. Middlesex Mut. Fire Ins. Co., 10 Pick. 326 ; Bryant vs. Booze, 55 Ga. 438.

4. The acceptance must be unconditional and in accordance with the terms of the offer, and given within the time prescribed, if any, by the offer. Andrews vs. Garrett, 6 C. B. (N. S.) 262 ; Jenness vs. Mount Hope Ins. Co., 53 Me. 20 ; Bruce vs. Pearson, 3 Johns 534 ; Elinson vs. Hershaw. 4 Wheat, 225 ; Jordan vs. Norton, 4 M. & W. 155.

Where there is misunderstanding as to the terms of a contract, neither party is liable in law or equity. Baldwin vs. Middleburger, 2 Hall, 176 ; Coles vs. Bowne, 10 Pai. 526 ; Utley vs. Donaldson, 94 U. S. 48. Where a contract is a unit, and left uncertain in one particular, the whole will be regarded as only inchoate, because the parties have not been ad idem, and therefore neither is bound. Appleby vs. Johnson, L. R., 9 C. P. 158.

A proposal to accept or acceptance upon terms varying from those offered is a rejection of the offer. Baker vs. Johnson County, 37 Iowa, 189 ; Jennings vs. Mount Hope Iron Co., 53 Me. 20 ; Chicago and Great E. R. Co. vs. Dane, 43 N. Y. 240 ; Suydam vs. Clark, 2 Sandf. Superior, 133.

After the letters were written a firm increased its member, two new partners being taken in without the knowledge of the bank. Held, that if the letter did constitute a contract with the firm as it was when they were written

it did not with the new firm. There was no privity between the bank and the new firm. A new party could no more be imported into the contract and imposed upon the bank without its consent than a change could be made in like manner in the other pre-existing stipulations. The bank might have been willing to contract with the firm as it was originally, but not as it was subsequently. Without its assent a thing was wanting which was indispensable to the continuity of the contract. Barns vs Barron, 61 N. Y. 39; Bleeker vs. Hyde, 3 McLean, 279; Taylor vs. Wetmore, 10 Ohio, 490; Taylor vs. McClung, 2 Houst. (Del.) 24; Hunt vs. Smith, 17 Wend. 179.

5. An immaterial addition to an acceptance does not prevent the taking effect of the contract. Clive vs. Beaumont, 1 DeG. & S. 397; Gibbons vs. N. E. Met. Asylum District, 11 Beav. 1; Brunson vs. Stannard, 41 L. T. (N. S.) 474. The latter case was as follows: The agent for an intending purchaser of property, having made an offer for it, received in reply a letter from the vendor's agent accepting the offer, and fixing a time for signing the contract. The purchaser's agent not having attended within the time named, the vendor refused to complete. Held, that the contract was complete, for that the naming of a time for signing a formal contract did not constitute a condition of the acceptance. If the letters constitute a complete contract it will take effect in spite of a statement in the acceptance that a formal contract will be drawn up. Bonnewell vs. Jenkins, 38 L. T. (N. S.) 381.

6. Acceptance must be within a reasonable time, unless a time is limited in the offer. The next day will answer. Dunlap vs. Higgins, supra. But four months after will not. Chicago, etc., R. Co. vs. Dane, 43 N. Y. 240.

7. An offer may be withdrawn before acceptance. Routledge vs. Grant, 4 Bing. 653; Honeyman vs. Marryatt, 21 Beav. 14; 6 H. L. Cas. 112; Faulkner vs. Hebard, 26 Vt. 452; Beckwith vs. Cheever, 21 N. H. 41. And so an acceptance may be retracted before or simultaneously with its receipt. Dunmore vs. Alexander, 9 Shaw & Dunl. 190. Story says (Cont., § 498): "The rule is that if the proposition be made in writing, and sent by the post, the person making the offer can retract by a subsequent letter reaching the other party at any time before an answer of acceptance is written and put in the mail. But as soon as such answer is placed in the mail the contract is completely closed as to both parties. Although, therefore, a letter containing a retraction of the offer be actually on the way at the time when the letter of assent is mailed, yet the contract is closed, unless such letter of retraction be received prior to the mailing of such letter of assent." As to retraction of acceptance, Story says (Cont., § 498): "The person assenting cannot, therefore, even stop his letter on the road after it is once mailed." In Byrne vs. Tienhoven, C. P. Div. March 6, 1880, 42 L. T. (N. S.) 371, it was held that the withdrawal of an offer, made and accepted by letters sent through the post, is inoperative if the notice of withdrawal does not reach the person accepting until after the letter of acceptance has been posted, unless authority has been given to notify a withdrawal by merely posting a letter.—[Albany Law Journal.

Legal Notes.

COMMON CARRIER—HAS NO RIGHT TO EXAMINE CONTENTS OF PARCELS ENTRUSTED TO HIM.

The refusal of a railroad company to carry an express company's safes and chests, unless it was allowed to open the same and inspect their contents, or was furnished with an inventory of such contents, with the further understanding that the railroad company might, whenever it saw fit, open and inspect the safes and chests of the express company, and also collect the freight on each separate article or parcel contained therein, as if each had been shipped by itself, violates both the express company's rights as a shipper, and the terms of an interlocutory judgment temporarily restraining an interference with the express company's business. In the Nitro Glycerine case, 15 Wall. 524, it was held that express carriers were not chargeable with notice of the contents of the packages they carry. The court then remarks: "If express carriers are thus chargeable with notice of the contents of packages carried by them, they must have the right to refuse to receive packages offered for carriage without a knowledge of their contents. It would in that case be unreasonable to require them to accept as conclusive, in every instance, information given by the owner. They must be at liberty, whenever in doubt, to require for their satisfaction an inspection even of the contents, as a condition of carrying the packages. This doctrine would be attended, in practice, with great inconvenience, and would seldom lead to any good. Fortunately, the law is not so unreasonable. It does not exact any such knowledge on the part of the carrier, nor permit him, in cases free from suspicion, to require information as to the contents of the packages offered." In Leaf vs. Tuton, 10 Mees. & W. 397, a number of small parcels belonging to different owners were united in one large package, and directed to one person as consignee, and it was held that the carrier was bound to take the package, charging for it as if each parcel belonged to one person, and that there was no right charge upon each separate parcel as if it had been shipped by itself. U. S. Circ., Indiana, June, 1880. Dinsmore vs. Louisville, New Albany and Chicago Railroad Co. Opinion by Gresham, D. J.

Mobile and Girard Railroad.

The gross earnings of this road for the year ending May 31, 1880, were $228,039 83, the expenses $149,335 71, and the net earnings $78,704 12, being an increase in gross earnings, compared with the previous year, of $32,132 02, in expenses of $13,763 02, and in net earnings of $18,379. Three hundred and sixteen tons of new rails have been laid and 32,566 ties put in, besides building a bridge across Uchee Creek and other improvements, amounting in the aggregate to $27,674 17. Rolling stock consists of five engines operated, four belonging to this company; five passenger cars; three mail, baggage and express cars; three cabooses, thirty-one box cars, thirty flat cars and eight coal cars. The officers are: Wm. M. Wadley, President; W. L. Clark, Superintendent; J. M. Frazer, Secretary and Treasurer.

The Lewisburg and Tyrone Railroad from Tyrone to Pennsylvania Furnace, has been built by the Pennsylvania Railroad.

American Railroad Journal.

Financial and Commercial Review.

THURSDAY EVENING, December 2, 1880.

The money market continues stringent, and while 6 per cent is the rate at bank, borrowers on stock collateral are paying at the Stock Exchange commissions ranging from 1-33 to ¼ of 1 per cent per day to get money at the bank rate. Long time loans—maturing after January 15, by which time the money market should be easy—are to be had at 6 to 4 per cent; but loans up to that time cost a heavy commission. Mercantile paper is 6@7 per cent and the market for it is dull. In the last hour stock brokers paid ¼@¾ of 1 per cent per day as a commission to get money at 6 per cent.

The posted rates for prime bankers' sterling are 4.80 and 4.82, the rates having been advanced half a cent. The actual rates are 4.79@⅛ and 4.81@⅛. Cable transfers are 4.81⅛@4.82; and prime commercial bills are 4.77¼@¾.

The Treasury to-day succeeded in getting only $118,000 6s of 1880 at 102⅞.

The November debt statement shows a decrease in the public debt for the month of $3,609,261, and for the five months ending November 30, of over $37,250,000. This is an exceedingly favorable exhibit compared with the corresponding period of last year, when the reduction was $800,000, and for the five months a little over $11,000,000. The decrease in the interest bearing debt for the month just closed is nearly $4,200,000, the reduction having been confined to 6 per cent

bonds. The available balance in the Treasury after deducting all current liabilities is nearly $151,000,000, which is about equal to the same balance on Oct. 31.

The earnings of the New York and New England Railroad for the three weeks ending Nov. 23, were $157,174 50, an increase of $23,396 64 over the earnings of the corresponding three weeks of 1879.

The closing quotations on Thursday were: Adams Express, 117½@118; American Express, 64½@65½; American District Telegraph, 76¾@77; Atlantic and Pacific Telegraph, 37@38; Canada Southern, 70@70¼; Central of New Jersey 77¾@78; Central Pacific 83⅛@83½; Chicago and Northwestern, 122@122¼; do. pref., 142@143; Chicago, Burlington and Quincy, 169@170; Chicago and Alton, 137½@139; Chicago, Milwaukee and St. Paul, 107¼@107⅜; do. pref., —@120½; Chicago, Rock Island and Pacific, 122@123; Chicago, St. Louis and New Orleans, 37⅛@38½; Columbus, Chicago and Indiana Central, 18½@18¾; Delaware and Hudson Canal, 87@87½; Delaware, Lackawanna and Western, 101½@101⅞; Hannibal and St. Joseph 41¾@42; do. pref., 92@92¼; Illinois Central, 119⅜@119½; Lake Erie and Western, 34¼@34½; Lake Shore and Michigan Southern, 120¾@120⅞; Morris and Essex, 117½@118; Manhattan Elevated, 32@—; Michigan Central, 113¼@113¼; Metropolitan Elevated, 109@110½; New York Elevated, 117½@118½; New York Central and Hudson River, 142@142⅛; New York, Lake Erie and Western, 45½@45⅝; do. pref., 78¼@78¾; New York, Ontario and Western, 31½@31⅝; Ohio and Miss., 25½@25¾; Pacific Mail, 46¾@47; St. Louis and San Francisco, 39¼@40; do. pref., 51@53; do. 1st pref., 83½@85; St. Louis, Iron Mountain and Southern, 48¼@48¾; St. Louis, Alton and Terre Haute, 32@33; do. pref., —@109; Union Pacific, 98⅛@98¼; United States Express, 51@52; Wells Fargo Express, 111@114: Western Union Telegraph, 90½@90⅝; Wabash, St. Louis and Pacific, 41¼@41½; do. pref., 76½@76¾.

It is officially announced that the Texas and St. Louis narrow gauge railway is to be extended to the Mexican frontier, there to make connection with the Mexican narrow-gauge system. It is nearly completed from Texarkana, the northern terminus of the St. Louis, Iron Mountain and Southern Railroad to Corsicana, on the Trinidad River and will reach Waco during this season—a total distance of 250 miles.

Finances of the District of Columbia.

The annual report of the Commissioners of the District of Columbia, submitted to the President on the 27th ult., shows the total receipts at the Treasury from all sources in the District for the year ended June 30, 1880—including general and special appropriations by Congress amounting to $1,692,990 71—to have been $3,826,791 35, and the total expenses $3,523,867 90. The receipts of 1879 were $3,467,665 52, and the expenditures $3,210,047 05. The year 1879 was begun with $61,142 84 in the treasury, and closed with $257,618 14. The year 1880 was begun with the last named sum, and closed with $302,923 48 in the treasury. The bonded debt of the District of Columbia is being gradually reduced, and the Commissioners recommend the policy of consolidating it as speedily as possible into 3.65 bonds, in which form the larger portion of it now exists. These bonds being now at par they think there would be no serious obstacle to the early accomplishment of such conversion. The Commissioners refer to the recommendation contained in their last report relative to the improvement of the river front and the proper method of reclaiming the marshes which injuriously affect the health and retard the progress of the city. The area of the marshes to be reclaimed is 629.8 acres, and they estimate the cost at 20 cents per cubic yard, or $3,872 per acre. The Commissioners also refer to the condition of the general water supply of the city, which they say is such as to require the immediate action of Congress.

Pennsylvania Railroad.

The statement of the business of all the lines of the Pennsylvania Railroad Company east of Pittsburg and Erie, for October, 1880, as compared with the same month in 1879, shows

An increase in gross earnings of	$364,570
An increase in expenses of	362,106
An increase in net earnings of	$2,464

The ten months of 1880, as compared with the same period in 1879, show

An increase in gross earnings of	$6,102,975
An increase in expenses of	3,367,314
An increase in net earnings of	$2,735,661

All lines west of Pittsburg and Erie for the ten months of 1880 show a surplus over liabilities of $2,605,837, being a gain over the same period in 1879 of $1,803,819.

The gross earnings of the Philadelphia and Erie Railroad for the month of October, 1880, were $367,082 05, the gross expenses $217,192,79 and the net earnings $149,889.26. For the ten months ending October 31, 1880, the net earnings were $1,120,117.44, against $734,632.40 for the corresponding period of the previous year, an increase of $385,485.04.

The Auditor of Pacific Railroad accounts has been officially informed that the Southern Pacific Railroad Company has completed and equipped their road to the Rio Membres, which is 220 miles east of Tucson, and 1,200 miles east of San Francisco. The New Mexico branch, which is being constructed south in New Mexico, to intersect the Southern Pacific, has now only about 20 miles of road to construct in order to effect a junction. The Texas Pacific, which will meet the Southern Pacific at El Paso, is completed 140 miles west of Fort Worth. It is expected that the entire line will be open to San Francisco early next year.

Northern Central Railway.

The Northern Central Railway Company furnishes the following comparative statement of its gross earnings, operating expenses and net earnings for the month of October, 1879 and 1880 :

	1880.	1879.
Gross earnings	$512,917 59	$413,584 65
Operating expenses	263,241 27	250,368 95
Net earnings	$249,676 32	$163,195 70

—showing an increase for the month in gross earnings of $99,382 94, in operating expenses of $12,872 32, and in net earnings of $86,510 62.

For the ten months ended October 31, 1879 and 1880, the earnings, expenses, etc., were :

	1880.	1879.
Gross earnings	$4,098,023 13	$3,316,033 36
Operating expenses	2,682,413 30	2,410,858 64
Net earnings	$1,414,609 83	$905,174 72

—showing an increase for the ten months in gross earnings of $780,989 77 in operating expenses of $271,554 66, and in net earnings of $509,435 11.

Railroads in the Indian Territory.

A letter was recently addressed to the Secretary of the Interior at Washington, by the representatives of a new railroad project, in which he was requested to state whether the simple assent of the Choctaw Nation, approved by him, would be sufficient for the grant of a right of way through that tribe's section of the Indian Territory, and also "Whether Congress can grant a right of way, irrespective of any section on the part of this tribe, or is the assent of its council a condition precedent?" The Secretary writes in reply that this whole subject was considered by one of his predecessors, and his conclusions embodied in a letter which was approved by the President, May 23, 1870; that the principles enunciated in that paper have governed the Interior Department ever since, and that no legislation has since been enacted by Congress to render any change therein necessary. The Secretary says in conclusion: "You will perceive from this paper that both legislation by Congress and treaty stipulations are conditions precedent to any action by the Interior Department concerning the construction of railroads through the Indian Territory."

The Fort Pierre and Deadwood extension of the Chicago and Northwestern Railway, which has been completed to Fort Pierre on the east bank of the Missouri River, 780 miles north of Chicago and about 170 miles east of Deadwood, was opened for business on the 15th ult. Passengers and freight trains now run daily through to Fort Pierre. A daily line of Concord coaches is also run between Fort Pierre and Deadwood.

From London, November 19th, we learn that Mr. Gladstone refuses positively to support the scheme for the new Euphrates Valley Railway Line, so much favored by "the Jingoes" as an important link between England and her Indian Empire. It was especially urged upon the attention of the public by the Marquis of Salisbury.

Italian Industrial Exposition.

The report of the United States Consul at Milan, Italy, to the Department of State at Washington says that the Italian Industrial Exposition will be opened at Milan May 1, 1881, and will be continued until the 1st of August. Its pecuniary success, he writes, is assured by the appropriations made by the Italian government and the city of Milan and the liberal subscriptions of individuals. Although the exposition is to be limited to a display of Italian products exclusively, the Consul suggests that to the representatives of American industries "it will afford a favorable opportunity to observe in what branches they may successfully compete with Italians, and in what others they may profit by Italian excellence." He is of opinion that such an investigation would be especially useful in the departments devoted to agricultural and mining machinery and tools, cotton fabrics, leather and paper; for all of which he predicts an increasing demand for the American make when our manufacturers have learned the kind and the qualities required.

Railroads in West Africa.

The West Africa Light Railways Company of London propose building four railroads in the Yomba country, viz: from Salt Pond to Mackessim, twenty miles; Accra to the river Volta, fifty miles; Chamah or Dix Cove to the Wassaw gold mines, fifty miles, and from Galin, opposite Lagos, to Abbeokuta, reputed to have a population of 125,000, forty miles.

It is humiliating perhaps to Americans that an English company has received a charter from Liberia for a railroad extending two hundred miles back from Monrovia, and designed ultimately to connect that port with the head waters of the Niger. This is a shorter and more feasible route to that contemplated by the French, by way of the Senegal, and is attracting considerable interest in Europe.

Six different railroads, short ones of course, are partially completed in South Africa. A railroad from Zanzibar to the Victoria Nyanza lake is popularly advocated in England. The Portuguese propose communication with Lake Nyassa and the east coast by steamers on the easily navigable part of the Zambest and its tributaries, and obviating the difficulties of the impeded points by railways.

Express Business distinct from Railroad Business.

Judge Key, of the United States Circuit Court, Nashville, Tenn., in his recent decision in favor of the Southern Express Company, and against the Louisville and Nashville Railroad Company, said:

The conduct of an express business, as such business, is no part of the duty of a railroad. Until within a recent period there has been in this country no effort on the part of railroads to carry it on. They have been content not only to permit this business to be done over their lines by others, but have fostered it by opportunities given until it has grown into a distinct, separate, organized branch of general business, different in its method and characteristics from the natural and legitimate transactions of a railroad. Expressage has grown into a public necessity. The idea cannot now be entertained that a railroad directly or by indirection, can trammel or drive express companies from their lines by fettering them with unjust regulations or unfair discriminations, nor can a railroad assume to itself the exclusive right or privilege of carrying on an express business over its own lines, or any portion of them. I do not undertake to say that railroads may not undertake to act as expressmen, but if it should undertake to do so it must do so as expressmen and not as a railroad. It is no part of its duty or privilege as a railroad. If, then, in the conduct of its business as expressmen, its duty, relations and operations be different and distinct from those appertaining to it as a railroad, it must treat its express just as though it had a separate individuality from that of the railroad. It must give to it no opportunities, advantages or privileges which it does not allow to other express companies, carrying on a like business.

Boston and Maine Railroad.

The income from operations of this road for the fiscal years ending September 30, 1879 and 1880, were as follows:

	1879	1880.
From passengers ...	$1,257,067 57	$1,416,167 42

Dividend Nov. 15th....	210,000 00	280,000 00
Reserved for improvements at Haverhill .	100,000 00	150,000 00
	$766,447 12	$920,908 88
Leaving a balance of..	$30,418 54	$13,525 29

It will be seen that the gross receipts for the twelve months ending September 30, 1879, were $2,238,821 14, the expenses $1,441,955 48, and the net earnings $796 865 66, leaving after the payment of interest, a balance of $550,418 54; for the twelve months ending September 30, 1880, the gross receipts were $2,532,652 54, the expenses $1,598,218 42, and the net earnings $934,434 12, leaving after the payment of interest, a balance of $388,525 29—showing an increase in gross receipts during the past compared with the preceding year of $293,831 40, in expenses of $156,262 94, and in net earnings of $137,568 46. The net income, after the payment of interest, shows an increase of $138,106 75. The President, in his report, says:

It is a great satisfaction to your directors to be able to report a year of successful results. The many years of financial depression weighed heavily upon those on whom the responsibility of the management of your property devolved. They rejoice with you that this corporation has passed unharmed through the severe trials to which all railroad property was subjected during the late financial crisis. The indications of the turning of the tide and of a more prosperous future, as suggested in our last annual report, have, we are pleased to say, been fully realized. The operations of the road the past year have been without interruption. Its duty to all has been faithfully discharged, and thanks to a kind Providence, we have been visited by no serious calamity.

As all interests by years of depression suffered, so all interests feel the good effect of the present prosperity. We believe that all well managed and well located railroads have entered upon an era of prosperity which will for some years secure to their stockholders a fair return for their investment. Increased business requires increased expenses. The rolling stock, the side tracks, the freight yards and houses that were ample for the business of this railroad twenty years ago, would scarcely accommodate one half of our business to-day. As has been suggested in a former report, it is the settled policy of the managers of this road to foster and encourage its local business, and thus help to build up new branches of industrial pursuits along its line. From its local business its net revenue has been mainly derived, and to our local business we must look for the principal part of our net revenue in the future. The increase in this class of business on our road during the past twenty years in passenger traffic has been from $477,000 in the year 1860 (and this included the business from the Portland, Saco and Portsmouth Railroad and the Newburyport and Danvers Roads) to $1,225 000 in 1880. Whether the next twenty years will show a similar increase we know not; but judging from the past the increase must be large, as new enterprises are annually being added to those in existence along our line. That the projectors of this road made no mistake in its location, is constantly brought to our minds as we pass through the many thriving cities and villages which dot our road all the way between Boston and Portland.

The above figures show our gross income the last year to have been $293,831 40 greater than for the year previous, and $110,853 27 in excess of any other year in the history of the road.

Our net earnings for the past year are $138,136 75 more than the year previous, notwithstanding our expenses have so largely increased. This large increase in our expenses is accounted for by largely increased business, the miles run the past year being 125,484 more than during the previous year, and by charging to expenses many items that formerly went to construction, such as $57,753 02 for new freight cars, $10,589 47 for new passenger cars, $27 148 for new locomotives, and $27,026 50 for filling Prison Point Bay, aggregating $122,516 99. You have received from the net earnings of the year one dividend of three and one half per cent, and will receive on the 15th of November another of four per cent. In addition to these dividends, we have, of the net earnings, carried to the credit of improvement account the sum of $150,000, and the sum of $13,525 29 to profit and loss.

Your equipment has been improved during the year by the purchase of three first-class engines—two of which take the place and number of two worn out and broken up—and two first class passenger cars; and we have constructed at our shops and purchased one new combined passenger and baggage car, fifty long box freight cars, and one hundred and one coal dump cars. Our roadbed and superstructure were never in better condition than at the present time.

We have laid down during the year past 7 $\frac{4008}{5280}$ miles of steel, and 7 $\frac{2426}{5280}$ miles of new iron rails, not including that laid on our new double track. We have now 125 $\frac{2356}{5280}$ miles of steel track.

Our last annual report informed you that there had been appropriated from the earnings of that year the sum of $100,000 for the extension of our

double track east from Haverhill, and for other purposes; under that appropriation we have completed, and are now using, the new double track from Newton Junction to Little River, in Haverhill. We have also built about three miles of double track west from Portland to the point of the crossing of the Portland, Saco and Portsmouth Railroad in Scarborough. The whole length of double track constructed during the year is nine miles. The amount expended upon this new track to Sept. 30, 1880, was $75,239.68.

All the trestle-work under our track in Prison Point Bay, in Boston, has been removed, and the space filled with earth. Considerable filling of the trestle-work across the Scarborough marshes has been done, and much labor and material have been expended upon the pile bridges in that locality during the past year.

Our last report informed you that new locations of our main line of road in Massachusetts had been filed under an Act of said State passed in 1878. An additional Act, approved Feb. 16, 1880, compels us to file within the present calendar year a new location of both the Newburyport and the Danvers Railroads. Our engineer has spent much time and labor upon this work, and will complete it within the time specified.

The filling of Prison Point Bay, under the legislative Act of 1878, has been carried on during the year, and we hope may be fully completed by the close of another year. When completed, one large item which we have thus far charged to expenses will be saved.

The construction account during the last year has been diminished $3,861.58 by the sale of real estate no longer required for the use of the road.

Our floating debt has been reduced during the year, and stood at the close of business on the 30th of September, 1880, at $7,009.08, none of which sum is due and payable.

The passenger and freight business of the year, as compared with that of the year previous, stands as follows:

	1879.
Passengers carried	4,572,175
Passengers carried one mile	61,974,759
Tons of freight carried	685,598
Tons of freight carried one mile	82,334,295
	1880.
Passengers carried	4,829,028
Passengers carried one mile	68,596,870
Tons of freight carried	810,122
Tons of freight carried one mile	39,952,004

Showing a net gain of 256,853 passengers, and for one mile a net gain of 8,622,117; and in freight a gain of 124,524 tons, and for one mile a gain of 7,617,709 tons.

The extension of our double track east of Haverhill as far as Newton Junction gives us 41 miles of unbroken double track, except about 800 feet over the Merrimack River at Haverhill, where we have a single-track bridge. The bridge which we have used at this point since the construction of the road is now being demolished. It was constructed about forty years ago, and was considered a model bridge at the time of its construction. Large expenditures from time to time have been made upon it to make it safe for our increased traffic over it, and for the largely increased weight of our rolling stock. It being a wooden structure, it has been a source of constant anxiety to your directors lest it might be destroyed by fire. Such a casualty at any time would result in great delay to our business operations, and would be of great damage to our income. On account of its age, a few individuals had become alarmed for its safety.

These and other considerations induced your directors seriously to consider the subject of a new bridge—such a one as should cause neither anxiety to themselves nor alarm to the public. The result of these considerations was the making of a contract, in the month of August last, for the construction of a most substantial double-track iron bridge over the Merrimack River at Haverhill.

On examination of the masonry of the old bridge, it was found to be hardly sufficient for the proposed new double-track structure. To make perfect work, it was decided to remove the old and erect entirely new piers, located on new foundations. When this work is fully completed it will be a most perfect structure. Such a structure cannot be built except at great expense; we have therefore appropriated from our earnings of the past year the sum of $150,000, for the construction of this new bridge and for other purposes.

The equipment of the road September 30, 1879 and 1880, was as follows:

	1879.	1880.
Locomotives	79	80
Snow ploughs	11	11
Passenger and baggage cars	164	167
Merchandize and other cars	1,692	1,844

—A proposition for a railroad from Springfield, Ohio, to the Indiana line via Troy and Granville has been submitted to the people of Troy, Ohio, by Col. W. B. McClung of Columbus.

—A new railroad is projected to run from Port Rowan to Amherstburg, forming an Eastern connection with the Hamilton and Northwestern Railway system, and a Western connection by crossing the Detroit River and connecting in Michigan with the Wabash system. The line is already surveyed as far west as the County of Essex, Ont.

—It is announced that the Hocking Valley Company contemplate the erection of a railroad bridge over the Ohio river at Pomeroy.

The Coal Trade.

The leading coal carrying companies make the following reports of their tonnage for the week ending November 20, and for the year to the same date, compared with their respective amounts carried to the same time last year :

	Week.	1880.	1879.
Reading Railroad ...	192,596	6,940,734	7,947,288
Schuylkill Canal....	34,883	515,422	880,598
Lehigh Valley	129,478	4,453,120	4,286,819
Del., Lack. & Western.	87,149	2,123,352	3,400,549
Shamokin Valley	26 065	818,878	812,180
Central New Jersey..	105,910	3,371,852	3,643,032
United New R. R. of Jersey	28,983	1,015 085	831,122
Pennsylvania Coal ..	33,098	1,002,570	1,284 213
Delaware and Hudson	82,224	2,676,594	3,028,076
Huntingdon & Broad Top Mt.....	7,386	386,286	281,563
Penn. and New York.	32.116	1,105,405	1,168,818
Clearfield, Pa.....	43,061	1,505,422	1,436,112

The total tonnage of anthracite coal from all the regions for the week ending November 20, as reported by the several carrying companies, amounted to 632,798 tons, against 580,183 tons in the corresponding week last year, an increase of 52,615 tons. The total amount of anthracite mined for the year is 20,975,767 tons, against 23,538,008 tons for the same period last year, a decrease of 2,652-241 tons. The quantity of bituminous coal sent to market for the week amounted to 102 537 tons against 43,469 tons in corresponding week last year, an increase of 59,068 tons. The total amount of bituminous mined for the year is 3.880.441 tons against 3,022,920 tons for the corresponding period last year, an increase of 807,521 tons. The total tonnage all kinds of coal for the week is 735,335 tons, against 623,652 tons in corresponding week last year, an increase of 111,683 tons, and the total tonnage for the coal year is 24,806,208 tons against 26,560,928 tons to same date last year, a decrease of 754 720 tons. The quantity of coal and coke carried over the Pennsylvania Railroad for the second week of November was 160,686 tons, of which 121,677 tons were coal and 38,959 tons coke. The total tonnage for the year thus far has been 6,248,819 tons of which 4.708,754 tons were coal and 1,540,065 tons coke. These figures embrace all the coal and coke carried over the road east and west. The shipments of bituminous coal from the mines of the Cumberland coal region during the week ended Nov. 20 were 46.-919 tons, and for the year 1,910,429 tons—an increase of 488,245 tons as compared with the corresponding period of last year. The coal was carried as follows : Baltimore and Ohio Railroad—week 21,797 tons, year, 1,116,939 tons ; increase over 1879, 279,071 tons. Chesapeake and Ohio Canal—week, 21 843 tons ; year 591,766 tons ; increase over 1879, 147,010 tons. Pennsylvania Railroad—week 3 280 tons ; year, 201,-724 tons ; increase over 1879, 62,165 tons. The Reading Railroad for the week ending November 27, carried 160,000 tons of coal, of which 12,000 tons were sent to Elizabethport and 10,300 tons shipped from there, and 47,000 tons sent to Port Richmond and 36,000 tons shipped from there.—Phil. Ledger, Nov. 29.

It is expected by the 1st of March next the distance between Savannah and Jacksonville will be reduced from 362 miles to 262 miles, and the time required from fifteen hours to six hours. This saving is to be accomplished by the new line from Jessup, Ga., to Jacksonville. The new road will be laid with fifty-six pound steel rails, with fish joints and well ballasted.

The St. Louis and San Francisco railway has completed the Arkansas division of its road to Seligman, thirty-five miles south of Pierce City, and it is now open to that point for business.

The New York Canals will be closed on the 2d of December.

VALENTINES VARNISH

OUR CLAIMS.

We claim that our Finishing Varnishes are unsurpassed in the following qualities:

1. Uniformity. 2. Paleness. 3. Fluency. 4. Reliability. 5. Drying. 6. Hardening. 7. Fulness. 8. Brilliancy. 9. Durability. 10. Economy.

All know it is easy to make a Varnish that has the single quality of DURABILITY, but Varnishes which wear well are generally inferior in color and working quality, uncertain in laying, too slow in drying, or lacking in body or lustre, and frequently they possess ALL these defects.

In our "RAILWAY-COACH FINISHING" the ten qualities will be found combined, and our other Varnishes are as elastic and durable as is practicable for the work on which they are employed.

Those of our Varnishes which have the greatest durability require time for hardening. They have superior elasticity, and ARE DISTINGUISHED FOR THE EXTENT OF SURFACE THEY WILL COVER, WHICH RENDERS THEM ECONOMICAL.

VALENTINE & COMPANY,

Chicago. NEW YORK. Paris

Patent Stretched and Patent Riveted Short Lap

BELTING.

Our Belts are made from pure Oak Tanned Butts, and of the heart or solid part only. No part of the shoulder being used. Any one not familiar with Belt making can readily detect this by the shortness of the lengths and laps. Long laps are made including the shoulder or thinner and softer part of the Leather, causing the Belt to be, in its enduring qualities, no better than its poorest or thinner parts

Our Belting is warranted to run straight and maintain an even bearing on the pulleys, and sold under the fullest Guarantee.

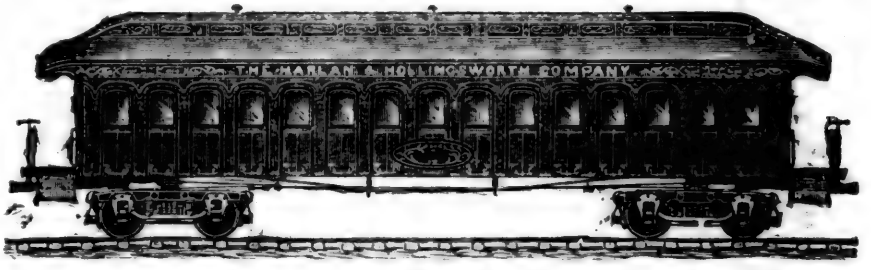
NEW YORK, LAKE ERIE & WESTERN RAILWAY.



TO THE TRAVELING PUBLIC.

During the Centennial Season—six months, closing November 10, 1876—the Erie Railway carried almos 3,000,000 passengers, without a single accident to life or limb, or the loss of a piece of baggage.

And for a whole year, the official records of the United States Post-Office Department show the arrivals of Erie Railway trains in New York, on time, to be from 15 to 27 per cent. ahead of competing lines.

Facts well worthy the consideration of travelers.

E. S. BOWEN, General Superintendent.

SECOND QUARTO SERIES, VOL. XXXVI., No. 50.] NEW YORK, DECEMBER 11, 1880. [WHOLE No. 2,329, VOL. LIII.

OUR BOSTON LETTER.

(From our regular correspondent.)

BOSTON, Dec. 7, 1880.

We have suffered from a considerable scarcity of money for the last few days, although many borrowers have promptly met any advance of rates above 6 per cent by payment of loans, and there is more or less private capital here that is still seeking temporary investment. We apprehend that the stringency has largely resulted from the shipment of available Boston funds to New York. When there has been any decline in stock it has resulted from general dullness rather than any pressure to sell caused by difficulty in getting money. The closing prices of the principal stocks, as compared with a week ago, show the following changes:

Advanced.

Atchison, Topeka and Santa Fe	141½	to	142½
Chic. Burl. and Quincy	170	to	174½
Conn. and Passumpsic	81	to	85
Fort Scott and Gulf	64½	to	70
Marquette, Houghton and O. Com.	21	to	33
Marquette, Houghton and O. Pref.	55	to	70
Old Colony	127	to	128
Flint and Pere Marquette Pref.	77	to	78½
Eastern	33¼	to	33¾

Declined.

Cin., San. and Cleveland	17	to	16½
Little Rock and Ft. Smith	63½	to	62¾
Flint and Pere Marquette	25	to	24
Rutland, Pref.	30¾	to	28½
Summit Branch	21½	to	20
Wisconsin Central, Com	14	to	13½
Pullman Palace Car Co.	125	to	122

Another installment of 10 per cent has been called on Massachusetts Central and also on Mexican Central subscriptions.

Oregon Improvement Company subscriptions are sought for at 25 per cent premium.

The most important advance is shown in the securities of the Marquette, Houghton and Ontonagon Railroad Company, the preferred stock of which has gone from 55 to 70 within less than a week. The published earnings of the road indicate that it is earning 6 per cent on the preferred stock, which must receive 8 per cent before the common gets anything. The road is located on the Wisconsin end of the State of Michigan, and a large part of its business is the transportation of ore. The company has made considerable sales from its land grant which, together with greatly increased earnings, have placed it in most excellent condition financially. It is worthy of remark that much of the buying of late has been by a house well represented in the directory.

The meeting of the stockholders of the New York and New England R. R. Co., was held to-day and the contest between the present management and the "Crane" interest which took place indicates that the recent heavy purchases of its securities just previous to this meeting were made to secure control of the road. The vote of the State's interest being cast in favor of the present management, however, substantially the old board of directors was re-elected. Independent of the State's interest Mr. Crane had the most votes, and it is understood that he will contest the validity of the election in the courts on the ground that the action of the directors was illegal in refusing to allow the bonds to be converted into stock at any time up to the hour of the meeting, and give them the same voting power as the stock. Also that the State, having passed a law limiting the voting interest of any one party in a railroad corporation to one-tenth of the capital stock, has no authority to overturn her laws in her own interest as a shareholder in the corporation, and therefore that the corporation had acted illegally in receiving the vote of the State for the full amount of the shares held by it.

Mr. Edward Crane has figured frequently in railroad schemes in Massachusetts and elsewhere. For two years he besieged the Massachusetts Legislature to adopt what was known as the "Crane scheme" for purchasing all the Massachusetts railroads and running them under State management. Another time his scheme was a trunk line from Boston to Chicago, owned in Boston and run in the interest of the "Hub." He next appeared in New York as the advocate of the towpath scheme, which was a scheme for a railroad along the Erie Canal to be used for towing the canal boats, and at the same time for general freight transportation. He was at one time President of the old Boston, Hartford and Erie Railroad, and is now supposed to represent some New York capitalists who are planning to make the New York and New England a part of an air line from New York to Boston, and will enter the former city by means of a road running parallel to the New York, New Haven and Hartford.

The directors of the Chicago, Burlington and Quincy will meet here Thursday to take action on the matter of a stock dividend, which it is generally admitted will be 66⅔ per cent.

Mexican Central subscriptions have declined under a pressure to sell from 121 to 116.

The fourth assessment of $425 is due Dec. 9, and being undesirable collateral, in times of stringency weak holders are forced to part with them.

New Railroad to the Sea Coast.

The Pennsylvania Railroad Company is perfecting arrangements for the construction of a new line of track running east to the seashore over a rather remote section of the State of New Jersey, which, it is expected, will open up another desirable beach resort contiguous to both New York city and Philadelphia. The chief object in the construction of the road is, however, to make a direct route to the seacoast from Philadelphia. The Camden and Burlington County Railroad runs hence to Pemberton, and the Pennsylvania Railroad Co. controls the Pemberton and New York Railroad, which runs east to Whiting's on the New Jersey Southern Railroad, and around Tom's river. It is proposed that the new track will lead from Whiting's to Tom's River Village in Ocean county, continuing on the south side of this stream to Sheep's Head Point, crossing Barnegat bay over a bridge 7,200 feet in length, and there striking what is known as Island Beach, a long tract of available shore between the bay and the ocean. Here the road will take a northerly direction, running up the beach on the bay side, crossing Squan Inlet and connecting with the Farmingdale and Squan Railroad, and having its terminus at or near Sea Girt. The track from Whiting's to the ocean will be a straight stretch of seventeen miles. Work will shortly be begun upon the new track; operations have already commenced upon the beach branch. It is expected that the road will be in running order during May. Speaking of the new road, a railroad official said that it would throw open for development the best piece of beach property from Sandy Hook to Cape May.

New York, Fort Wayne and Chicago R. R.

Articles of consolidation have been filed in the office of the Secretary of State of Indiana of the Ohio Railway Company, organized to construct, equip and maintain a line of road across Ohio from Trumbull to Paulding County, and the Ohio, Fort Wayne and Chicago Railroad Company, or-

ganized to build and operate a line from the west end of the Ohio Railroad to a point in Lake County, at the southeast corner of Cook County, Illinois. The new corporation will be known as the New York, Fort Wayne and Chicago Railroad Company. Of the directors, one shall reside in Indiana, two in New York and four in Ohio. The office shall be located at Tiffin, O. The capital stock will be $7,400,000 in $50 shares.

New York and New England Railroad.

From the report of this company prepared for presentation at the annual meeting of the stockholders held in Boston on the 7th inst., it appears that the lines owned by the company are: Boston to Waterbury, 149.66 miles; Providence to Willimantic, 58.50; Brookline to Woonsocket, 33.75; East Thompson to Southbridge, 17.50; Islington to Dedham, 2; Charles River to Rigde Hill, 1.64; Dorrance street track, Providence, 0.82—total miles owned and operated by the company, 263.87; and the lines leased by the company: Norwich and Worcester, 66.4 miles; Rhode Island and Massachusetts, 13.6; Rockville, 4.4; Connecticut Central, 34.25—total leased lines, 117.39; total miles of road operated, 381.26. In addition the company owns the road (nearly finished) from Waterbury to Hopewell Junction, 65 miles, and has a running arrangement over the Newburg, Duchess and Connecticut Railroad, from Hopewell Junction to the Hudson River at Fishkill, 13 miles. The company also controls, through its lease of the Norwich and Worcester Railroad, the Norwich and New York Transportation Company's line of steamers, which run between Allyn's Point, New London, and New York, 116 miles.

The earnings of the roads operated by the company for the years ending September 30, 1879 and 1880, (not including the Norwich and Worcester Railroad) were:

	1879.	1880.
From passengers'....	$788,216 95	$893,616 51

Deduct worthless acco'ts.	996 82	
		38,379 67
Surplus for the year.....		$328,226 42

The gross earnings show an increase of $353,404 09, or 17.92 per cent, the operating expenses an increase of $123,564 04, or 8.05 per cent, and the net earnings an increase of $229,840 05, or 42.4 per cent.

The bonded debt of the company at the close of the fiscal year amounted to $6 468,000, having been increased during the year by the sale of $1,760,000 par value of first mortgage bonds. After the payment of coupons and taxes, the surplus earnings and the proceeds of the bonds have been expended for improvements, additional equipment of the road, for terminal grounds at Boston and for the construction of the western extension from Waterbury, Ct., to the Hudson River. The story of the purchase of the lands of the Commonwealth in South Boston, 37 acres in area, at a cost of $1,108,165, is given at some length, and the facts are noted that upon them are being constructed a freight house 650 feet in length by 210 feet in width, and a grain elevator with a capacity of 500,000 bushels.

Of the advance towards the Hudson, it is said: Work on the extension from Brewsters to Hopewell Junction has been pushed with a fair degree of rapidity, but it is now quite certain that the western extension of the road, and the necessary connections, transfer and terminal arrangements at the Hudson River cannot be completed till spring, though the section between Waterbury and Brewsters will probably be opened for traffic at an earlier date. There has been paid on this work $1,319,384 82.

There have been purchased within the year ending Sept. 30, 7 "Mogul" and 8 passenger engines, 8 passenger and 5 baggage, mail and express cars, 662 box, 113 flat and 15 drop side gondola cars, at an aggregate cost of $507,895 57. Five hundred of these new box cars have been placed, by permission of the Pennsylvania Railroad Company, in the Star Union Line.

Notwithstanding the additions already made to equipment, it will be necessary to buy or build, as soon as possible, at least 100 20-ton drop bottom gondola and 150 side dump coal cars, in order to meet the demands of the rapidly increasing coal trade. It will also be necessary to contract for about 15 heavy freight engines, in order to furnish motive power sufficient to promptly handle the business from New York and the West, now coming by the way of New York, and also such new business as may be obtained by the completion of the western extension of the road.

During the year 2,479 tons of new steel rails, costing, with the necessary fastenings, $81,921 09, were bought and put into the track, as against 2,316 tons new steel rails, costing $40,357 41, and 1,652 tons new iron rails, costing $14,678 91, for the year previous, while 144,325 new cross ties, costing $47,198 76, were put into the track this year, as against 110,616, costing $34,685 26, for the preceding year. The entire cost of these rails has been charged to repairs, and no part to betterments or improvements, as is common on many roads. In addition to the above, 312 tons of steel rails have been used in extending the double tracks to Walpole. For the proper accommodation of the company's business, and to meet the prejudice existing against a single track road for passenger traffic, it is believed that it will be necessary, at an early day, to complete the double track from Boston to Hartford.

United States Sixes of 1880.

The following circular relative to the payment of interest due Dec mber 31, 1880, on the United States six per cent bonds, act of February 8, 1861, was issued at the Treasury Department on the 4th ult.:

Notice is hereby given to the holders of United States six per cent registered bonds, issued under the act of February 1, 1861, commonly known as "sixes of 1880," that the interest on said bonds, due December 31, 1880, will be paid with the bonds upon the presentation of the bonds for redemption. No intrrest on that loan will be paid upon schedules. JOHN SHERMAN, Secretary.

New York, Saturday, December 11, 1880.

Entered at the Post Office at New York, N. Y., as Second-Class Mail Matter.

ALTERATIONS and improvements being made in the tables, which are weekly features of the JOURNAL, necessitate the temporary withdrawal of part of them. In the Bond List alterations are desirable, owing to changes among the roads, consolidations, etc., since our tables were revised. The Share List is naturally corrected at this season of the year, and as this is the time when much of the necessary information comes to us from our correspondents and from the railroads, the table, if published now, could not be as symmetrical and complete as we would wish. On these accounts we withhold these two tables until they are perfected and made of greater value than ever before, to accomplish which no efforts will be spared. We have added several important features to the JOURNAL recently and it seems desirable now that some of our tables should appear semi-monthly, monthly and quarterly instead of weekly, thus giving us an opportunity to lay before our readers more information and a greater variety each week. We shall announce the tables as they are to appear from week to week. The table of contents always gives those in the current number, and in future by referring to the files of the JOURNAL any of its tables desired can readily be found, and they will contain as late information as though appearing in each number, as we do not intend to withhold any tables that are of weekly interest. While adding new features to the JOURNAL, our aim is to retain and improve the old ones.

THE Grand Duke Nicholas turned his exile in Central Asia (occasioned by extravagance and misbehavior) to good account. Becoming interested in the construction of a railroad connecting Siberia with the western part of the Russian empire the young man under exile personally explored the respective regions and wrote a masterly report on the best line to be selected for the grand enterprise. He has been pardoned by the Czar and allowed to return to St. Petersburg;—another illustration of railroads as the true benefactors and inspirers of Grand Dukes as well as the People.

THE New York Chamber of Commerce does not like Judge Lowell's bankruptcy bill because it does not sufficiently discourage insolvency. That seems to be a valid objection, but the merchants of New York have a much better method at their command of "discouraging insolvency," viz, that of discouraging extensive and ill-considered credits without which there would be few bankrupts and little need of a statute. So long as we have no national bankrupt law and every merchant is compelled to trust to the varying State enactments for the recovery of debts, credit and insolvency alike seem to be discouraged.

A CABLE dispatch from London announces that the appeal by the defendants in the case of the Erie Railway Company against Mc Henry was decided Monday. The Court of Appeal upheld the decision of the Master of the Rolls, ordering McHenry to pay £400,000 to the Erie Railway Company. It also decided that McHenry is not entitled to commission on moneys raised by him for the Erie Company. This probably terminates the important suit, as it is not thought that McHenry will take an appeal to the House of Lords. There is doubt as to the amount which it will be possible to secure from McHenry, who sometime ago began proceedings in bankruptcy though it is said they have not been prosecuted. He is reported to have offered $500,000 as a compromise.

THE annual report of Auditor French, the controller of the government's accounts with the land grant railroads, among the other valuable facts contained in its comprehensive statements, exhibits a very assuring and salutary condition of affairs with the great Pacific lines. It shows most emphatically the great advantages the travelling and shipping public have received through the liberal expenditure which has marked the generous policy of their managers; an expenditure made possible by their enterprise and experience and the public confidence in the same. Reductions in rates have been made as fast as it has been possible, until the charges have been reduced on an average to nine-tenths of a cent per ton per mile for freight, and for passengers to two and one-eight cents per mile. A far better business than ever before is now being done by the Pacific roads, with a rapidly increasing traffic promised. The managers and the public alike certainly have reason to congratulate themselves upon the attainment of these conditions in trans-continental railroading, which have been secured, and under no pressure, save that which comes from a healthy competition and the common sense belief that the best way to increase traffic is to study the needs of commerce and the public welfare.

Judge Black's Letter.

In comparison with the melo-dramatic remarks of Mr. Thurber, Judge Black's letter to the New York Board of Trade and Transportation is a very tame affair. He indulges in no newspaper or lecture quotations and utters nothing startling or even novel. The opinions of so eminent a lawyer as Judge Black are entitled to respectful consideration, but the ideas that he has just advanced upon the transportation questions now being agitated, will add little to the general knowledge upon the subject. The greater part of the letter is consumed in proving that States have the power to *regulate* railroads within their limits and to prescribe reasonable and equal rates for the transportation of freight and passengers. Surely Judge Black cannot be ignorant that legislatures have for several years past, freely exercised the powers, that he has taken so much pains to prove they may exercise.

Some States have prohibited under penalty any railroad within their territory from charging a larger sum for transporting freight of the same class over a given distance, than it is charging for the same distance over another part of its road, or in the opposite direction or for a less distance in the same direction. Let us look at the operation of such statutes. At certain seasons of the year more freight is moving from Albany toward New York, than in the opposite direction. The consequence, of course, is that the supply of empty cars at the latter point will be in excess of the demand. The Hudson River lies between these points, and touches nearly all the stations upon the New York Central road. Unless the railroad is permitted, under such circumstances, to induce shipments over its line by lowering its freights, it follows that a portion of its cars will return empty. This would necessitate a higher charge for freight moving toward New York than it would be necessary to impose if return freight could be secured by lowering the rates on the return trip. To forbid the company to lower the rates of return freight would thus benefit no one, and would work an injury both to the company and to the people along the line. At other seasons of the year the larger amount of freight is moving in the opposite direction, and then the operation must be reversed. But statutes now in force in several States will not allow this expansion and contraction in similar cases, and it is this power that Mr. Thurber wishes to abrogate entirely. Again, it is evident that it is much

cheaper to deliver freight in Boston, where it can be moved in long trains than it is to peddle it out in small quantities, but the legislature interferes once more to say that no railroad must charge more for carrying one hundred pounds of freight from Albany to Boston than from Albany to a little village just outside of Boston.

Rates for freight and passengers should be allowed to vary with the volume of traffic but legislatures in some States prescribe an arbitrary rate for passengers and freight, and from their dictum there is no appeal. All States have the right to prescribe rates that shall be reasonable and equitable and no one knows better than Judge Black that they have exercised such rights, and have carried their power in many cases to extreme limits. Indeed he says that "the laws necessary for this purpose are not difficult to frame," and he confesses that in the constitution of his own State there are "a series of provisions which if carried out and enforced would be amply sufficient." Then why not enforce them if there are wrongs to correct? There was *one* honest man in Sodom; would Judge Black have us infer that there is not one honest judge in Pennsylvania? The cases he has cited might lead some persons to suppose that the doctrines he has maintained in the beginning of his letter were of recent date, but the duties and liabilities of common carriers are clearly defined by the common law, and have been so defined for centuries. One of these principles is, that nothing excuses the carrier for the non-delivery of goods received by him for carriage, except the act of God or the public enemy. This principle is not written in the charters of railroad corporations, that they shall exercise their franchises subject to this stringent liability; nevertheless courts have universally held them to it, not permitting them to evade it, even by a notice, or by any means short of a special contract to which the free consent of the shipper must be shown.

Another perfectly well settled rule of the common law with regard to common carriers is, that they shall not exercise any unjust and injurious discrimination between individuals in their rates of toll. Chief Justice Hall, when delivering the opinion of the court of King's Bench, in the celebrated case of Cogga vs. Bernard, 2 Lord Raymond, decided in 1703, that the common carrier "exercises a public employment," and it necessarily follows that he must deal with the public fairly and without unjust discrimination. This common law duty is not prescribed in the charters of railroad corporations but attaches to them by virtue of their function as common carriers. We suggest to Mr. Thurber and his associates that they first acquaint themselves with the rights that the shippers of freight already have by the common law, and by the constitutions and statutes of the different States before they shriek stronger "regulations."

Judge Black advises the passage of a national statute which shall suspend the operation of the statutes of several States and give to Congress the power to prescribe rates for freight and passengers. We will discuss this proposition at another time and will only suggest to the members of the Board of Trade and Transportation, that if they decide to present this matter to Congress, they can hardly find a gentleman of greater legal acumen or better adapted to address a congressional committee upon this subject than Judge Black of Pennsylvania.

Death of a Noted Inventor.

Thomas S. Hall, the well known inventor of Hall's electric danger signal, now in use on several railroads, died at his home in Meriden, Connecticut, last week. He had been a sufferer for some time from paralysis, and he leaves a widow and several children one of whom, Mr. W. P. Hall, carries on the business that his father established.

The signal which bears his name is one of the best known and most widely used of automatic danger signals. In the Hall system an open circuit is employed; and the current which keeps the signal set at safety is transmitted over the wires. This current being broken by an engine entering a section and touching a circuit closer, sets the signal at danger. Mr. Hall had made the very important subject of railroad signals almost a life study. Railroad men generally will miss his practical suggestions and the novel mechanical appliances that he was continually giving to the public; and the traveling public will not soon forget the quiet and unostentatious but valuable and we may say philanthropic labors of Thomas S. Hall.

Railroad Law.

COMMON CARRIERS.

LIABILITY FOR CONNECTING LINE.

In Stewart vs. Terre Haute and Ind. R. Co., United States Circuit Court, East District of Missouri, Oct. 1, 1880, 10 Rep. 618, it was held that in the absence of a special contract, a common carrier is liable to the extent only of his own line, and for safe delivery to the next carrier. The court said: "In the present case the question is whether a special contract on the part of the defendant to carry through to Buffalo is established by proof that the cattle were delivered to defendant, that its agent knew of their destination, and that he named the price to be charged for carrying through to Buffalo, the price having been paid at the end of the route, and to the last carrier. The fact that the defendant gave the through rate with knowledge of the point of destination is most relied upon by the plaintiff. Ordinarily, men contract with reference to the use or disposition of their own property, and do not undertake to control that of others. It follows, I think, that a contract by which one carrier agrees to carry freight over a railroad belonging to and under the control of another, being out of the usual course, must be established by something more clear and definite than by proving the fact that such carrier has named a through rate. It is commonly known that it is the duty of a railroad agent to inform himself and advise all inquirers as to the rates of fare and freight to distant points, and it would be a hard rule that would make the giving of this information equivalent to an agreement to carry to all such distant points. If it had appeared in evidence that there was an arrangement between the several lines comprising the through route by which each was the agent of all the others to solicit and ship freight over the combined through line, the case would have been very different, and I think that such proof would have been sufficient to make out a prima facie case for the plaintiff. This for the reason that in such a case each of the several companies may be regarded as operating the whole line as if it were its owner, and therefore its contracts would be presumed to run to the destination of the freight anywhere upon such line, unless the contrary should appear. But in the absence of any further showing, the naming of the through rate and knowledge of the destination of the freight are not enough." This is the ordinary American ruling, and is supported by the following authorities and later ones in the same States; Railroad Co. vs. Manufacturing Co., 16 Wall, 318; Nutting vs. R. Co., 1 Gray, 502; R. Co. vs. Berry, 68 Penn. St. 272; Root vs. R. C. 45 N. Y 524; Converse vs. Transportation Co., 33 Conn 166; Perkins vs. R. Co., 47 Me. 573; Bank vs. Transportation Co., 23 Vt. 209; Express Co. vs. Rush, 24 Ind. 403; McMillan vs. R. Co., 16 Mich. 79; Hoagland vs. R. Co., 39 Mo. 451; Balt. and Ohio R. Co. vs. Schumaker, 29 Md. 176; Irish vs. Railroad, 19 Minn. 376; Crawford vs. R. Assoc., 51 Miss. 222; Philips vs. Railroad, 78 N. C. 294. In Gray vs. Jackson, 51 N. H. 9; 12 Am. Rep 1, the agreement was held to be a question of fact, and where there was no agreement for liability beyond the carrier's own line there was no liability beyond. But in Mobile and Girard R. Co. vs. Copeland, Supreme Court of Alabama, 1880, 10 Rep. 625, the carrier was held liable for delivery at the destination, even beyond his own line, unless he expressly limits his liability. The court said: "When goods are consigned to a place on his own line of transportation, the known and established duty of the carrier is to deliver them at that place, and to the person who has the right to receive them. A mistake, however innocent, in making delivery, either to the proper person or at the proper place, involves him in liability. When he accepts goods directed to a place beyond the line of his own route, not limiting his liability, what difference is there in the measure of his duty and liability? The true doctrine, that which is most consistent with all the principles which govern the liability and duty of carriers, and which seems to us required by the same necessity and public policy upon which these principles are founded, is that a common carrier who receives goods destined to a place beyond his own line of transportation, not expressly otherwise limiting his duty and liability, must be regarded as contracting for a delivery at the point of destination. It cannot be said that this rule is more unjust to the carrier than that which holds him liable as an insurer for loss or injury not occurring by the act of God, or of the public enemy. Nor is it more

unjust than the rule which compels him to receive all goods within the scope of his business, which are offered for transportation on his own line. The injustice seems to us to be visited upon the public, who are compelled to employ carriers, if the opposite rule is adopted." This is the English doctrine, founded on Muschamp vs. Ry. Co., 8. M. & W. 421, and followed in this country in Ill. Cent. R. Co. vs. Copeland, 24 Ill. 332; Carter vs. Peck, 4 Sneed, 203; Angle vs. Railroad, 9 Iowa, 487; Bennett vs. Filyans, 1 Fla. 403; Bradford vs. Railroad, 7 Rich. 201; Mosher vs. South. Ex. Co., 33 Ga. 37; Lock Co. vs. Railroad, 48 N. H. 339.

SLEEPING CARS—LIABILITY OF R. R. CO. FOR NEGLIGENCE OF SERVANTS OF.

47. The Pennsylvania Company vs. Jos. E. Roy. In error to the Circuit Court of the United States, for the Northern District of Illinois.

This was a suit for damages on account of injuries sustained by Roy in consequence of the breaking down of a berth in a Pullman sleeping car in which he was traveling on one of the leased lines of the Pennsylvania Railroad Company. Roy alleges that the injuries complained of were caused by a breach of the railroad company's obligation to furnish safe cars and competent servants. The Pennsylvania company asserts that negligence which led to the injuries was neglect of the Pullman Palace and Sleeping Car Company, not of the Pennsylvania Company; that if (the Pennsylvania Company) did not agree in its contract with Roy to furnish him with a sleeping car or take pay therefor; that his contract for a sleeping car was with the Pullman Company, and that he should look to that company for compensation for the injuries complained of. This court holds that passenger carriers are under an obligation arising out of the very nature of their employment to provide for the safety of the passengers whom they have undertaken for hire to convey from one place to another In fulfilling that obligation they should be held to the greatest possible care and diligence. It is an immaterial circumstance in this case as between the parties before this court that the sleeping car was owned by the Pullman Palace Car Company, and that that company provided at its own expense for such car a conductor and porter, who had immediate control of its interior arrangements. The duty of the railroad company was to convey passengers over its line. In performing that duty it could not, consistently with the law and obligations arising out of the nature of its business, use cars and vehicles which careful and thorough examination would have shown to be inadequate or insufficient for safe conveyance. Where it did not choose to exercise from time to time such right of inspection over the cars of the Pullman Palace Car Company as it should exercise over its own cars, it is chargeable with negligence or failure of duty, and is responsible for any injury therefrom to passengers. The conductor and porter assigned by the Pullman Company to control the interior arrangements of the car in which Roy was injured exercised such control, as the law will conclusively presume, with the assent of the railroad company. For the purpose of the contract between that company and Roy, therefore, the sleeping car conductor and porter are to be deemed the servants and employes of the railroad company and their negligence was the negligence of the railroad company. The law will not permit the carrier of passengers through any arrangement with sleeping car companies whereby the latter's cars become a part of the train of carrier to throw off the responsibility of providing proper means for the safe conveyance of those whom he has agreed for hire to convey. While holding these views, however, as to the responsibility of the railroad company, the court is of the opinion that evidence tending to improperly increase the damages awarded was erroneously admitted in the trial below, and on that ground alone the judgment of the Circuit Court is reversed and the cause remanded for a new trial.—[Chicago Legal News.

Construction.

—It is estimated that the Nevada Southern Road will be open for travel in June 1881.

—Surveys are being made for a special bridge at Belmont, for the Philadelphia and Reading Railroad.

—Work is being pushed on the enlargement of the Welland Canal, the intention being to complete it by July next.

—The Chicago, St. Louis and New Orleans Railroad is to be laid with steel rails from New Orleans to Cairo, about 500 miles.

—It it reported that Senator Davis of West Virginia is planning for the construction of a railroad up the north branch of the Potomac river.

—The railroad from Baltimore to Annapolis and Drum Point, seventy-five miles, has been taken up by capitalists who intend to push work upon its completion at once.

—It is announced that work will be rapidly pushed in constructing the Chicago, Texas and Mexican Railroad. The headquarters for Texas will be at Dallas.

—Memphis aims to have a railway into Texas, and surveyors will soon make a beginning of the work, which includes a no less undertaking than the bridging of the Mississippi.

—Prominent New England railroad men have recently been looking into the plan of extending the Manchester and Keene Railroad, N. H., from Greenfield to Manchester.

—An effort is being made by the citizens of Benton, Gilboa and other Ohio towns to have the Findlay branch of the Cincinnati, Sandusky and Cleveland road extended to Gilboa and ultimately to Toledo. The preliminary survey will soon be made.

—The abutmen's for the new bridge being built by the Delaware, Lackawanna and Western Railway Company at Binghamton, N. Y., are about completed, work having been rapidly pushed while the water was low and before the setting in of winter.

—The Chicago and Northwestern Road is building 600 miles of road this season, including 238 in Dakota, 19 in Iowa, 151 in Wisconsin and 45 in Michigan. This will bring the great system up to about 3,200 miles. The Wabash system now includes 2,477 miles of road.

—The directors of the New York, Ontario and Western Railroad Company met in this city, Tuesday, and considered bids for the extension of the road between Jersey City and Middletown. The contract for the improvement will be awarded at the next meeting of the Board.

—Twenty-five surveying parties are to be sent out next week, to make surveys for the route of the proposed extension of the Lake Erie and Western Railroad, from some point on the main line of the road, not yet decided upon, to St. Louis, 12,000 tons of steel rails, it is said, have been purchased for the new road, which it is proposed to have completed within a year.

—It is expected that Messrs. Charles E. Powers, John M. Clark, Samuel B. Rindge, J. Warren Merrill, Sumner R. Mead and others will ask the Massachusetts General Court of 1881 for a charter for an elevated railroad company, which shall locate, construct and operate an elevated railroad in the cities of Boston, Cambridge, Somerville and Chelsea, and in the towns of Malden, Medford and Everett.

—The Massachusetts Central Railroad Co., will probably have its line completed during the next year with trains running over its entire route to the Hoosac Tunnel. Rails are now being laid in the vicinity of Sudbury, Mass., about half a mile of track being completed daily. On the eastern side of Sudbury construction trains are now running to the town of Wayland.

—The extension from Parkersburg to Evansville of the Peoria, Decatur and Evansville Railroad is nearly completed, and through trains over it to Chicago will probably be run by Jan. 1st. A round house and machine shops are being erected for this road, and excavations are being made for a large brick depot at the corner of Faanklin st. and 6th avenue, Evansville.

—The Texas and St. Louis Railroad, a narrow gauge road, is about completed from Texarkana, the southern terminus of the St. Louis Iron Mountain and Southern road, to Corsicana on the Trinidad river and will reach Waco during this season. The line will probably be extended to the Mexican frontier, to make a connection with the Mexican narrow-gauge system.

—It is reported at Denver, Col., that the Denver and Rio Grand Railway Company will, as soon as iron can be procured, begin laying a third rail between Denver and Pueblo, with a view of running the Atchison, Topeka and Santa Fe cars through to Denver without transfer. The additional rail, it is understood, can be laid on the present ties. In the meantime there will be erected hoisting machinery at Pueblo for the purpose of changing Santa Fe freight cars to the Rio Grande tracks.

—As soon as the weather will permit, work is to be begun on the completion of the Chicago and Atlantic Railroad, which was partially constructed several years ago. The road is graded from Marion, O., to Kenton and through portions of Indiana. That part of the road which is laid with a three foot gauge is to be changed in the spring to the regular standard gauge. The line begins at Marion, O., on the New York, Pennsylvania and Ohio, and will run through Kenton, St. Mary's, Celina, Bluffton, Huntington and Rochester, Ind., to Chicago.

—A New Albany despatch says: "The engineer corps now engaged in making the survey and location of the New Albany and St. Louis Railroad, between Albion, Ill., and St. Louis, will complete their work by the last of January. From Albion, Ill., to the Pike county line, in Indiana, the road is completed and being profitably operated. From the Pike County line to New Albany the most expensive grading hnd tunnelling have been done and will only need slight repair to complete it ready for the superstructure. The completion of the division between New Albany and the Pike County line is now regarded as a certainty in 1881. It is stated that work upon the division between Albion and St. Louis will be commenced in April next.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An *asterick* (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics.*" State-aid Railroads are distinguished by a "¶."

A New Departure in Railroad Brakes.

Mr. Wm. Loughridge has made arrangements with the Baltimore and Ohio Railroad Company, through its master of machinery and others connected with that corporation, to introduce on an experimental train now being equipped a new method of applying brakes to an entire train of freight cars. This system, the invention of Mr. Loughridge, whose air brake is in use on the Baltimore and Ohio Railroad, is to be operated by the engineer by steam power, assisted by the force of the momentum of the train. This is done without any connection of flexible hose, or the use of air or air-pumps in any form. Mr. Loughridge has made elaborate experiments with dynamometers and other instrumentalities, which prove that the engineer can apply the full braking power required, and graduate the same to any degree required for grades or moderate stops. The great feature in this improvement is that the engineer can within two seconds apply the full power to a train of any length, and relieve the brakes from the wheels within the same time to start the train. This remedies the great evil now found in the air-brake, by relieving the brakes from the wheels to start. With the new method the power is so nicely adjusted that it is impossible to slide the wheels, and it can be graduated to deliver on each brake lever ten pounds pressure. It is also capable of being graduated to transmit the required power to each car in the train, whether loaded, partly loaded or empty, without sliding the wheels. The experimental train is now being equipped at Mount Clare, and will within sixty days be ready for actual test. Some estimate of the value of a perfect freight brak will be better appreciated when it is understood that there are only 15,000 passenger cars in operation in the United States, and over 600,000 freight cars. Mr. Loughridge expresses the belief that this experimental train will fully develop the feasibility of a freight-train brake that will enable the engineer to control his train quite as effectively as can now be done with passenger trains. That it is a hard problem to solve is proven by a failure in all efforts heretofore made to accomplish it, yet when we consider that he has fulfilled heretofore all his promises in the equipment of passenger trains, and was the first to accomplish that end, and with the fact that he is a very careful experimentalist, and fully posted in the law of forces, and has had great practical experience in this connection, it is to be hoped that this, the greatest effort of his life, will prove a success.—[Balt. Sun, Dec. 3.

BOOK NOTICE.

THE LAW OF CARRIERS OF PASSENGERS; Illustrated by Leading Cases and Notes. By SEYMOUR D. THOMPSON, Author of "Law of Negligence," &c. (St. Louis; F. H. Thomas & Co., 1880.)

Mr. Thompson's book is an attempt to examine more closely into a subject which has steadily increased in importance during the last few years. We are very much in favor of treating the more prominent branches of Railroad Law separately and in detail. Judge Redfield's general treatise upon the Law of Railways, scholarly though it is, was published several years ago, and does not now meet the wants of the profession. The rapid growth of Railroads and the yearly increase in the number of passengers by rail, combine to make the subject an interesting and important one. We therefore cordially recommend this work to our readers as being worthy of their patronage. The plan adopted by Mr. Thompson is to give a number of the leading cases in full, and to give the results of the other cases in the form of notes. The notes are able and scholarly and constitute a very commendable treatise on the law of carriers of passengers. The table of cases embraces a concordance of citations similar to that in the author's work on Negligence. Mr. Thompson has given us a book of six hundred and twenty pages, nearly faultless in its mechanical execution and well indexed. It is dedicated to Judge Samuel Treat of the United States District Court. The author acknowledges valuable assistance from Edwin G. Merrian, Frank W. Peebles and William L. Murfee, J.

Organization.

—The Providence and Springfield Railroad Company has re-elected its old board of directors.

—The incorporators of the Arlington and Pimlico Railway Company are Messrs. Oden Bowie, Washington Booth, James L. McLane, J. B. Ferguson and J. Alexander Preston. The new railroad is to be located in Baltimore County, Md.

—Among the certificates of incorporation recently filed at Columbus, Ohio, were those for the following companies: The Parlor Cattle Car Co., of Cincinnati, and The Goshen Building and Loan Co., of Mechanicsburg; the capital of the latter to be $100,000.

—Articles of incorporation have been filed in the County Clerk's office of Hudson County, N. J., for the Ocean Oil Company, with a capital stock of $250,000. The incorporators are Messrs. James R. Keene, John Pitcairn, Josiah Lombard, Pascal L. Taylor, David M. Kelsey, Josiah G. Benton and Alanson A. Sumner.

—The annual meeting of the New York and New England Railroad was held at Boston, Tuesday. The directors elected were as follows: Messrs. William T. Hart, James H. Wilson, Joseph K. Baker, Le Grand B. Cannon, Samuel A. Carlton, George P. Carter, R. Suydam Grant, John Goldthwait, Marshall Jewell, Frederick J. Kingsbury, Jesse Metcalf, Thomas Nickerson, Gornam P. Pomeroy, Stillman B. Allen and James Sturgis.

—At the annual meeting of the stockholders of the Pittsburg and Connellsville Railroad Company in Pittsburg, Monday, the following directors were elected, Messrs. John King, Jr., of Cincinnati; Mendes Cohen, Hugh Sisson, Charles Webb and Robert Garrett, of Baltimore; W. S. Bissell, of Pittsburg; Wm. Baldwin, of Connellsville; Charles Donnelly and Jno. L. Scully, of Pittsburg; W. H. Koontz, of Somerset; W. H. Markle, of Greensburg, and C. C. Markle of West Newton.

—The directors elected at the annual meeting of the New York, Lake Erie and Western Railroad Co. are: Messrs. Theron R. Butler, Charles Dana, Harrison Durkee, R. Suydam Grant, James J. Goodwin, Solomon S. Guthrie, Hugh J. Jewett, John T. Johnston, James R. Keene, Edwin D. Morgan, Cortlandt Parker, John F. Pierson, Homer Ramsdell, Henry G. Stebbens, William L. Strong, and John Lowber Welsh.

—Mr. Henry M. Whitney has been elected president, and Mr. G. T. W. Bramant reasurer of the Cape Cod Canal Company, which was organized, under a special act of the Massachusetts Legislature of 1880, as the successor of the Cape Cod Ship Canal Company. The corporators of the new company are Messrs. Henry M. Whitney, Hocum Hosford, George M. Bainard, Alfred A. Nickerson, G. T. W. Braman, Henry F. Dimock, William C. Whitney and Charles T. Barney.

Interest and Dividends.

The Missouri Pacific Railroad Company has declared a dividend of 1½ per cent payable Jan. 3, 1881.

The Western Union Telegraph Company has declared a quarterly dividend of 1½ per cent, payable Jan. 15, 1880, to stockholders of record on the 20th inst.

The Richmond and Petersburg Railroad Company have declared a semi-annual dividend of three per cent, payable Jan. 1, 1881.

A semi-annual dividend of 3½ per cent will be paid by the Spring Mountain Coal Company on and after Dec. 10.

A semi-annual dividend of 2½ per cent has been declared by the Vermont Valley Railroad Co., payable Jan. 1, 1881.

The New Central Coal Company of Maryland has declared a dividend of 2 per cent, payable January 15. 1881.

The Ontario Silver Mining Company has declared its sixty-second dividend, payable at Wells, Fargo & Co.'s on the 15th inst. Transfers close on the 10th. The Ontario has now paid in dividends $3,100,000.

The Chicago and Northwestern Railway Company has declared a quarterly dividend of 1½ per cent on the preferred stock, and a dividend of 3 per cent on the common stock payable Dec. 28.

The New York Central and Hudson River Railroad Company have declared a quarterly dividend of two per cent, payable on the 15th of January, 1881. Transfer books close on the 15th inst.

A dividend of four per cent upon the capital stock of the New York and Harlem Railroad Company will be paid by the New York Central and Hudson River Railroad Company, lessee, on the 3d of January, 1881, to stockholders of record on the 15th inst.

The Treasury Department gives notice that no books for registered interest on 6s of 1880, which are payable on 31st instant, will be made up The interest up to that date will be paid when the bonds are redeemed.

The Pennsylvania Railroad Company give notice that the First Mortgage Coupon Bonds of the company maturing December 31, 1880, will be paid at the Office of the Company in Philadelphia on that date, after which time interest on same will cease. The coupons on said bonds, maturing January 1, 1881, will be paid at the same time.

A dividend af 1½ per cent will be paid by the Union Pacific Railway Company on and after January 1, 1881, to stockholders of record December 15, 1880. New York stockholders will be paid at the Union Trust Company, 73 Broadway, New York, and Boston stockholders at the company's office, 44 Equitable Building, Boston.

Personal.

—Mr. Joan W. Garrett was re-elected president of the Baltimore and Ohio Railroad Company, Wednesday.

—Mr. George Morris Dorrance has been elected President of the Philadelphia and Long Branch Railway.

—Mr. T. S. Spear is the newly appointed Southeastern agent of the Vandalia and Pennsylvania lines at Dallas, Texas.

—The new Buffalo, Cleveland and Chicago Railroad Company have elected Mr. Clarence H. Clarke, of Philadelphia, president.

—President Gowen of the Philadelphia and Reading Company postponed his departure for Europe from last Saturday to Wednesday of this week, when he sailed by the Cunard line.

—Mr. A. A. Talmage, superintendent of the Missouri Pacific Railroad has been appointed to the same position on the Missouri, Kansas and Texas road, which is operated as a division of the Missouri Pacific.

—Mr. Eugene Fontaine, the inventor of the new locomotive bearing his name which is attracting so much attention in the West, was born near Quebec of French Canadian parents, learned his trade as machinist at Rouse's Point N. Y., is 46 years old, and lives in Detroit, Mich., where five years ago he took charge of the "Pin Works" and in April last began work on the drawings of the new locomotive which has just been built at Paterson, N. J., and successfully tried at Detroit. The Fontaine locomotive has four drive wheels, revolving above the boiler upon the flanges of the smaller wheels below running upon the track; the lower wheels revolving one and three-quarter times to each revolution of the upper wheels. It is reported to have run a mile in forty-eight seconds.

Articles of incorporation of the Long Island Company, which bought from Drexel, Morgan & Co. a controlling interest in the Long Island Railroad Company, were filed on the 8d inst. at Albany. The incorporators are Austin Corbin, Alfred C. Chapin, Edward Tuck, Henry W. Maxwell and B. S. Hemming. The company is organized under the Limited Liabilities act of 1875, and has $1,000,000 capital. It has power to buy receivers' certificates, scrip, stock, bonds and other securities of railroad companies and to buy and sell rolling stock.

At the recent meeting of the directors of the Louisville and Nashville Railroad Company a letter was read from Mr. H. V. Newcomb, the retiring President, recommending the extension of the Memphis division into Arkansas, the immediate completion of the Knoxville branch and a more advantageous connection via the Evansville, Henderson and Nashville line with Chicago and St. Louis.

A meeting of the stockholders of the Ohio Central Railroad will be held in Toledo on the 5th of January, 1881, for the purpose of passing a resolution authorizing an increase of the capital stock of the company from $4,400,000 or 44,000 shares at $100 each, to $12,000,000 or 120,000 shares at $100 each.

Patent Office Operations.

A summary of the operations of the Patent Office during the last fiscal year, prepared by Commissioner Marble, for the forthcoming report of the Secretary of the Interior, shows that in twelve months ended June 30, 1880, the office received 20,990 applications for patents for inventions, and granted 12 584, besides 496 "reissues" and 569 patents for designs. The receipt of the Patent Office from fees of various kinds aggregated $780,547, and the total expenses for salaries and all other objects were $538,926, showing a net revenue to the government of $191,621.

Statement of the Public Debt of the United States, December 1, 1880.

Sioux City and Pacific bonds, 1862-64	1,628,320 00	40,708 00
Totals	$64,623,512 00	$1,615,587 80

Interest paid by United States, $47,589,861 30; interest repaid by transportation of mails, &c., $13,879,165 67; interest repaid by cash payments: 5 per cent net earnings, $655,198 87; balance of interest paid by United States, $33,055,296 76.

The foregoing is a correct statement of the public debt, as appears from the books and Treasurer's returns in the Department at the close of business, November 30, 1880.

JOHN SHERMAN,
Secretary of the Treasury.

The first passenger train on the Oregon Railway and Navigation Company went over the road from Celilo to Blalock's, 33 miles east of the former station on the 22d ult. Trains are now running regularly to Blalock's, where close connections are made with steamers for Umatilla. The track from a point opposite Ainsworth to Wallula has also been completed. The telegraph line between those points has also been erected. An announcement that freight will be received in Portland, Oregon, for the Northern Pacific Railroad to the present terminus of the track on the Pen d'Oreille Division will probably be made in a few days.

The report that the St. Louis Railroad Bridge, being a single track, was unable to accommodate the traffic since the close of the river and the boat transfers, is denied. The General Manager of the bridge claims that there is scarcely a limit to its capacity.

The agreement of consolidation of the Connotton Valley Railroad and the Connotton Northern Railroad, with a capital of $3,000,000, was filed in the office of the Secretary of State of Ohio on the 30th of November.

American Railroad Journal.

Financial and Commercial Review.

THURSDAY EVENING, December 9, 1880.

The quotation for call loans during the day has been 6 per cent, a few brokers paying a small commission, and in the last hour as high as 1-16th of 1 per cent was paid for the privilege of getting money at 6 per cent.

The posted rates for prime bankers' sterling are now 4.79½ and 4.82½; the actual rates are 4.78¾@4.79¼ and 4.81½@4.82. Cable transfers are 4.82@½. Prime commercial bills are 4.77 @½.

The governing committee of the New York Stock Exchange have admitted to call the following securities: $8,000,000 prior lien bonds and $35,000 000 first mortgage bonds of the New York, Pennsylvania and Ohio Railroad Company, and $600,000 additional consolidated mortgage bonds of the Chicago, St. Paul, Minneapolis and Omaha Railway Company.

By reference to the public debt statement in another column, it will be seen that the total debt of the United States on the 30th of November was $2,115,807,930 73, less cash in the Treasury $210,926,763 98, leaving net $1,994 881,166 75. Since the 1st of November the debt has been reduced $3,609,261 23, and since the 1st of July last the reduction is $37,291,128 59. Of the bonded debt $213,521,550 bears 6 per cent interest, $469,651,050 bears 5 per cent, $250,000,000 bears 4½ per cent, $739,347,800 bears 4 per cent and $14,000,000 bears 3 per cent Interest h

ceased on $5,518,085 26, and there is $104,907,783 37, in the shape of legal tenders, certificates of deposit, fractional currency, and gold and silver certificates which bears no interest. The Treasury has purchased and paid off $4,178,000 6 per cent bonds in the past month. In addition to the above there are $61,623,510 6 per cent currency bonds outstanding, which were issued to Pacific Railroads, and on which the Government has paid a balance of interest amounting to $33,955,296 76.

The payments made from the United Stater Treasury in November on warrants (exclusive of interest and principal of the public debt,) were on account of civil and miscellaneous $5,152,298 97; war $1,024,597 86; navy $1,677,474 13; Indians $679,713 72, and pensions $4,275,145—total, $15.809,229 68.

The closing quotations on Thursday were: Adams Express, 116@118; American Express, 65@65½; American District Telegraph, 76½@76⅞; Canada Southern, 72@72½; Central of New Jersey 78@78⅛; Chicago and Northwestern, 123⅛@123¾; do. pref., 139⅛@140½; Chicago, Burlington and Quincy, 177@177¾; Chicago, Milwaukee and St. Paul, 111⅜@111⅝; do. pref., 121⅛@122; Chicago, Rock Island and Pacific, 125@125¾; Cleveland, Columbus, Cincinnati and Indianapolis, 83⅜@83¾; Columbus, Chicago and Indiana Central, 20@20⅛; Delaware and Hudson Canal, 87⅛@87¾; Delaware, Lackawanna and Western 102@102½; Hannibal and St. Joseph 43¾@44; do. pref., 95¼@95¼; Lake Erie and Western, 35@35¼; Lake Shore and Michigan Southern, 122⅛@122⅜; Louisville and Nashville, 83¾@84; Morris and Essex, 119@119½; Manhattan Elevated, 33½@34; Michigan Central, 115½@115¾; Metropolitan Elevated, 111¼@111½; New York Elevated, 119@120; New York Central and Hudson River, 144⅛@144¾; Northern Pacific, 83@83¼; do. pref., 63⅛@64; Ohio and Miss., 35⅛@35⅝; Pacific Mail, 48⅛@48¾; Philadelphia and Reading, 49¾@50; St. Louis and San Francisco, 41⅛@42; do. pref., 55⅛@56; do. 1st pref., 86⅛@87⅛; St. Louis, Iron Mountain and Southern, 45¾@46; Union Pacific, 106¾@107; United States Express, 51@52; Wells Fargo Express, 113@114; Western Union Telegraph, 82¼@82½; Wabash, St. Louis and Pacific, 42⅛@43; do. pref., 79⅜@79⅞.

Right of Way for Telegraph Lines.

In the Circuit Court for Shelby County, Tenn., on the 4th inst., Judge Pierce decided the case of the American Union Telegraph Company against the Memphis and Charleston Railroad Company which was an application by the Telegraph Company, a corporation of the State of New York, to condemn for its new line a right of way over the Memphis and Charleston Railroad, between Memphis and Grand Junction, Tenn. The points decided were as follows:

First—The grant of a privilege to have property condemned for the purpose of public improvements rests wholly in the discretion of State legislation.

Second—The laws of the State of Tennessee do not confer to any telegraph corporations, except those chartered under statutes of the State, the right to ask for or to have a condemnation of property of any kind for the erection of telegraph lines.

Third—The acts of Congress do not confer any powers upon foreign corporations in this respect. Section 5,263 of the United States statutes only gives Federal permission to telegraph companies to build their lines along railroads; but they must acquire the right of way by purchase or contract when the State laws, as in this case, do not allow condemnation.

Accordingly the privilege of condemning a right of way in this case was denied to the American Union Telegraph Company.

The Post Master General, in his recent report to Congress, calls attention to the suit brought by Christopher C. Campbell against the Postmaster at New York, now pending upon appeal before the Supreme Court. Suit has recently been brought by the same person against other Postmasters upon the same grounds, viz: Alleged infringement of letters patent for and improvement in Post Office post marking and canceling stamp, which stamps are furnished to Postmasters by the Department. It is again requested that before a final judgment is had, the Postmaster should be placed under the same legal protection given Treasury officials against a levy upon their private property under judgment for acts done in their official capacity and under orders of the department.

The earnings of the Richmond and Petersburg Railroad for the year ending Sept. 30, 1880, were $164,198, the expenses $85,099, and the net earnings $79,099 ; for the year ending Sept. 30, 1879, the earnings were $154,062, the expenses $80,-991, and the net earnings $73,071—showing an increase in earnings of $10,136, in expenses of $6,038, and in net earnings of $4,108. Of the $25,-000 8 per cent bonds which matured on the 1st of April last, $23,000 were paid off out of the current revenues. The remaining $2,000 had not been presented up to the close of the year. They bear no interest.

The Pittsburg Chronicle says that $7,000 have been subscribed toward the extension of the Emlenton and Shippensville Railroad from Clarion to Strattonville. Only $3,000 more are wanted, which will assure the speedy completion of the road.

The Hawley branch of the New York, Lake Erie and Western Railroad extends from Hawley, Penn., to Lackawaxen, a distance of 15 miles, passing through a most romantic country, and following the course of the Lackawaxen river the entire length of the road.

Coefficient of Safety in Navigation.

Prof. W. A. Rogers, of the Cambridge (Mass.) Observatory, recently delivered a lecture at the Institute of Technology, Boston, under the auspices of the Society of Arts, upon the subject of the Coefficient of Safety in Navigation. The causes of wrecks he treated under four heads as follows: Direct, or indirect from over insurance; Variations of the compass; Errors of astronomical observations; and Causes clearly beyond human control. Seven out of eight of the accidents which occur were, Prof. Rogers thought, the result of preventable causes. He dwelt especially upon the subject of insurance, which he believed to involve more or less of fraud and to be the cause of the destruction of more vessels than many people even imagine. He showed the deviation of the compass in an iron vessel to be much greater than in a wooden one, and still greater in an iron steam vessel than in an iron sailing one; the effect upon the needle, of course, being produced by the iron in the first case; and in the second case he showed that the steam had its effect upon the instrument. His statement to the effect that it was impossible for masters of vessels to ascertain their precise positions with certainty within 8.6 miles by means of the chronometer or astronomical observation was surprising to many of the audience. From 8.6 miles to 15 miles was about as near the precise position as sailing masters were able to get.

The Massachusetts Railroad Commissioners have granted a location to the Eastern Junction, Broad Sound Pier and Point Shirley Railroad Company, which, with a capital of $40,000, proposes to lay a track of the standard gauge from the track of the Eastern Railroad near Beach street in Revere to Point Shirley in Winthrop by the way of Broad Sound Point, a distance of four miles.

The New York and New England Railroad Company, in order to attract settlement along its line, announces that on the main line between Boston and Franklin, and on the Woonsocket Division, between Brookline and West Medway, all in Massachusetts, it will give free tickets for two years to the first occupants of any dwelling hereafter erected costing $1,000, and for three years for a house costing $2,000.

Judge Wallace in the Circuit Court of the United States for the Northern District of New York has decided that city governments cannot tax the National banks. This is good news for the banks here as well as at Albany, and steps on their part will be at once taken to secure the full benefit of the decision. At present the amount of taxes imposed on bank shares in this city is about $1,-500,000.

It is reported that the Chicago, Burlington and Quincy has leased the Central Iowa Railroad, which runs from Albia to Northwood, about one hundred and ninety miles.

The Government of Nova Scotia is negotiating for the sale of the railroads built by the Province, 341 miles in all, and is offering inducements to capitalists to purchase them.

20s.

Quebec. Quebec Bank, Toronto Branch. Raised from 4. Old issue. Dated 1856. Recalled. The issues of this Bank since 1863 have green backs.

An engineer of one of our Western Railroads says that his prominent success in economizing fuel is readily explained. He breaks the lump coal as fine as nut coal before using it, and that by this method he can get twenty per cent more steam out of a ton of coal than could an engineer who burns the coal as it comes, regardless of its size. Another part of his statement was that his fireman paid special attention when throwing fuel into the fire-box to drop it where it is needed, the secret of firing successfully being to have an even fire all over the fire-box. As saving fuel is one of the most important features in operating railroads the statements above are matters of interest. On the roads in Pennsylvania the firemen saturate the coal with water in dry weather, and in this way claim there is a great saving as well as a greater heat produced.

Articles of association of the Crystal Railway Company of St. Louis have been filed with the Secretary of State of Missouri. The road is to run from Crystal Station, on the St. Louis and and Iron Mountain Railroad, to Crystal City, near Platin Rock, on the Mississippi River, in Jefferson County. The capital stock of the company is $75,000; the incorporators, Carlos S. Greeley, Ethan A. Hitchcock, James M. Lute, Edmund T. Allen and Henry Hitchcock, all of St. Louis. The corporation is to continue in existence fifty years.

The Board of Railroad Arbitrators has reversed the decision of Commissioner Fink made two years ago, by which the Chicago, Burlington and Quincy Railroad Co. was given a 3½ per cent share in the pool on east-bound freight from St. Louis, which share was taken from the 12 per cent allowed the Chicago and Alton Railroad Co. The arbitrators decide that the Chicago, Burlington and Quincy is not entitled to any share in the pool, and restores the Chicago and Alton's share to 12 per cent.

A decision has just been rendered by the Supreme Court of Iowa to the effect that it is a flagman's duty as a matter of law, not only to warn against collision, but also to give such warning as will enable a traveler approaching a crossing, in the exercise of reasonable care, to protect himself from alarm to the animals he is driving.

The Indianapolis Journal says that seventeen surveying parties are now engaged in different parts of the State making surveys for new roads, surveys of old lines, and surveys where it is proposed to extend roads already built. Probably five or six of the new projects will be pushed to completion.

Imports of Dry Goods at New York.

The headquarters of the Missouri, Kansas and Texas railway are being removed from Sedalia, Missouri, to St. Louis.

Improvement in Car Windows.

In traveling, it is evident that there is no greater nuisance than the dust, smoke and cinders which penetrate every window and every crevice. The officers of the Consolidated road, in a new palace car which is building at the New Haven shops, will introduce a simple device, which is calculated to remedy the evil, in part at least, although it is not claimed that all the smoke and finer particles of dust can be prevented from entering the car. The invention consists of an extra window, placed outside of the ordinary car window. The metal frame, top and bottom, is curved, and the general principle is that of a curved bay window. The glass is only half the width of the window, and slides in a groove above and below. The regular window being opened, this glass is pushed around to the front side, and thus presents a slope outward, against which cinders, dust and smoke strike, and are thrown outward from the car. The air enters from the open half of this additional window, and will, of course, bring with it some smoke and fine dust, but in such inconsiderable quantities as to prove of little inconvenience, as the draught inward into the car is almost wholly prevented. The inventor asserts that these windows, when subjected to the severest test on fast express trains, have proven very successful.—[Hartford (Conn.) Courant, Dec. 1.

A meeting of the directors of the New York, Port Chester, Ridgefield and Danbury Railroad Company was recently held at Port Chester to receive a proposition from Judge Wright having for its object the completion of the road. About seven or eight years ago nearly $100,000 was expended in grading the road, and nearly all the heavy work between Port Chester and Ridgefield was done.

The Milford (Del.) News says that the engineers who are surveying the line for the proposed extension of the Delaware railroad from Dover to Milford, have located the line from Dover to the crossing of Murderkill creek about half a mile from Frederica. They are now engaged in running lines from the creek to Milford for the purpose of determining the best one for their purpose.

The Chicago Tribune says that the Union Pacific Railway Company, recognizing the tendency toward low passenger fares has reduced the rates from Omaha to Ogden, a distance of 1,033 miles, from $77 to $62, or from 7½ cents per mile to 6 cents per mile.

The Southeastern Railway Company has entered into an agreement with the Quebec Government to carry all the through freight and passenger traffic of the North Shore Railway, to and from the New England States and New York, for a period of nine years from Jan. 1.

The Detroit and Butler Railroad bridge over the Raisin at Adrian, Mich., is completed. The whole length of the bridge and trestle work is 875 feet, the iron span being 125 feet long and 85 feet above the water.

The transfer apparatus, by which the Cincinnati Southern and its connections at Cincinnati will transfer car bodies from one gauge of trucks to another, is completed, and when properly manned it is claimed that thirty cars per hour can be transferred.

Work on the Bergen County, N. J., Short Cut of the New York, Lake Erie and Western Railroad is making as good progress as the weather will allow, and the grading is now half done. It is reasonably certain that the road will be in operation by Spring.

From Havana, Cuba, Nov. 23d, we learn that the project for a railroad between the Canto and the town of Bayonne is being actively pushed; also one for a line between Puerto Principe and Santa Cruz. The estimated cost of the latter, including building, material and lands, is $700,000.

From Berlin, Germany, November 25th, we learn that the Government is about to complete a number of branch lines over the country, hoping thus to extend a network of railways which will be of great advantage both strategetically and economically.

Ground was broken at Matamoras, Mexico, on the 1st inst. for the Matamoras and Monterey Railway. The road is under the special patronage of President Gonzalez, and was begun in his name.

The Sea Breeze Avenue Railroad Company has been incorporated with a capital of $10,000, The line is to be but a mile in length, connecting the depots on Coney Island with the Coney Island and Brooklyn railroads.

Messrs. Riehle Bros. the Philadelphia scale and and testing machine manufacturers have removed their Pittsburg store from Penn Avenue to 272 Liberty street, under the 7th Avenue Hotel, in Pittsburg.

The Olean, Bradford and Warren Railroad, extending from Olean, N. Y., to the Pennsylvania State Line, 12.53 miles, and from thence to Bradford, Penn., 10.48 miles, is to be extended to Warren.

The Ocean Navigation and Pier Company have increased their capital stock $50,000. The proceeds are to be used in liquidating indebtedness in the construction of the Coney Island iron pier.

The Sherburne, Ontario, by-law, granting a bonus of $10,000 in aid of the Toronto, Grey and Bruce Railway was voted on the 30th ult., and carried by a majority of six.

The engineers have commenced work at Port Moody, Burrard Inlet, British Columbia, the western terminus of the Canadian Pacific Railway.

The lease of the Nashua and Lowell Railroad to the Boston and Lowell Railroad Company has been signed and the lessees are now in possession.

The work of extending the Credit Valley Railway track, from Queen street into the heart of the city of Toronto is being proceeded with.

The Wheeling and Lake Erie Railroad, extending from Martin's Ferry, Ohio, to Sandusky, has all been placed under contract.

The increase in the receipts of the Grand Trunk Railway in Canada this year is estimated at more than $2,300,000.

The Southern Nevada Railroad Company has been incorporated with a capital of $700,000.

One thousand hands are now at work on the Waycross and Jacksonville (Florida) Railroad.

The Utah Eastern road is finished to Kimball's.

The Coal Trade.

The leading coal carrying companies make the following reports of their tonnage for the week ending November 27, and for the year to the same date, compared with their respective amounts carried to the same time last year :

	Week.	1880.	1879.
Reading Railroad ...	241,866	7,179,398	8,147,579
Schuylkill Canal	9,567	524,988	910,917
Lehigh Valley	153,369	4 606,415	4,861,785
Del., Lack. & Western.	66,753	3,190,106	3,490,203
Shamokin Valley	22,070	840,949	886,306
Central New Jersey..	122,364	3,494,216	3,744,098
United New R. R. of Jersey	24,939	1,040,025	857,170
Pennsylvania Coal ..	26 409	1,028 980	1,304,618
Delaware and Hudson	81,059	2,757,654	3,111,467
Huntingdon & Broad Top Mt.....	4,824	391,110	286,128
Penn. and New York.	35,576	1,140,981	1,190 063
Clearfield, Pa.....	37,891	1,542,813	1,458,586

The above reports for the Lehigh Valley Railroad and the Pennsylvania and New York Canal and Railroad are for eight days ending November 30, and they embrace the entire tonnage of the fiscal year for each of these companies. The Lehigh Valley Railroad, it will be seen, has carried 4,606,415 tons, an increase over the previous year of 244,630 tons, and the Pennsylvania and New York Road has carried 1,140,981 tons, a decrease compared with the previous year of 49,082.

The reports for the Reading Railroad and Schuylkill Canal are also for eight days ending November 30, and embrace the year's tonnage. The Reading Railroad has carried 7,179,398 tons, a decrease compared with the previous year of 968,181 tons, and the Schuylkill Canal has carried 524,988 tons, a decrease of 385,928 tons.

The report of the Lehigh and Susquehanna Division of the Central Railroad of New Jersey also concludes its fiscal year, showing 3,494,216 tonnage, a decrease of 249,881 tons.

The total tonnage of anthracite coal from all the regions for the week ending November 27, as reported by the several carrying companies, amounted to 603,096 tons, against 621,639 tons in the corresponding week last year, a decrease of 21,548 tons. The total amount of anthracite mined for the year is 21,678,593 tons, against 24,162,647 tons for the same period last year, a decrease of 2,584,-054 tons. The quantity of bituminous coal sent to market for the week amounted to 73,400 tons against 95,185 tons in corresponding week last year, a decrease of 21,782 tons. The total amount of bituminous mined for the year is 4,001,018 tons against 3,705,109 tons for the corresponding period last year, an increase of 295,904 tons. The total tonnage all kinds of coal for the week is 676,496 tons, against 719,821 tons in corresponding week last year, a decrease of 43,325 tons, and the total tonnage for the coal year is 25,579,606 tons against 27,867,756 tons to same date last year, a decrease of 2,288,150 tons. The quantity of coal and coke carried over the Pennsylvania Railroad for the third week of November was 169,688 tons, of which 125,358 tons were coal and 44,280 tons coke. The total tonnage for the year thus far has been 6,418,457 tons of which 4,834,112 tons were coal and 1,584,345 tons coke. These figures embrace all the coal and coke carried over the road east and west. The Reading Railroad for the week ending December 4, carried 90,000 tons of coal, of which 13,500 tons were sent to Elizabethport and 13,000 tons shipped from there, and 12,500 tons sent to Port Richmond and 20,000 tons shipped from there.—Phil. Ledger, Dec. 6.

A new electric signal has been placed along the track of the New York, Lake Erie and Western Railroad three or four hundred yards from the Jersey City Depot. This signal is to inform engineers approaching the depot whether the track is clear or not. If there is anything in the way the signal shows a red light, and if the track is clear it shows a white light.

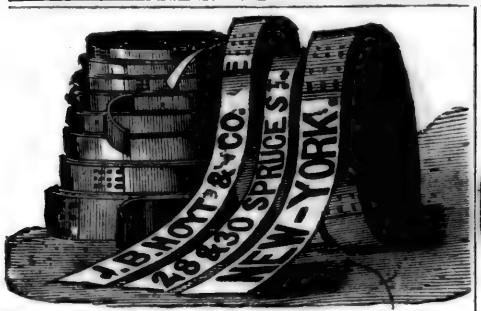
VALENTINES VARNISHES

OUR CLAIMS.

We claim that our Finishing Varnishes are unsurpassed in the following qualities:

1. Uniformity. 3. Fluency. 5. Drying. 7. Fulness. 9. Durability.
2. Paleness. 4. Reliability. 6. Hardening. 8. Brilliancy. 10. Economy.



All know it is easy to make a Varnish that has the single quality of DURABILITY, but Varnishes which wear well are generally inferior in color and working quality, uncertain in laying, too slow in drying, or lacking in body or lustre, and frequently they possess ALL these defects.

In our "RAILWAY-COACH FINISHING" the ten qualities will be found combined, and our other Varnishes are as elastic and durable as is practicable for the work on which they are employed.

Those of our Varnishes which have the greatest durability require time for hardening. They have superior elasticity, and ARE DISTINGUISHED FOR THE EXTENT OF SURFACE THEY WILL COVER, WHICH RENDERS THEM ECONOMICAL.

VALENTINE & COMPANY,

Chicago. NEW YORK. Paris.

Patent Stretched and Patent Riveted Short Lap

BELTING.

Our Belts are made from pure Oak Tanned Butts, and of the heart or solid part only. No part of the shoulder being used. Any one not familiar with Belt making can readily detect this by the shortness of the lengths and laps. Long laps are made including the shoulder or thinner and softer part of the Leather, causing the Belt to be, in its enduring qualities, no better than its poorest or thinner parts

Our Belting is warranted to run straight and maintain an even bearing on the pulleys, and sold under the fullest Guarantee.

Transportation of Cattle.

THE FEEDING AND WATERING OF CATTLE IN TRANSIT.—HUMANE, SANITARY AND PECUNIARY BENEFITS TO BE DERIVED BY CATTLE DEALERS' PROPER TREATMENT OF THEIR STOCK.—AN IMPORTANT DEVICE IN THIS DIRECTION.

The rapid increase in the transportation of live stock from the West to the Eastern markets and seaports, augmented by the growing export of American cattle, makes the method of treatment of the stock in transit one of greatest importance to shippers, railroad companies, dealers and the general public alike; and in nothing pertaining to this branch of transportation is there more need of wise and humane action, than in the feeding of the cattle on their journeys from rich pasture lands to market. In the past a "penny wise and pound foolish" system, or rather lack of system, in the matter seems to have prevailed among cattle dealers in bringing their stock East. They have insisted upon the very lowest rates of transportation, and upon the railroad companies furnishing the cheapest, or lowest priced, and consequently the most crude means of conveyance for their living freight. The dealers would hire a car at prices oftentimes unreasonably low, pack it to its utmost and strained capacity, and then without any grounds for expecting accommodations from the carriers in the way of caring for the health or comfort of the stock, rely for the safety and welfare of the same upon rapid and unobstructed delivery, which at the best must necessarily be variable and subject to the most barbarous results to living freight and ultimately to the health and sensibilities of its consumers. It was not wholly a fault, but quite as much a necessity perhaps on the part of shippers, for until recently the attention of practical men, inventors and dealers has not to any extent been turned toward providing methods of relief.

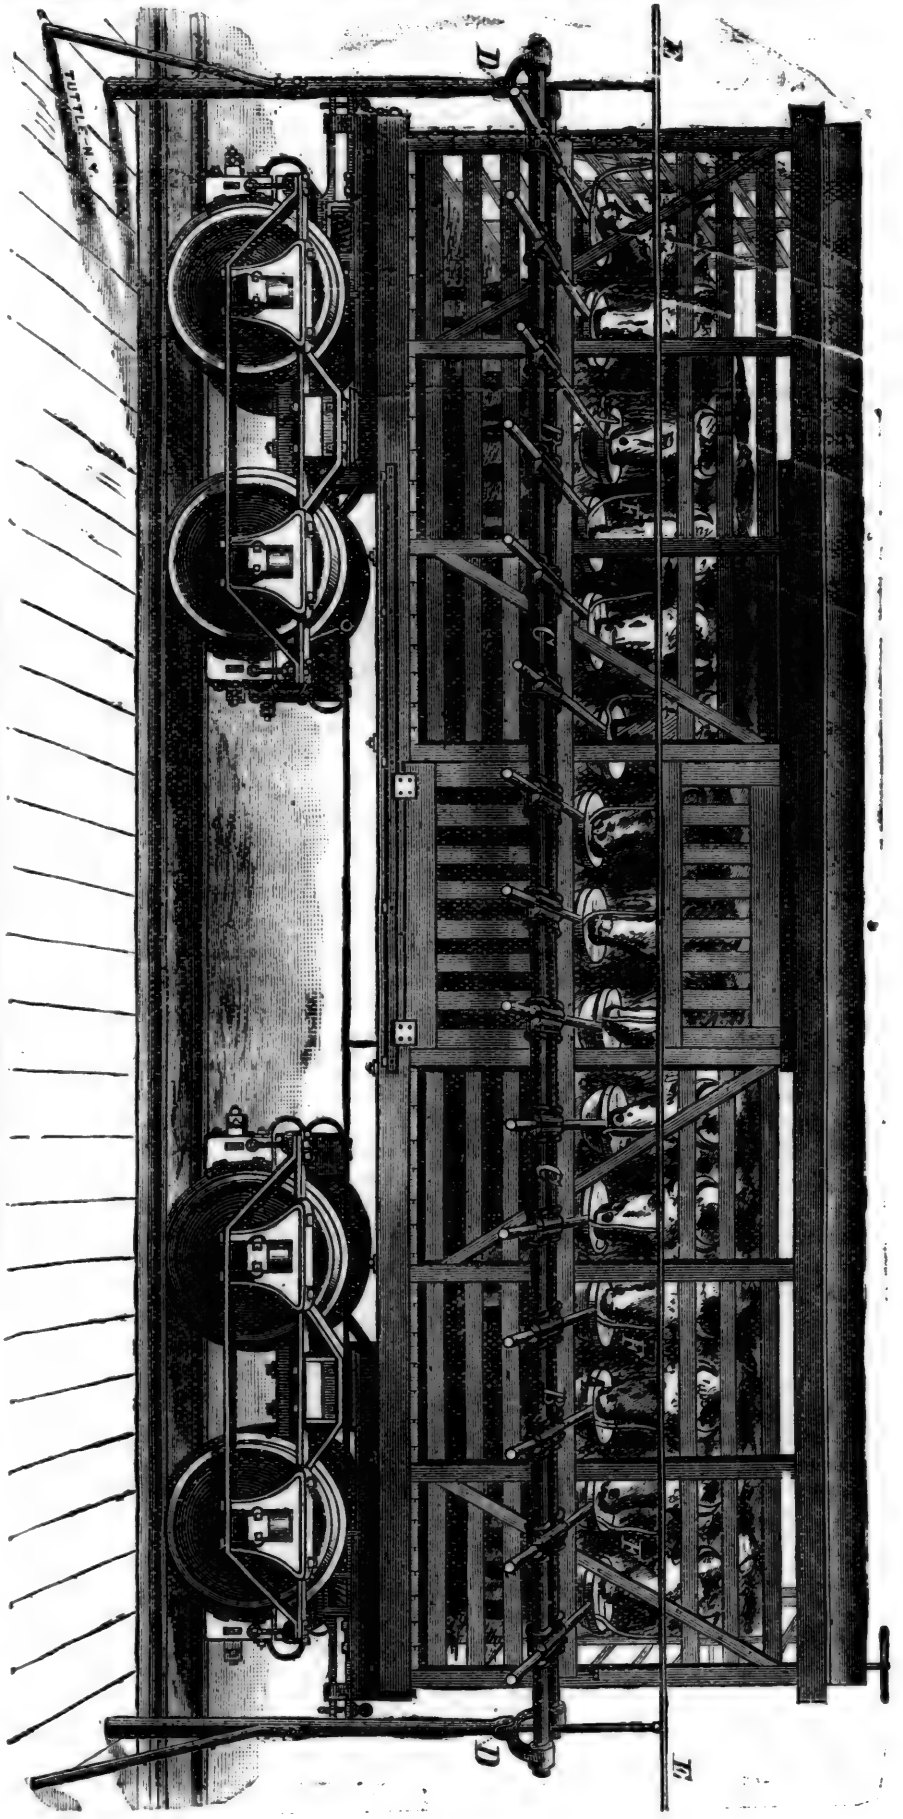
The Agricultural Committee of Congress has among its most important subjects for consideration during the present session, that of providing means to suppress pleuro-pneumonia in cattle. A large number of petitions and memorials have been presented to Congress, urging prompt action in this matter, and this is an especially opportune time to consider one of the best and most practicable safe-guards that can easily be employed to prevent the occurrence and spreading of pleuro-pneumonia and other cattle diseases.

Since the days when the transportation of cattle by rail was proven to be eminently practicable up to within the past year or two, almost nothing has been done tending directly to improve its sanitary relations. Cattle in transit must be fed, and the cost of this feeding had by far better be borne by the consumers if necessary, rather than that an inferior and diseased article of diet should be thrown upon the market. Not having the facilities it not infrequently happens that dealers send their stock over railroad lines from the West, feeding at almost incredibly long intervals, sometimes even several days passing in succession without proper nourishment being given to the animals, and when they are properly fed and rested by unloading it can only be done at a great expense and loss of time, under the ordinary method. Animals which before being shipped have been under high feeding are placed in a most unnatural physical condition through having their food abruptly and inhumanly cut off, and a result of this, increased by the strangeness of the position in the cars, is that the animals are thrown into a feverish and frenzied condition which not only superinduces a great waste of flesh but renders them peculiarly susceptible to pleuro-pneumonia and other diseases, placing unwholesome meat on the market. In publishing a report of the New York Board of Health, in November, in which were reported several seizures of beef found to have been diseased through the cattle being weak and sickly when killed, the *New York Herald* said:

"We believe that a large portion of the cattle arriving at this and other large cities are sick when they arrive, and that their sickness is caused from the fact that they are from 72 to 154 hours in transit without being properly fed and watered."

There is a strong element in this matter that appeals to the instinct which naturally influences man in his treatment of the lower animals in a helpless condition, and so strong has it become that a public demand is being made that animals in transit shall receive less barbarous treatment at the hands of their owners. This demand is one that must be listened to or strong societies, backed by public opinion, will be seeking the enactment of laws that may be more humane in their intent than easy or practicable to comply with. But there is an element more likely to move the public, an unpleasant confession to make though it be, and that is the public's stomach. In this prosperous country there is no need of diseased meat from poorly fed cattle being complacently accepted. But if the heart and the stomach remain passive to the evil, consideration for the purse should be a strong influence in mitigating it.

It is not economy to poorly feed or partially starve cattle in transit. It is well known that much stock dies on the cars through starvation and ill use. Of the cattle which are brought by comparatively comfortable means, excepting as to feeding, through long journeys, many lose from fifty to one hundred pounds of the most valuable part of the meat; this under ordinarily fair treatment. It is estimated that a loss of about six per cent on cattle and nine per cent on sheep and swine occurs in transportation, a large proportion of which is known to result from improper care. It has been shown by actual tests that a shrinkage of fifty pounds a head was saved by watering and feeding live stock regularly twice a day on a route of 1,000 miles. *The Scientific American* gives the following as a moderate estimate of saving to the shipper with eight feeding and watering stations between St. Louis and New York.



Allowing 16 cattle to each car, and a saving in shrinkage of 50 lb. per head, or 800 lb. per car, worth 8 cents per lb., we have a total saving to the shipper on each car load	$64 00
Deduct cost of feeding and watering at 20 cents per head at each station	25 60
Net saving to the shipper on each car load	$38 40

When it is remembered that over 14,000,000 head of live stock were shipped from St. Louis and Chicago alone in 1879, an idea can be formed of the vast amount of capital employed

in this department of transportation and trade, and of the importance of any improvement tending materially to save waste in the animals in transit. This is a direct source of economy, needing little demonstration. It would add greatly to the profits of the cattle trade. Indirectly, too, the people at large would feel the effects of anything tending to prevent a waste in animals sent to market. Meat could be furnished at considerably lower prices if the dealers adopted methods to avoid or decrease the important item of loss occasioned by ill feeding their stock. The benefits would be soon felt by the public, and the dealers would find an impetus given to their export trade, could the foreign market be assured of receiving better beef at even slightly reduced prices. The consumption of American beef in Europe has rapidly increased within the past few years, as is well known, and of course the introduction of our meat into the foreign market has had to contend with a strong opposition on the other side of the water, the main point of which has been to decry it on sanitary grounds. In this opposition has been much of rivalry and prejudice, but it has become of the utmost importance that our exporters of cattle and meat should provide every possible means for assuring foreign as well as home consumers, that the article of diet offered to them is derived from animals that have received the utmost care in sanitary and humane respects.

A plan has been devised by which these essential results can be obtained without materially affecting or disarranging the present methods of transportation, and yet greatly convenience railroad men and shippers and increase the profits of all concerned in the transportation of live stock. It is a plan devised by Mr. A. D. Tingley, of 27 Union Square, New York, and which has received the strong endorsement of The Farmers Club of this city, and prominent men interested in transportation matter; practical men looking to its merits financially as well as those looking at it from a humane standpoint, among the latter Mr. Henry Bergh. We understand that negotiations are under way for the erection of feeding stations on this principle on some of our western railroad lines. The device is for feeding and watering cattle in a cheap and expeditious manner without removing them from the car; the feeding stations to be erected at intervals of about a twelve hour run, on both sides of the track, at convenient stopping places. The cut with the following explanation illustrates the device.

A series of feed boxes, A, slide back and forth in sockets, B, so that they can be pushed in and out of the car as desired. The sockets slide sideways on the rods, C, by which a lateral movement is obtained for the feed boxes, to avoid posts, braces, etc. Hinges D, attached to the upright posts allow the feed boxes to be slightly lowered or raised to suit the elevation of the cattle. A main water pipe, E, is connected to each separate feed box by a small flexible hose, F, so that the water is taken by the cattle from the same box as the feed. No alteration in the stock cars now in use is required, excepting the loosening of one board on each side of the car, to be supported on hinges and hooks, to furnish an opening through which the feed boxes are pushed under the heads of the cattle. Mr. Tingley generously offers to railroad companies the right to use these devices free of charge until they have made large profit in using them, when he is to be paid only a small royalty. The economy and simplicity of this plan and the humane, and sanitary pecuniary benefits to be derived from it would seem to make it a very popular one with all concerned,

DEVICE FOR FEEDING AND WATERING LIVE STOCK IN TRANSIT.

ALTERATIONS and improvements being made in the tables, which are weekly features of the JOURNAL, necessitate the temporary withdrawal of part of them. In the Bond List alterations are desirable, owing to changes among the roads, consolidations, etc., since our tables were revised. The Share List is naturally corrected at this season of the year, and as this is the time when much of the necessary information comes to us from our correspondents and from the railroads, the table, if published now, could not be as symmetrical and complete as we would wish. On these accounts we withhold these two tables until they are perfected and made of greater value than ever before, to accomplish which no efforts will be spared. We have added several important features to the JOURNAL recently and it seems desirable now that some of our tables should appear semi-monthly, monthly and quarterly instead of weekly, thus giving us an opportunity to lay before our readers more information and a greater variety each week. We shall announce the tables as they are to appear from week to week. The table of contents always gives those in the current number, and in future by referring to the files of the JOURNAL any of its tables desired can readily be found, and they will contain as late information as though appearing in each number, as we do not intend to withhold any tables that are of weekly interest. While adding new features to the JOURNAL, our aim is to retain and improve the old ones.

SECRETARY THOMPSON has resigned his position as Secretary of the Navy to assume the chairmanship of the American Committee of the Panama Canal Company. Secretary Ramsey has been designated by the President to perform the duties of the Secretary of the Navy in connection with those of the Secretary of War; the change to take effect on the 20th inst.

MR. GEORGE TICKNOR CURTIS has written a public letter in answer to the recently expressed views of Judge Black on the relations of the railroads to the States and the General Government. He takes a strongly fortified position against the consideration of railroads as public highways or public property, and with ample citations argues forcibly against the legality of attempts to treat or control them as such. His letter will be widely read and will have great weight from its legal and logical strength.

IF the plans laid before the House of Commons for the construction of the Canadian Pacific Railway are adopted and the contract awarded, as is generally believed it will be, it is expected that work will be commenced in the spring. Ten years from next May are allowed under the agreement for the completion of the road. Mr. George Stephen of Montreal is mentioned as the probable president of the company. Great opposition to the agreement under consideration appears to exist, but it is in strong favor with the present Canadian Government.

A BILL incorporating the "Maritime Canal Company of Nicaragua" was introduced by Congressman Morton in the House of Representatives Tuesday. The incorporators mentioned are General Grant, ex-Governor Morgan and Messrs. H. J. Jewett, Howard Potter, William R. Garrison, Frederick Billings, George W. Riggs, Solon Humphreys, Frederick Butterfield, J. Thomas de Franco, E. F. Beale and William Dennison. It provides that the capital stock shall not be less than $50,000,000, nor more than $100,000,000, in shares of $100 each, and that bonds shall be issued not exceeding one-half of the capital stock. One of the eleven directors is to be appointed by the Government of Nicaragua.

THE practical aid which the New York Central and Hudson River Railroad Company is giving to the movement for the suppression of the circulation of objectionable literature, by forbidding its sale on the trains and at the stations of that road, will be appreciated by a public fully aroused to the importance of checking in every way the growth of these poisonous and trashy publications. The railroad officers have made their orders very emphatic and explicit, specifying the objectionable papers by name, and the worthy example will undoubtedly be followed by many other passenger carriers as it should be by hotel proprietors and news agents. Orders of this kind are practical reformers and strong aids in the suppression of vice.

ONE of the chief obstacles, it is claimed, which the managers of M. de Lesseps's Panama Canal project have had to contend with in awakening enthusiasm among American investors has been the difficulty of convincing our capitalists of its strictly commercial or universal character. There may have been at times a little adverse feeling created in this country by brandishing the "Monroe doctrine," but an indication of the comparatively slight hold this influence has is seen in the character of the men who are becoming prominently identified with the project. What American investors want demonstrated before putting their money down liberally for the undertaking is something a little more clear and definite about its paying qualities; what advantages it offers in the way of dividends over many of our flourishing and tested enterprises. These things may not be easy of demonstration, but then they are points stronger than doctrinal points. The tendency of such demonstration is to make "Monroe" and other doctrines flexible.

Richmond and Danville Railroad.

The annual report of the Richmond and Danville Railroad Company, presented at the annual meeting of the company held in Richmond Va., on the 8th inst., shows the earnings, expenses, etc., of the several roads operated by the company as follows: Richmond and Danville and Piedmont—earnings $1,243,271, interest received on investments $57,485, total, $1,800,756; expenses $745,333; net $555,423. Northwestern North Carolina Railroad—earnings $57,233, expenses $20,995, net $36,238. North Carolina Railroad—earnings $632,856, expenses $380,184, net $252,-222. Total receipts from all lines $1,990,845, total expenses $1,146,462, total net earnings $843,883. The total net revenue from all lines is $807,641, from which, deducting interest on funded and floating debts and rental of the Piedmont and North Carolina Railroads, a balance is left of $233,825. Total net increase on all lines for the year $45,760. The ratio of earnings to expenses was 59.8 per cent.

The late Mr. Hall and his Railroad Signal System.

Further particulars concerning the late Mr. Thos. Hall, the inventor of the Automatic Electric Railroad Signal, and in relation to the business started by him, have been furnished us as follows: Though suffering for several years past from partial paralysis of the sciatic nerve, the immediate cause of Mr. Hall's death was an attack of pneumonia resulting in dropsy of the chest. The signal business has been carried on for years past by a joint stock corporation, known as the Hall Railway Signal Co., Meriden, Conn., and will suffer no interruption in consequence of the death of Mr. Hall. His son, Mr. W. P. Hall, is a young man of about seventeen years of age, of estimable and promising character, and is in the employ of the company.

The features of the Hall signal system are that

the signals are set at danger by the closing of an electric circuit on the entrance of a train into a section or block, and reversed or set at safety in the same way, by the train leaving the section, the signals being held in either position by suitable mechanism, and when properly cared for they are an effectual preventive of a large class of railway accidents.

OUR BOSTON LETTER.

(From our regular correspondent.)

BOSTON, Dec. 14, 1880.

The market is dull and is likely to remain so till borrowing becomes easier. Some of the large corporations who lend their balance on the street are calling in loans preparatory to dividend disbursements, and borrowers are experiencing great inconvenience in shifting loans at this time.

The rates for Clearing House balances between the banks is seven per cent, and the banks are perfectly satisfied to loan their surplus funds to each other at that rate.

Advanced.

Boston, Clinton, Fitchburg and N. B. Com	19½	to	20¾
Boston, Clinton, Fitchburg and N B. Pref	105	to	108½
Cin., Sandusky and C.	16½	to	17¼
Conn. and Passumpsic	85	to	86¼
Flint and Pere Marquette Pref	78½	to	79⅛
Fort Scott and Gulf, Pref	125	to	128
Marquette, Houghton and O. Pref.	70	to	71
Marquette, Houghton and O. Com.	33	to	34
Summit Branch	20	to	21⅜
Wisconsin Central	13½	to	14¾

Declined.

Chic. Bur'. and Quincy	174½	to	172¾
Chicago and W. Michigan	73½	to	73
Little Rock and Ft. Smith	62¾	to	61½
Lawrence and Southern	91½	to	90
New York and New England	45	to	43

The report of the Worcester and Nashua Railroad for the year ending Sept 30, 1880, contains the following items:

Total income	$575,860
Expenses (including taxes)	386,559
Net income	$189,301
Rentals Nashua and Rochester R. R.	$74,274
Interest	50,000
Balance surplus for the year	$65,027

The directors have declared a dividend of one dollar and a half per share, payable in January.

The earnings increased 22 per cent for the year, and the large increase in expenses is due to the fact that the money has been put into the road and charged to expenses.

The report shows net earnings of 3½ per cent on Worcester and Nashua stock. The Nashua and Rochester leased by the Worcester and Nashua receives 3 per cent on its stock, $1,305,000 as the first charge against net earnings, after that the Worcester and Nashua gets 3 per cent, and after that the surplus is divided between the two roads according to the relative number of shares.

The Worcester and Nashua, however, hold more than one fourth of the shares of the Nashua and Rochester and the dividend on that portion of course goes back into the treasury of the Worcester and Nashua.

The Boston, Clinton, Fitchburg and New Bedford Railroad held its first annual meeting since the road was leased to the Old Colony, Dec. 7, at South Framingham. The report shows

Total income derived from 10⅔ per cent of the gross earnings of the Old Colony R. R		$374,509
All other sources		7,088
		$381,597
Taxes	$28,855	
Office expenses	4,787	
		33,642
		$347,955
Rentals Framingham and Lowell		35,000
Int. on funded debt	$177,969	
Int. on unfunded debt	52,346	
		330,316
4½ per cent divs. on preferred stock		78 754
Balance for the year		3,883

Ten per cent increase in the gross earnings of the Old Colony Railroad, will enable the company to pay full seven per cent on its preferred stock, and thirty-three per cent increase will enable them to pay six on its common. The common stock has risen from one dollar to twenty since the lease to the Old Colony, and the preferred is regarded by many as a certain seven per cent stock.

The bonds of the Chicago, Burlington and Quincy will open Dec. 17, and the settlement of contracts made since the books closed, will require very large sums of money, but as the buyers of that stock at the present high prices have been of the heavy description, the settlements are as likely to bring relief as stringency.

The certificate holders and stockholders of the Eastern Railroad held their annual meetings last week and the present board of directors were re-elected in both instances.

Hoosac Tunnel Line.

Boston is in a flutter because of a rumor that the Erie road has decided to take off the St. Louis and Cincinnati sleeping cars from the Tunnel Line on account of the refusal of the manager to allow Sunday trains to run over the Troy and Greenfield Railroad, as per the following correspondence:

BOSTON, October 29, 1880.

G. C. Gardner, Esq., Manager T. and G. R. R. and H. T.—

DEAR SIR: All the roads interested in the passenger line between Boston and Cincinnati via Hoosac Tunnel new route insist that trains shall run daily east of Albany as they are now run west of Albany. Will you agree to a daily schedule for this train, to go into effect with change of time table, November 8? I think I need not argue the question with you, as to the necessity for making this train a daily line as above indicated, in order to successfully compete with roads which do not use the tunnel. I have made similar application to Fitchburg road, and have their assurance that the train will be run as desired, if you will put the same on your schedule. An early reply will oblige.

Yours truly,

(Signed) A. A. GADDIS, Gen'l Manager.

COMMONWEALTH OF MASSACHUSETTS,
TROY & GREENFIELD R. R. & HOOSAC TUNNEL
Office of Manager, North Adams, Nov. 2, 1880.

A. A. Gaddis, Esq., Gen'l Manager B., H. T. and W. Ry. Co.—

MY DEAR SIR: Noting your favor of the 29th ult., and although it may be an arbitrary ruling, I must decline, under existing circumstances, to place on the schedule of the road any additional Sunday trains. Trains run on Sunday, except from necessity or charity, are in violation of law, and I have no evidence that those you propose to run are either from necessity or charity; yet, as you may think otherwise and consider this construction of the law as detrimental and discriminating against the rights of your company, I would suggest that you bring the matter before the railroad commissioners for their consideration.

Yours truly,

(Signed) G. CLINTON GARDNER.

Organization.

—Col. A, S. Buford has been re-elected president of the Richmond and Danville Railroad Company.

—The following managers of the Plymouth Railroad, now controlled as a branch of the Philadelphia, Germantown and Norristown Railroad, were elected Dec. 13: Messrs. James Boyd, Edwin Swift, W. S. Wilson, I. V. Williamson, John Slingluff and Christopher Heebner.

—The following are the directors of the Rhode Island and Massachusetts Railroad Company, elected Dec. 8: Messrs. Jonathan Chace, Arnold B. Chace, George L. Littlefield, Henry B. Metcalfe, Hezekiah Conant, Newton D. Arnold, Jesse Boynton, and Darius Goff, The road is leased by the New York and New England Company.

—The stockholders interested in the "Keely Motor" have elected the following as directors of their company: Messrs. John W. Keely, George B. Collier, William Bockel, John Marsten and John H. Lorimer, of Philadelphia; William W. Wright, Frank G. Green, Frederick W. Foote, W. S. Hoyt, Enos T. Thorpe, Radcliff Baldwin, Henry Cummins and John A. Flagler of New York.

—A meeting of stockholders of the Washington County Railroad Co. was held in President Keyser's private car at Hagerstown, Md., Dec. 10, and officers were elected as follows: Directors, Messrs. Wm. Keyser, Galloway Cheston, Jacob A. Miller, E. W. Mealey, Walter S. Kennedy, Peter B. Small and David Fowler. Mr. Wm. Keyser was re-elected president, and Mr. Peter B. Small secretary and treasurer.

—The Boston, Clinton, Fitchburg and New Bedford Railroad Co. has elected the following directors: Messrs. Nathaniel Thayer, Jr., of Lancaster, Lyman Nichols of Nahant, Eugene V. R. Thayer of Lancaster, W. J. Rotch of New Bedford, W. W. Crapo of New Bedford, Harrison Bliss of Worcester, C. T. Crocker of Fitchburg, Charles Burleigh of Fitchburg, W. B. Wood of Boston, John E. Sanford of Taunton, George A. Torrey of Boston.

—The Boston and Maine Railroad Co., has elected the following directors: Messrs. Nathaniel G. White of Lawrence, George C. Lord of Boston, Amos Paul of South Newmarket, N. H., Nathaniel O. Bradlee of Boston, Wm. S. Stevens of Dover, N. H., James R. Nichols of Haverhill, John F. Osgood of Boston, Samuel E. Spring, of Portland, Me., Nathaniel W. Farwell of Lewiston, Joseph D. Guppy, of Dover, N. H. Jonathan Sawyer of New Hampshire.

—At the annual meeting of the New York, Providence and Boston Railroad Company, held in Providence, R. I., Dec. 8, the following directors were elected: Messrs. Samuel D. Babcock, Henry Morgan, Edward Morgan, J. Boorman Johnston, D. S. Babcock and George M. Miller, of New York; Henry Howard, of Coventry, R. I.; Charles H. Salisbury, of Providence; Nathan F. Dixon, of Westerly, R. I.; John A. Burnham, of Boston; A. S. Matthews of Stonington.

—The stockholders of the Richmond and Allegheny Railroad Company met at Richmond, Va., Dec. 8th, and elected directors as follows: Messrs. George M. Bartholomew, Hartford, Conn.; the Hon James G. Blaine, Maine; Joseph H. Gray, Boston; Conrad N.

Jordan, New York; the Hon. Hugh McCulloch, Washington; Cyrus H. McCormick, Chicago; John I. McCook, New York; H. C. Parsons, Richmond, Va.; Samuel Shelthar, and John W. Simpson, New York; H. D. Whitcomb, and C E. Wortham, Richmond, Va.

—Tbe following directors of the Eastern Railroad Company were elected at the annual meeting held in Boston, Dec. 8th, the first three being elected by the stockholders, and the others by the certificate holders: Messrs. Jacob C. Rogers of Peabody, William B. Bacon, of Boston, and Stephen J. Young of Brunswick, Me., Elijah B. Phillips, Alfred P. Rockwell, George P. King and Richard Olney of Boston, George S. Morrison of New York and John Cummings of Woburn.

—The Mutual District Telegraph Co. has filed articles of incorporation at Albany. The capital stock is $250,000, with power to increase to $1,000,000. The shareholders are as follows: Messrs. Henry W. Pope, of Union, N. J., 900 shares, George V. B. Frost, Peekskill, 800, John D. Haines, New York, 800. It is expected that lines will be run from New York through all the cities in the State, and the transmission will be by telephonic signals and messages, dwellings, stores, &c., being connected with one another and with the main office in New York.

Personal.

—Vice President Blanchard of the New York, Lake Erie and Western Railroad, has returned from his extended trip in Europe, in considerably improved health.

—Mr. Grenfeldt, one of the firm of Messrs. Morton, Rose & Co., of London, who has been on a business visit to Messrs. Morton, Bliss & Co., of New York, has returned to Europe.

—Mr. David Dudley Field, has gone to Jamaica, to visit his daughter, wife of Sir Anthony Musgrave, Governor of the Island, to be absent perhaps until sometime in January.

—General Grant and family and Mr. and Mrs. U. S. Grant, Jr., will make their winter home on 52nd street, this city, General Grant having rented the residence of ex-Senator Chaffee.

—Major B. S. Heming, of the Indiana, Bloomington and Western Railroad, it is said, will take charge of the Long Island Railroads, which have recently passed under the control of Mr. Austin Corbin.

—Mr. Henry C. Jones, of the Philadelphia and Reading Railroad, has been selected as Superintendent of the Junction Railroad, Philadelphia, in place of O. E. McClellan, of the Pennsylvania Railroad, resigned.

—Mr. John J. Kiernan, the manager of the Financial News Agency, on account of increasing business has removed his office from the second story of the building on the corner of Wall and Broad streets to the basement, with the entrance on Broad street.

—Mr John B. Mulliken has been promoted to be General Manager of the Detroit, Lansing and Northern Railroad. Mr. T. S. Fish has been appointed General Superintendent, and the offices of Chief Engineer and Assistant Superintendent have been abolished.

—Mr. Roberts, the successor of Col. Thos. A. Scott as president of the Pennsylvania Railroad Company, is said to be an indefatigable worker, acquainting himself thoroughly with the workings of the road and personally examining many of its detailed accounts and reports.

—Among the prominent railroad men who have been in New York within the past week or ten days are; Vice-president R. R. Cable, of the Rock Island and Pacific, Vice-president R. B. Angus, of the St. Paul, Minneapolis and Manitoba, President J. Tracy, of the Burlington, Cedar Rapids and Northern, and President Isaac Hinckley of the Philadelphia, Wilmington and Baltimore Railroad Co.

—Mr. Brassoy, an English contractor and operator and famous as a yachtsman is reported to have recently bought two more tracts of land amounting to about 120,000 acres near the base of the Rocky Mountains, and Senator Cochrane, of Canada, is also said to have bought 50,000 acres west of Lake Winnepeg, for cattle raising. Extensive purchases of a similar kind are also being made by other Canadians and Englishmen, on the probabilities of early railroad communication between that region and the East.

—The Czar of Russia does not have the most enjoyable and assuring railroad journeys. It is said that as he is about to leave Livadia for St. Petersburg hundreds of menacing letters are daily received by members of the Imperial family and other distinguished personages, threatening murder on the road. As on the former occasions, the entire line of rail will be watched by soldiers and peasants, and lighted up by torches at night. There will be several trains on parallel lines, the one carrying the Emperor being unknown; and Count Melikoff will himself go from the capital to the Crimea to return with his sovereign.

—The Springfield, Ill, Morning Monitor, says: "O. M. Shepard, formerly of this city, who was Trainmaster on the old Grand Central and Springfield Railroad when it was under the Sheldon and Melvin regime, and later was for a long time connected with the old St. Louis and Southeastern as Assistant Superintendent, has been promoted by the New York and New England Railroad Company, from Superintendent of Construction to Master of Transportation and Superintendent of the Eastern Division, with headquarters at Boston, Mass. Mr. Shepard's friends in this city will be pleased to learn of his success in the profession for which he is so well fitted."

—Concerning the value of seats in the New York Stock Exchange, *Harpers Weekly*, says: 'Mr. Metcalf a partner of Mr. Ives, the president of the Stock Exchange, bought the seat of Mr. George Chapin for $20,500, and paid $1,000 admission fee to the Exchange in addition. The value of seats has of late appreciated more rapidly even than the prices of stocks, for it is only a year or so since Mr. James Gordon Bennett paid but $10,000 for a seat, which he presented to his friend Mr. Lawrence R Jerome. At the rate paid by Mr. Metcalf, the 1,100 seats of the Exchange are worth about $22,000,000. One of its advantages is that at the death of a member his family or estate is entitled to $10,000.

—Mr. William C. Whitney, who has just been appointed to the New York City office of Counsel for the Corporation, is a son of General Whitney the well-known New England Railroad man. Mr. Whitney graduated from Yale College in 1863, came to New York soon afterward and entered the office of Hon. Abram R. Lawrence, Justice of the Supreme Court. He was appointed in 1865 by Mayor Wickham to fill the vacancy caused by the removal of Mr. E. Delafield Smith, and in 1876, was re-nominated for a full term, the nomination being confirmed by an almost unanimous vote. He is a lawyer of recognized ability and strength and is eminently fitted by a valuable experience for the position to which he has just been appointed.

—Mr. Allan Campbell, the new Comptroller of New Yoak, is a civil engineer by profession and has been interested in the construction of several important railroad and other works, having been connected for over forty years with enterprises requiring the highest engineering skill. He was the Chief Engineer in the construction of the Union Pacific Railroad, marked out the route for the New York and Harlem Railroad and began the construction of the first railroad in South America, from Lima to Callao. For six years, beginning with 1855, he was president of the New York and Harlem Railroad Co., in which office he was succeeded by Commodore Vanderbilt. He has also been president of the Consolidated Coal Company, one of the great coal companies of Western Maryland, and has also been chairman of the Finance Committee of the Ohio and Mississippi Railway. During the late war Mr. Campbell was the engineer of the harbor defenses of New York. In 1876 he was appointed commissioner of Public Works, which office he has just vacated to assume his new duties. Mr. Campbell is of Scotch descent, is about sixty years of age stands six feet and two inches in height and is a fine specimen of substantial Scotch growth. His appointment is received with general approval by the public, his record in office being highly appreciated by the citizens of New York, among whom he is known as a genial and able business man and a gentleman of unusual strength and decision of character. He is very popular personally and professionally and a wise and just administration of the office of Comptroller is confidently expected of him.

The directors of the Boston, Clinton, Fitchburg and New Bedford Railroad, in their annual report, say: "It is impossible to give a full comparative statement of the rental for the year, as the previous report only covers eight months under the Old Colony lease, but the same eight months this year show an increase of earnings amounting to $23,946 83 over the corresponding months of last year. During the past year your Directors have placed a loan of $1,200,000 of the new mortgage bonds authorized by you at 5 per cent interest. This loan they regard as of very great importance to your property. It has enabled them to pay off all the floating debt, including $528,000 secured by 7 per cent New Bedford Railroad mortgage bonds; also to call in and retire $247,600 Fitchburg and Worcester 7 per cent bonds, thereby saving nearly $5,000 a year in your interest account. It also makes probable a very large reduction in interest as your different forms of securities mature."

The Baltimore Sun says that Mr. Thos. R. Sharp has written a letter to a friend in Danville, Va., in which he says: "I am still president and receiver of the Long Island Railroad, and the conditions on which I effected the sale from Drexel, Morgan & Co., to Mr. Austin Corbin, who is one of my personal friends, was that I was to be a member of the Corbin syndicate, and manager of the roads under the new arrangement. I negotiated the sale from Drexel, Morgan & Co. to Mr. Corbin and friends, and it was all arranged before my departure from New York, to which place I return this week."

Two new locomotives arrived at the railroad shops in Sacramento, Cal., on the 30th of November for the Southern Pacific Railroad, of Arizona. They will be put in order and forwarded as soon as possible to Tucson.

The branch of the Flint and Pere Marquette Railroad to Manistee will be built this winter, the contract having been let.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An *asterick* (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics.*" State-aid Railroads are distinguished by a "†."

Title in Lost or Stolen Bonds.

The First Comptroller of the U. S. Treasury has just rendered a decision touching the finding of a Government coupon bond, in which he holds—

First, United States coupon bonds, being payable to bearer, the title thereto passes by delivery. Possession, even fraudulently obtained, is prima facie evidence of ownership, and all persons not chargeable with knowledge of the fraud, may safely purchase from the holders.

Second, if the holder of such bond present it to the Treasury for payment, or for the issue of a new bond, and give notice of any defect in his title, payment to such holder will not relieve the Government from the duty to again pay the rightful owner.

Third, when registered bonds are presented for transfer to an indorsee, the Government is bound at its peril to ascertain the genuineness of the assignment, and in case of transfers by operation of law, as in case of administration or bequest, the Government is bound to ascertain the parties who, by legal right, are entitled to be inscribed as payees.

Fourth, payment to a person who is not the owner of a registered bond, even though procured by false personation and with the possession of the bond, will not relieve the government from liability to pay the rightful claimant, who has in no way participated in the fraud.

Fifth, payment or transfer of registry of a registered bond on a forged endorsement will not deprive the bona fide owner of the bond of his rights therein.

Sixth, on general principles of the common and civil law the finder of a Government bond acquires no title therein.

Seventh, when the holder of a Government bond presents it to the Treasury for payment, with evidence showing he is not the owner or entitled to payment, he has no right to a return of the bond to his custody. It is the duty of the Government to hold it, to protect the rights of the proper owner until he demands it.

The Oil City and Ridgeway (Pa.) Railroad and Mining Company and its liberal franchises, with depots, engines, cars and six hundred and fifty-six acres of valuable bituminous coal lands, already largely developed and now being worked, has been sold entire to T. H. Wilson, of Oil City.

The Carson and Colorado Railroad has been completed to Dayton.

Railroad Law.

SUPREME COURT OF PENNSYLVANIA, CAULEY VS P. C. & ST. L. R. R. CO.—NEGLIGENCE—CHILD OF TENDER YEARS.

Parents who permit their children to trespass upon the track of a railroad, are guilty of negligence. It is not only gross but culpable negligence, as it imperils the lives of the children, as also the lives of the traveling public.—[ED. CHICAGO LEGAL NEWS.

These were two actions on the case to recover damages, one brought by the father of John Henry Cauley, a boy of tender years, for loss of his services, etc., and the other in right of the boy, for damages for the injury itself. On the trial, counsel for plaintiff offered to prove by the mother of the boy, that on September 20, 1879, the day of the accident, she saw from her house on the hill side opposite to the point bridge, this city, and above the defendant company's railroad tracks, a train of freight cars in motion, down the road; that she saw the conductor of the train standing on the track close to the moving train, and heard him call out to a number of boys that were on a car loaded with sand, ordering them in an authoritative tone of voice, to get off the car; that noticing that her own son, John Henry Cauley, was amongst the boys on the car, she protested against her boy being compelled to get off the car while in motion, and asked the conductor that he should not be put off till the cars were stopped; that the conductor persisted in compelling the boys to get off while the train was in motion, and that in complying with his orders, her boy, then aged seven years, two months and six days, fell under the car and had one of his legs so severely injured that it was subsequently amputated; that when the conductor was ordering the boys to get off, a brakeman went toward the car the boys were on, his manner indicating that he was about to enforce the order of the conductor, this immediately before the boys jumped off the car. This, for the purpose of showing that those in charge of the train of defendants had carelessly and negligently acted in the premises, and had ordered the boys to get off the train at an improper time, i. e. while it was in motion, and also to show negligence on the part of the defendants.

This was objected to, first, as incompetent and irrelevent; second, because the offer disclosed the fact that the plaintiff, the boy injured, was a trespasser at the time of the injury; third, because the offer failed to disclose any act of negligence upon the part of any employee of the company, for which the company itself was liable. The objections were sustained.

The plaintiff then rested, and the court directed a verdict for defendants. The rejection of these offers was assigned for error.

PAXON, J.—It was said by Mr. Justice Strong, in Philadelphia and Reading R. R. Co. vs. Hummell, 8 Wright, at page 378: "It is time it should be understood in this State that the use of a railroad track, cutting or embankment, is exclusive of the public everywhere, except where a way crosses it." The same doctrine has been reiterated again and again in subsequent cases. In Mulherin vs. Delaware, Lackawanna and Western R. R. Co., 31 P. F. S. 366, it was said: "Except at crossings, where the public have a right of way, a man who steps his foot upon a railroad track, does so at his peril. The company has not only a right-of-way, but it is exclusive at all times and for all purposes," and Railroad, vs. Norton, 12 Harris, 465, was cited in support of this rule. Many other cases might be referred to were it necessary. We live in an age of steam and of rapid development. The world demands quick transportation. Increased speed necessarily involves increased danger. Holding, as we do, such corporations to a strict responsibility for negligence, it is our duty to give them a clear track. This rule is not only proper in itself, but is necessary for the preservation of life. Its propriety is no longer a subject for discussion.

It ought also to be equally well understood that parents who permit their children to trespass upon the track of a railroad are guilty of negligence. It is not only gross but culpable negligence, as it imperils the lives of the children so trespassing, as also the lives of the traveling public. A similar view was taken in Railroad Company vs. Hummell, supra, where it was said that children "cannot be upon the railroad without a culpable violation of duty by their parents or guardians." It is very clear, therefore, that as to the suit brought by John Cauley in his own right for the injury to his son, he cannot recover. The child was upon the car where he ought not to have been by the negligence and want of care of his father. Nor does the offer of evidence ruled out by the court below tend to rebut the presumption of the negligence on the part of his parents. On the contrary it strengthens it. Assuming the offer to be true, it shows that the child was not only playing upon the car on the occasion when he received the injury, but that he had done so before. The location was near his parents' house, probably in sight, as his mother saw the accident and called to the conductor. That the child was there without his father's consent is not to the purpose. "To suffer a child to wander upon the street has the sense of permit. If such permission or sufferance exist it is negligence:" Philadelphia and Reading R. R. Co. vs. Long, 25 P. F. S., 265. I apprehend few parents would consent to a child playing upon a railroad track, or any other known place of danger. But many parents might neglect the precautions necessary to prevent it. In some instances it would require more than merely to caution a child against it. Positive prohibition, followed by punishment for violation sometimes may be necessary. It too often happens that boys are allowed to wander about the streets, and trespass upon railroad tracks with very little care or supervision of the parents. Whilst so engaged injuries of this character are deplored, and however much our sympathies may

likely to happen. Much as they are to be debe aroused for one so injured, it would be unjust to compel a corporation or individual to make a pecuniary compensation for such accident, where it was the result of the lawful pursuit of a lawful business by such corporation or individual. Aside from this the defendant company owed the father of this child no duty. The father owed his child the duty of protection. The company did not. The evidence was properly rejected.

In regard to the suit brought for the child by his father, as his next friend, it is sufficient to say that the child being unlawfully on the car, the defendant company owed it no duty, and is not liable for the injury. This was the principle upon which Railroad Co. vs. Hummell was ruled. In the recent case of Duff vs. Allegheny Valley R. R. Co., 27 Pittsburg Legal Journal, 58, it appeared that a conductor of a train in violation of the rules of the company, permitted a boy to sell papers on the train. By the alleged negligence of the company the boy was killed. The right of his mother to recover was denied, upon the ground that the boy was a mere trespasser, and the company owed him no duty. It is useless to multiply authorities. The rule is well settled and is sustained by reason and authority. Moreover, it is demanded by humanity. There are many unfeeling parents not only neglect, but maltreat their children. It would be cruel to such children to lay down a rule which would make it an object for unprincipled parents to expose them to injury and death upon a railroad track. Writ Quashed.—[Legal Intelligencer.

Interest and Dividends.

The American Express Company has declared a devidend of $2 50 per share, payable Jan. 3.

The Fitchburg Railroad Company has declared a dividend of $3 50 per share, payable January 1, 1881.

The Eastern (N. H.) Railroad Company has declared a semi-annual dividend of 2½ per cent, payable December 15th.

The Boston, Revere Beach and Lynn Railroad Company has declared a dividend of $3 per share, payable Jan. 1.

The Baltimore City Passenger Railway Company has declared a dividend of $1 25 per share, equal to 5 per cent, payable January 3, 1881.

Three per cent interest for the six months ending December 1, 1880, will be paid upon the income bonds of the Indiana, Bloomington and Western Railway Company on and after Jan. 3, 1881.

A dividend of 1¾ per cent on the preferred stock of the Chicago, St. Paul, Minneapolis and Omaha Railway Company, will be paid on the 20th of January, 1881, to stockholders of record on the 30th inst.

The Homestake Mining Company has declared its 27th dividend of 30 cents per share and an extra dividend (the 28th) of same amount, both payable December 27th. Transfer books close on the 20th.

The directors of the Chicago, Burlington and Quincy Railroad Company have declared a stock dividend of 66⅔ per cent, subject to ratification by the stockholders at a meeting, called for that purpose, to be held on the 28th inst.

The Northern Central Railway Company has declared a dividend of 2½ per cent, from the profits of the year 1880, payable January 10, 1881. This is the first dividend paid by this company since April 1, 1876, when 3 per cent was paid.

The Worcester and Nashua Railroad Company has declared a dividend of $1 50 per share of $75, or two per cent, payable January 1, 1881. This is the first dividend since July 1876, when a similar dividend was paid.

A dividend of $1 75 per share has been declared payable on the 23d of December to the holders of the preferred shares of the Keokuk and Des Moines Railway Company, at the closing of the books on the 15th of December.

The city officials of Harrisburg, Penn., give notice that all Five-twenty or Option Bonds issued by that city from January 1, 1875, to January 1, 1876, inclusive, are called in and will be paid January 1st, 1881, when interest will cease. They are payable on presentation at the Western Bank in Philadelphia.

The coupons of the First Mortgage Sinking Fund bonds of the Port Royal and Augusta Railway Company due January 1, 1881, will be paid at the office of the company, No. 252 Broadway, on and after that date. Also at the same time and place a dividend of two per cent on the company's income bonds on presentation of coupons 3 and 4.

The Boston and Maine Railroad Company is building over the Merrimac River at Haverhill, Mass., the heaviest and strongest iron railroad bridge in New England. It comprises five great spans of a total length of 720 feet, and bears two tracks, supported by trusses, each calculated to carry 3500 pounds live load to the lineal foot. The floor system will carry 4500 pounds per lineal foot upon each track. The masonry of the new structure will be completed by the 25th inst., and the iron work will be on the ground as soon as the foundations are ready to receive it.

A new railroad is projected to run from Port Rowan to Amherstburg, Ont., forming an Eastern connection with the Hamilton and Northwestern Railway, and a Western connection by crossing the Detroit River and connecting in Michigan with the Wabash system. The line is already surveyed as far west as the County of Essex, Ont.

The Pittsburg Chronicle says that as a part of the new scheme of the Pittsburg, Titusville and Buffalo Railroad the Baltimore and Ohio is surveying a route across the eastern part of Allegheny county to make connection with the New York, Pennsylvania and Ohio for a through route to Cleveland.

The New York and New England Railroad Company has completed its track between Danbury and Waterbury, Conn., and is only a few miles from the Harlem Railroad. The trains will soon run from Boston to Danbury, the cars being now ready.

The first through Pullman sleeper from Cincinnati to Savannah, Ga., over the Cincinnati Southern and Georgia Central railroad, arrived at Savannah on the 13th inst.

Five car loads of steel rails were forwarded for the terminus of the Southern Pacific Railroad from Sacramento on the 30th ult.

Track laying on the Utah Eastern Railroad is being prosecuted between Kimball's and Park City.

The Southern Pacific Railroad was completed 22 miles east of Rio Mimbres, N. M., and 60 miles from El Paso on the 1st of December.

Philadelphia Stock Exchange.

American Railroad Journal.

Financial and Commercial Review.

THURSDAY EVENING, December 16, 1880.

Six per cent has been the minimum rate for call loans during the day at the Stock Exchange, but in the last hour the rate fell to three per cent. Time Money was offered to-day for four months at six per cent, and for thirty days money can be borrowed at six per cent and a commission of one-quarter. Prime mercantile paper is six and seven per cent.

The posted rates for prime bankers' sterling are 4.79@4.82; the actual rates are 4.78@⅛ and 4.81@⅛. Cable transfers are 4 81⅛@4.82. Prime commercial bills are 4.76¼@4.77.

The Treasury to-day purchased $199,000 6s of 1880, at 102⅞.

The earnings of the Central Pacific Railroad Company, for the month of November, 1880, were $2,154,000; for the month of November, 1879, $1,488,141. The earnings for the first eleven months of 1880, were $18 682,195; for the first eleven months of 1879, $15,817,292.

The earnings of the Chesapeake and Ohio Railway for the month of November, 1880. were $289,-078 31; for the month of November, 1879, $148,-078 51—increase in 1880, $90,999 80. For eleven months in 1880 the earnings were $2,439,690 52; for eleven months in 1879, $1,755,888 24—increase in 1880, $683,802 28.

A negotiation has just been concluded between Drexel & Co., of Philadelphia, and the Pennsylvania Railroad Company for the purchase from that company of $5,000,000 of the 5 per cent

Consolidated Mortgage bonds of the Philadelphia and Erie Railroad Company which is leased to, and the bonds guaranteed by, the Pennsylvania Railroad Company.

The returns of the railroad companies of the State of Illinois to the Railroad and Warehouse Commissioners are complete except from the Baltimore and Ohio and St. Louis and Southeastern Railroads, and show that the earnings of the 46 roads doing business in the State during the year ending June 30, 1880, were $139,000,000 ; the expenses, $78,000,000 ; and the net income, $61,000,000. The passenger business paid $34,000,000 ; freight, $101,000,000. The highest gross earnings in any previous year was in 1879, when they were $110,000,000, and in the same year the net earnings were $47,000,000. Six of the roads carried over 9,000,000 passengers in one year. Some of the roads doubled their net earnings over the preceding year.

The receipts of the New York, Providence and Boston Railroad Company for the year ending September 30, 1880, were $854,072, the expenses, $504,096, and the net earnings, $349,096—an increase over last year of $30,439 ; increase in number of passengers, $167,240.

Western Union Telegraph.

The following is the official statement of the operations of the Western Union Telegraph Company, submitted by the Treasurer at the meeting of the directors held on the 8th inst. :

EXECUTIVE OFFICE,
WESTERN UNION TELEGRAPH COMPANY,
NEW YORK, December 8, 1880.

In the report presented by the Executive Committee at the last quarterly meeting of the board, held Sept. 8, 1880, the net profits for the quarter ending Sept. 30 (August being partially and September being wholly estimated) were stated at $1,104,041 63. The official returns for the quarter (ended September 30) showed the profits to be $1,070,827 71, or $33,213 92 less than the estimate. The following revised statement, based upon complete returns, will show the condition of the company at the close of the quarter ended Sept. 30, 1880 :

Surplus July 1, 1880, as per quarterly report		$403,255 14
Net profits, quarter ended Sept. 30, 1880		1,070,827 71
Total		$1,474,082 85
From which deducting :—		
Dividend of 1¾ per cent, paid Oct. 15, 1880	$717,571 75	
Interest on bonded debt	107,000 00	
Sinking fund appropriations	20,000 00	
Construction account	438,921 48	
Purchase of telegraph stocks and patents	35,459 76	
Total	$1,315,952 99	
Less portion of the sinking fund for the bon's of 1900 (which was set aside previously) returned to the company by the Union Trust Company, trustees, because of the drawn bonds not having been presented for redemption	40,000 00	
		1,275,952 99
Leaves a surplus Oct. 1, 1880, of		$198,129 86
The net profits for the quarter ending Dec. 31, instant, based upon official returns for October, nearly complete returns for November, and estimating the business for December, (reserving amount sufficient to meet the claims of the Atlantic and Pacific Telegraph Company under existing agreements) will be about		951,806 62
Add surplus Oct. 1, as above		198,129 86
Total		$1,149,936 48
From which appropriating—		
Interest on bonded debt	$107,000 00	
Construction	250,000 00	
Sinking fund appropriations	20,000 00	
Purchase of telegraph stocks and patents	25,000 00	
		402,000 00
Leaves a balance of		$747,936 48
A dividend of 1½ per cent requires		615,061 50
Deducting which leaves a surplus, after paying dividend, of		$132,874 98

In view of the preceding statements, the committee recommend the adoption by the board of the following :

Resolved, That a dividend of 1½ per cent from the net earnings of the three months ending Dec. 31 be and is hereby declared payable on the 15th day of January next to stockholders of record at the close of business on the 20th day of December instant.

Resolved, That for the purpose of such dividend the stock books of the company be closed at 3 o'clock on the afternoon of the 20th day of December instant and be reopened on the morning of the 17th of January next.

Respectfully submitted,

NORVIN GREEN, President.

Illinois Central Railroad.

During the month of November, 1880, the traffic on the lines operated by this company was (estimated) :

In Illinois	$557,131 00
In Iowa (leased lines)	163,440 00
Total	$720,571 00

The traffic for the same month in 1879, on the same mileage, was (actual) :

In Illinois	$190,530 42
In Iowa (leased lines)	140,812 97
Total	$331,343 39

During November, 1880, the land sales were 2,441 87 acres for $13,814 71, and the cash collected on land contracts was $19,584 43.

L. A. CATLIN, Secretary.

The Canadian Pacific Railway.

At the opening of the Dominion Parliament on the 9th inst., the Governor General in his address, said :

During the recess, my advisers thought the time opportune for making another attempt to carry out the declared preference of Parliament for the construction and operation of a Canadian Pacific Railway, by means of an incorporated company aided by grants of money and land, rather than by the direct action of the Government. Three of my Ministers, therefore, proceeded to England for the purpose of carrying on negotiations. I am pleased to be able to inform you that their efforts were so far successful that contracts have been entered into, subject to the approval of Parliament, with men of high financial standing in Europe, the United States and Canada for the speedy construction and permanent working of this great national enterprise. The contract and papers connected therewith will be submitted to you without delay, and I invoke for them your early and earnest consideration. With this view, I have summoned you before the usual period, as no action can be taken by contractors to prosecute the work, and no permanent arrangement for the organization of systematic emigration from Europe to the Northwest territory can be satisfactorily made until the policy of Parliament with respect to the railway has been decided. Steady progress will be made in the construction of those portions of the railway now under contract. Two additional sections have recently been opened for traffic, one from Winnipeg to Portage La Prairie, the other from Cross Lake to Kee Watin, so that there are now in all 264 miles in operation.

Trains are now run regularly over the Eastern Extension Railway from New Glasgow to the Strait of Canso. The rest of the road is unfinished and will probably remain so until next summer.

The Flushing (L. I.) and North Shore Railroad was sold at public auction the 11th inst., at the Court House in Long Island City, for $800,000, the purchasers being Drexel, Morgan & Co.

Add balance of income per last report		123,232 97
Balance of interest account		72,867 19
Total income		$308,539 01
From which deduct—		
Paid dividend Dec. 1, 1879, $2 50 per share	$74,932 50	
Dividend payable June 1, 1880, $3 00 per share	89,919 00	
	164,851 50	
Balance of income account		$143,687 51

Compared with the previous year the gross earnings show an increase of $112,131 87 with an increase in expenses of $7,065 04—making the increase in net earnings $5,066 83. The report says:

The directors are happy to be able to report that the net income warrants the payment of a dividend of 3 per cent for the latter half of the year, making, with the dividend paid for the first half, 5½ per cent for the entire year.

Although there has been some doubt as to the policy of increasing the amount of the dividends paid since 1875, they trust that, in view of the increased net income, such action will meet with the general approval of the stockholders.

The through rates received for business from the West have, during the past year, been even less than in former years, so that though the amount of such business has largely increased, the relative net income therefrom has decreased. As this business constitutes the larger part of the traffic over your road, a small increase in such rates would materially increase the net income.

The material required for the use of the road the past year having been purchased at comparatively low prices, this large increase of business has been done without much addition to the expenses of the former year. The present and prospective increase in the cost of labor and materials may cause the ratio of expenses to income to be greater for the year to come than it has been during the last year. A reduction has been made in passenger fares, which may somewhat reduce the future income from this source. It is hoped, however, that this reduction, which seemed to be demanded by the public, will result in such an increase of business that no material loss will result therefrom.

The station at White River Junction, owned in common by the Central Vermont, Connecticut and Passumpsic Rivers Railroads, and this company, requiring extensive repairs and improvements for the public accommodation, we have joined with the other parties in interest in making them, and though they are not yet fully completed, the larger part of the cost to this road has been included in the expenses of the past year.

Under the new system of taxation, the State tax, which was before larger than was equitable, compared with the taxation of other property, has been increased about eleven per cent over the amount of the previous year, so that on the net income of $107,372 02, a tax of $35,043 31, has been assessed upon this corporation. Believing this tax to be unjust, the directors have caused it to be paid under protest.

The Peterborough and Hillsborough Railroad, in which this corporation has an interest, referred to in former reports, has not as yet paid the interest on the investment, the Manchester and Keene Railroad, with which it connects, and in which this company also has an interest, having been operated only from December, 1878, to March, 1879, and then discontinued. It was expected that some advantages would be derived from the operation of the Manchester and Keene Railroad; and as there is now a strong probability that this road will soon be satisfactorily completed and continuously operated, it is hoped the objects for which you lent your aid will be accomplished without pecuniary loss to the company.

The road, track, equipment, and other property of the corporation, have been well maintained, and are in better condition than at any time heretofore.

During the past year 803 tons of new steel rails, 235 tons of new iron rails, and 51,122 new sleepers have been placed in the track, and about 2,800 tons of iron rails have been welded and relaid.

There have been rebuilt at the shops of the company during the year one freight locomotive and twenty-seven freight cars, the cost of which is included in the general expense of the road herein.

The equipment of the road March 31, 1880, was as follows: 9 passenger and 16 freight locomotives, 412 long and 99 short merchandise cars, 18 passenger, 1 mail, 2 mail and smoking, 7 bag gage and 19 gravel cars. Number of miles run by passenger trains, 196,620; by freight trains, 302,842; by other trains, 2,676—total, 502,138. Number of passengers carried, 133,012; do. carried one mile, 2,410,875. Tons of merchandise carried, 509,358; do. carried one mile, 32,628,860.

President.—HENRY C. SHERBURNE.

Directors.—George W. Nesmith, Uriel Crocker, Francis B. Hayes, Josiah H. Benton, Jr., George E. Todd, Albert M. Shaw.

Treasurer.—GEO. A. KETTELL.

Superintendent.—GEORGE E. TODD.

At a meeting of the stockholders of the Knoxville and Ohio Railroad Company, held in Knoxville, Tenn., on the 8th inst., resolutions were adopted authorizing the directors to let a contract for the completion of the road to the point of the junction with the Louisville and Nashville Railroad as soon as the latter company is obligated to complete the Knoxville branch to the Tennessee State line. A resolution was also adopted authorizing the issuance of $1,800,000 in bonds to take up the present indebtedness and prosecute the work, and setting forth the advantage of the new outlet for the coal banks of East Tennessee.

The first blast furnace on the Western reserve was built by Dan. Eaton, in 1803 or 1804 in the township of Poland, Mahoning (then Trumbull) county, on Ye low creek, about one and a half miles south of its junction with Mahoning river.

SEYMOUR D. THOMPSON,

Author of works on "Negligence," "Homesteads and Exemptions," "Liability of Stockholders" etc., etc.

The above work is arranged as a companion, or rather as a supplement, to Mr. THOMPSON'S work on **Negligence, and is constructed on the same plan.** The author has attempted to collect and examine all cases on the **Duties and Liabilities of Carriers of Passengers.** The best of these cases, which present the leading doctrines pertaining to the different branches of the subject, are printed in full, and the rest of them are presented in carefully written and explanative notes. The notes are designed to form a **Complete Treatise** on the subject of **Carriers of Passengers,** in addition to the cases published in full.

Price, $5 50 net. Sent by mail, prepaid, on receipt of $5 80.

The Coal Trade.

The leading coal carrying companies make the following reports of their tonnage for the week ending December 4, and for the year to the same date, compared with their respective amounts carried to the same time last year :

	Week.	1880.	1879.
Reading Railroad ...	85,168	85,168	189,134
Schuylkill Canal....	.....	.....	28,793
Lehigh Valley	68,602	68,602	92,305
Del., Lacs. & Western.	94,037	3,284,143	3,583,361
Shamokin Valley	19,529	860,478	850,803
Central New Jersey..	40,878	3,103,181	3,363,723
United New R. R. of Jersey	36,285	1,076,310	885,648
Pennsylvania Coal ..	25,313	1,054,293	1,322,877
Delaware and Hudson	77,617	2,835,271	3,181,044
Huntingdon & Broad Top Mt.....	3,114	394,224	291,437
Penn. and New York.	15,448	15,448	7,767
Clearfield, Pa.....	55,682	1,598,495	1,492,933

The reports for the Reading Railroad, Lehigh Valley Railroad, Pennsylvania and New York Canal and Railroad, and Schuylkill Canal are for four days, ending December 4th, and begin the new fiscal year of those companies. The Schuylkill Canal is closed for the season, and there is, consequently, no tonnage reported.

The total tonnage of anthracite coal from all the regions for the week ending December 4, as reported by the several carrying companies, amounted to 466,437 tons, against 531,889 tons in the corresponding week last year, a decrease of 65,452 tons. The total amount of anthracite mined for the year is 22,029,030 tons, against 24,679,406 tons for the same period last year, a decrease of 2,650,376 tons. The quantity of bituminous coal sent to market for the week amounted to 93,227 tons against 103,193 tons in corresponding week last year, a decrease of 9,966 tons. The total amount of bituminous mined for the year is 4,094,859 tons against 3,392,904 tons for the corresponding period last year, an increase of 701,955 tons. The total tonnage all kinds of coal for the week is 559,664 tons, against 635,082 tons in corresponding week last year, a decrease of 75,418 tons, and the total tonnage for the coal year is 26,123,889 tons against 28,072,810 tons to same date last year, a decrease of 1,948,921 tons. The quantity of coal and coke carried over the Pennsylvania Railroad for the third week of November was 169,688 tons, of which 125,358 tons were coal and 44,280 tons coke. The total tonnage for the year thus far has been 6,418,457 tons of which 4,834,112 tons were coal and 1,584,345 tons coke. These figures embrace all the coal and coke carried over the road east and west. The shipments of the bituminous coal from the mines of the Cumberland coal region during the week ended Dec. 4 were 30,978 tons, and for the year 1,965,087 tons—an increase of 427,084 tons as compared with the corresponding period of last year. The coal was carried as follows: Baltimore and Ohio Railroad—week 27,971 tons, year, 1,161,406 tons; increase over 1879, 250,283 tons. Chesapeake and Ohio Canal—week, 2,548 tons; year 599,817 tons; increase over 1879, 117,379 tons. Pennsylvania Railroad—week 463 tons; year, 203,864 tons; increase over 1879, 60,372 tons. The Reading Railroad for the week ending December 11, carried 131,000 tons of coal, of which 16,000 tons were sent to Elizabethport and 18,500 tons shipped from there, and 19,000 tons sent to Port Richmond and 82,800 tons shipped from there.—Phil. Ledger, Dec. 13.

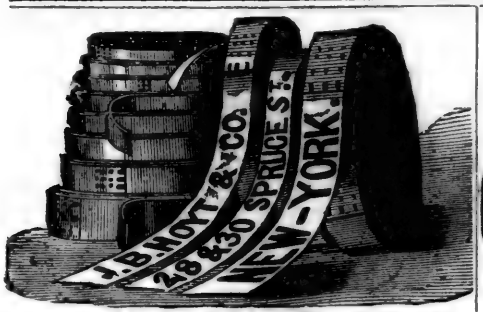
VALENTINES VARNISHES

OUR CLAIMS.

We claim that our Finishing Varnishes are unsurpassed in the following qualities:

1. Uniformity. 3. Fluency. 5. Drying. 7. Fulness. 9. Durability.
2. Paleness. 4. Reliability. 6. Hardening. 8. Brilliancy. 10. Economy.



All know it is easy to make a Varnish that has the single quality of DURABILITY, but Varnishes which wear well are generally inferior in color and working quality, uncertain in laying, too slow in drying, or lacking in body or lustre, and frequently they possess ALL these defects.

In our "RAILWAY-COACH FINISHING" the ten qualities will be found combined, and our other Varnishes are as elastic and durable as is practicable for the work on which they are employed.

Those of our Varnishes which have the greatest durability require time for hardening. They have superior elasticity, and ARE DISTINGUISHED FOR THE EXTENT OF SURFACE THEY WILL COVER, WHICH RENDERS THEM ECONOMICAL.

VALENTINE & COMPANY,

Chicago. NEW YORK. Paris

Patent Stretched and Patent Riveted Short Lap

BELTING.

Our Belts are made from pure Oak Tanned Butts, and of the heart or solid part only. No part of the shoulder being used. Any one not familiar with Belt making can readily detect this by the shortness of the lengths and laps. Long laps are made including the shoulder or thinner and softer part of the Leather, causing the Belt to be, in its enduring qualities, no better than its poorest or thinner parts

Our Belting is warranted to run straight and maintain an even bearing on the pulleys, and sold under the fullest Guarantee.

CHICAGO.

DECEMBER FEATURES OF THE CHICAGO STOCK MARKET.—INTERESTING FACTS CONCERNING THE OPERATION OF WESTERN RAILROADS, EMPLOYEES, EARNINGS, ETC.—CHICAGO'S SHIPMENTS.—CONSTRUCTION ENTERPRISES, ETC., ETC.

[From our Chicago correspondent.]

CHICAGO, December 18, 1880.

The feature of the middle of December in financial circles was the diminished demand from the country, for currency, and consequent cessation of drafts by our local banks on New York. New York Exchange rising from 1 50 to 1 00 discount to par, the shipping of gold and currency to New York was anticipated. Clearings for the week ending December 11th were $41,906,972, as compared with $34,941,632 for corresponding week last year. Loans on call could be secured at 6 to 7 per cent, and 7 to 8 per cent on time, with slight concessions to A.1. customers, Sterling exchange had been in good supply, market dull and rates fluctuating. Actual rates on the 15th ranged at 4.81½ and 4.7d½: Documentary bills weak at 4.75¾ and 4.76¼ for sterling; 5.32½ for francs. Antwerp and Havre; and 93 for marks.

Quotations on the Chicago Stock Board on the 15th were as follows:

Chicago, Mil. & St. Paul 7s, Dakota Extension	117½
Chic., Mil. & St. Paul 7s, Hastings & Dakota Div.	114¼
Chic., Mil. & St. Paul 6s, Chicago & Pacific Div.	105¾
Chicago, St. Paul, Minn. & Omaha 6s	101
Chicago, & North Western 6s sinking fund	108½
Chicago, Burlington & Quincy 4s, 1919	90½
Chicago, Burlington & Quincy 5s	103¾
Jacksonville & S. E 6s	99¾
Wabash, St. Louis & Pacific 1st mort. 5s, C. D.	90¾
Chicago, Burlington and Quincy stock	174
Chicago, Rock Island & Pacific stock	129
Chicago & Alton stock	138
Chicago & North Western common stock	122
Chicago & North Western preferred stock	139

The forthcoming report from the State Railroad Commissioners will be unusually interesting, comprising returns from 48 railroad companies doing business in Illinois. A brief summary shows: the Chicago, Milwaukee and St. Paul controls 3,000 miles, and employs 10,824 men; the Chicago, Burlington and Quincy has 1,573 miles, and employs 11,507 men; the Chicago and North Western has 2,024 miles and employs 8,457 men; the Chicago, Rock Island and Pacific has 1,617 miles and employs 6,742 men; the Sycamore, Cortland and Chicago has 5 miles and employs 14 men. The number of employees on the other important lines is as follows: Wabash, St. Louis and Pacific, 8,064; Illinois Central, 3,777; Michigan Central, 5,052; Lake Shore and Michigan Southern, 9,292; Pittsburgh, Ft. Wayne and Chicago, 7,959; Pittsburgh, Cincinnati and St. Louis, 3,481; Ohio and Mississippi, 3,400; Chicago and Alton, 3,900.

The "Tribune" summarises fares paid by all classes of passengers at $34,273,472, and freight charges at $100,737,476. There were 217 persons killed and 706 injured during the year.

The total revenue received by the railroads doing business in Illinois during the years named has been as follows:

1876—Earnings, $106,773,300 13; expenses, $65,120,618 77; net earnings, $41,698,011 26. Five roads reported a total deficit of $43,329 89.

1877—Earnings, $95,731,224 06; expenses, $61,608,613 25; net earnings, $34,317,040 20. Six roads reported a total deficit of $194,429 39.

1878—Earnings, $105,601,796 30; expenses, $63,215,882 94; net earnings, $42,391,525 09. One road reported a deficit of $19,004 40.

1879—Earnings, $109,877,864 40; expenses, $62,920,042 27; net earnings, $46,966,899 12. Three roads reported a total deficit of $9,076 99.

In 1880 the forty-six roads from which reports have thus far been received had a total income of $138,659,155 40; expenses, $73,089,185 47; net income, $61,093,612 22. Their total receipts from the passenger department were $34,273,472 20, and from the freight department $100,737,476 12. Forty-five roads report earnings in Illinois as follows: Passenger department, $11,738,013 12; freight department, $36,418,664 05.

Thirty-three roads at the end of the year covered by their reports carried forward to next year an aggregate balance of profit of $35,060,640 09. Thirty-four roads reported an aggregate balance applicable to dividends of $31,800,502 42. Thirty-seven roads paid $3,399,976 83 for taxes.

Forty-two roads report the amount of capital stock issued. The total number of shares is shown to be 2,768,182, amounting to $507,137,171 43. Of this, $32,702,396 87 is common stock, $74,434,744 56 is preferred stock, and the remaining portion is accredited to other accounts. The greatest amount of stock per mile is issued by the Lake Shore and Michigan Southern ($58,959 53), and the lowest ($2,626 per mile) is issued by the Chicago and Eastern Illinois.

In Illinois, seven roads report 18 passengers killed, and 13 roads report 39 passengers injured. Twenty-five roads report 126 employes killed in this State, and 26 roads report 431 employes injured. The same number of roads report 173 other persons killed, while 23 roads report 217 other persons injured. Total for Illinois: killed, 217; injured, 706.

One of the most interesting features shown by the reports of the railroad companies is the train and car mileage. The mileage of passenger trains for the past year is shown to be 24,739,385 miles; freight, 59,560,621 miles; mixed trains, 1,202,276 miles; excursion, 12,721 miles; construction, 2,936,956 miles; switching, etc., 12,276,357; total train mileage, 100,728,316. The car mileage was: passenger, 20,949,325 miles; freight, 1,254,816,168; empty freight cars, 502,260,402 miles.

Articles of incorporation of The Champaign and South Eastern Railway Company have been filed with the Secretary of State. It is purposed to construct a road from Champaign in Champaign County, to Paris in Edgar County, Illinois. The capital stock is fixed at $100,000.

The freight blockade which has seriously embarrassed the railroads during the past few weeks has been almost overcome, though shippers still complain of great scarcity of cars. The high prices of grain acted as a temporary check; but the recent declines in all lines of produce, estimated by some at $1,500,000 during the past two weeks, will probably induce a more active demand from Eastern markets with a probable repetition of the trouble.

The following were the receipts of breadstuffs in this city during the past week:

	Dec. 11, 1880.	Dec. 4, 1880.	Dec. 13, 1879.
Flour, bbls	123,096	138,820	114,795
Wheat, bu	703,515	850,608	678,730
Corn, bu	985 679	1,247,377	747,490
Oats, bu	343,493	382,598	152,779
Rye, bu	36,478	37,759	28,928
Barley, bu	206,389	258,660	197,222

The corresponding shipments were:

	Dec. 11, 1880.	Dec. 4, 1880.	Dec. 13, 1879.
Flour, bbls	110,986	126,840	103,161
Wheat, bu	74,313	76,171	108,152
Corn, bu	239,995	374,179	290,194
Oats, bu	258,676	298,244	88,092
Rye, bu	27,393	38,931	18,769
Barley, bu	99,931	108,673	71,051

Some fears of an advance in freight rates between Chicago and the seaboard is entertained, but at present writing nothing definite is known as to the intentions of the principal roads; the probabilities are against such action.

The city authorities are hopeful of being able to negotiate the sale of that portion of the Lake Front lying north of Monroe street, to the Illinois Central R. R. Co., who in conjunction with the Michigan Central and Baltimore and Ohio Railroads are willing to pay from $750,000 to $800,000 for the land, and would proceed immediately to the erection of a commodious passenger station. It appears that the title to the two blocks in question is in the United States and it will be necessary to have an Act of Congress authorizing the city to make the sale. There is some objection from adjacent lot owners, but it is to be hoped the railroad companies will obtain the land, and remove the present sheds that, occupying the ruins of The Anti-Fire Union depot, are by no means a credit to the city or themselves.

The three rolling mills of this city have orders, it is said, for 200,000 tons steel rails to be delivered during 1881.

Philadelphia and Erie Railroad Bonds.

To meet the $5,000,000 first mortgage 6 per cent bonds maturing March 31, 1881, the Philadelphia and Erie Railroad Company has resolved to issue under its general mortgage $5,000,000 registered 5 per cent gold bonds to become due in 1920, and the Pennsylvania Railroad Company, lessee, having purchased the same, has decided to indorse upon them its contract agreeing to purchase at par as they mature the principal and interest of said bonds. The company covenants to pay State tax upon the interest and principal. By the payment of the $5,000,000 maturing first mortgage bonds, the general mortgage bonds, which, with this issue will now amount to $13,680,000, become a first lien upon all the property of the company after the payment of $3,000,000 secured upon the main line and $976,000 secured upon the Sunbury and Williamsport Division. The net earnings of the Philadelphia and Erie Railroad Company for the present year, it is estimated, will be sufficient to pay all fixed charges, including interest on the bonded debt, and leave a surplus; and it will be observed that this issue does not increase the debt, while it diminishes the interest charge to the extent of $50,000 per annum. The indorsed guarantee of the Pennsylvania Railroad Company upon the bonds is the absolute agreement of that company to purchase the principal as well as the interest as each matures. A. J. Drexel & Co., of Philadelphia, have contracted with the Pennsylvania Railroad Company for this issue of bonds. The bonds are executed and ready for delivery, and interest thereon will begin to accrue April 1, 1880.

Atlanta and West Point Railroad.

The earnings of this road for the years ending June 30, 1879, and 1880, were:

	1879.	1880.
From passengers	$97,580 24	$110,592 39
" freight	202,487 96	220,215 43
" mail	11.561 52	15 586 47
" express	6,042 57	8,047 93
" miscellaneous	12,590 65	13,688 85
	$330,262 94	$368,130 57
Expenses, viz:		
Conducting transp	$45.234 31	$50,039 90
Motive power	50,955 66	72,117 82
Maintenance of way	70,528 24	55,772 91
Maintenance and rent of cars	25,079 67	25,976 58
Rents of Central and Georgia Railroads	6,166 66	6 000 00
Taxes	5,521 60	3,856 00
Legal expenses	3 406 16	1,048 40
	$206,892 30	$214,811 56
Net earnings	$123,370 64	$153,319 01

In the payments of 1879 are included about $22,000 for steel and iron rails over the annual wear, and about $5,000 in value of additions to the rolling stock. Allowing for proportion of cost of new locomotives, new cars and steel rails, $12,000 as betterments in 1880, the ratio of current expenses to receipts will be the same as in 1879, 54½ per cent. The Superintendent in his report, says:

The change of ownership and management of our connections south and west of Montgomery, has led me to apprehend some diversion of the long travel we have heretofore carried between the Gulf and Atlantic cities. With the superior inducements of solid trains between New Orleans and Louisville, that route will doubtless attract some travel from us. The shorter line will, I think, continue to hold a reasonable share of the business, unless the policy of obstruction should be resorted to by our competitor.

Yielding to the earnest appeals of our connections North and South, and of the public, I consented, with the approval of the Board of Directors, to put on an additional fast mail and passenger train, each way, commencing in the latter part of July last. The additional mail pay and travel, have not been sufficient to remunerate the company for the service. The train would have been discontinued but for the promise of an early opening of the all-rail connection with Houston, Texas, through New Orleans. This new line will be opened in August, and will make close connection with our second train going North. This, with additional mail pay, which we are entitled to under the last weighing, will, I trust, justify us in continuing the second train service.

The property of the company has been fairly maintained, if not improved, since the last report.

The substitution of steel rails, for defective iron rails, has progressed as fast as required to keep the track in safe condition. We have now twenty-two miles of steel rail track. Some progress has been made in ballasting the track with a good quality of gravel, procured from natural deposits along the line of the Western Railroad of Alabama, near Chehaw. This is a much needed improvement, in view of the adoption of a heavier class of locomotives than we have heretofore used, and I recommend its prosecution as rapidly as our outfit, for transporting the material, will admit. The Roadway Department has, as usual, been well managed by our vigilant supervisor.

Two new freight engines, from the Baldwin Locomotive Works, were added to the motive power in October and November last. Three of the old engines have been cut up—one sold, and one condemned, during the past year—leaving fourteen as the number now available for service. Two of these are of the old light stock, and are fit only for auxiliary switching service. Two additional freight locomotives have been contracted for, one to be delivered in November, the other in December.

One passenger, 1 postal and ten coal cars have been added to the rolling stock during the year, and one passenger and one express car condemned. The equipment now consists of 15 locomotives, 7 passenger, 3 baggage and express, 1 portal, 5 cab, 113 box, 18 stock, 26 platform and 13 coal cars. Number of passengers carried, 47,069, against 39,662 in 1879—an increase of 7,407. Tons of freight transported, 99,604; do. in previous year, 74,885—increase, 24,719. Bales of cotton transported 88,863, against 73,491 in 1879—increase, 15,372.

The condition of the company July 1, 1880, was as follows:

Assets:	
Road outfit and real estate	$1,192,499 72
Bills receivable	13,200 00
Preferred stock, Vicksburg and Meridian R. R.	3,432 00
Due by agents & connecting roads.	45,361 53
Due by Georgia Railroad Bank	48,972 00
Cash	39,450 44
	$1,342,915 69
Liabilities:	
Capital stock	$1,232,200 00
Bonds of the company	65,000 00
Dividends unpaid	958 00
Due to agents and connecting roads.	5,038 56
Profit and loss	39,719 13
	$1,342,915 69

BALANCE SHEET, July 1, 1880.

Road outfit and realsestate	$1,192,499 72
Bills receivable	13,200 00
Note of Western R. R., charged P. & L	126,792 25
Preferred stock Vicksburg and Meridian R. R. Co	3,432 00
Dividends of July and January	98,576 00
Interest account	5 425 33
Due by agents and connecting roads	45,361 53
Due by Georgia Railroad Bank	48,972 00
Road expenses for the year	214,811 56
Cash	39,450 44
	$1,788,520 83

New York, Saturday, December 25, 1880.

Entered at the Post Office at New York, N. Y., as Second-Class Mail Matter.

ALTERATIONS and improvements being made in the tables, which are weekly features of the JOURNAL, necessitate the temporary withdrawal of part of them. In the Bond List alterations are desirable, owing to changes among the roads, consolidations, etc., since our tables were revised. The Share List is naturally corrected at this season of the year, and as this is the time when much of the necessary information comes to us from our correspondents and from the railroads, the table, if published now, could not be as symmetrical and complete as we would wish. On these accounts we withhold these two tables until they are perfected and made of greater value than ever before, to accomplish which no efforts will be spared. We have added several important features to the JOURNAL recently and it seems desirable now that some of our tables should appear semi-monthly, monthly and quarterly instead of weekly, thus giving us an opportunity to lay before our readers more information and a greater variety each week. We shall announce the tables as they are to appear from week to week. The table of contents always gives those in the current number, and in future by referring to the files of the JOURNAL any of its tables desired can readily be found, and they will contain as late information as though appearing in each number, as we do not intend to withhold any tables that are of weekly interest. While adding new features to the JOURNAL, our aim is to retain and improve the old ones.

WE publish this week notes of three recent decisions upon the subject of negligence by railway corporations. In one case the Supreme Court of Massachusetts decide that it is for the jury to decide whether a failure to maintain a flagman at a railroad crossing, in the absence of municipal requirements, is negligence or not. In a similar case the New York Court of Appeals decide, a bare majority of the Judges concurring, that the omission to ring a bell and keep a flagman at a street crossing if not contributing to injury from railroad train is not negligence. There can be no question but that the Massachusetts rule is the safer rule, and the one more in accord with recent decisions. Negligence is a question of fact and should be considered by the jury and not the court. We regard it a very dangerous doctrine for the New York Court of Appeals to say that as "it appeared that the plaintiff saw the engine" and that therefore "it was not negligence contributing to the accident to omit to ring it, as the plaintiff had all the notice that ringing would have given." Many persons who are run over by the cars see the engine before they are struck but it is for the jury and the jury alone to decide whether there is contributory negligence or not. We have not seen the full text of the decision referred to but we believe that it will provoke considerable discussion and that it will not meet the approval of the legal profession.

THE principal American railroad systems are in great favor at present among European capitalists, and the next few years are likely to make them still more so. There has probably never been a time when foreign investors have looked over to this side of the water with more confidence in our fields of investment than now. The willingness, and even eagerness, with which foreign capital seeks investment here results from the most substantial causes; the universal prosperity of our country and the demonstrated general good management of our important enterprises, as exhibited by the records of the year just closing. Meanwhile abroad there has been a general depression in business attended by the narrowing down of popular and reliable fields for the remunerative use of capital, and accompanying this has been a corresponding weakening of faith in the prospects of the near future for investments over there. An illustration of what may safely be considered the feeling in cautious English financial circles, concerning our railroad systems and their prospects is seen in the following from a leading editorial in *Herapath's Railway Journal*, London, Dec. 11th, one of the most substantial and conservative railroad and financial papers in England: "The prospects of the principal railroad systems of the United States appear to us to be very good. Never was the general condition of the United States so favorable as it is at present, and the great American railroads necessarily participate in the prevailing prosperity. Another abundant harvest has rejoiced the hearts of American farmers, and must give a great amount of employment to American lines, especially those centering at Chicago. Even the railroads of the Southern States appear to be looking up, and dividends are reappearing in quarters where they had almost come to be regarded as an exceptional complaint which occasionally broke out. In the older settled States, American railroad property has also steadily improved this year. We may see this in the case of the railroads of Massachusetts. Thus the Boston and Albany earned a dividend for its last financial year at the rate of 9¾ per cent per annum upon its share capital or stock. The Boston and Maine earned 10 per cent upon its capital stock; the Boston and Lowell, 6 per cent; the Boston and Providence, 9½ per cent; the Old Colony, 7 per cent; the Fitchburg, 8½ per cent; and the Boston, Revere Beach and Lynn, 8 per cent."

Southern Maryland Railroad.

The Southern Maryland Railroad Company has been organized with the following board of directors: J. H. Linville, Philadelphia, president; B. F. Folson, Philadelphia, treasurer; M. H. Hoffman, Philadelphia, secretary; W. P. Henzey, Thomas T. Butcher, George H. Fairman, D. B. McKibben and Joseph Trimble, of Philadelphia; W. H. Lafferty, Camden, N. J.; Charles E. Coates, Baltimore; Chief Engineer W. W. W. Wood, Washington, D. C., and John M. Broom, of St. Mary's, Md. Work, it is stated, will be resumed within sixty days, and the road completed from the Baltimore and Potomac railroad at Brandywine Station, Prince George's county, to Point Lookout in time to accommodate summer travel. Forty-five miles are already graded, leaving only thirteen miles to be built to give Baltimore and Washington access to Point Lookout and the traffic of those cities a winter harbor at St. Mary's. As the company intends to extend the road to a connection with the Baltimore and Ohio railroad and the Chesapeake and Ohio canal, an outlet will be afforded for the anthracite coal of Pennsylvania over the Northern Central railway and Baltimore and Potomac railroad and the canal. St. Mary's has been recommended by a board of naval officers as a desirable station for a naval coaling station. A branch line from two and a-half to three miles long is designed to be built from the crossing of Chancellor's run to Drum Point harbor, at the mouth of the Patuxent. The road, will, therefore, make three connections with the lower Potomac and Chesapeake Bay.

Railroads in Wisconsin.

The following information came from Wisconsin concerning the construction of railroads in that State during 1880: Chicago and Tomah Gap, completed from 3½ miles south of Woodman Cooley, 8 miles, narrow gauge; North Wisconsin, from a point six miles north of Granite Lake to Long Lake, 54 miles; Wisconsin Central, from Menasha Junction to Appleton, 2½ miles, and from Abbotsford to Chippewa Falls, 54 miles; Milwaukee, Lake Shore and Western, from 11.46 miles south of Hortonville to Oshkosh, 10.60

miles, from one mile north of Tegerton to Wausau, 34 miles, and from Eland Junction north to Aniwa, 11.10 miles; Chicago and Northwestern from Menominee River to Florence, 11 miles; Appleton Water Power extension, 3.63 miles; from Madison to Verona 9.45 miles, and from Janesville to Afton, 6.10 miles. Chicago, St. Paul, Minneapolis and Omaha, the Menominee spur, 3.02 miles, and the Eau Clare spur, 2.25 miles; Chicago, Milwaukee and St. Paul, from Janesville to Beloit, 13.84 miles, and from Brodhead to Albany, 7.15 miles; the Fond du Lac, Amboy and Peoria, narrow gauge, extended north one mile; Black River, from Merriam to Milesville, 13.61 miles, the rails on which road will be laid by Christmas. Total number of miles of standard gauge, 246.74; narrow gauge, 9 miles; total, 255.74 miles. This mileage for 1880 may be increased a little by further extension of the new line west of Verona, should the weather prove favorable. The Chicago, Milwaukee and St. Paul will have ten miles of track west of Monroe ready for the iron before January 1, and, should the weather be favorable, that may be ironed during the present year also, but it is not very probable that it will be until some time later. The Wisconsin Central is also contemplating extending its line south from Portage to Oake at an early date, but this has not as yet been fully resolved upon.

OUR BOSTON LETTER.

(From our regular correspondent.)

BOSTON, Dec. 21, 1880.

The rates between the banks at the clearing house is still seven per cent, but there is more money afloat and a generally easier feeling prevails. The banks, however, are asking 8 per cent on demand loans to outsiders but in many instances concessions are made on this rate.

Cincinnati, Sandusky and Cleveland has advanced from 17¼ to 19½ on the renewal of the negotiations for a lease to the Indiana, Bloomington and Western. We understand the proposition now under consideration is for an annual rental of $100,000 and fixed charges, which would be a little more than 2 per cent on the stock. Being a half stock, that is par being 50, it now sells for 39 per cent of par.

Chicago and West Michigan has advanced from 73 to 77¾. The road is earning about five per cent and will probably pay a 3 per cent dividend by next February. The past year has been the best year in the history of the road, and with a continued improvement in the lumber business the road will earn six per cent next year. The expenses are about 65 per cent of the gross earnings.

We understand President Forbes has within 20,000 proxies of enough to carry through the proposed increase of capital stock in the Chicago, Burlington and Quincy. It is estimated that the new stock will be in demand at 115.

Eastern has been very active after a long period of dullness, and has advanced from 33 to 38½ within a week, is now 37. Orders to buy several hundred shares came on the market simultaneously, and the market being bare of stock purchasers had to "climb" to get it.

Atchison declined yesterday on the newspaper statement of the intention of the Rock Island road to build down to Topeka. It recovers today to 143.

Summit Branch has been dull but strong. The reputed earnings for the month of November show net earnings of nearly one per cent on the stock, and the present earnings will justify a dividend during the fiscal year 1880.

Boston and Lowell has sold, as high as 120, but the last recorded sale is 113½.

Vermont and Canada declines from 20¼ to 8½, influenced no doubt by the recent decision of the Chancery Court of Vermont in the case of Langton et al., vs. the Vermont and Canada R. R. Co., that the "trust securities" are prior in right security to the rental claims of the Vermont and Canada.

Personal.

—Chief Engineer King, of the United States Navy, has written 620 page book on "The War-Ships and Navies of the World."

—Mr. A. B. Nichols resigned from the office of Government Railroad Engineer to take a position on the Pennsylvania Railroad.

—Mr. J. C. McMullen, General Manager of the Chicago and Alton Railroad, is in Florida, where he has gone to seek needed rest.

—Hon. S. S. Cox is dangerously ill with congestion of the lungs, at his residence, 13 East 12th Street, this city. He was attacked in Washington last week Wednesday and was removed to New York on the following day.

—Hon. Chauncey M. Depew, counsel of the New York Central and Hudson River Railroad, and Hon. Levi P. Morton are mentioned among the prominent candidates for the seat in the United States Senate soon to become vacant.

—Mr. Stephen D. Field is busily at work, in a building arranged for the purpose at Stockbridge, Mass., developing his electric motor and other of his ideas and plans connected with the use of electricity. He has recently taken out a patent on an improvement in underground telegraph lines.

—Among the prominent railroad men stopping in New York this week have been Mr. A. A. Talmage, General Superintendent of the Missouri Pacific, President Wadley of the Central Railroad of Georgia and Mr. John Newell, General Manager of the Lake Shore and Michigan Southern Railway.

—Gen. J. H. Wilson, Vice President of the New York and New England Railroad Company, has written a letter to the Springfield Republican demonstrating the comparatively small number of accidents on that road in the different States through which it passes, as compared with other New England railroads.

—By the recent burning of Mr. Jay Gould's conservatory, at Irvington on the Hudson, probably the finest private collection of rare foreign and domestic plants in this country was destroyed. Mr. Gould takes much interest and displays marked taste in making his home surroundings attractive and beautiful. In the much that is written of Mr. Gould the public is given but little opportunity to catch glimpses of his domestic life, which, to those at all familiar with it, is known to be the sphere in which he finds his greatest enjoyments. Notwithstanding what in most men would be the all absorbing nature of his gigantic and care encumbering financial enterprises, his family circle, his choice library, his household decorations and his garden are, after all, the attractions that draw from him the warmest devotion; and these household gods and the dispensing of liberal charities through his home and in other ways are sources of his highest pleasure.

Construction.

—It is proposed to extend the Hartford and Connecticut Valley Railroad from Hartford, Conn., to Springfield and Holyoke, Mass.

—A plan is on foot among prominent business men, of Augusta, Gardiner and other towns in Maine to construct a railroad in that State from Farmington to the Kennebec.

—The St. Louis and Indiana Railroad Company has been organized to construct a railroad from East St. Louis to Danville, in Vermilion County, Ill., at a point near the Indiana State line. Articles of incorporation for the new company were filed at Springfield, Ill., Dec. 16th.

—An extension of the Chesapeake and Ohio Railroad to run from Richmond, Va., east to Newport News will cross the Chickahominy River at Roxbury to Burnt Ordinary and thence through James City, Warwick and Elizabeth City counties. It will open a valuable lumber region.

—The bondholders of the Burlington and Southwestern Railroad in Missouri, after reorganizing the company under the name of the Chicago, Burlington and Kansas City Railway Company, it is said, intend to complete the present line from Laclede, Mo., to Kansas City with a branch from Unionville, Mo., to St. Joseph.

—Mr. Archibald McArthur, of Chicago, contractor, began work this week on the construction of the Central City, Deadwood and Eastern Railroad, Dakota. The road is to pass through Whitewood Canon and a tunnel of 1,500 feet under the mountain, to connect Deadwood, Central and Lead Cities. It is to be completed by next August.

—The Richmond and Allegheny Railroad Company, a new corporation of Northern and Western capitalists among the directors of which are Hon. Jas. G. Blaine of Maine, and Hon. Hugh McCulloch of Washington, are building a road of 230 miles up the old James River Canal, penetrating the coal and iron regions of the James River Valley. The company have 75 miles of the road completed and in full operation.

—Monroe County and the town of Aberdeen, Miss. have voted a subsidy for a new railroad to be built from Aberdeen, a terminus of a branch of the Mobile and Ohio, to Elyton, Ala., on the Alabama Great Southern Railroad, a distance of about 100 miles. The Aberdeen and Elyton Railroad Company are to erect repair shops in Aberdeen, build a bridge over the Tombigbee river and construct 15 miles of the road before the subsidy can be collected.

Wire Ropes for the Brooklyn Bridge.

Four large steel wire ropes were shipped on the 17th inst., from the works of John A. Roebling's Sons & Co., in Trenton, N. J., for use in the Brooklyn Bridge. Each rope is 1,550 feet in length, three inches in diameter, and their aggregate weight is 102,495 pounds. They are to be stretched in the form of parabolas under the floor of the bridge, to which they will be attached at proper intervals, from one tower to the other. Their use will be to strengthen the floor against the lateral pressure of strong winds or other disturbing influences.

Each rope is made in seven strands. The central strand has forty-nine No. 11 wires, and the six strands surrounding and enveloping this have nineteen wires each, of Nos. 4, 5 and 7 gauge,

making 168 wires in all. Every wire put into these and all other ropes used in the bridge is tested in strength, elasticity and tension. The strength must equal 160,000 lbs. per square inch cross-section. The stretch must be not less than 4 per cent, and the wire must be wound around at. iron rod three times its own diameter without showing flaw or fracture.

With regard to the superstructure, there is a prospect that sufficient material will be delivered so that the work of erecting that part of the floor which begins in the towers will be under way on or before the first week in January, 1881, or eleven years from the time the work of preparing the foundation for the Brooklyn tower was commenced. It will take about one year to suspend and finish the superstructure, provided the materials are promptly delivered by the different contractors.

Concord Railroad.

The receipts from operations of this road for the years ending March 31, 1879 and 1880, have been as follows:

	1879.	1880.
From passengers	$278,321 01	$299,447 91
" freight	424,954 63	541,244 80
" rents	3,862 73	3,791 99
" express	13,750 02	13,550 04
" mails	12,115 76	12,053 91
	$733,004 20	$870,088 65
Expenses, viz:		
Repairs of road	$93,178 84	$60,523 61
" structures	12,999 80	17,465 87
" locomotives	20,742 69	15,838 95
" cars, etc	22,263 88	32,469 77
Oil and waste	6,910 64	7,481 14
Fuel	89,513 62	99,139 90
Passenger expense	52,649 25	55,224 90
Freight expense	61,485 42	63,484 80
Damages	1,559 90	1,654 62
General running exp.	14,594 65	12,958 16
Insurance and taxes	8,237 77	6,116 14
New rails	21,619 84	83,428 54

	$414 157 11	$528,356 14
Leaving a balance of	$318,847 09	$346,732 51
From which has been paid—		
Taxes on capital stock	$35,939 62	
Manchester and Lawrence Railroad	67,581 49	
Rent of Concord & Portsmouth Railroad	25,000 99	
Rent of Suncook Valley Railroad	8,094 00	
Rent of Nashua, Acton and Boston Railroad	11,000 00	
Reserved and appropriated for new engine-house, coal and woodsheds, and yard improvements at Concord	15,000 00	
New passenger depot at Nashua	20,000 00	
New freight-cars	10,000 00	
Unsettled claims	3,000 00	
		195,615 11
Leaving a balance of		$151,117 40
From which has been paid two dividends of 5 per cent each		150,000 00
Balance carried to contingent fund		$1,117 40

The sum of $32,033 04, which appears in the above statement of expenditures, was paid on account, for land purchased for the use of the road, at Manchester, in the year 1875, for which the note of the corporation was given, reference to which purchase was made in the report for that year.

There has been paid for new iron and steel rails, purchased and charged to earnings during the year, the sum of $38,428 54, of which amount $40,000 was paid for new steel rails, now on hand at the mill, and to be delivered the coming season. This amount is not included in the statement of the account of stock on hand for repairs of the road.

The foregoing statement of the receipts and expenditures with the annexed trial balance of the Treasurer, will show the present financial condition of the corporation.

STOCK ACCOUNT.

The amount of fuel on hand for use of the road has been quite largely reduced from that at the close of previous years, for the reason that, on account of the great depreciation from decay, it was not deemed advisable to carry so large a stock of wood as has been the practice heretofore, and it was decided to use up a large proportion of the old wood on hand before making additional purchases, and hereafter to keep only a sufficient stock to meet the necessary requirements of the business from year to year. The reduction in the amount of material for road repairs was caused by the sale of old worn-out rails, which had been on hand for several years, and for welded rails, taken from the stock, and used for laying new and additional side-tracks. The amount received from the sale of old rails has been credited to the expense of road repairs.

MOTIVE POWER AND ROLLING STOCK.

One new locomotive, contracted for the previous year, has been delivered to the road and paid for, and one new locomotive built in the shop during the year, and is now in service. One locomotive has been thoroughly rebuilt, and all ordinary and necessary repairs to other locomotives have been made. The motive power of the road is now fully as efficient and in as good condition for service as at any time heretofore. Baker's patent car-warmers have been placed in six of the passenger-cars, at an expense of about three hundred and fifty dollars each. They have proved to be very satisfactory, and add greatly to the comfort of passengers during the cold weather. An additional number should be put in as the business may require. Eight passenger-cars and nine baggage-cars have been repainted throughout, nineteen passenger cars and twelve baggage-cars varnished, and other necessary repairs made to the passenger equipment. Thirty-three long platform-cars, four short platform-cars, and five box-cars have been rebuilt. Substantially new bodies for twenty-four platform-cars have been made, and nearly one hundred other long platform-cars have been newly planked, and other needful repairs made during the year. The rolling stock, generally, is in good condition for service, but an additional number of freight-cars is needed, and should be provided as soon as convenient.

ROADBED AND TRACK.

The roadbed, track and superstructure generally has been kept in good repair. Nearly $6,000 were were expended during the past summer for labor in ballasting the track of the Concord and Portsmouth road with gravel, and it is desirable that this work should be continued and completed as soon as it can conveniently be done. 605 tons of new steel rails, and 857 tons of new iron rails have been purchased and placed in the track, and 456 tons of welded rails have been relaid during the year. 67,917 new sleepers have been placed in the track, and 6,929 feet of new and additional side track laid. The overhead bridge below Robinson's Ferry has been rebuilt, new corrugated iron roofs put on the bridges at Hooksett Falls and necessary repairs made to other bridges upon the road. Additional land has been purchased for enlarging and improving the train-yard and terminal facilities at Concord, and a contract made for the necessary filling and grading of the same, the work upon which is now nearly completed.

DEPOTS AND OTHER BUILDINGS.

The depots and other buildings owned by the corporation have generally been kept well repaired, and are now in good condition. Improvements, for the convenience of the patrons of the road, have been built at Concord depot, and the ticket office at that station has been enlarged; new platforms have been built, and the necessary repairs made at various other stations upon the road. Extensive changes are now being made in the depot building at Greenland, which will, when completed, add much to the comfort of the public who patronize the road at that station. Plans have been adopted, and contracts made for the construction of the long contemplated new passenger depot at Nashua, and the work has already been commenced upon the same, the whole to be completed during the present season. Contracts have also been made for completing the new engine house at Concord, and for constructing new and more extensive coal and wood sheds, and improved conveniences for sawing wood at the station, work upon which improvements is now in progress.

The total tonnage of the road for the year has been 899,662, equal to 29,006,834 tons transported one mile. Total number of passengers carried, 527,003; total carried one mile, 11,081,309. Number of miles run by trains, 661,078. Value of materials on hand at the close of the year, $119,776 77, against $166,060 28 at the close of the previous year—a decrease of $58,716 49.

BALANCE SHEET March 31, 1880.

Construction	$1,500,000 00
Rindge's Wharf	51,507 72
Manchester and North Weare Railroad	11,584 19

President.—J. THOMAS VOSE, Boston, Mass.

Directors.—J. Thomas Vose, Boston, Mass.; Frederick Smyth, Samuel N. Bell, Manchester, N. H.; Benjamin A. Kimball, Josiah Minot, Concord, N. H.; Dexter Richards, Newport, N. H.

Treasurer.—NATHAN PARKER.

Superintendent.—H. E. CHAMBERLIN.

At a meeting of the directors of the Niagara Falls International Bridge and the Niagara Falls Suspension Bridge Companies at Albion, N. Y., on the 16th inst., the report of Engineer Buck, who had charge of the substitution of steel for wood in the bridge, was accepted and adopted. The work has been carried on without stopping a train.

Among the resolutions introduced in the House of Representatives at Washington on the 20th inst, under the call of the States was one by Mr. Gillette, of Iowa, calling on the Secretary of War for an estimate as to the cost of a steel railroad from New York city to Council Bluffs.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An *asterick* (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "¶."

Change in the Mode of Railroad Time Reckoning.

A change in the system of giving time on our railroads could be readily improved upon, and it is a wonder that some of our enterprising railroad managers do not take hold of the subject. In the time cards all the roads carry an encumbrance that positively confuses the uninitiated. Not one man in fifty can take an ordinary time card and in the multiplicity of A. M.'s and P. M.'s, dittoing as they do from both the top and bottom of the card, and figure out the time from New York to St. Louis or Chicago without becoming confused and uncertain, and from New York to San Francisco it becomes a positive impossibility with many more. There is no more reason why there should be two 12 o'clocks in one day than there is why there should be two twelve miles posts in a twenty-four mile railroad. Practically the day commences at midnight, consists of twenty-four hours, and ends the next night at midnight. By acknowledging that fact and dividing the day into hours and minutes, numbered consecutively up to twenty-four hours, the record time would be greatly simplified. Thus, instead of saying 12:15 A. M., we would give the time as fifteen minutes, writing 15, showing that it was the fifteenth minute of the day. Instead of saying 12:30, A. M., 30, or in the same manner for any number of minutes up to 1 o'clock, which hour would be written 1.00 instead of 1:00 A. M. The same rule would be followed up, omitting the A. M. and P. M. up to 12:59. What we call 1 o'clock P. M., under the new system, we would call thirteen o'clock, or thirteenth hour; 1:30 P. M. would be 13:30, 18 o'clock P. M., 14:00, and so on up to twenty-four. It might be a little odd at first, but people would soon become accustomed to it. Clock and watch-dial plates could be furnished with an inner circles upon which the additional figures could be given, instead of the a. m. and p. m. nuisance. In foreign countries a change is made out of the old grooves. In France the change is not so marked as in Germany. In the latter country the railroads display the figures for the arrival and departure of trains with a white or black back ground—the white for day and the dark for night, which is very simple and appears to answer all purposes.—Pittsburg Chronicle.

Railroad Law.

NEGLIGENCE—FAILURE TO MAINTAIN FLAGMAN OR GATE AT RAILROAD CROSSING, IN ABSENCE OF MUNICIPAL REQUIREMENTS, MAY BE.

In an action for injuries received by plaintiff's who were travelling in the highway at a crossing of defendant's railroad, by reason of defendant's negligence, it was claimed that defendant was negligent in not having a gate or a flagman at the railroad crossing. It appeared that no proper authority had ever required the establishment of a flagman or gate at this crossing. The court below ruled that it was competent for the jury, under the declaration, to consider whether the defendant had used such reasonable care, in addition to the ringing of the bell or the blowing of the whistle required by the statutes, as the safety of travellers demanded at this particular crossing. Held, that the ruling was correct, as recognized by numerous decisions. These cases all rest on the common-law rule that when there are different public easements to be enjoyed by two parties, at the same time and at the same place, each must use his privilege with due care not to injure the other. The rule applies to grade crossings, because the traveller and the railroad each has common rights in the highway at those points. The fact that the Legislature has seen fit for the additional safety of travellers imperatively to require the corporation to use certain warnings at such crossings, does not relieve it from the duty of doing whatever else may be reasonably necessary. Bradley vs. Boston and Maine R. Co., 2 Cush. 539; Linfield vs. Old Colony R. Co., 10 id. 562; Norton vs. Eastern R Co., 113 Mass. 366; Favor vs. Boston and Lowell R. Co., 114 id. 351. Even though the proper authorities had never required the maintenance of a gate or flagman at the crossing in question, the defendant was still under the rule which requires the exercise of reasonable care on its part; and the jury could not be limited in their inquiries by the fact that a gate or a flagman has never been ordered, however proper it might be for them to take that fact into consideration. Eator vs. Fitchburg Railroad Co. Opinion by Colt, J.

CARRIER OF PASSENGERS—INJURY TO PASSENGER ON STREET RAILROAD—CONTRIBUTORY NEGLIGENCE—SITTING ON FRONT PLATFORM.

Plaintiff's intestate, a passenger on defendant's street railroad car, when the car was approaching a draw-bridge sat down on the front platform. He was told by the driver of the car that he had better not sit in that place, as it was against the rules of the defendant and unsafe, to which he made a reply not understood by the driver. He continued to occupy his position while the car was detained at the bridge some fifteen minutes by an open draw; and remained there until he fell from the car after it had passed the bridge, receiving the injuries whereof he died. There were notices posted upon the car forbidding passengers to be upon the platforms and that the defendant would not be responsible for the safety of passengers while there. In an action for such injuries, held, that the defendant was not liable. It was for the plaintiff to prove that the intestate was free from negligence contributing to the injury which he received. Plaintiff could recover if the case presented failed to disclose the exercise on his part of ordinary care, as judged of in the light of common knowledge and experience. The rule is to be applied which requires the exercise of such care as men of common prudence usually exercise in positions of like exposure and danger. The question is in most cases a question to be submitted to the jury, but when the circumstances are not complicated, and the undisputed evidence discloses conduct which would be condemned as careless by men of common prudence, it is the duty of the judge to instruct the jury to find a verdict for the defendant. Garrett vs. Manchester and Lawrence R. Co., 16 Gray, 501; Gahagan vs. Boston & Lowell R. Co., 1 Allen, 187; Todd vs. Old Colony R. Co., 7 id. 207. The evidence in this case wholly failed to show that intestate was in the exercise of due care. He was a passenger occupying an exposed and unusual place in a constrained and awkward position, against the rules of the road and the warning of the driver. The case differs from Meesel vs. Lynn and Boston R. Co., 8 Allen, 234. A street railway corporation has a right to make all reasonable regulations for the safety of passengers. A rule prohibiting passengers from riding on the front platform is a reasonable regulation; and one who knowingly violates it, without some reasonable excuse or necessity, cannot be said to be free from negligence, if the act contributes to his injury. There could be no doubt that the negligence of intestate contributed to the injury which he suffered. Wills vs. Lynn and Boston Railroad Co. Opinion by Colt, J.

NEGLIGENCE—OMISSION TO RING BELL AND KEEP FLAGMAN AT STREET CROSSING IF NOT CONTRIBUTING FROM INJURY FROM RAILROAD TRAIN NOT NEGLIGENCE.

In an action against a railroad company for injury to plaintiff, a boy ten years old, caused by being run over early in the evening by defendant's engine at a street crossing, it was claimed that no bell was rung when the engine approached the crossing. It appeared, however, that plaintiff saw the engine, which was backing, approaching and tried to run across in front of it, but his foot caught between a rail and the planking and he fell down and was run over. Held, that as the object of ringing a bell upon an engine is to warn people of its approach, it was not negligence contributing to the accident to omit to ring it, as plaintiff had all the notice that ringing would have given. A flagman was usually kept at this crossing, but he was absent on this occasion. It was not the duty of defendant to keep a flagman at that crossing and plaintiff did not know that one had been usually kept. Held, that there was no negligence on the part of the defendant in this particular. McGrath vs. New York Central, etc., R. C., 59 N. Y. 468; S. C., 68

Id. 522. The regular fireman was not on the engine at the time, and there was no light on the rear of the engine and it was dark. Held, as it appeared that plaintiff plainly saw the engine approaching, there was no negligence. Judgment reversed and new trial granted. Pakalinskey vs. New York Central and Hudson River Railroad Co., appellant. Opinion by Earl J. Folger, C. J., and Rapallo and Miller, J.J., concurred; Andrews, Danforth, and Finch, J.J., dissented.

[Decided Nov. 9, 1880.]

Organization.

—Articles of association of the Portage and Baraboo Railroad Company were filed with the Secretary of State of Wisconsin on the 15th inst. The capital stock is $250,000, and the incorporators are among the solid men of Portage and Baraboo.

—The Texas, Santa Fe and Northern Railroad Company recently chartered under the laws of New Mexico with a capital of $12,000,000 elected the following officers Dec. 21: Mr. Charles J. Lowry, of New York, President; Mr. Bernard Seligman, Vice-President; Mr. Charles H. Gildersleeve, Secretary, and Mr. Lehman Speigelbergh, Treasurer.

—The incorporators of the Long Island Electric Light Company, capital $300,000, are Messrs. A. Ames, V. K. Spear, J. J. Anderson, J. H. Flegg, C. F. MacKenzie, J. F. Williams, B. I. Butler, C. C. Wyman, and W. H. M. Sistare. Mr. Ames and others have also filed articles of incorporation for the Manhattan Electric Light Co., capital $600,000.

—Articles of consolidation were filed with the Secretary of State of Kansas on the 16th inst. by the officers of the Kansas City, Lawrence and Southern Railroad, the Southern Kansas and Western Railroad, and the Sumner County Railroad. The name of the new company is the Kansas City, Lawrence and Southwestern.

Broadway Underground Road.

The General Term of the Supreme Court has denied the application made by Mr. George Ticknor Curtis, a few weeks ago, on behalf of the Broadway Underground Railroad Company, for the appointment of Commissioners under the statute. The Court says:

"The petition states that an application has been made for the consent of the owners of one-half in value of the property bounded on Broadway along the line of the proposed tunnel and railroad, and that for the reason set forth in the affidavit of Walter J. Morris thereto annexed, such consent has not been given. The affidavit of Mr. Morris fails to show that any personal application has been made to such owners and that any actual refusal has been given. The affiant simply states that he has endeavored to obtain the consent of one-half in value of the property owners and has not obtained such consent, and that he believes such consent cannot be obtained, because the property owners prefer that the railroad should be built under the guarantees that would be afforded by the proceedings under the statutes for the appointment of Commissioners. This we cannot accept as a compliance with the requirements of the statute. It must be shown affirmatively by a statement of the facts what application, to which consent has been refused, has been made, and to whom, and that persons to whom the application was made are in fact owners of at least one-half of the property bounded on the proposed railroad, so that the Court can judge, and not the affiant, whether there has been such an application and such a refusal as the statute requires. The very general statements of the petition and affidavit do not confer jurisdiction upon the Court to appoint the Commissioners. The motion therefore must be denied, but without prejudice to further proceedings after the requirements of the statute shall have been complied with."

Manufacturing.

—The Harrisburg Car Manufacturing Company are turning out 50 cars per week.

—The only cement mills on the Pacific coast are at Benicia, Salano Co., Cal.; they make about 140 barrels of cement a day.

—Messrs. Richle Bros., Philadelphia, are busy on orders for the scales and testing machines of which they are the sole manufacturers. They have recently placed improved machinery in their works which greatly facilitates the prompt filling of orders.

—The Indianapolis R. R. Link & Pin Co., Indianapolis, and Messrs. Westlake & Co., Warren, O., manufacturers of merchant bar and band iron, have consolidated; the former company moving its machinery to Warren, where the combined enterprises will work together.

—The report of the Superintendent of the Cincinnati Chamber of Commerce says that the total production of pig-iron in nine States tributary to that city during the past year was 876,000 tons, showing an increase of 150,000 tons over the preceding year. Of this increase Missouri made 37,000 tons; Michigan, 31,000; Ohio, 27,000; West Virginia, 20,000; Tennessee, 13,000; Indiana, 11,000; Alabama, 8,000; Georgia, 4,000. Kentucky showed a decrease of 1,400 tons. The aggregate sales here of pig-iron from first hands, to go actually into consumption, amounted to 150,000 tons an increase of 46,000 tons over the preceding year. The value of the business, at an average price would be $8,750,000.

Buffalo, Pittsburg and Western Railroad.

Representatives of the Pittsburg, Titusville and Buffalo Railway, the Buffalo, Pittsburg and Western Railroad, the Salamanca, Bradford and Allegheny River Railroad of Pennsylvania, the Salamanca, Bradford and Allegheny River Railroad of New York (aggregating 120 miles) and the Titusville and Oil City Railway, (which during the past Summer, built its road from Titusville to Petroleum Center, a distance of 9 miles), met in Philadelphia on the 20th inst., and unanimously agreed to consolidate their interests. A meeting of the stockholders of the Pittsburgh, Titusville and Buffalo Railway Co. will be held on the 20th of January to ratify the agreement. The new organization, which is to be known as the Buffalo, Pittsburgh and Western Railroad Company, will own 294 miles of road. It will connect the Pittsburgh, Titusville and Buffalo Railway with the system of railroads centering in Buffalo, give an increased mileage on coal and other products, give the company 64 miles instead of 14, on the passenger business between Buffalo and Chautauqua Lake, extend the market for coal from the Allegheny Valley, and finally to make the road part of a trunk line to the West, giving, by means of the New York, Pennsylvania and Ohio Railroad from Corry, an outlet to Columbus, Indianapolis, and other cities.

Articles of association have been filed in Springfield, Ill., by the St. Louis and Indiana Railroad Company, organized to build a railroad from East St. Louis to Danville, near the Indiana line.

During the past year 400 miles of railroad have been constructed in Ohio.

—Mr. John G. Whittier's seventy-third birthday was celebrated at Danvers, Mass., last week, Friday.

American Railroad Journal.

Financial and Commercial Review.

THURSDAY EVENING, December 23, 1880.

The quotation for call loans at the Stock Exchange this afternoon has been 6 per cent; in the last hour it was 5 and 6 per cent.

The posted rates of the leading drawers of sterling were this morning advanced half a cent to 4.80½@4.83½. The actual rates are 4.79½@¾ and 4.82½@¾. Cable transfers are 4.83@¼. Prime commercial bills are 4.77¾@4.78¼.

The United States Assistant Treasurer here has received instructions from Washington to begin next Tuesday, the 28th, the payment, without rebate, of the January interest—which amounts to about $15,700,000. The remaining 6s of 1880, between $9,000,000 and $10,000,000 will not be paid until maturity.

The Governing Committee of the Stock Exchange have admitted to the regular list $20,184,000 consolidated first mortgage bonds of the Missouri Pacific Railway Company. These are intended to retire the outstanding bonds of the consolidated company. The total issue is $30,000,000. The remaining $9,816,000 is to be issued for extensions and improvements.

The Governors of the Stock Exchange have also admitted to dealings at the Board $4,500,000 Chicago Division mortgage 5 per cent bonds of the Wabash, St. Louis and Pacific Railroad Company. Secured by First Mortgage on the Chicago Division, from Effingham and Altamont, Ill., to Chicago, Ill., 259 miles, road completed. Dated

July 1, 1880; principal due July 19, 1910. No 1 to 4,500, each, $1,000.

The closing quotations on Thursday were: Adams Express, 119@120; American Express, 63@63½; American District Telegraph, 60½@62; American Union Telegraph, 70½@71⅛; Canada Southern, 76½@76⅝; Central of New Jersey 81½@81⅝; Central Pacific, 87⅜@87⅝; Chicago and Northwestern, 125⅞@126; do. pref., 140@140¾; Chicago, Burlington and Quincy, 176½@177; Chicago, Milwaukee and St. Paul, 112¼@112½; do. pref., 122⅞@123¼; Chicago, Rock Island and Pacific, 135½@137; Columbus, Chicago and Indiana Central, 20⅝@21; Cleveland, Columbus, Cincinnati and Indianapolis, 89@89¼; Hannibal and St. Joseph 49¾@59; do. pref., 103½@103¾; Illinois Central, 125¼@125½; Lake Erie and Western, 37¾@38; Lake Shore and Michigan Southern, 132@132½; Michigan Central, 122@122¼; Metropolitan Elevated, 114@114¾; New York Elevated, 123@124; New York, Lake Erie and Western, 48⅛@48⅜; do. pref., 82½@82¾; New York, Ontario and Western, 31½@31⅝; Ohio and Miss., 37¾@37⅞; do. pref., 91@92; Pacific Mail, 52@52¼; St. Louis, Iron Mountain and Southern, 54¼@54⅛; Union Pacific, 108⅛@108¼; United States Express, 52@52½; Wells Fargo Express, 114½@115; Western Union Telegraph, 81@81½.

Port Huron and Northwestern Railroad.

A letter from A. L. Reed, Chief Engineer of the Port Huron and Northwestern Railroad, says:

Our company has completed the earthwork upon the Marlette branch to Marlette, Mich., 33 miles from the main line, and is laying iron at the rate of three-quarters to one mile per day. With reasonably favorable weather the iron will be all down by January 1, which will make 66 miles of new lines built by the company since March 10, 1880. Business on the main line opens much better than was anticipated, and on the branch business is only waiting for the rails to be put down. When we reach Marlette the company will have 100 miles in operation, which is doing well for an entirely local enterprise, commencing October 22, 1878, and paying all bills promptly every thirty days.

Amberg's Cabinet Letter File.

In the offices of railroad companies, and in fact of all business houses, anything which assists in systematizing the routine work or adding to the convenience and expedition of preserving accumulating papers, letters, valuable vouchers, etc., is appreciated and considered worthy of careful examination. One of the most important and valuable devices for preserving papers for ready references is that included in Amberg's systems of letter-filing. The Amberg cabinet letter file has been in use for several years in many prominent business houses and has come to be considered among them not only as a convenience but almost a necessity. The cabinet is a handsome article of furniture and is made in a great variety of designs and sizes. It contains a series of drawers with a most ingenious system of lettering, each drawer being a complete file of itself. Mr. J. T. Granger, of the Union Pacific R. R. office, in writing of it says: "It gives perfect satisfaction and I could not conduct the business of this office without it." Messrs. Fairbanks & Co., says: "We consider it the best system of letter-filing we have seen." The secretary of the Eames Vacuum Brake Co., speaks of it as a first class investment for any business man. Messrs. Cameron, Amberg & Co., manufacturers, 69 Duane st., New York, have issued a handsome catalogue containing descriptions of the cabinet and numerous references as to its merits.

Three stationary steam engines have been constructed at Paterson, N. J., of 150 horse-power each. No piece in either weighs more than half a ton, and they have a link motion, like a locomotive. They are designed for a rolling-mill at Bogota, United States of Colombia, South America, and are constructed in convenient sections, because in the last stages of the journey to their destination they will have to be carried on the backs of mules over the Andes for several hundred miles. On arriving at Bogota the different parts will be set together with screw bolts. Even the driving shaft is in several pieces.

The Virginia Midland Railroad was sold at public auction in Alexandria, Va., on the 20th inst., by Hon. J. S. Barbour, commissioner, to Messrs. R. T. Baldwin, J. Wilcox Brown and Robert Garrett for $5,600,000. The purchasers represent the syndicate of creditors under the scheme of reorganization adopted some time since. The holders of the obligations of the old company are required to deposit their evidences of indebtedness with the Safe Deposit Company of Baltimore before the 1st January next, or they may be deprived of the benefits of the scheme of reorganization.

The Oil City and Ridgeway Railroad has been purchased by Mr. T. H. Wilson, the Superintendent of the Pittsburgh, Titusville and Buffalo Railroad. It runs for eleven miles in a southerly direction from South Oil City through rich, unworked coal lands.

Pennsylvania Railroad.

The statement of the business of all the lines of the Pennsylvania Railroad Company east of Pittsburg and Erie, for November, 1880, as compared with the same month in 1879, shows:

An increase in gross earnings of	$442,916
An increase in expenses of	395,389
An increase in net earnings of	$47,627

The eleven months of 1880, as compared with the same period in 1879, show

An increase in gross earnings of	$6 545,891
An increase in expenses of	3,762,608
An increase in net earnings of	$2,783 288

All lines west of Pittsburg and Erie for the eleven months of 1880 show a surplus over liabilities of $2,883,471, being a gain over the same period in 1879 of $1,801,193.

Chesapeake and Ohio Railway.

At the annual meeting of the stockholders of the Chesapeake and Ohio Railway Company, held in Richmond, Va., on the 16th inst., the following directors were elected for the ensuing year: C. P. Huntington, A. A. Low, A. S. Hatch, Elias Higgins, John Castree, Jesse Hoyt, A. E. Orr, Ezra Wheeler and E. D. Tournier, of New York, and W. C. Wickham and John Echols, of Virginia. The earnings of the road for the past fiscal year, as shown by the report of Vice President Williams C. Wickham, were $2,514,245. The operating expenses were $1,945,018. Earnings over operating expenses, $569,227, being an increase of $185,018 over the net earnings of 1879. General Wickham refers to the steady improvement in the business of the road, and feels justified in looking forward to a larger increase of business during the next season than ever had before.

The Texas, Santa Fe and Northern Railroad Co., recently chartered under the laws of New Mexico with a capital of $12,000,000, have decided to contract at once the San Juan division so as to have an immediate connection with the Denver and Rio Grande Railroad for the transfer of freight and passengers. The new road proceeds from Santa Fe northward to Salt Lake City by the valleys of the Chama and San Juan, and southward through Bonanza City, the coal fields of the Pecos Valley, and Texas, to the Gulf at Corpus Christi, with a branch to Colorado east of the Raton Pass and one to Albuquerque. The road will be narrow gauge, and will connect with the Texas narrow gauge now building toward Presidio del Norte.

A deed of trust was placed on the registry of the District of Columbia on the 20th inst. from the Washington City and Point Lookout Railroad Company to the Farmers' Loan and Trust Company of New York. The deed is made to secure the payment of one thousand first mortgage bonds, amounting to $1,000,000, payable in gold on the 1st of November, 1900, with six per cent interest, payable semi-yearly. The deed conveys all the lands, property, estate, railway ties, rails, depots, bridges, wharves, etc., now owned by the Company.

A. G. DAY,

MANUFACTURER OF

Kerite Insulated Telegraph Wire and Cables

Of all kinds made to order, for Ocean, River, Aerial and Subterranean Lines.

The Kerite covering of these Conductors unlike any other, resists effectually the destructive action of Heat and Moisture, and the corrosive agents either in Earth, Air or Water.

☞ Special orders should state whether the Cable is to be exposed to Earth, Air or Water.

FACTORY—SEYMOUR, CONN. **Office, 120 Broadway, New York.**

C. B. HOTCHKISS, General Agent.

NEW YORK, LAKE ERIE & WESTERN RAILWAY.

TO THE TRAVELING PUBLIC.

During the Centennial Season—six months, closing November 10, 1876—the Erie Railway carried almost 3,000,000 passengers, without a single accident to life or limb, or the loss of a piece of baggage.

And for a whole year, the official records of the United States Post-Office Department show the arrivals of Erie Railway trains in New York, on time, to be from 15 to 27 per cent. ahead of competing lines.

Facts well worthy the consideration of travelers.

E. S. BOWEN, General Superintendent.

JNO. N. ABBOTT, General Passenger Agent.

GET THE BEST.

THE PERFECTED STYLOGRAFIC PEN.

A. T. CROSS, PATENTS.

Is the best Fountain Pen ever made. Carries its own ink. Never wears out, never blots, never leaks. Writes well on smooth or rough surfaces.

Total exports....	$336,553,242	$388,510,848
Do. exclusive of specie	322,369,002	380,808,538

According to the recent report of the Railroad Commissioners of South Carolina there are seventeen railroads in operation in the State, with a total length, exclusive of sidings, of 1,407½ miles. The total expense of running these roads for 1880 was $3,585,766; the total income was $4,943,074; net earnings, $1,357,307. Last year the total expense was $3,098,346; gross income, $4,008,802; net earnings, $910,456. Thus showing not only an increase of business amounting to nearly 25 per cent, but an increase of profit of nearly 50 per cent.

The long-contested suit of Westinghouse against Eames, for alleged infringements of air brake patents, involving the Eames Vacuum Brake Company, of Watertown, N. Y., has been abandoned, Westinghouse withdrawing the action and paying the costs. This suit has been one in which the railway companies were greatly interested, and it means an end of a great air brake monopoly.

SWIFT'S IRON AND STEEL WORKS,
26 West Third St., CINCINNATI, O.,
Manufacturers of all Weights of Standard and Narrow-Gauge Rails by most Approved Process. Also Rail Fastenings, Steel and Bloom Boiler Plate, Tank, Sheet and Bar Iron.

TO ALL RAILROAD AND OTHER CORPORATION LAWYERS.
THE LAW
OF
CARRIERS OF PASSENGERS,
ILLUSTRATED BY
LEADING CASES AND NOTES.
BY
SEYMOUR D. THOMPSON,
Author of works on "Negligence," "Homesteads and Exemptions," "Liability of Stockholders" etc., etc.
The above work is arranged as a companion, or rather as a supplement, to Mr. THOMPSON'S work on **Negligence, and is constructed on the same plan.** The author has attempted to collect and examine all cases on the **Duties and Liabilities of Carriers of Passengers.** The best of these cases, which present the leading doctrines pertaining to the different branches of the subject, are printed in full, and the rest of them are presented in carefully written and explanative notes. The notes are designed to form a **Complete Treatise** on the subject of **Carriers of Passengers,** in addition to the cases published in full.
Price, $5 50 net. Sent by mail, prepaid, on receipt of $5 80.

The Coal Trade.

The leading coal carrying companies make the following reports of their tonnage for the week ending December 11, and for the year to the same date, compared with their respective amounts carried to the same time last year :

	Week.	1880.	1879.
Reading Railroad ...	135,074	220,243	366,542
Schuylkill Canal	.....	.....	85,346
Lehigh Valley	104,303	172 995	207,129
Del., Lack. & Western.	83,537	3,367,681	3,664,939
Shamokin Valley	16,891	877,369	868,649
Central New Jersey..	69,756	3,604,851	3,904,459
United New R. R. of Jersey	34,720	1,111,031	917,698
Pennsylvania Coal ..	21,942	1,076,235	1 342,816
Delaware and Hudson	71,054	2,999,325	3,253,502
Huntingdon & Broad Top Mt.....	3,755	397,980	295,422
Penn. and New York.	21,883	40,341	37,323
Clearfield, Pa.....	39,377	1,637,872	1,535,772

The Schuylkill Canal is closed for the season The total tonnage of anthracite coal from all the regions for the week ending December 11, as reported by the several carrying companies, amounted to 555,595 tons, against 633,224 tons in the corresponding week last year, a decrease of 77,629 tons. The total amount of anthracite mined for the year is 22,584,933 tons, against 25,300,229 tons for the same period last year, a decrease of 2,715,296 tons. The quantity of bituminous coal sent to market for the week amounted to 73,120 tons against 112,008 tons in corresponding week last year, a decrease of 38,888 tons. The total amount of bituminous mined for the year is 4 170,188 tons against 3,505,880 tons for the corresponding period last year, an increase of 664,308 tons. The total tonnage all kinds of coal for the week is 628,715 tons, against 745,232 tons in corresponding week last year, a decrease of 116,517 tons, and the total tonnage for the coal year is 26,755,121 tons against 28,806,109 tons to same date last year, a decrease of 2,050,988 tons. The quantity of coal and coke carried over the Pennsylvania Railroad for the fourth week of November was 144,482 tons, of which 111,751 tons were coal and 32,731 tons coke. The total tonnage for the year thus far has been 6,562,939 tons of which 4,945,863 tons were coal and 1,617,076 tons coke. These figures embrace all the coal and coke carried over the road east and west. The shipments of bituminous coal from the mines of the Cumberland coal region during the week ended Dec. 11 were 25,932 tons, and for the year 1,991,019 tons—an increase of 397,004 tons as compared with the corresponding period of last year. The coal was carried as follows: Baltimore and Ohio Railroad—week 24,081 tons, year, 1,185,487 tons; increase over 1879, 232,034 tons. Chesapeake and Ohio Canal—week, 1,599 tons; year 601,416 tons; increase over 1879, 107,262 tons. Pennsylvania Railroad—week 251 tons; year, 204,116 tons; increase over 1879, 57,708 tons. The Chesapeake and Ohio canal has been closed for the season. The Reading Railroad for the week ending December 18, carried 101,000 tons of coal, of which 10,200 tons were sent to Elizabethport and 16,000 tons shipped from there, and 9,500 tons sent to Port Richmond and 14,500 tons shipped from there.—Phil. Ledger, Dec. 20.

The Salamanca, Bradford and Allegheny River Railroad Company, was incorporated on the 11th inst. The length of the road will be twenty-five miles; capital, $850,000. The line will connect Salamanca, Cattaraugus County, N. Y., with a point on the New York and Pennsylvania State Line.

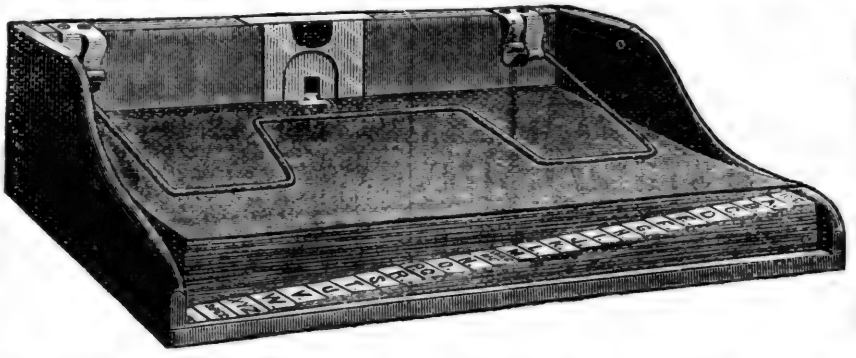
The Sanilac (Mich.) Reporter says that iron laying on the Marlette branch of the Port Huron and Northwestern Railway is being vigorously prosecuted, and should the weather be favorable, trains will run into Marlette before the New Year.

AMBERG'S PATENT

"PEERLESS" CABINET LETTER FILE.

(27-FILE CABINET WITH DOORS.)

675 Indexed Divisions, will hold 17,000 Letters.



These CABINET LETTER FILES are made in many sizes containing as few as 6, and as high as 100 or more files each, at prices ranging from $19 50 to $500 00. They are elegantly and substantially made, the wood-work being of the best seasoned Black Walnut, and the other parts of Brass and Steel, nickel-plated. They can be arranged for any class of correspondence and can be adapted to any requirement. **OVER 2,000 SOLD IN LAST THREE YEARS.**

—o—

AMBERG'S PATENT

"PEERLESS" LETTER FILE.

THE BEST IN THE WORLD.

THE BEST IN THE WORLD.

This cut shows a Single "Peerless File" which is complete in itself. This File forms the drawer part of Cabinet shown in above cut. The lettering of the index leaves of the Files in Cabinets is, however, very different, as each drawer or file has an index to correspond with the lettering shown on its front.

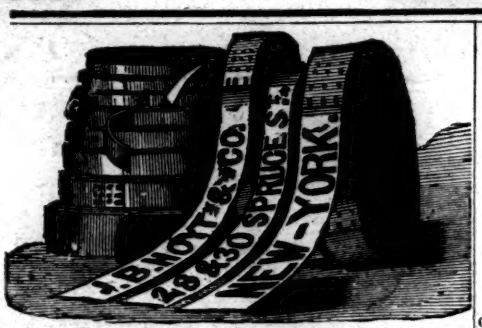
Its location, in the PORT of NEW YORK, is most favorable for shipments, and its CARS, CONSTRUCTED in SECTIONS, may be ENTIRELY COMPLETED before being packed for transportation.

VALENTINES VARNISHES

OUR CLAIMS.

We claim that our Finishing Varnishes are unsurpassed in the following qualities:

1. Uniformity. 3. Fluency. 5. Drying. 7. Fulness. 9. Durability.
2. Paleness. 4. Reliability. 6. Hardening. 8. Brilliancy. 10. Economy.



All know it is easy to make a Varnish that has the single quality of DURABILITY, but Varnishes which wear well are generally inferior in color and working quality, uncertain in laying, too slow in drying, or lacking in body or lustre, and frequently they possess ALL these defects.

In our "RAILWAY-COACH FINISHING" the ten qualities will be found combined, and our other Varnishes are as elastic and durable as is practicable for the work on which they are employed.

Those of our Varnishes which have the greatest durability require time for hardening. They have superior elasticity, and ARE DISTINGUISHED FOR THE EXTENT OF SURFACE THEY WILL COVER, WHICH RENDERS THEM ECONOMICAL.

VALENTINE & COMPANY,

Chicago, NEW YORK, Paris

Patent Stretched and Patent Riveted Short Lap

BELTING.

Our Belts are made from pure Oak Tanned Butts, and of the heart or solid part only. No part of the shoulder being used. Any one not familiar with Belt making can readily detect this by the shortness of the lengths and laps. Long laps are made including the shoulder or thinner and softer part of the Leather, causing the Belt to be, in its enduring qualities, no better than its poorest or thinner parts.

Our Belting is warranted to run straight and maintain an even bearing on the pulleys, and sold under the fullest Guarantee.

J. B. HOYT,
D. B. FAYERWEATHER,
HARVEY S. LADEW.

LEATHER BELTING.

Made exclusive[ly] from Messrs. J. B. Hoyt & Co.'s Best Oak Butt[s] shoulders all cut off, only solid leather used—sh[ort] lengths and short laps—fully warranted.

Rubber Beltin[g] and Hose and Packing at lowest prices.

AMERICAN RAILROAD JOURNAL,

PUBLISHED WEEKLY BY THE

AMERICAN RAILROAD JOURNAL COMPANY,

JOHN H. SCHULTZ - - - - - President.

The AMERICAN RAILROAD JOURNAL, the oldest railroad paper in the world, was established during the construction of the first 100 miles of railroad in this country. Its files of the past fifty years furnish a complete record of the development of American railroads and faithful chronicles of the kindred financial interests. It contains features of special value to investors and others desirous of being readily acquainted with values and transactions connected with the development and working of our railroad systems, and much of interest to the general reader. Among its contents are concisely arranged Bond and Share Lists, in tables (describing in detail railroad properties, giving the length of Main Road and Branches, Gauge of Track, Number of Locomotives and Cars, Traffic, Capital Stock, Bonded Debt, Earnings, Dividends, etc., of the different American Railroads), condensed summaries of Railroad Reports, Weekly, Monthly and Yearly Earnings, Dividend Statements, Market Reports of New York, Boston, Philadelphia, Baltimore and London; a Weekly Boston Letter, a Department on Railroad and Banking Law, Lists of United States and Canadian Counterfeits, Construction, Organization, Manufacturing and Personal Notes, Sketches, Editorial and Miscellaneous Articles, etc.

The AMERICAN RAILROAD JOURNAL is taken by leading railroad men, investors and banking houses in this country and Europe, where it has long been a recognized authority in its special field, being recommended as such by *Chambers' Encyclopædia* and other standard foreign and domestic publications. We give below a few extracts from opinions of the press:

From HERAPATH'S RAILWAY JOURNAL, London.

The *American Railroad Journal*, one of the most honest and outspoken of American papers.

From THE JOURNAL OF COMMERCE, New York.

The *American Railroad Journal*, a most valuable weekly newspaper, is now half a century old.

From THE CINCINNATI PRICE CURRENT.

The *American Railroad Journal's* list of patrons is composed largely of the oldest and heaviest financial houses in the United States, Great Britain and the Continent, and of railway companies, manufacturing establishments, and banking and commercial houses in this country.

From THE NORWICH (Conn.) DAILY BULLETIN.

The *American Railroad Journal*, founded in 1831, is the oldest railroad paper in the world. The carefully prepared list of bonds and stocks, their description and value, which has always been given more freely by this journal than any other, is one of its more noteworthy valuable features.

From THE PITTSBURG (Pa.) CHRONICLE.

The *American Railroad Journal* is authority on railroad news.

From THE WASHINGTON (D. C.) LAW REPORTER.

The *American Railroad Journal* is a most valuable publication, and to all persons interested in American railroads, bonds, shares, including mileage, rolling stock, debts, income, dividends, etc., etc., it is almost invaluable.

TERMS OF SUBSCRIPTION FIVE DOLLARS PER ANNUM.
